In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

HIGHCLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising this plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely [illegible] others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

24 TONS TO ACRE

American Institute Speaks of Sugar Beet Industry

Considerable mention has been made of the proposed sugar beet plant, about to be established in Peterborough, and the following recent despatch from Kaukauna, Wis., may be of interest to Times' readers.

Kaukauna, Wis., March 19— The most successful "round-up" farmers' institute in the history of the state, in session here, and will close shortly. Farmers for many miles around are in attendance and manifest the greatest interest in the addresses, each one being followed by questions and discussions.

One of the interesting features of the session was a paper and discussion on "Sugar Beet Growing." G. T. Fink, of Appleton, last year raised sixty tons of beets on two and one-half acres, making a record for quantity; he sold his crop for $270. The discussion of the paper emphasized that the sugar beet grower enjoyed a great advantage in knowing when he planted his seed just what he would get a ton for his crop, and that the tillage necessary to succeed with the crop put the soil in excellent condition. It also was shown that the beet is very exhaustive to fertility and that a thorough system of rotation must be followed or the soil will deteriorate rapidly.

DOCKING HORSES TAILS

Municipalities May Pass By-law Forbidding It

The docking of horses' tails is a silly fad, according to Dr. Routledge, member of the Legislature for Middlesex, and will be given up when women say they will not drive behind a docked horse. Of the cruelty of the operation he spoke eloquently to the Agricultural Committee of of the House. "Why, you might as well cover me with molasses and tie me to a tree in fly-time," he said. Dr. Routledge had two bills before the committee by which he sought to accomplish his aim, one giving municipalities power to pass by-laws prohibiting docking, and the other forbidding the granting of any prize or award at an agricultural fair to any horse which had been docked.

This discussion evoked a good deal of difference of opinion, and was practically a repetition to that which took place in the House the other day. On the one side it was argued that the practice is cruel and useless, and on the other that it is not hurtful if properly done, and is called for by a large trade. The Minister of Agriculture opposed both Bills.

The committee passed the bill to permit municipalities to prohibit docking, by a vote of 13 to 7, and threw out the other one.

POPULAR MINING COMPANY

Smuggler Gold Mining Company Has Promising Future Capital $1,000,000

One of America's most progressive corporations is that known as The Smuggler Gold Mining Company, which has been organized under the laws of the State of Maine, with a capital of $1,000,000. The property consists of five full mining claims, 600x1500 feet each, or about 100 acres in all, containing large fissure veins of gold-bearing ore, and is located in the Sumpter Mining district, East Oregon.

Large bodies of rich gold ore have been uncovered and the best modern machinery has been placed on the property. There is an abundance of timber and water on the property, and electric roads and many other facilities that will go to make the Company a success, have been built.

It is estimated that the placer ground in the vicinity of this property has yielded about $2,000,000 in gold, and there is every likelihood of the Smuggler mines being even more productive. The mines are situated in one of the most successful mining districts in the country, and surrounded, as they are, with every advantage of nature, the directors are confident of a prosperous future.

THROW OUT UNION LABEL

Rochester, N.Y., March 21—The use of the union label has been discontinued by more than thirty of the large wholesale clothing manufacturing firms of this city. The manufacturers say that they are disgusted at the attitude of the unions and refuse to be dictated to any longer. They claim that their customers demand goods without the label on them.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,800 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.
1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 185 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold,

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SOAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY,

Consumption is Not Hereditary

'tis Not Handed Down From Generation to Generation but is Simply "Caught" by the Germs Getting Into Your Lungs—Cured by Catarrhozone

Consumption was formerly believed by some to be due to poverty of the blood. By others it was supposed to be hereditary. Both these beliefs are incorrect.

If the disease passes through several members of the same family it is because the germs get into the clothes, bedding, furniture and carpets that are in general use.

These germs find their way into the air, are inhaled, lodge themselves securely in the throat and lungs were they rapidly increase, and soon claim another victim.

The only remedy that has cured a genuine case of Consumption is Catarrhozone. Its germ killing vapor is inhaled into every air cell and air passage of the head, throat and lungs, and creates a healthy condition of these organs in which disease germs cannot live.

It is impossible for consumption to make headway is the soothing antiseptic vapor of Catarrhozone is inhaled a few times daily into the lungs. The cause of the disease (germ life) is at once removed, the inflamed mucous surfaces are healed, and a lasting cure effected.

Catarrhozone is breathed right into the lungs. By its soothing influence the soreness caused by coughing is removed. The cough becomes less severe and soon ceases all together. Catarrhozone aids expectoration, quiets the nerves, and lends to the patient a large measure of comfort.

Consumptives are strongly urged to use Catarrhozone as immediate relief always follows. It is a direct method of treatment, and is endorsed by the highest medical authorities everywhere. The balsamic vapor reaches the lungs and respiratory tracts in a speedy manner that no medicine taken into the stomach can do.

Catarrhozone is just as good as a change of climate, equally pleasant and cheaper. It can be used at home at any hour of the day or night and never causes inconvenience or bother.

The complete Catarrhozone outfit contains two months treatment and costs only $1.00. It is a perfect boon to consumptives and their surrounding friends. You cannot afford to miss the benefit of Catarrhozone and should order it today. Sold by all druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A.

Indian Relics Found

The Historical Society was recently presented with a number of relics found in Otonabee. Among them were two arrow heads of flint and two stone axes, knives and a stone gauge. The axes are of stone, four inches in length.

Our Boundaries Extending

Another piece of the Township of Smith is to be taken in to the corporation. This area extends from Smith street to the Communication road and Dickson street, containing about 20 houses and adding about 100 to the population of Peterborough. The necessary steps are being taken by the Council to effect the union.

Laid at Rest

The funeral of the late Edward Brown took place yesterday afternoon from his late residence, Stewart street, and was largely attended. Service was held in St. John's church, and was conducted by the Rev. J. C. Davidson. The funeral was under Masonic auspices. The pall bearers were Rt. Wor. Bro. H. Rush, V. Wor. Bro. H. C. Winch, Wor. Bros. W. F Johnston and J. Crane, and Bros. Alex Elliott and T. E. Beddy.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 2/3 of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE,
Principal

Important Notice!

Mr. W. P. Douglas, Peterborough, and Mr. Jno. Halyburton, St. Catharines, are still going on with the meeting all this week (excepting Saturday), God willing, in the Gospel Hall, corner George and Brock streets, at 7.45 p.m. Come yourself and bring a friend. All are welcome. Christ died for the ungodly.—Rom. 5, 6. God that justifieth the ungodly.—Rom. 6 5.

Moving Pictures

The London, Eng., Bioscope Company, and Howard Clifton, musical expert and ventriloquist of the world, will give two entertainments at the Opera House on Friday night, and Saturday afternoon at 2.30, on March 25 and 26, under the auspices of the Fire Department. 7,000 feet of films—late subjects, Japanese destroyers' attack upon the Russian fleet, Uncle Tom's Cabin, great Chicago Theatre fire, and 50 other new subjects. Tickets, 25c Saturday matinee, 10 and 20 cents. To be had of the members of Fire Co. td

An Enjoyable Evening at St. Paul's

A most enjoyable evening was spent in the school-room of St. Paul's church last night, it being a union gathering of the different young people's organizations in connection with the congregation, the Ladies' Aid Society acting as hostesses. The Young Men's Guild, the Christian Endeavor Society, the Choir and the senior Mission Band were all represented. Mr. John Crane acted as chairman, and the following took part in the programme; Misses H. Davies, L. Moore, M. Meldrum, and Messrs. G. Scott, C. N. Brown, J. Dawson, Dr. Torrance. Refreshments were served, and a hearty vote of thanks to the Ladies' Aid for their kind entertainment was passed.

A Good Suggestion

It has been suggested to The Times that it would be a graceful act to tender a complimentary band concert to Mr. Miller, father of Mr. Finch Miller, as a recognition of his long services in connection with the Peterborough bands in the past. Mr. Miller, who is now well on to a centarian, we are sure would appreciate such an act. For over 25 years he was an active member of the regimental band, and even yet, it is said, can handle an instrument with the best of them. The Times would, therefore, suggest to Mr. Gliddon and the members of the 57th Band the pleasure that it is in their power to afford, not only to Mr. Miller and his many personal friends, but to the general public.

More Dwellings Needed

The scarcity of houses for the past year or so in the town has assumed serious dimensions, and the outlook for the coming spring is not encouraging. A hundred new houses would scarcely meet the town's present requirements. A number of families have had to be satisfied with getting a room or two with another family, or living in flats in the business parts of the town. In consequence of the prevailing famine the town's progress is much handicapped and there is no legitimate reason why men of means should not relax their hold on their bank accounts and invest in building tenement houses, which cannot fail to be a paying venture, even with the high rate of taxation levied by the town. Rents are correspondingly high, and there is a clear margin of six or seven per cent. for the men who will take hold and try to help the town in its present dilemma.

THE NAVY LEAGUE

Editor Times, Peterborough;—

Dear Sir,—In connection with proposed legislation during the present session of the Parliament of Canada, your consideration of the following is invited;—

The commercial needs of Canada demand a vigorous maritime policy, including the encouragement of shipbuilding. Such policy can and should go hand in hand with measures of National Defence.

Separate Colonial Navies, i.e., under independent commands for fighting purposes, would be a source of weakness, rather than of strength.

But centralization of command for fighting purposes does not involve centralization of administration for the purposes of maintenance.

Each part of the Empire may, therefore, by prearrangement with the other parts, maintain such forces, whether of men or material, as will be susceptible of forming one complete weapon in the hands of the fighting admiral commanding a unified British Navy.

Your attention is again called to proposals for the establishment of a Canadian Naval Militia and the hire of cruisers from the Admiralty for training purposes, advanced by this Branch of the Navy League in 1898 for securing these ends.

Proposals which have been advanced for the joint maintenance of a Royal Navy Reserve are objectionable as sure to lead to friction. Each part of the Empire should control the maintenance of its own forces.

In adopting a vigorous maritime policy, and encouraging the shipbuilding industry, the Canadian Government will secure the installation of plants capable of effecting repairs to damaged warships. Vessels may be built to suit the requirements of Canadian trade of a class convertible into fleet auxiliaries. At the present time we are only dealing with one half (the inland half) of the question of transportation. Why should Canada not build her own ships, employ her own men and keep her own money in circulation amongst Canadians?

On behalf of the executive committee,

Yours very truly,

H J. WICKHAM,
Hon. Sec.

WILL MEET TO-MORROW

Commissioners on the Trent Waterway to Meet Here.

Tomorrow at 1.30 o'clock the Transportation Commission appointed by the Dominion Government will meet in the Town Council Chamber, to take evidence in regard to the waterway. Representatives from towns along the line of the waterway will be in attendance, and evidence will be presented to the commission which should show conclusively that the Trent Waterway will be to the material advantage of Canada.

Local manufacturers and public bodies will be represented in full force, and will have evidence supporting their claims.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—The creek will soon be on the rampage.

—Water street canal is now at its flood.

—The water in the river is rapidly rising.

—Two drunks at the police court were discharged yesterday.

—A good boy wanted at the Times bindery to learn bookbinding.

—The country roads are said to be almost impassible in many places.

—The Grand Trunk pay car passed through Peterborough on Friday last.

—A large force of men have for a couple of weeks been working on the new piers at the locks below the cemetery.

—Bobcaygeon has got a bank—a branch of the Bank of British North America having been established there.

—A good, steady man, to solicit orders for the Daily and Weekly Times, wanted at once. Apply at the Times Bookstore.

—A meeting of the Royal Templars of Temperance was held last night, when the proposed liquor bill, to be introduced by Hon. G. W. Ross, was up for discussion.

—During the next two or three weeks, the house to house visitation in connection with the new Y.W.C.A. building will be undertaken by the ladies of the Y.W.C.A. Board.

—A party of strangers drove over to view the lift lock yesterday, and were unfortunate enough to upset when going down the hill. No damage was done.

—The work of repairing the damage caused by the fire at the Cereal Works is progressing steadily. The new roof will soon be completed.

—On Friday evening of this week the Charlotte street Young Men's Guild will entertain the male members of the congregation of the church. Mr. J. Fife will give an address.

—In Lindsay the Council will only grand billiard licenses when the tables are run in connection with the hotels; in other towns the opposite rule is enforced. In Whitby two licenses have just been issued on condition that the tables are removed from hotel premises and conducted under the eye of the Chief Constable.

—The Bancroft Times says that deer are being slaughtered almost every day within a few miles of that village by a few lazy settlers who have done no work all winter and take this method of replenishing their larders. "Mounted on a pair of snowshoes these human wolves pursue the helpless creatures, which have no chance of escaping owing to the great depth of snow, and the killing is done as often with club as with a gun."......What is the matter with Game Warden Smith, of Belleville? Evidently he would discover things if he took a trip north.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Frank W. Burke, Toronto, was in town yesterday.

—Mrs. J. R. Stratton is spending a few days in Brampton.

—Mr. D. W. Anderson, of Hastings, formerly of Peterborough, was in town yesterday on a business trip.

—Mr. and Mrs. Duncan Fife, Hastings, were the guests of Mr. Fife's brother, Mr. Jas. A. Fife, of Collegiate Institute staff.

—Mr. Wm. Greer, of Brandon, Man., an old Peterborough boy, is in town buying a couple of carloads of horses for the North-West.

—We regret to learn that Mrs. Jas. Madill, of Toronto, mother of Mr. Wm. Madill, town, is seriously ill, and her recovery is doubtful.

—Mr. Gilmour, of Trenton, President of the Trent Water Conservation Association is in town in connection with the visit of the Transportation Commission.

BAY OF QUINTE CONFERENCE

Meeting of the Programme Committee Held Yesterday

The Programme committee in connection with the coming Methodist Church Conference, to be held here next June, met in the George street church yesterday afternoon. Arrangements were made for the programme during the session of conference, and the speakers at the different public services were chosen, and other matters of importance discussed. Those composing the committee are Rev. T. J. Edmison, of Brighton, President of the Conference; Rev. Dr. Balfour, of Selby, Secretary of the Conference; the local ministers, Rev. Messrs. J. P. Wilson, W. J. Jolliffe and J. G. Lewis, and the following laymen;—Messrs. D. W. Dumble, Dr. Morrison, M. W. Matchett, J. Jeffries, T. W. Robinson and R. J. Kidd.

ALUMINI ASSOCIATION

Met at Residence of Dr. Carmichael on Monday Night

A meeting of the Alumni Association of the Nicholls Hospital was held at the residence of Dr. Carmichael on Monday evening, March 21st.

In response to a request from the Alumni Association of the Toronto General Hospital, it was decided to hold a meeting of all the graduate nurses in Peterborough to discuss the organization of an Ontario Nurses' Association, said meeting to be held in the Y.W.C.A. parlors, Wednesday, March 23rd, at 2.30 p.m. Other questions relating to nursing interests were also discussed, among them the need for Peterborough to secure the services of at least one nurse of the Victorian Order, and it was decided that as an organization our Alumni would do all it could to popularize this idea in the city until it is taken up by the proper authorities.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

CLEANING

House is one of the duties that a weak woman looks forward to with dread. As a rule, she knows that she must pay for the over-strain with days or weeks of womanly suffering.

Doctor Pierce's Favorite Prescription makes weak women strong and sick women well.

$500 REWARD FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"I took two bottles of your 'Favorite Prescription' and two of the 'Golden Medical Discovery' and am feeling well," writes Mrs. Dan McKenzie, of Lorway Mines, Cape Breton Co., Nova Scotia. "I had uterine trouble, also pain in the side and headache. After taking your medicine I was cured. You may publish this or use it in any way you think best, as I cannot speak too highly of Dr. Pierce and his medicine."

FREE. Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 21 one-cent stamps for the book in paper covers, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

WILL GIVE "AT HOME."

For the Benefit of the T.A.S. Hockey Club on Easter Monday

Just after the hockey season closed, the Ladies' committee of the T.A.S. expressed their desire to help the club in some way in view of the fact that the season had not been as successful, financially, as was expected, and the proposition took definite form last night, when it was decided to hold an "At Home" under the auspices of the Ladies' Committee in the T.A.S. Hall on Easter Monday, the proceeds to be devoted to the T.A.S. Hockey Club.

The ladies will doubtless make a great success of the function. The object is a very worthy one, and no doubt the efforts of the ladies will be appreciated by the many supporters of the champions of the Trent Valley League.

The Monarch Consolidated Gold & Copper Mining & Smelting Co
of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 20 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9 000 feet on this vein.

Ore running from $18 to $50 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $38 25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. water power of 800 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Trade with Dominion Would Help New England

SLUMP IS FELT NOW

New York R.R. Man Discusses American Commercial Depression

New York, March 22 — The new president of the New York, New Haven, and Hartford Railway Company, Chas. S. Mellen, is a man of capacity. Therefore, he can give reasons for the policy of retrenchment which his road inaugurated a month or so ago.

RECEIPTS FALL OFF.

"What are the conditions which demand the discharge of so many employes?" he was asked. "Were there too many of them?"

"I am not prepared to say the road has had too many employes for the business it has heretofore had to do. About January 1 a condition confronted me which required immediate action, and that condition was a very serious falling off in the receipts of the company, both from passengers and freight.

"I waited for some time, hoping the falling off would be only temporary, that there would be a recovery after the severe weather had passed, but after waiting about three weeks I found there was no apparent recovery in sight, and was forced to reduce the expenses by the discharge of employes and by holding up work that had been recommended. In such discharges as were made the agreements of the company with its employes were strictly lived up to and every exertion was made to make the burden as light as possible. It was more for this reason than any other that the hours of labor were shortened in the shops rather than a discharge of men made, as would have been necessary otherwise."

"Why should the number and variety of the trains be reduced at this time, when the general business of the country is good?"

"Is the general business of the country good? Such reports as reach me indicate decided stagnation in lines of business, and I find very general complaint of a falling off in the volume as compared with previous years, not only here, but elsewhere.

"It has been my idea in reductions made that the accommodations furnished to the public should be affected last, and it is only the fact that the receipts of the road are still considerably reduced, as compared with last year, that I am compelled to resort to the second step in making reductions, which is the curtailment of the Company's passenger service. No trains have been taken off that could be construed as profitable; none have been taken off that did not after a careful investigation show a positive loss."

"Is there any connection between these alleged necessities from a railroad point of view and the general alleged slump in business throughout New England from a commercial point of view?

"There is every connection. The slump in business is not only alleged, but it is a fact. Without it there would have been no necessity for the reductions. They have necessarily followed the slump."

"Would the general railroad situation be improved, as it is declared the general business situation would be improved throughout New England, if the commercial relations with the Dominion of Canada were more intimate?"

"Undoubtedly, reciprocal trade relations with Canada would increase the business of the New England States, and whatever increases the business of those States would improve the general business situation."

"Are railroad conditions in New England demanding a new adjustment of the relation of the employer and employe? I refer to through runs by train crews."

"The business conditions in New England, as elsewhere, are always demanding readjustment of relations between employer and employe.

"I do not find conditions here substantially different from elsewhere. I have no prejudice whatever against organized labor, and have found such leaders and committees of the same as I have come in contact with, as a rule, reasonable, fair, partisan, of course, but in the end willing to do what is right, always striving for a little more, but generally yielding when convinced.

"With regard to through runs by train crews, I only know through the newspapers there has been any trouble in this respect. Many of our employes prefer the runs, as giving them more money, others prefer shorter runs and to be at home more. I believe it should be the policy of the company, so far as it can, to arrange its business so its employes may be home nights especially, but it is not always practicable."

"Must steam give way to electricity as a motive power, and the steam engine or locomotive be consigned to the scrap heap?"

"I believe we are rapidly approaching the time when this will be done. I think we are making very rapid strides in that direction at the present time. The great obstacles today to the substitution of electricity for steam as a motive power upon railroads are the character of the construction of the roads themselves, the frequency of the crossings, and the danger attending the conducting of the power by the third rail.

"These will be greatly overcome, and in the near future; and looking ahead a very few years on such portions of the systems as have eliminated these dangerous crossings, as, for instance, our line between New York and New Haven, I confidently expect to see the steam locomotive become in the nature of a curiosity."

Latest Portrait of W. W. Rockhill, President Roosevelt's Chief Adviser on the Situation in the Far East

JAPAN IMITATES BRITISH NATION

Accepts England as a Model in All Things

HER FITNESS FOR THE SEA

Ambition of Japan is to Become a First-class Sea Power

London, March 24—The fitness of the Japanese naval officers to conduct war at sea was made apparent, even to Russian minds, at the very start of the war. That such fitness is never an accident, and that it can be acquired only by the hardest study and the most strenuous efforts is self-evident. Just how carefully the Japanese naval officers are trained is, however, little appreciated. An address on the subject by a Japanese naval lieutenant, K. Sato, delivered in England and reproduced in condensed form in a recent number of Engineering is illuminating.

Japanese youths are admitted to the naval colleges between the ages of 16 and 20. Last year 1,996 applied for admission, of whom 1,400 passed the physical examination. Of these but 400 passed in the educational tests, while only 180 were selected for admission. Three years of hard study at this college are required, the reward being promotion to the rank of midshipman. Then comes rigorous training in all branches of duty at sea, and this training does not cease when the midshipman become sub-lieutenants or even lieutenants. Yearly essays are required of the young officers, and not as a formality, but as a test of real progress. Later on comes study at the higher naval college for lieutenants, commanders and captains of special ability.

It is especially interesting to note how important a place the study of English holds in the cirricula. The applicant for admission to the lower college may offer French, German or Russian as an optional subject, but he is required to pass an examination in English grammar and in translation from English to Japanese, and from Japanese into English. In his first year of work he gives seven hours a week to English, and in the two succeeding years six hours a week. This is due of course, first of all, to the fact that England, the "mistress of the seas," has been Japan's model from the beginning, and, secondly, to the alliance between the two powers. The intimate relations of Japan with the United States gives added reason for the emphasis of the English language.

Commander Sato felt confident that in "one or two small particulars," his country had gone England "one better" in the matter of naval training, and Admiral Ingles, who heard the address, was inclined to give his assent, for he said that "the Japanese nation, so far as he knew, was unique; they combined every qualification of the East with every qualification of the West."

The "imitation" hypothesis concerning the Japanese must be exceptionally husky if it can survive a knowledge of such facts as these.

ISSUES IRISH LAND STOCK

London, March 24—The Government today announced the issue of $25,000,000 in 2 3-4 per cent. stock and under the Irish land act of 1903. The issue price is 88. The list will close on or before March 25.

Our Boundaries Extending

Another piece of the Township of Smith is to be taken in to the corporation. The area extends from Smith street to the Communication road and Dickson street, containing about 20 houses and adding about 100 to the population of Peterborough. The necessary steps are being taken by the Council to effect the union.

ADVERTISE IN THE TIMES.

OLD FEUDS ARE NOW FORGOTTEN

The Anglo-French Aggreement Pleasant to Both Nations

AUGURS WELL FOR PEACE

Britain and France Will Settle Many Disputes Outside of Their Own Country

London, March 24—Paris, they say, is delighted at the prospect of an Anglo-French agreement amicably settling international differences in Egypt, Newfoundland, Morocco, Siam and West Africa. A well-informed Paris correspondent declares that it is already reflected in the balance sheets of leading establishments in the Rue De La Paix and the grand boulevards.

The Balfour ministry suffered a heavy electoral reverse in the farming community of East Dorset. Since the beginning of the year there have been ten elections and instead of six tories and four liberals there are now eight liberals and two tories.

Liberals Gaining Everywhere.

Everywhere the Liberals have secured largely increased polls. Indeed, taking the thirty contested elections since 1902, the ministerial vote has decreased 12 per cent. and the opposition vote has increased 45 per cent. The ministerial majority of 152 in the house of commons has now been reduced to 106, falling on fiscal questions to fifty, or even thirty-five.

"No black bread in England, no yellow labor in South Africa" is the radical war cry, and so clearly is it sweeping the country that the ministers themselves admit that a general election at the present moment would mean a tory route. Better, urge some tories, to have the dissolution at once and let the liberals come into power, only to get entangled with the house of lords over the education problem and with the nationalists over home rule, these together producing a deadlock from which a whole-hearted acceptance of Chamberlainism would be a welcome relief.

But the ministry, with a working majority of forty, is not eager to abandon the sweets of office. An early dissolution is not probable, unless Mr. Chamberlain, returning home invigorated next month should decide otherwise. He is still the real master in the ministry.

Woman's Week in Parliament.

This has been the womens' week in parliament. By a majority of 144 the house of commons accepted the principle of an extension of the franchise to women, most of the Liberals and a large majority of the unionists supporting the principle.

No one takes the vote seriously, for no one anticipates that a non-party bill of this character would get beyond the principle stage in the present congested state of parliamentary business, when only urgent government measures have the smallest chance.

POPE'S CRITICISM ALARMS

Caustic Comment Stirs Grave Anxiety in Paris

Paris, March 24—The pope's caustic criticism of French policy, in the course of his address to the cardinals yesterday, is receiving serious attention in the highest quarters here. It has been regarded as sufficiently important to call for an official report which is now in the hands of the authorities. It was at first thought that the unofficial reports of the pope's utterances might be overstated, but the official version fully bears out the gravity of his remarks.

They related chiefly to past and prospective laws for the suppression of teaching by the religious orders. The pope characterised some of the steps as contrary to liberty and civilization and he also criticised the arraignment of three French cardinals before the council of state for writing letters to President Loubet against the proposed extension of the law.

BOOMS CANADA STOCK

Minister Says Breeding Will Become Chief Farm Business

INDIA AT TURNING POINT

Missionary Says Natives Will Rise Against England if Japanese Win

City of Mexico, March 22—S. F. McKinnon and Commodore A. A. Allan, of Toronto, Canada, stockholders and directors in the Mexican Gulf Commercial Company, have just completed an inspection of the Dos Rios plantation, the property of the company, on the Isthmus of Tehauntepace. Mrs McKinnon accompanied her husband. The plantation comprises 20,000 acres and the Canadians visited every portion of the immense tract, travelling on horseback and by river canoes. Only about 5,000 acres of the plantation are now under cultivation, but land is being cleared each year. Several thousand rubber trees are on the property, but the principal product is coffee. Concerning the production, Mr. McKinnon said; "The coffee yield of the Dos Rios plantation last year was over 20,000 bags, and this year it will be much greater. Up to the present time we have been able to treat the coffee of other plantations at the Dos Rios plant, but this year we will be able to handle only our own crop because of its magnitude. The coffee is prepared for roasting on the plantation, and is then shipped to the company's plant in Kansas City, where it is prepared for the market."

The Mexican Gulf Commerical Company is one of the most important agricultural concerns operating on the Isthmus of Tehuantepec. It maintains stores at the isthmian towns of Dos Rios and Las Flores, and everything needed in that region is carried in stock. The sales at Dos Rios last year amounted to $12,000 and at Las Flores $6,000. The establishment at Dos Rios includes a drug store. Commodore Allan is now his way home via New Orleans, Atlanta and New York. Mr. and Mrs. McKinnon have gone to California, where they will remain several weeks before returning to Toronto. Before their departure from this city. Mr. and Mrs. McKinnon were received by President Diaz.

A MONTREAL COMPANY

James C. Tory, general manager of the Western Foreign Department of the Sun Life Insurance Company of Montreal, Canada, and L. L. Lewis, inspector of agencies, are here in connection with the entrance of the Montreal Company into the Mexican field. Mr. Tory and Mr. Lewis are arranging for a local board of reference, to be composed of representative business men of this capital, which will advise upon the payment of death claims in Mexico and the investment of money in this country.

BUYING MEXICAN BONDS.

The Confederation Life Association of Toronto, Canada, has purchased Mexican gold bonds to the value of $100,000. The purchase is in addition to the recent investment of $50,000 in Mexican silver bonds. The action of the Toronto Association is looked upon here as evidence of Canadian confidence in Mexico and Mexican finances.

RECIPROCITY WITH MEXICO

Judge W. W. Spinks, of Okanagan, British Columbia, for many years prominent in judicial and business affairs of Canada, and Mrs Spinks, arrived in this city after visiting Jamaica, Cuba, and the cities of New Orleans and San Antonio. From here they proceeded to California, where some time will be spent before returning to their home. Judge Spinks is greatly interested in the project for reciprocity between Canada and Mexico, and said, while here: "I am heartily in sympathy with the efforts being made to promote close relations between Canada and Mexico. The interests of the countries are reciprocal. What we most need in Canada outside of our own products we can be supplied with from Mexico, and we have to exchange many products of value to this republic. An international steamship line between the two countries would prove a boon to the people of both. The operation of boats on both oceans would result in big savings in time and money in the transportation of mail, express and freight, and would greatly stimulate trade."

MEXICAN CATTLE FOR CANADA.

Luis Terrazas, jr., son of Gen. Luis Terrazas, the cattle king of Mexico, and now governor of this state, says that heavy shipments of Mexican cattle will be made to Canada during the present year. The experiment of taking Mexican cattle to Canada has met with success and Canadian cattle men have already placed orders for several thousand head of cattle from the Terrazas ranches. The cattle now contracted for will be shipped in May. Gen. Terrazas is one of the heaviest land and cattle owners in the world. A considerable portion of the State of Chihuahua belongs to him, and he numbers his cattle by the hundred thousand.

GERMANY TO INCREASE NAVY

Experiences of Russia in Far East Reason for Action

Berlin, March 24—It is learned from a reliable source that it has been decided to increase the German navy to a considerable extent. The government will introduce a bill in the Reichstag supplementing the navy bill of 1900, which was thought to represent all that was proposed to construct till 1917. So far as has been at present determined, the additions will be made principally with a view to strengthening the home squadron and the First division, which were to consist of thirty-four battleships and twenty-two cruisers.

ADVERTISE IN THE TIMES.

WHATEVER HAPPENS IN MANCHURIA JAPAN WILL KEEP HERMIT KINGDOM

BRITISH MANUFACTURER'S PROGRESS

THE London Daily News says: Some idea of the progress made by British automobilism will be apparent at Cordingley's Ninth International Exhibition, to be held at the Royal Agricultural Hall, London, from March 19th to 26th, under the auspices of the Automobile Club of Great Britain and Ireland. Of the 300 exhibitors who have already taken space, the majority are English and Scotch firms, whose productions will show that we are rapidly making headway in this new industry. Side by side with the British exhibits will be leading types of American and Continental motor-cars, thus giving our manufacturers an opportunity of comparison in points of detail which should be extremely useful. In addition to motor-vehicles, there will be a display of war balloons actually used at Ladysmith, airships, &c., organized by the Aero Club, thus adding a very popular feature to a display that promises to be greater than any previous Exhibition of the kind in this country.

SHANGHAI ADVANCES A BLOOD CURDLING THEORY

Japanese Have Succeeded in Blocking the Entrance to Port Arthur

London, March 23.—A despatch to the Daily Telegraph from Shanghai says that private telegrams received by Chinese officials at Shanghai continue to assert that the Russians have virtually evacuated Port Arthur, after thoroughly surrounding it and Dalny with land and sea mines and kerosining the stores and coal ready for igniting. Only a sufficient garrison is left to carry out these designs.

A despatch to the Times from Tokio says it is rumored that the Japanese have succeeded in blocking the entrance to Port Arthur..

THE SCOTCH CURLERS

Rev. John Kerr's Book will Soon Be Out

The Times has received some of the advance sheets of the book prepared by Rev. Dr. Kerr, M.A.; F.R.S.E.; F.S.A., Scot, Minister of Dirlitan and captain of the Scottish Curling team that visited Canada last season, by special courtesy of the author. In forwarding the proofs, he writes;

There has been delay in issuing the volume, which I regret, but when I explain that I was laid aside with ill health about a month and had to do much of the work in bed, I am sure curlers on the other side will excuse such delay. I may further add by way of explanation that the pressure of material sent me was far beyond what I expected, and the volume has thereby grown to about double the size I expected. Even taking such explanation into account, it is not surely unsatisfactory that a volume of 800 pages with about 500 illustrations should be ready at the interval of only a twelve-month after our team's return home.. I hope you will quote what I say regarding the contents. Apart from any consideration for my own personal labor, the volume has cost something like $5,000 to begin with, and only by a large sale will this outlay me met. The volume is called "Curling in Canada and the United States."

The book will be illustrated with 500 engravings, almost the first being a Peterborough rink, composed of Messrs. W. G. Ferguson, Dickson Davidson, Frank Matthews and John Cameron.

A Coming Treat

The people of Peterborough will have the opportunity on April 14th, of hearing once again Miss Muriel Foster, whose singing, together with her charming presence, created such enthusiasm when she first appeared in Canada as one of Madame Albani's supporting artistes. Muriel Foster's opportunity was made for her at the Birmingham Festival, conducted by Hans Richter. Through a sudden indisposition on the part of Madame Brema, Miss Foster took her place at short notice; and upon the conclusion of the Festival, which is the greatest of all given in England, she found herself made famous by all critics. In the two great works of Elgar, namely, "The Dream of Gerontius" and "The Apostles," both of which were brought out at Birmingham, Miss Foster further enhanced her reputation as the finest exponent of contralto roles in Great Britain.

Of her singing in 1902, when she shared honors with Albani, the Montreal Gazette says;—

"Miss Muriel Foster was the contralto of the evening and entirely won the hearts of the house. Her voice is a most exceptional one, rich and deep, pure and flexible. Her presence is admirable, and her dramatic power, as all the passions seems to vibrate at her will, of a very high order. Her's is a voice for the note of triumph or the defiance of the enemy, and as it rang round the hall it stirred the blood of all who heard it."

Whiskey Galore

At a session of the County Police Court in Havelock on Tuesday, before Judge Edminson, several witnesses were heard on the charge against Jas. Maloney, of selling liquor without a license. None of the witnesses called could anything, and the case was adjourned to Peterborough, until Monday next. While the trial was going on a constable searched Maloney's premises at Cordova and found five or six cases of whiskey and much other liquid refreshments, together with many empty cases. There were also invoices showing that purchases amounting to over $100 a month had been made with a firm in Toronto.

THE LATE MRS. M'COLL

Death of an Old and Esteemed Resident of Smith

On Tuesday evening one of the oldest residents of Smith Township passed away, in the person of Letitia Gardner, relict of the late Robert H. McCall. The deceased lady was born in Ireland and came to Canada when but two years of age. She married in 1840 and her husband predeceased her by eighteen years. She is survived by seven children five sons, Robert, of Chicago; Charles, of Vancouver, B.C., Isaiah, of Prince Albert, N.W.T.; William Edward, of Peterborough; and George W., of Odessa, and two daughters, Mrs. Robert Edmison, of Smith, and Mrs. George May, of Vancouver. Two brothers of the deceased are still living, Rev. Dr. Gardner, of Belleville, and Mr. Wm. Gardner, of Michigan.

The funeral will take place from the family residence, Lot 5, Chemong Road, this afternoon at 2.30 o'clock, and proceed to Little Lake cemetery.

THINGS BECOMING MIXED

The Friendship of Britain and France and its Consequences

St. Petersburg, March 24—Russian newspapers and public men are putting the best possible face on the growing evidences of Anglo-French amity. Nevertheless the matter is deeply disturbing far-sighted Russian imperialists. They welcome the entente between Paris and London, as far as the present situation in the Far East is concerned. They say that it insures a clear ring in Manchuria and Corea and temporary peace in the Balkans, both of which Russia devoutly desires.

YOUNG GIRL ATTEMPTS SUICIDE

Nora Golden Found Unconscious But is Brought Round

Toronto, March 23—Disappointed in love, pretty little Nora Golden, a maid at 232 Jarvis street, tried to end her life last evening. She retired to her room and one of the girls in the house happening to call at her room some time later, found her lying on the bed to all appearances dead.

Dr. Jenny Gray was hastily summoned, and assisted by some of the members of the household she put forth every effort towards restoring consciousness. Finally the girl was taken to St. Michael's Hospital. She revived and was violently sick, but the physicians are uncertain whether or not her attempt on her life will have any serious effect. The medium used was a mixture of gin and some powerful narcotic.

She is eighteen years of age, and came to this city about three years ago. Her family reside at Mount Forest. For some time she has kept company with a young man, and her attempted suicide is ascribed to a lover's quarrel. She had frequently announced her intention of committing suicide.

WEATHER NOTES

Fair and mild.

Mob of 200 Coreans Go Up Against Japanese

WERE PRO-RUSSIANS.

Japs Forced Them to Disperse--Several Were Killed

London, March 23.—A Seoul despatch to the Daily Telegraph says that a mob of 200 Coreans, probably pro-Russians, rose against the Japanese at Samung. The Japanese dispersed them, killing five, wounding 20 and capturing 30. A Japanese soldier was wounded.

INTENDS TO HOLD COREA.

London, March 23.—The Seoul correspondent of the Times describes the vigorous work that is being done by the Japanese on the railway. The immediate object is to construct a light military railway as far as Ping Yang, which subsequently will be made permanent, and extended to Wiju. Three thousand military engineers are employed in the work. They have abandoned the French plan of terminating the line at Seoul, and will connect it with the Seoul-Fusan line west of Seoul, where the latter joins the Chemulpo line. Nearly a hundred miles of the Fusan line is already finished, and the road should be completed by autumn. The Ping-Yang line should be finished by September. The plans are significant of the strategic value Japan places on the combined projects. She is thereby preparing for the possibility of military reverses in Manchuria. Whatever happens she intends to hold fast to Corea.

Ottawa, March 24.—Should Japan win in her present conflict with Russia, then British India will be face to face with the gravest crisis in its history. This is the opinion of Rev Dr. Wilkie, who is visiting Ottawa, and who for many years has been engaged in missionary work in that country. From the wide knowledge he has of the native sentiment throughout India, Dr. Wilkie believes that if Japan is victorious, India will rise and endeavor to throw off the British yoke.

He says that for years the native priests secretly have been inciting the people to rise. These priests would draw the sword at once were they sure of the people. The Hindu priests want to see British rule overthrown, because they realise that if it continues much longer, there is imminent danger to them of Christianity becoming dominant, and consequently they are daily employing every argument they can invent to excite the population to revolt.

EYE TO FAT OFFICES.

In their latest efforts is found a serious menace to Britain. The priests urge that if the British were driven out all the fat offices would go to the natives, and the cry is going through the land that a mere handful of foreigners should not be allowed to rule 300,000,000 people, who might by themselves be united and powerful.

The conditions in India, today, Dr. Wilkie points out, are not what they were forty years ago. When Britain entered India the country was divided into dozens of petty kingdoms, always at war with each other, but now India is almost united. The cause assigned for the mutiny of 1857 was greased cartridges and mismanagement by the viceroy. These were not the true reasons. Natives had told him time and time again that the people rose because they did not believe that Britain had any God. Dr. Wilkie declares that India is now at a turning point in her history. Just what direction her future will take depends largely on what the British do within the next few years to win the land to Christianity.

HOPE IN RELIGION.

While the country is still steeped in the worst sort of superstition and misery, there are many signs which go to show that the masses of the people are looking for something different. The caste system is likely, in time, to make India Christian. The low caste natives, who are about three-quarters of the whole population, are becoming greatly dissatisfied with their lot, and they never can rise in the social scale. They see other low castes, who adopt Christianity, secure well-paid positions under the British government, and they have begun to think that it is time that the caste system were abolished. There therefore is a strong tendency for the low caste natives to throw themselves into Christianity. They know that under that religion they will get education, which the Brahmins discourage.

According to Dr. Wilkie, this feature is the saving point to Britain, if only the British people awake to the grave danger that confronts them in India and seize the opportunity that now offers.

If you should take a Japanese, shave off his little moustache, let his hair grow, and braid a false queue into it and then dress him in Chinese garments, how many Americans do you suppose could tell him from the original, simon pure John Chinaman? More pertinent to the matter in hand, how many Russians do you suppose could find him out? The experiment has been made, not once or twice, but hundreds and thousands of times, and the result is known to a certainty—the white man can't detect the counterfeit.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotency, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 24 1904

THE JAPANESE SPY SYSTEM

If you should take a Japanese, shave off his little moustache, let his hair grow, and braid a false queue into it and then dress him in Chinese garments, how many Americans do you suppose could tell him from the original, simon pure John Chinaman? More pertinent to the matter in hand, how many Russians do you suppose could find him out? The experiment has been made, not once or twice, but hundreds and thousands of times, and the result is known to a certainty—the white man can't detect the counterfeit.

This is one of the most important facts in the crisis that exists in the Far East. It makes it possible for the Japanese to know all that the Russians are doing in Manchuria — how many troops there are there, what their condition is, how well they are equipped and provisioned, where they are now, and what are their facilities for rapid concentration. Never, probably, says a correspondent, has one country on the verge of war been more thoroughly informed as to the circumstances and purposes of its potential enemy than is Japan with regard to Russia. Her intelligence department is superb and in this case is working under a peculiar advantage due to the similarity between the racial characteristics of her people and the people among whom the Russians are quartered.

The efficacy of this spying system has been proved. When the war between China and Japan, which came on in 1894, was imminent, it was worked successfully against the Chinese themselves, who, of course, are very much more capable than the Russians of detecting a Japanese wolf in Chinese sheep's clothing. At that time there was a Japanese physician practicing his profession in Shanghai who, it has since been discovered, was the head of Japan's secret service in the Flowery Kingdom. To him came daily reports by underground railroad, grapevine telegraph and all sorts of ways that were as dark and tricks that were as vain as those of the heathen Chinee himself. He had under his direction an organization that extended to every source of military and political information. Merchants, professional men, laborers and household servants, and Japs made to look like Chinamen were his agents. That was a good school for Japanese spies. They learned their lesson well and now they are bettering in the instruction. The matter of disguise presents no difficulties. Even the false queue that it requires does not jeopardize its success, for false queues are as common among Chinamen as false hair is among their paleface sisters. If a Chinaman's hair is thinner or shorter than he considers desirable, he supplements it with a switch, which is sometimes made of hair and sometimes of silk. The rest is easy for a Jap. Chinese garments become him as if he were to the manner born. He must speak Chinese, of course, and if he speaks it with an accent, nobody is going to know it but his Chinese neighbor, and they in the present state of their feelings towards the invading Russians, are not going to say anything about it.

So it happens that Japanese eyes see and Japanese ears hear all that Russia conceals from the rest of the world. The Russian viceroy may give newspaper correspondents their walking papers, as he has done before now, but all his repression and his censorship will not keep his every move from being reported in Tokio as promptly as news can travel.

There are men who have recently returned from Japan and whose interests require that they shall be well acquainted with the situation there, who believe that the information which comes to the Mikado's government from its spies amounts in large part for the apparent willingness of Japan to match her strength against an enemy that seems to be her superior. Perhaps, they say, Russia is not so well prepared for war in that quarter as she is supposed to be.

SOCIALISTIC NONSENSE

Speaking of the management of leased franchises, the Toronto World, the organ of state socialism, declares that "there is little incentive to enterprise in the company enjoying the monopoly. It has its franchise for a fixed period, during which it cannot be disturbed, no matter how bad the service may be. Its custom may fall off, but even this check operates only in a limited way." To which the Hamilton Times replies;—"The World talks unmitigated nonsense. If there is no incentive to enterprise, and no means of disturbing a company that gives a bad service, the municipality granting the franchise has been corrupt or neglectful of its duty. The municipality leasing a franchise has full power to secure for its people all the benefits of the best service to be had, to control the leasing company at every point, to stimulate the enterprise—even to make its profits depend upon such enterprise—and to share in the earnings of the lessee. If municipal management, subject to popular vote, is not competent—or too corrupt—to secure such safeguards to the people in leasing a franchise, how is it to be supposed it will be competent and upright throughout the work of operation, which involves endless exercise of trained skill and judgment and daily opportunities for corruption and crookedness? To state the case is to make it ridiculous."

TRENT VALLEY CANAL

MR. R. B. ROGERS WRITES REGARDING THE WATERWAY

In Reply to Some Questions Asked by a Belleville Gentleman—Comparison Between Trent and Erie Canals.

Mr. R. B. Rogers, Superintending Engineer of the Trent Canal, writes as follows to the Belleville Intelligencer, replying to questions asked by a gentleman of that city;—

"A copy of Mr. Flint's letter of enquiry regarding some facts mentioned in my lecture on the Trent waterway has just been sent to me. I shall gladly give the information asked for to the best of my knowledge. The estimated cost of transhipping at Midland is from 1-4 to 1-2 cent per bushel. The depth of water in the waterway when completed will be 8 feet 4 inches. The present barges on the Erie Canal are about one-third the capacity of those intended for use on the Trent. The distance from Georgian Bay to Trenton will be about 200 miles, of which only about one-tenth of the distance will be actual canal. The Erie Canal is about 352 miles long from Buffalo to Albany, about all of which distance is actually canal, and 150 miles of river navigation from Albany to New York. In comparing the length of time required to go from Midland to Montreal, and from Buffalo to New York, many different points have to be taken into consideration —but a single steam barge from Midland to Montreal would take 60 hours, and from Buffalo to New York, the Erie canal, about double this time. Regarding freight rates by rail or by water of course the rate on the Trent canal can only be arrived at by comparison with the rates on other barge canals, for instance on the Erie canal. The distance from Midland to tide water at Montreal is 445 miles. From Buffalo to tide water at New York is 508 miles. Freight is delivered now at Midland from the western ports at 1 cent per bushel, and at Buffalo at from 1.42 to 2 cents per bushel. By the new Erie Canal, Major Symonds, who is perhaps the most expert barge engineer in the United States, calculates that wheat can be taken from Buffalo to New York at 8-10 of one cent per bushel. Now if they can do that on the new Erie we can do it on the Trent canal, being as I have mentioned above, a waterway, not a canal. This 8-10 of a cent added to the 1 cent rate to Midland and 1-2 cent for transhipping charges will make a rate of 2.3 cents from the western ports to Montreal. Rates from western ports to Montreal via Depot Harbour 5 cents, via Midland 5 to 6 cents. Rates from western ports to New York, via Buffalo by water and rail 6 3-4 to 7 cents; by water about 5 1-2 cents.

Regarding the difference in distance from Port Arthur to Liverpool, that via the Trent Canal is 757 miles shorter than via the Erie canal, which on the return trip amounts to 1,514 miles, not 1,425 as mentioned by Mr. Flint. Regarding the purchase of water power, that depends from what point you get your power. There are both private and Government owners of power.

Hoping the above will be satisfactory.

Yours truly,
R. B. ROGERS.
Peterborough, March 18, 1904.

Typhoid Victim Recovered Health

BY REBUILDING HIS WASTED FRAME WITH FERROZONE

If it is Health, Renewed Vigor, Well Balanced Nerves You Want Try the Food Tonic Ferrozone.

No stronger evidence than the case of Jno. M. Ainslee is needed to prove that Ferrozone is unsurpassed as a tonic and rebuilder. Writing from his home in Bartonville, Mr. Ainslee says: "I had typhoid fever two years ago, and for a long time couldn't get strong. I carefully followed my doctor's orders and for months took his medicine regularly but no matter what I did I couldn't get up enough strength to take an active employment again. Like most weak people I was also nervous and finally had to give up the doctor. I read of Ferrozone and decided to try it. I took the first box with fair results. I felt stronger. The second box astonished me and my strength returned very rapidly. I kept on using Ferrozone and my friends then noticed how quickly I was improving. This encouraged me to take more Ferrozone and my strength all returned in two months. When I started Ferrozone I gave up all other medicines and can say that it alone restored me. For weak, nervous people Ferrozone will do more good than anything else."

Ferrozone is both a food and a medicine. It builds up the wasted tissue and strengthens the weakened nerves by giving the system a plentiful supply of pure nourishing blood. It puts new vigor into every organ of the body, dispels nerve sickness and lassitude. The person that uses Ferrozone will have a good appetite, healthy complexion, good digestion and a reserve of strength that protects you against pneumonia and weakening fevers.

Ferrozone is not a nauseous cod liver oil mixture, but a chocolate coated tablet, combining the most strengthening elements in concentrated form. Very easy to take. Its sale has multiplied year by year and no remedy to-day holds a higher place in the esteem of the public. The success of Ferrozone is due to its ability to give strength to the weak, and cure the sick of their troubles. Insist on getting Ferrozone when you ask for it, and refuse to deal with any druggist who tries to induce you to accept some substitute affording him more profit. Price 50 cents per box, or six boxes for $2.50, at all druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

ARE YOU A PRISONER?

THOUSANDS of men are prisoners of disease as securely as though they were confined behind the bars. Many have forged their own chains by the vices of early youth, exposure to contagious disease, or the excesses of manhood. They feel they are not the men they ought to be or used to be. The vim, vigor, and vitality of manhood are lacking. Are you nervous and despondent? tired in the morning? have you to force yourself through the day's work? have you little ambition and energy? are you irritable and excitable? eyes sunken, depressed and haggard looking? memory poor and brain fagged? have you weak back with dreams and losses at night? deposit in urine? weak sexually?—you have

Nervous Debility and Seminal Weakness.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS., Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

MURDERER BLAMES LIQUOR

Clement Goyette Admits Crime and Receives Priest

L'Orignal, March 22.—"Had it not been for liquor I would be a free man now."

This is the plaint of Clement Goyette, the degenerate on trial at the spring assizes of the united counties of Prescott and Russell, for the brutal murder of the Colligans, father and son in Alfred township last January. The non-arrival of an important witness delayed the opening of the trial.

Goyette has undergone a remarkable change of mind since being committed to jail. His first sullen reply was: "I want neither priest nor preaching. I did the devil's work and am ready to go to him now." The fellow now seems to recognize that he is to take his last look from the gallows, and he is resigned to his fate. He has accepted the ministrations of the parish priest, who calls on him daily and prays with him. While the plea of insanity will be entered by the defence, it will hardly save Goyette from the hangman's noose. The experts on mental diseases who have examined him agree that while he is a degenerate, he knows the difference between right and wrong. A weak will and an inordinate fondness for liquor cultivated for years is the combination that is held responsible for his double crime.

While enraged at a supposed insult, Goyette, with a broadaxe, brained his employer, Daniel Colligan, and his fourteen-year-old son Thomas, in Alfred Township a couple of months ago. He then went into the house and attacked Mrs. Colligan with the axe, demanding money. Mrs. Colligan and her daughter Tessie gave the prisoner $25. While Goyette was still swinging the axe over Mrs. Colligan's head neighbors came to the rescue, and Goyette was overpowered and tied with a rope.

THE
Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

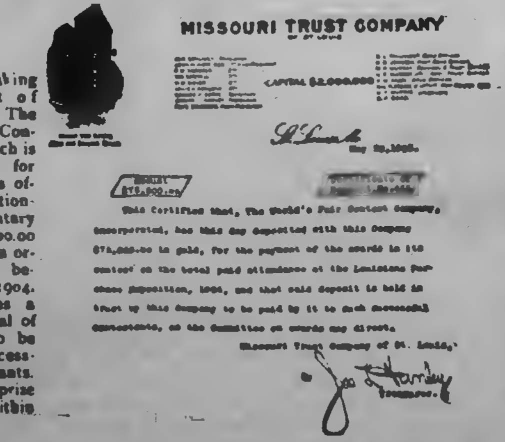
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904. An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1800 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1 00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,500.00
To the sixth nearest correct estimate	1,000 00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500 00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000 00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

CAPITAL $2,000,000

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1 00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW,—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1809 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500 00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

THE FIRST ATTACK

A Canadian Lady saw the First Bombardment of Port Arthur

Sherbrooke claims that probably the first letter to arrive in this country from a resident of Port Arthur during the first days of the war was that received Thursday by Mr. W. C. Webster, of Coaticook, from his daughter, Mrs. Arthur T. Short. The writer, with her husband, went to Port Arthur some years ago.

Her letter is dated Shanghai, February 11, and is in part as follows:

"We arrived here on Saturday at 4 o'clock.

"A week ago Sunday the Japs sent transports to take away the Japanese residents, but we never believed trouble was so near, nor did the Russian officers. On Monday we knew that war was certain and spent the whole day packing our things. Luckily the ship could not go that night. At 11.30 p.m. we heard a lot of cannon firing but supposed it to be the Russians trying their forts. We finished packing about 2 a.m.? and got to bed.

"At ten a.m. Tuesday we all started for the ship (Fu Ping) where we met people, who told us the Japs had really been there the night before.

"It happened this way. The Russian fleet was lying just outside the harbor. Some war vessels came along from the direction of Dalny. They signalled the Russian fleet 'We are from Dalny,' this being done in Russian signals. Naturally the Russians thought they were some of their own ships and when they got near and inside the guard ship, they called out in perfect Russian, 'What is the news of war?' and joked a bit, then the nasty, sneaky little Japs sent the torpedoes going right and left, and then ran away. They badly disabled three of the Russian ships, the Pallada, Retvizan and Czarevitch. The Pallada can be mended, but the other two are too large for the docks. You see it was some time before the Russians began firing. There was not as many Russian officers in the forts as there ought to have been, and the navy officers were nearly all at Mrs. Stark's, at a party, so they had to hurry away rather unceremoniously and get to their ships, and then the Japanese run away.

"We went to our ship, which was expected to sail every moment, but the Russians gave orders that the ship should not sail that morning.

About 11.30 the Japs came back and the fight began fast and furious, shells falling on all sides, so we decided the best place for us was our own houses, as the steamer was crowded and if a shell struck her she would probably sink. We were perfectly calm and collected, but some of the women and children began to cry and got fearfully frightened.

"We got back all right from the ship, but soon a boy rushed in and told us the ship was about to go. We went back and waited all the afternoon. The firing stopped at 12 o'clock. This time the Russians being ready gave the Japs all they wanted. The ship was not allowed to go that night but the captain said to come back in the morning.

"Before returning to the house we took a look around the town. It was a most desolate looking place, hardly anyone stirring, all business places closed, the windows all smashed, cargoes scattered everywhere and smashed where a big shell had burst. In the Clarkson garden opposite the office was a big shell not yet burst.

"We went to the port and a torpedo boat came in with a lot of wounded sailors, a great number on stretchers, some in blankets, and others with their heads all done up. It was an awful sight and I shall not soon forget it.

"That night the street lights were turned off and the order was given for all lights to be turned as low as possible so as not to light the sky, or give a reflection. The next morning the weather was cold. We never had such a day.

"The following day Mr. Adams, a passenger, who was on his way to Manilla, rushed in and said the boat would leave at three o'clock sharp. We barely had time to catch the boat.

"We were just going out of the harbor when bang went three shots into the bow of our boat. The captain stopped immediately. Five Chinese passengers were badly wounded and the ship caught fire a little which was quickly put out.

"You see, the Wenchow, another English boat had tried to go out earlier, and had been stopped, the order being that if a ship goes out or comes in without first obtaining permission, the guard ship fires on her. Clarkson & Company are agents for these ships, and when the permit was given for the Fu Ping to go, Clarkson and Company should have informed the guard ship, which they neglected to do.

"The captain naturally got very angry, not knowing the reason, and started to abuse the Russians. We had to wait for a time till things were fixed up, but finally got away all right.

"We stopped at Wei Hai Wei. The ship was simply besieged with reporters, and the story of some of the passengers and the captain himself told would simply make your hair stand on end. I think each one tried to

DOCKING HORSES TAILS

Municipalities May Pass By-law Forbidding It

The docking of horses' tails is a silly fad, according to Dr. Routledge, member of the Legislature for Middlesex, and will be given up when women say they will not drive behind a docked horse. Of the cruelty of the operation he spoke eloquently to the Agricultural Committee of of the House. "Why, you might as well cover me with molasses and tie me to a tree in fly-time,' he said. Dr. Routledge had two bills before the committee by which he sought to accomplish his aim, one giving municipalities power to pass by-laws prohibiting docking, and the other forbidding the granting of any prize or award at an agricultural fair to any horse which had been docked.

The discussion evoked a good deal of difference of opinion, and was practically a repetition to that which took place in the House the other day. On the one side it was argued that the practice is cruel and useless, and on the other that it is not hurtful if properly done, and is called for by a large trade. The Minister of Agriculture opposed both bills.

The committee passed the bill to permit municipalities to prohibit docking, by a vote of 13 to 7, and threw out the other one.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. P. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 1,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 525 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air pump into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

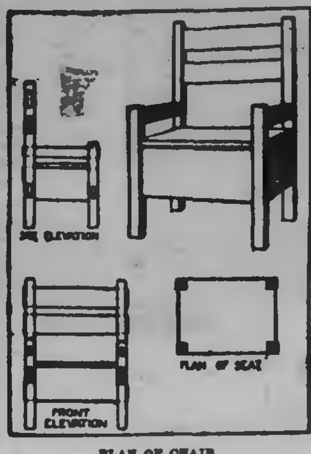
A ROOMY ARMCHAIR.

Plans by Which a Substantial One May Be Made at Home.

A good, roomy armchair is welcome in every home. In making the sketch and measurements of the chair illustrated, which is a very comfortable piece of furniture, great care was taken to allow for a generous seat, with arms broad enough to sit upon. The sides were put together first. The uprights were held in position with dowels and glued in. The lower sidepieces consisted of two boards nailed together, the inside ones being seven-eighths of an inch lower and that much less in depth than the outer ones to allow the boards for the seat to be flushed. These sidepieces were nailed to the legs and put together by placing front and back boards in mortises and gluing them before setting them in place. The back rest was a three inch post sawed in half and mortised, with crosspieces nailed in. The stick to support the back was one inch square. The chair was stained with Flemish finish. The back rest was hinged to the back board, as indicated in the illustration. The back legs were made shorter than the front ones. The cost was $4.75.—Ladies' Home Journal.



PLAN OF CHAIR.

Mozart's Musical Memory.

Mozart had a wonderful memory of musical sounds. When only fourteen years of age he went to Rome to assist in the solemnities of holy week. Immediately after his arrival he went to the Sistine chapel to hear the famous "Miserere" of Allegri. Being aware that it was forbidden to take or give a copy of this renowned piece of music, Mozart placed himself in a corner and gave the strictest attention to the music and on leaving the church noted down the entire piece. A few days afterward he heard it a second time and, following the music with his own copy in his hand, satisfied himself of the fidelity of his memory. The next day he sang the "Miserere" at a concert, accompanying himself on the harpsichord, and the performance produced such a sensation in Rome that Pope Clement XIV. requested that this musical prodigy should be presented to him at once.

Molasses Candy.

It is a mistake to suppose that good candy will hurt children. A distinguished London physician, Dr. Fothergill, says that molasses taffy containing both sugar and grease is an ideal preventive for children of a consumptive tendency.

The following is a good recipe for molasses candy: A quart of molasses, one-half cupful of vinegar, a cupful of sugar, butter the size of an egg and one-half teaspoonful of soda; dissolve the sugar in the vinegar, mix with the molasses and boil, stirring frequently until it hardens when dropped from the spoon into cold water; then stir in the butter and soda, the latter dissolved in hot water; flavor to taste, give one hard final stir and pour into buttered dishes; let cool and pull.—Cooking Club.

Cleanliness.

Cleanliness is in itself one kind of loveliness. You often see a girl whose features are not any too fine, but you remember her as being neatly clad. Her collar is snowy, her cuffs nice and carefully pinned, her frock is well brushed and her shoes shiny. There are many ways of being attractive, and to be trim and neat and "cleany" is one of them. These are the days when the girl with whispy locks hanging about her ears and skirt wandering away from bodice at the waist line is entirely out of the running. The woman who has bona fide brains inside of her head and who does everything well because she wants to will give careful attention to the way she gets into her clothes.

Pretty Lamp Shade.

To the housekeeper a new lamp shade is always welcome. A pretty one is made by covering a wire frame with rose pink silk. A thick quilling of white silk finishes it at the top. The "waist" is gathered in by white ribbon and tied in bows every inch or so. It is finished at the foot by two ruffles of the silk, headed by white quillings. The ruffles are embroidered in white flowers.

The First Corset.

The first corset—not counting ancient modifications of the Grecian zone and girdle—was introduced into France by Catherine de' Medici. It was a strange affair and fashioned after the style of a knight's cuirass. The framework was entirely of iron, and the velvet, which decorated the exterior only, served to hide a frightful and cumbersome article of torture.

Good Scheme.

Hicks—You keep duplicates of all your old love letters? What an idea!

Wicks—Yes; when I have done something particularly foolish I just read over one of these letters. It is quite encouraging to know that I'm not nearly so much of a fool as I used to be.

Our Boundaries Extending

Another piece of the Township of Smith is to be taken in to the corporation. The area extends from Smith street to the Communication road and Dickson street, containing about 20 houses and adding about 100 to the population of Peterborough. The necessary steps are being taken by the Council to effect the union.

RUN BY MOUSE POWER.

A Thrifty Scotchman's Scheme For Operating His Thread Mills.

Thrift is generally acknowledged to be one of the leading characteristics of the native of Fifeshire, and it never was more forcibly exemplified than in the person of David Hutton, a native of Dunfermline, who actually proved that even mice, those acknowledged pests of mankind, could be made not only to earn their own living, but also to yield a respectable income to their owners.

About the year 1820 this gentleman actually erected a small mill at Dunfermline for the manufacture of thread—a mill worked entirely by mice. It was while visiting Perth prison in 1812 that Mr. Hutton first conceived this remarkable idea of utilizing mouse power. In an old pamphlet of the time, "The Curiosity Coffee Room," he gave an account of the way in which the idea dawned on him. "In the summer of the year 1812," he wrote, "I had occasion to be in Perth, and when inspecting the toys and trinkets that were manufactured by the French prisoners in the depot there my attention was involuntarily attracted by a little toy house, with a wheel in the gable of it that was running rapidly round, impelled by the insignificant gravity of a common house mouse. For 1 shilling I purchased house, mouse and wheel. Inclosing it in a handkerchief, on my journey homeward I was compelled to contemplate its favorite amusement. But how to apply half ounce power, which is the weight of a mouse, to a useful purpose was the difficulty. At length the manufacturing of sewing thread seemed the most practicable."

Mr. Hutton had one mouse that ran the amazing distance of eighteen miles a day, but he proved that an ordinary mouse could run ten and a half miles on an average. A halfpenny's worth of oatmeal was sufficient for its support for thirty-five days, during which it ran 736 half miles. He had actually two mice constantly employed in the making of sewing thread for more than a year. The mouse thread mill was so constructed that the common house mouse was enabled to make atonement to society for past offenses by twisting, twining and reeling from 100 to 120 threads a day, Sundays not excepted. To perform this task the little pedestrian had to run ten and a half miles, and this journey it performed with ease every day. A halfpenny's worth of oatmeal served one of these thread mill culprits for the long period of five weeks. In that time it made 3,350 threads of twenty-five inches, and as a penny was paid to women for every hank made in the ordinary way the mouse at that rate earned ninepence every six weeks, just one farthing a day, or 7s. 6d. a year.

Taking sixpence off for board and allowing 1 shilling for machinery, there was a clear yearly profit from each mouse of 6 shillings. Mr. Hutton firmly intended to apply for the loan of the empty cathedral in Dunfermline, which would have held, he calculated, 10,000 mouse mills, sufficient room being left for keepers and some hundreds of spectators. Death, however, overtook the inventor before this marvelous project could be carried out.—Edinburgh Scotsman.

A Surprised Duke.

Just after the late Duke of Richmond and Gordon received the latter half of his title—he was created Duke of Gordon in January, 1876—he was sent to this country as president of the British commission to our centennial exposition. While in this country he heard of a certain picture owned by a country woman in which he thought he might be interested, and so wrote to her, using the official stationery of the commission and signing himself, as a peer does, simply by the names of his title, "Richmond and Gordon."

Much to his surprise and a good deal to his disgust—for he had precise ideas as to his dignity as a duke—the letter which he received in answer to his was addressed, "Messrs. Richmond & Gordon," and began, "Gentlemen!"

Reading In Bed.

Commenting upon the recent discussion of the habit of reading in bed, American Medicine concludes that if the position is literally prone the habit is bad, because in such a position the eyes are fixed upon the book in a straining and harmful way and the book cannot be sufficiently illuminated.

But if one sits propped up by pillows, in much the same position of the head and trunk as when in a chair, there can be no evil consequences, provided a good rich light is rightly placed behind and at one side of the head.

The greatest argument for reading in bed is that the attention is not distracted by the discomfort of the body, the noises and interruptions usual at other times. Let one take an erect position of the body and head, be assured he has a good oculist and that his light is strong, white, steady and properly placed. He may then read with impunity until drowsiness cautions him to stop.

DRESS HINTS.

Whenever it is possible it is a good plan for an elderly woman to wear silk.

Don't have any loose ends or staring pins. Let your clothes be carefully put on. Have an air of good grooming.

Unbleached muslin shrinks much in the washing. Therefore allow an extra inch in each yard when making a garment to allow for this peculiarity.

The auburn haired woman will always look her best in black or brown, and dark green will display the lights of this most lovely shade of hair to advantage.

Tucked chiffon when crumpled and shabby looking may easily be freshened up by passing a hot iron over the wrong side of the material. This makes the tucks have the raised appearance they had when new.

The Literal Truth.

Dunne—What do you mean by sending me word that you were not in?

Debts—I didn't. I sent you word that I was out.

Dunne—Well, and what did you mean by that?

Debts—Exactly what I said. I am out of cash.—Cincinnati Commercial Tribune.

ADVERTISE IN THE TIMES.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

Capitalization 200,000 Shares

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

(Principal Office and Place of Business)
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure the gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 324 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo, bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

For full particulars apply to the Peterborough Brokerage Co., City Agents, Peterborough; W Gallon, Agent, Apsley; Roland Kidd, Toronto; G. Hilliard, Lakefield; D. L. McKINNEY, SECRETARY, SIOUX FALLS, S. D.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,600 feet on this vein.

Ore running from $18 to $80 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $40 25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 80 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

GRAND MILITARY FUNERAL

ACCORDED TO THE LATE DUKE OF CAMBRIDGE

The Duke's Charger with Stirrups Reversed Followed Master's Body

London, March 22.—The Duke of Cambridge was buried today after a funeral such as has been accorded to no English soldier since the death of the Duke of Wellington. King Edward, Queen Alexandra, and nearly all the members of the royal family, representing foreign monarchs, a majority of the nobility, the diplomatic corps, and representative British subjects of all walks in life attended the impressive national service at Westminster Hall.

Thereafter the body of the "Old Duke," as he was affectionately known to the public, was taken to Kensal Green cemetery and buried beside that of his morganatic wife. Thousands of troops marched through and lined the streets, and dense crowds watched the spectacle, which, in military magnificence, rivalled the funeral of Queen Victoria.

GREAT MILITARY FUNERAL.

The King, wearing a field marshal's uniform, and the Queen, in the deepest mourning, drove from Buckingham Palace to the Abbey. The crowds uncovered in silence, and the troops reversed arms on their arrival. The Abbey was packed with diplomatists, Privy Councillors, and army officers, all in gorgeous uniforms. The King walked up the aisle, which was lined by Grenadiers, their busbies bent low over reversed arms, and took his place as chief mourner at the head of the coffin. The Prince of Wales, the Duke of Connaught, and the other princes stood behind him. Prince Albrecht of Prussia represented Emperor William.

Among the principal mourners were Admiral and Colonel Fitzgeorge, the late Duke's sons. Beside the coffin stood five field marshals—Wolseley, Haines, Roberts, Harman, and Wood—who with a score of other famous British generals acted as pall-bearers. In a corner of the Abbey stood a number of veterans who had fought with the Duke of Cambridge in the Crimea. Every branch of the army and volunteers were represented.

The Dean of Westminster read the service, and a dirge, which had not been played since the funeral of Queen Mary II. (who died in 1694), echoed through the Abbey.

The Norry King of Arms (William Henry Weldon) hoarsely proclaimed the full titles of the dead man, eight Grenadiers lifted the coffin, and the King walked behind it, followed by a throng of officers in crimson and gold uniforms.

In the bright sunshine the thousands of people outside the Abbey watched the coffin being placed on the gun carriage. The old Duke's charger, with stirrups reversed, followed his master to the grave.

The King, Princes, Ambassadors, and generals entered 21 carriages and started on the long journey to the cemetery. Ahead of the gun carriage was an array of troops seldom seen in the streets of London. Life Guards, Lancers, Grenadiers, Hussars, Dragoons, and Highlanders, with fantry lining the route. Behind their bands, marched through a lane of brilliant color formed by the infantry lining the route. Behind these these the spectators formed a continuous black background.

Cuirasses, plumes, swords, and lances sparkled in the sun that had been seldom seen of late by the inhabitants of the metropolis.

Nearly two and a half hours elapsed before the gun carriage reached the cemetery, from which the public had been excluded.

The King and others stood by the grave-side while a squad of Grenadiers fired three volleys for their old field marshal, and the funeral came to an end.

Throughout the day all the flags were half-masted, and many people were mourning. There were genuine signs of popular sorrow at the death of the old Duke.

ARE DRAWING NEARER

Paris, March 22.—According to the Petit Parisienne's London correspondent, the negotiations between France and Great Britain with regard to the conclusion of a treaty concerning Morocco made a great advance at the end of last week, agreements on important questions having been submitted by both sides. The correspondent adds that it is anticipated an agreement on the essential points will be announced within a few days.

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY
owns extensive gold properties in one of the
RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1.20 a ton. Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3.00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

For prospectus and information address

R. J. KIDD, Local Agent,
Peterborough, Ontario.

ST. LOUIS GOLD MINING CO.,
C. R. Best, Fiscal Agent, Milwaukee, Wis.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,

Powerful Healing Effective Cure

FOR COLDS, COUGHS, CATARRH BRONCHITIS AND ASTHMA

Simply Inhale Catarrhozone; it Cures Because it Goes where the Disease Actually Is.

These diseases cannot be cured by stomach medicines; they must be treated locally. Catarrhozone is inhaled to the very source of the trouble, and gives the diseased membranes local treatment with the strongest, most-healing antiseptics known.

After one trial of Catarrhozone you will wonder how you ever lived without it. Nasty colds in the head it cures in an hour; coughs are stopped in two hours, and catarrh and bronchitis are relieved at once. Nothing could be simpler or more pleasant than to inhale the fragrant vapor of Catarrhozone. Nothing is half so certain to cure your trouble permanently.

Nor is proof of Catarrozone's merit lacking, for it is endorsed more strongly by the medical profession than any other remedy. Its superiority to-day is unquestioned, and its sale by far exceeds that of any other two remedies on the market. Why? Because it does what is claimed for it—cures permanently those who use it for any disease of the breathing organs.

Mr. S. E. MacAuley, the well-known attorney of Portland, endorses Catarrhozone in the following letter. "I am anxious to make known that after three years' suffering from weak throat and catarrh, I have been cured byn Catarrhozone.' I was treated by many doctors of wide reputation. I have used scores of different remedies. I have suffered everything catarrh entails, and I am convinced that no medicine is so sure to cure as Catarrhozone, which did me untold good and completely eradicated this awful disease from my system.'

Complete outfit, guaranteed to cure cents $1, sample size 25c. At al druggists or N. C. Polson & Co., Kingston, Ont., or Hartford, Conn. U.S.A. Beware of substitutes and insist on getting Catarrhozone when you ask for it.

The Late Mrs. Furber

There passed away at the family residence, Dufferin street, early yesterday morning, Elizabeth, beloved wife of Mr. Henry Furber. Deceased, who was 60 years of age, had been ailing for some years, and since January had been confined to her bed. She leaves a husband and several children to mourn her demise. The funeral will take place from the family residence tomorrow afternoon at 2.30 o'clock, and proceed to the Little Lake cemetery for interment.

THURSDAY AND THURSDAY EVENING

We invite you to visit our Millinery Parlors. We will show EXCLUSIVE IDEAS in spring millinery, and our special decorations will please.

CRESSMAN'S.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 85% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE,

[illegible] Principal

Popular and Educational

Will be a trip this summer to the Great World's Fair at St. Louis. No young man or woman or any business man can afford to miss this Fifty Million Dollar Exposition. The Grand Trunk will be the popular route and tickets allow stop-over at certain points in Canada and at Detroit and Chicago. $21.50 round trip from Peterborough, good 15 days, or $34.40 for 30 days. Full information at Grand Trunk City Office.

Grants to Bands

Peterborough, March 24—To the Editor; I see the Salvation Army band is applying to the council for a grant of $100. I presume the band of the T.A.S. will also look for help, and it appears to me that the line should be drawn somewhere. My idea is, that our military band should alone be supported by the corporation. This is an institution we are all justly proud of. As well as being connected with an institution in which all are interested,—it is a band of and for the people without regard to race, color, or religion.

I do not wish, Mr. Editor, to reflect in the slightest on the Salvation Army or the Total Abstinence Association—both are doing noble work.

Thanking you, Mr. Editor,

I am &c.,

A READER.

The Transportation Commission

This afternoon at 1.30, the Transportation Commission will open its session in the Council Chamber. Mayor Roger has received word from many towns along the canal as to the delegations that are coming here, and these will make a considerable number. Evidence of an important character is being prepared on behalf of manufacturers by Mr. R. M. Dennistoun, and it is altogether likely that much other evidence of an important character relative to the transportation business will be presented. It is expected that the Commission will sit here for two days in order to receive necessary information from the different parties called. The Mayor will present the Commissioners with an address of welcome.

Big Profits on Bread

Peterborough, March 23.—To the Editor; I notice a letter in an evening paper today, dealing with the recent demand of the bakers for a new bread bylaw, which hits the nail squarely on the head. The writer says; "My baker at present is furnishing me with the three pound bread at ten cents, which is an advance of over $1.10 on the hundred of flour for which he claims he pays 50 cents advance. This would mean 100 per cent. profit on his investment, and the workingman pays it as we are the bread eaters. This matter should be looked into by some of our smart aldermen who claim they look after our interests. Should the Council pass the proposed bylaw it certainly should have a provision in it that when flour drops to its ordinary price the bakers will go back to the four pound loaf."

This is common sense, and the Council should not alter the present bylaw.

ANOTHER BREAD EATER.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—The creek is now on its annual rampage.

—The town watering carts are being treated to a coat of paint.

—A nice assortment of Easter cards and novelties at Times Bookstore.

—The ice on the northern lakes is still firm. Teams crossed Chemong and Rice Lake yesterday.

—Packages containing 125 sheets of good quality note paper for only 19 cents at Times Bookstore.

—125 cloth bound books, regular price 25 and 30 cents, to clear, at 15 cents. Times' Bookstore.

—Mr. Robert Harrison informed The Times that he saw a robin yesterday—a true harbinger of spring.

—The Council will build several miles of granolithic pavements during the coming summer.

—The new market clerk, Mr. Thos. J. Lee, will take possession of the market on Friday of next week.

—There appears to be considerable opposition to the demands of the bakers for a change in the bread bylaw.

—Mr. James English, the veteran engineer of the steam fire engine, has resigned. Mr. Samuel Wainwright has been appointed to the vacant position.

—At Lakefield yesterday the death occurred of Mr. Alexander Irakin, who passed away at the age of 76 years. The funeral will leave his late place of residence, Albert street, this afternoon at one o'clock and proceed to the Little Lake cemetery.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Robert Stuart, of Chicago, is in town.

—Mrs. Jas. Simpson, of Finch, is in town visiting friends.

—Rev. Mr. Holah gave the address at St. Luke's church last night.

—Mr. J. H. Brandon, Fenelon Falls, is in town on business.

—Mr. John McCarthy has left for Portage La Prairie, Manitoba.

—Mr. John Craig, Lakefield, was in town yesterday on business.

—Mr. James Young, of Toronto, is visiting her brother, Mr. Richard Foster, 293 Bethune street.

—The friends of Mrs. M. L. Henry will regret to learn that she is still ill, and will be unable to receive for some weeks.

—Rev. C. J. James, M.A., rector of the Church of the Redeemer, Toronto, was the speaker at St. John's last night on "The Ideal Life."

—Mr. J. A. Culverwell, Toronto, is registered at the Snowden House. Mr. Culverwell is here in connection with the meeting of the Transportation Commission, which meets today.

—Mrs. Dr. Kernan, of Florida, U.S.A., who visited last summer in Peterborough, is at present in New York, and intends to spend the summer among her friends in Peterborough.

BIRTHS

PIGEON.—March 23, at 270 Charlotte street, the wife of Dr. Pigeon of a son.

CRAIG INQUEST AT LAKEFIELD

A Large Number of Witnesses Examined

POISON CAUSE OF DEATH.

The Inquest Adjourned for Two Weeks—More Witnesses

The adjourned inquest to enquire into the death of the late James Craig took place yesterday at the Craig House, before Dr. Gray, Coroner, when a number of witnesses were examined. Mr. R. E. Wood, County Crown Attorney, appeared for the Crown. There was a large attendance, and much interest is being taken in the inquiry.

The first witness was Dr. Fraser, who deposed that he had examined the body and submitted a written report thereon. The deceased was not suffering from any disease. The stomach had been sent to Prof. Ellis, Toronto, who had not yet reported thereon. He could not say what caused stupor. In strychnine poisoning the mind is usually bright and clear until the last. The analysis should disclose the nature of the poison, if any were taken.

James Long deposed as follows; I made some further search for strychnine after the last adjournment, and found a small strychnine bottle, the one I purchased from Mr. Tanner. I gave it to Mr. Cochrane. I found it in the meat house. That is where we prepared the pills for the rats. I got ten cents worth and made eight pills. I went to the barn and deceased went back to the kitchen. I gave him the bottle when I went to the barn. I never saw the bottle until I found it on the rafters the other day. I don't know how much strychnine was left after making the pills. There had been no trouble between deceased and anyone in the house that I know of.

Archie Boyes, sworn—I left hotel at nine o'clock the evening of Craig's death. When I left he was at his usual work in the kitchen. Was in the bar until I left for the night.

Mrs. McQuaw, sworn—I went to bed about eight o'clock, and saw deceased was lying on the sofa. He said he was taking a rest. I heard nothing more about it until six o'clock the next morning. I was not in the pantry in the morning and did not see the lunch. I did not see the cup of water or bread in the kitchen. I know nothing of the poisoning of the rats. I have been at hotel about two months, coming up from Peterborough. Deceased went to Port Hope for his health. He had a very sore leg and thought he needed a rest. I am no relation of his, but knew him since a boy. He wrote to me to take his place for a month. He returned about one month ago, and I remained on since then. Since his return, things were quiet about the hotel. There were no disturbance or quarrels that I am aware of. The last I saw him was between 7.30 and 8 o'clock, when he was on the sofa in the hall upstairs. Everything was quiet at that time. I never heard him say that anyone had tried to poison him. I never heard him say that every one was bucking up against him. He had no trouble on his mind that I know of. There were no family quarrels I know of no trouble between him and his wife.

Clara Coones, sworn—I live at the Craig House. I have been hired there a month. I have been doing generally work. I saw Jas. Craig alive last sleeping on the sofa in the hall about nine o'clock on the night of his death. I learned of his death next morning. I got up about six o'clock. I did not see the remains of his lunch. I was not talking to him the night of his death. When I went down town he was sitting by the fire and when I returned he was sleeping. I know nothing of his having strychnine for rats. There had been no difficulty that day or any other day that I know of between him and any one else.

John Cooper, sworn—Jas. Long told me in the post office at nine o'clock on the morning of the inquest that he had found the bottle of poison. He came and told me of his own accord. I know of nothing to throw light upon the affair. There was no quarreling whenever I was in the hotel. I saw the deceased on the night before his death about nine o'clock. I have heard of rumors of quarrels, but know of none.

J. C. Lillicrap, sworn—I was passing the post office on the morning of the inquest. I heard Mr. Long mention poison. Mr. Long said he had found the poison and put it back where he got it. He said it was in a bottle, and showed me about the size of it. This was on the morning before the inquest. I know of nothing to throw light upon the mystery.

Chas. Shannon, sworn—I have not had occasion to be about the Craig House since last spring. I know nothing of the affairs there of late. I have often dropped in for a few minutes. Everything was peace and quietness, as far as I know. I saw nothing disorderly.

Jas. Long, sworn—I made a mistake in saying that I found the poison after the inquest. I found it in the morning. I had no conversation with Mr. Lillicrap and Mr. Cooper about the poison on the morning of the inquest. I found the poison in the morning and put it back where I found it. It took me quite a while to find it. I did not say when I was here last that I had found it. I made a mistake when I said that I had not seen the bottle after giving it to Mr. Craig. I never saw the bottle until I found it that morning. I had no talk with Jas. Craig regarding the bottle, nor with anyone else as to what my evidence would be. I may have told Mr. Cooper on the morning of the inquest that I had found the bottle. I was not the first to tell of it. I told it first to Mrs. McQuaw, and she told it afterwards. I told her first that I had found the poison in the afternoon I had forgotten what I told her in the morning. I swore that I had not seen the bottle since I gave it to Mr. Craig in the barn. I am all right in the upper story. I went home twice on the day before his death. At night deceased and I had a glass of beer at my expense. I went to look for the strychnine because I heard that he had said there was some in the house.

John Craig, sworn—I had a key of the bar and Boyes had another. I had my key in my possession the night of the deceased's death. He could not get a glass of ale without getting either key. I drew some beer from a pump in a pail. Long drew a pail of beer to take home, and Long and deceased had a glass of beer about eight o'clock. Boyes went home about nine, and I was in charge of the bar afterwards. Deceased did not have glass of ale before going to bed. He could not have said he had ale to the doctor without my hearing it. He had no means of getting the ale. I saw deceased about 11 o'clock the night of his death.

The inquest was adjourned for two weeks.

A Pretty Window

The south window of Richard Hall & Sons' store presents a most elaborate scenic effect, both in taste and skill, as well as in depicting the fashion of the spring millinery and dress goods that the fair sex will be arrayed in the coming season. The window has been the centre of attraction since the curtains were raised yesterday morning, and until a late hour last night it was besieged by many eager to get the "habit" for the spring. To Mr. Arthur Mitchell is due the credit for the excellent artistic workmanship, the design being planned and carried out by him.

Rail Road Men

In all departments of active service stand in need of the readiness of mind and promptness of action which depend on a healthy nervous system. Let a railroad man be "rattled," and every life depending on him is in danger. A great many railroad men have found in Dr. Pierce's Golden Medical Discovery a valuable tonic for the overstrained nervous system. It builds up the body, purifies the blood, nourishes the nerves, and induces a healthy appetite and refreshing sleep.

"I suffered for six years with constipation and indigestion, during which time I employed several physicians, but they could not reach my case," writes Mr. O. Popplewell, of Eureka Springs, Carroll Co., Ark. "I felt that there was no help for me; could not retain food on my stomach; had vertigo and would fall helpless to the floor. Two years ago I commenced taking Dr. Pierce's Golden Medical Discovery and Dr. Pierce's Pellets, and improved from the start. After taking twelve bottles of the 'Discovery' I was able to do light work, and have been improving ever since."

Send 31 one-cent stamps to pay expense of mailing and get Dr. Pierce's Medical Adviser in paper covers, *free*. Address Dr. R. V. Pierce, Buffalo, N. Y.

A clean, legitimate proposition.

Best of references will be furnished.

For prospectus and full particulars address

The Cooperative Investment and Exploration Company

311 Quincy Building - Denver, Colo.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men.

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

THE HARBOR IS MINED THROUGHOUT ITS LENGTH

To Approach Port Arthur Means Certain Death --The Latest Bombardment

London, Thursday, March 24—A despatch to the Daily Mail, dated March 17, from Chinampho, says that the warships protecting the Japanese debarkation at that place were warned on the evening of March 9, that a Russian torpedo-boat destroyer had left Port Arthur. They accordingly left to join the main squadron. When they returned they admitted that Port Arthur is now so protected with mines and torpedoes that to approach it means death.

This coincides with numerous indications of the imminence of land operations.

In the meantime, the veil has not lifted, and not a word has been issued either officially from Japan or unofficially from any other source, concerning the last bombardment of Port Arthur. The rumored naval battle of March 18 is also totally unconfirmed.

It is almost certain, in the correspondent's opinion, that the war will be a long one, and at the worst Japan will retain a way to retreat overland into Corea. If she secures Newchwang, he says, her prestige will be established, and he adds that the waterways of Southern Manchuria will be of inestimable value in somewhat counterbalancing the weakness of Japan in her cavalry.

BATTLESHIP SUNK.

Tokio, March 23—It is rumored that a Russian battleship has been sunk at Port Arthur. This, according to one story, occurred on March 18, during a severe battle outside the harbor, while another report states that it occurred on Tuesday. The report is not confirmed, and is discredited.

STILL AT VLADIVOSTOCK.

Russian Advices Say Squadron Is Still in Port.

St. Petersburg, March 23—According to private advices from Vladivostock, the Russian squadron is still there.

ORDERED FROM CAPE TOWN.

Japanese Steamer Loaded With Coal Puts in to That Port

London, Thursday, March 24—A despatch to the Express from Cape Town says that the Japanese steamer Sado Maru, with 6,000 tons of Cardiff coal, for the Japanese fleet, was notified twenty hours after her arrival at Cape Town to leave port. On her passage out she had avoided the Mediterranean, in order to escape capture by Russian warships under Admiral Irenius. She had a number of British subjects on board, evidently engineers. It is assumed that they have been employed by Japan to repair damaged warships.

Tokio, March 23—A special despatch from Moji says the Japanese fleet attack on Port Arthur March 18 bombarded the city and its defences and fought a furious engagement with the Russian fleet outside the harbor, destroying one Russian battleship. Seven Japanese casualties are reported. There is no information concerning the Japanese fleet's condition.

This is the first announcement of an engagement off Port Arthur on March 18. Special despatches received in London this afternoon contain the same details of an engagement, but give the date as March 22, which probably is correct.

ONE JAP KILLED.

Seoul, March 23—A brush between the opposing forces has occurred at the outposts north of Anju. One Japanese was killed.

EXPECTS A CLASH.

Vladivostock, March 23—While the situation here remains quiet, it is not expected that Vladivostock will continue to be much longer free from the vigorous operations of the Japanese. In anticipation of the appearance of the enemy, and of a possible seige, a Ladies' Circle has been formed, which sits six hours daily at the ministry of marine, preparing bandages of linen for sick soldiers and sailors. Most of the women in Vladivostock belong to this circle, including the representatives of the aristocracy, who have determined to share the discomforts of the operations with their husbands.

WHERE WAR WILL BE.

London, March 24—The Daily Mail's Chefoo correspondent comments on a report that U.S. Consul Fowler, at Chefoo, has received of native anti-tax riots at Chioagangchow, where the Germans were massacred in 1898, as giving Germany a pretext to safeguard her interests in the Province of Shantung.

The Times this morning publishes an opinion of a correspondent that Japan will land her main army at Newchwang, which will be turned into a magnificent base, and that she will also seize Haicheng, 15 miles eastward of the railroad, as an additional base, and that without seriously attacking either Port Arthur or Vladivostock, the war will be fought out on the plains of Central Manchuria.

The stringent Japanese censorship is likely to be relaxed early in April, says the well-informed Daily Telegraph's Seoul correspondent. This

AN EXPENSIVE CONFLICT

May be Most Costly War that Was Ever Fought

Paris, March 23—Baron De Rosen, Russian Minister at Tokio, up to the outbreak of the war, who has just arrived in Paris, on his way home, told a correspondent yesterday that he expected the fight would be long and arduous. "Although there can exist no doubt that Russia will triumph roundly in the end," said the Baron. "Yet this struggle will cost more money than any war in history and will last twice the time. Japan is immensely wealthy in the sense that she is able to put her hands on all the money necessary for a protracted struggle. The confidence of the Japanese that they are bound to win in the end will prevent an early discouragement, which would save millions of money and thousands of men."

Baron De Rosen believes that as soon as operations on land begin next month the Japanese will change their ideas. He says that the Mikado soldiers are definitely formed, and overdrilled, and will simply be mowed down by the Cossacks. Moreover, he declares, they know nothing by experience of hard fighting against a modern civilised foe.

MEMBER OF CABINET ILL

Hon. Mr. Latchford Said to be in Poor Health

Toronto, March 25—Hon. F. R. Latchford, Commissioner of Public Works, left the city for his home in Ottawa last night and it is not expected back in the Legislature during the present session. Mr. Latchford contracted a severe attack of the grippe over a month ago, which necessitated his absence from the House for some time. He has now been ordered by his physicians to take a complete rest. He will go south immediately.

REMEMBERS OLD LOVERS

Will of Michigan Alderman Gives Three Women $30,000 Each

Monroe, Mich., March 25—Alderman Waters, Monroe's richest bachelor, maintains his fame for peculiarity even after his death, by the disposition of his property. His will was probated here yesterday.

Three of his old sweethearts are remembered, each with $10,000 in gilt-edged, convertible securities. The women are Miss Alice Kendell, city librarian here; Miss Kate O'Rielley, a saleswoman in a Detroit store, and Mrs. Nellie Calahan, of Saginaw. The remainder of his $80,000 estate is left to relatives.

Anita McGee was at the head of the two thousand nurses in the Spanish-American war, and is planning to take one hundred Yankee nurses to Japan.

CHINA JOINS JAPAN IN THE WAR WITH RUSSIA

Sensational Report That May Bring on a General European War

Special to The Times.

London, March 25—A despatch to the Daily Mail from Tokio states that China will join Japan in her conflict with Russia. All that is necessary to set the Chinese army in motion is the defeat of the Russians *in the first land battle, or the fall of Port Arthur.* Marquis Ito, the great Japanese statesman, who is now in Corea, will visit Pekin, and it is generally understood that he has already been assured of the co-operation of the Chinese.

New York, March 25—*The Sun's special says that the fall of* Port Arthur, which is sure to take place, will be the signal for a revolution in Russia. The unhappy Poles, as well as the inhabitants of Finland, are becoming very restless, and internal trouble would very much hamper Russia *in her great struggle.*

As the Japanese land forces are comparatively limited for an invasion of Manchuria, it is the belief in high quarters that they will increasingly feel the need of Chinese auxiliaries

It is not believed that Japan will openly seek the aid of China, but that China will gradually be drawn in by General Kuropatkin's tactics of remaining on the defensive in the interior of Manchuria.

St. Petersburg, March 25—In government circles there exists a strong belief that the question as to whether China will observe her neutrality undertakings will depend largely on the result of the first heavy land fighting. A big victory by the Russian army it is believed would insure the quiescence of the celestial empire, but there are grave fears as to what might happen in the event of a signal Japanese success in the early stages of the land operations.

For the time being the situation appears to be satisfactory and it certainly is much better than it was three weeks ago. The Pekin government has reiterated its professions regarding neutrality to Paul Lessar, the Russian minister, and has given him fair assurances in answer to his representations regarding the number of Chinese troops north of the great wall. The natives manifest a friendlier disposition than they did at the beginning of the war, but the Russians know the Oriental character as no other Europeans do. They understand how deep-seated is the hatred for foreigners in China and the only prestige of the Russians is their strong arm.

The recent naval successes of the Japanese have not greatly improved the Chinese, but if the Russians should sustain a really disastrous defeat on land the Chinese might suddenly be aroused, whether with the connivance or even with the consent of the Japanese against Russia and perhaps against all foreigners.

Russia's present plans are based on the appreciation of the supreme importance of the first land battle, and no fighting on a large scale will take place, if it possibly can be avoided, until the Russians feel morally certain that they can deal the enemy a crushing blow.

The statement that the Russian minister at Pekin has demanded the withdrawal of all Chinese troops north of the great wall is incorrect. As cabled Russia had made representations about the number of Chinese troops in the neutral zone, west of the Liao river, not desiring a force there which would constitute a threat, and it is understood that China has given measurably satisfactory assurances on the subject.

The Novoe Vremya publishes prominently a Paris despatch declaring it is believed there that a triple alliance between Japan, China and Corea has been former, which was the real object of the Marquis Ito's visit to Seoul.

THE COLORADO STRIKE

Denver, Colo., March 25—Martial law has been declared in the Trinidad coal mining district as a consequence of the miners' strike. The martial law followed an order to the entire state guard to hold itself in readiness for service at three hours' notice. The trouble in the district is due chiefly to the bringing in of negroes to take the place of strikers. Troops have left for the scene.

FEAR TRENT CANAL ROUTE

ONLY CANADIAN SYSTEM AMERICANS VIEW SERIOUSLY

Comparative Discourse by Upon It by Mr. J. A. Culverwell

(From Mail and Empire, Feb. 8, 1904.)

"The Trent Valley Canal and the Development of Canadian Waterways" was the subject of a lecture before the Canadian Institute, Toronto, on Saturday evening by Mr. J. A. Culverwell, of Peterborough.

The discourse was illustrated by numerous lantern views of structures, and some maps of the new Erie, the Welland-St. Lawrence route, the Trent Valley, and the German Canal system, and an interesting description was given of all these systems.

Mr. Culverwell argued that in the Trent Valley system we were following out the method adopted by the German barge canal, constructed recently, to connect their coal and steel districts with the North Sea, viz., length and breadth of lock rather than depth, seeking bulk of boat in that direction. The depth of the Germany canal is 8 feet, and the Trent Valley will be 8 feet 4 inches.

New York State also is building a barge route of 1,000-ton boat capacity, only a little larger than the Trent, which will be an 800-ton barge canal, and this enlarged Erie Canal, costing one hundred million dollars, would—the State Commission reported—will reduce the grain freight rate from Buffalo to New York by two-thirds, as also completely underbid the New York railroad rate possibilities. This would, Mr. Culverwell said, demoralize the Canadian grain traffic.

Certain marine men are pressing the Canadian Government to enlarge the Welland Canal from a 2,000-ton lock capacity, so as to enable them to pass a 6,000-ton vessel through to Kingston, and then tranship to 2,000-ton barges for Montreal, and this, too, after just completing an expenditure of $10,000 for the present enlargement of the Welland-St. Lawrence Canals. Mr. Culverwell pointed out that ship dimensions in fact had outgrown the Welland-St. Lawrence system years before the enlargement was completed, and the astonishing fact existed that no Canadian boats had as yet been built to suit the full capacity of the Welland locks.

He advocated first expending the five million dollars necessary to complete the Trent Valley route, which now had 160 miles of navigable route bottled up, and thus open up "nature's short route grain-carrying waterway," as he termed it, pointing out that an American marine journal recently openly stated editorially that the Trent Valley route is the only Canadian route they feared.

Views were shown of the immense double hydraulic lift lock, at Peterborough, and the lecturer explained that the five hydraulic locks to be used on the canal would save six hours over the ordinary system of lockage. Views were also shown of similar locks in Europe.

The speaker also showed that it was a day shorter than the Welland route, and, besides, would give communication between Peterborough, Lindsay, Barrie, Orillia, and Central Ontario points with Toronto, Hamilton, and Western Ontario, and be the means of increasing the rapid development of the central portion of the province.

ROYAL TRANSPORTATION COMMISSION MEETS.

LARGE NUMBER OF DELEGATES IN ATTENDANCE

Mr. John Bertram, Chairman -- Many Speakers Heard

Yesterday afternoon the Royal Transportation Commission began its session in Peterborough, and a large number of delegates was present. Mr. John Bertram, Chairman of the Commission, presided, and the general evidence goes to show the great advantage of the Trent Valley Canal to the country at large, as well as to the local towns and villages.

Among those in the city for the purpose of attending this important meeting are Messrs. R. Sylvester, H. A. Ryder, J. H. Shoothberan, Mayor; R. A. Kennedy, W. Flavelle, Thos. Stewart, F. C. Stewart, of Lindsay; R. J. Sanderson, C. H. Hale, J. P. Secord, Orillia; D. Ross, J. A. Lamb, Barrie; W. S. Jacques, F. Fennice, G. W. Ostrom, D. Gilmour, W. H. Matthews, G. A. White, Capt. Vanalstein, H. E. Maybew, R. H. Bennett, C. W. Graves, Trenton; F. S. White, Col. McLean, Capt. Peacock, J. F. Clark, R. A. Mulholland, F. Oustram, H. Barrett, Alf. Long, W. McCallum, Mayor Quinlan, Port Hope; A. B. Colville, E. C. West, W. Fowlds, C. H. Cannon, J. B. Ferris, L. G. Stephens, R. S. Shannon, G. E. Burrows, Campbellford; C. J. Blomfield, Lakefield; J. W. Evans, Deseronto; B. Lett, Thos. Ritchie, A. O. Fish, Belleville; D. L. White, Midland, and many others.

His Worship Mayor Roger opened the afternoon meeting, and stated that it was a great pleasure to all the municipalities represented to welcome the Commission to enquire into the great question of Transportation. He then read a lengthy address, ably setting forward the great advantages to be derived from the Trent Valley Canal. Work upon the Trent route had been performed by the Government of Canada for many years, for the purpose of carrying out this scheme which, he was now more confident than ever, would solve many questions of transportation. About 160 miles had been completed at a cost of $4,000,000, and only 20 miles remains to be built at a cost of $5,000,000. In many other progressive countries canal construction and development is being steadily pushed forward as the chief solution of the transportation question. The Mayor's able address showed much careful preparation, and was well received.

Mr. Bertram, in reply, thanked His Worship for such an excellent address. He was greatly pleased to be back in his home town again, and to renew his pleasant associations with Peterborough. He was here, however, not to act as a partizan of any one town. The duties of the Commission were to ascertain the facts with reference to the Trent Waterway as a portion of the great transportation problem. The Trent Canal had a long history, and why it had not been completed he did not know, nor did the other members of the Commission. He assured those present that the Commission would act with strict impartiality in advising on the evidence presented. He asked that those having evidence to present to condense it as much as possible.

Mr. R. R. Hall then read the report of the Committee on the Trent Canal published 13 years ago

Mr. D. Gilmour, president of the Trent Valley Conservation Association, delivered an address, which showed he was thoroughly informed on the subject. "I have been accustomed to looking after freight rates all my life time, and I have carefully gone into the rates of freight, comparing the different water routes, lakes and Erie Canal, the lakes and Welland Canal, and the Trent Natural Water Route." Continuing, he remarked; "The local business and the large water powers and steady manufacturing business during the long winter months and the employment of labor and increase of population during the full year, although of such enormous importance are comparatively small, compared with the international importance of the great cheap, short distance only water highway which absolutely must control the grain and heavy merchandise of both continents."

Mr. Thos. Stewart headed a deputation from Lindsay. Owing to the short notice he had received he had prepared nothing elaborate. He considered that, in the interests of the local towns and the country at large the canal should be gone on with. Several citizens of Lindsay had been urging the completion of the canal for the past twenty years, and now they would like to see it completed in order to prove whether or not they have been right. Several statements were handed in, among which was one from Mr. W. Flavelle, of the Flavelle Milling Co., one from Mr. Richard Sylvester, one from Mr. Robert Kennedy, and one each from Mr. Alexander Horn, of Horn Bros. Woollen Mills, and the Manager of the Rathbun Lumber Co., at Lindsay. Messrs. Flavelle, Sylvester and Kennedy spoke briefly on the subject, and each emphasized the great necessity of completing this great project.

—Mr. Patrick Roach had his leg broken on Wednesday evening by a kick from a horse. Dr. McWilliams set the limb.

ADVERTISE IN THE TIMES.

AFTER AFFECTS OF THE WAR

Probability of War in the Near East Increasieg

TROUBLE FOR BRITAIN

Norman Talks of "Flames of Hostility to England" and Predicts a Day of Reckoning

London, March 25—Under the title "The War and After," Henry Norman M.P., discusses the probable after-effects of the Russo-Japanese war. He says that it is most important that one of the acts should be clearly realized, that "it is a fight for the control of China, Corea and Manchuria are subordinate or indirect issues. The real object is predominate influence in Pekin, bringing with it the ultimate domination of the Far East, and in the future, the headship of all the Asiatic races."

He points out the probability of war in the Near East and English peril from such an event and says;—"Already the flames of hostility to England are visible almost everywhere in Europe—a manifestation which is not at all surprising in view of the language of so much of the London press. From the highest to the lowest, moderation of language, respect for the feelings of other nations and a sense of responsibility appear to have vanished from many newspaper offices. Denunciations of Russia are as extravagant as adulation of Japan is exaggerated, and both are making England a host of fresh enemies every week. For all this, a day of reckoning will surely come, for the passion roused against England will have reached its climax when—if this happens—Russia has practically evacuated Manchuria, and Japan, unable to continue a ruinous struggle of indefinite duration, requests the powers to recognize the retrocession of Manchuria to China and to decree the end of the war. Then England is likely to learn the result of her Asiatic alliances, for it is the universal conviction that it will be the Anglo-Japanese treaty which rendered the war in the Far East both possible and probable.

"In conclusion, I will venture upon one prophecy, namely, that the result of this war will be for Russia a blessing in disguise. The policy of expansion everywhere, at any cost, and by any method, whether of arms or of diplomacy, together with its authors and upholders, will be discredited. The canker at the heart of Russia—the corruption of her bureaucracy—will be cut out. The statesmen who desire to curtail military expenditure and to encourage Russian production and commerce will come back to power. The Czar will brush aside opposition to the ideals of humanity and peace that he cherishes."

EUROPE'S TIDE OF IMMIGRATION

Mr. Geo. Hannah Speaks of Westward Business

ALL BOUND FOR THE WEST

Increase in Number of Second-class Passengers is a Feature

Montreal, March 25—The rush of immigration to Canada is going on apace. Mr. George Hannah, General Passenger Manager of the Allan line, said yesterday that one feature of the tide of travel westward this year was the increase in the number of second class passengers and a corresponding decrease in the number of steerage passengers. Mr. Hannah attributed this condition of affairs to the better class of immigrant that is coming to Canada this season. Large numbers of them are supplied with money, and are able to travel in a better and more comfortable way. A noticeable feature of the business done by the Allan line during the winter months was the superior class of immigrant carried. Nearly all were from various parts of the British Isles, practically no continental passengers being carried.

In former years it had been customary for the majority of passengers carried by the Allan line to go to the United States through Canadian ports. This has changed now, a large percentage of the immigrants carried remaining in Canada. Mr. Hannah quoted the last trip westward of the Tunisian; This boat on her last trip from Liverpool to Halifax and St. John brought out 320 second class passengers and 820 third class passengers. Of these, 89 only were destined for points in the United States, the remainder settling in Ontario and the North-West. Mr. Hannah calculated that 7-8ths of the immigrants carried during the past winter season were bound for the West to help swell the tide of settlers that was flowing into that country from all parts of the globe.

PREDICTS WAR FOR TWO YEARS

Norwegian Officer Quotes Interview with General Kouropatkin

Copenhagen, March 25—Captain Nyquist, the Norwegian officer who obtained permission to accompany the Russian general staff to Manchuria writes regarding an interview he had with General Kuropatkin;

"The general ended his half hour's conversation with me by saying;

"'My dear captain, you must be prepared for a war that will last two years, and you will come back with a large beard and gray hair.'"

Japanese Renew the Attempt to Bottle Harbor

Sank Seven Merchant Vessels in the Desired Position

Special to The Times.

London, March 24.—The Daily Telegraph publishes a dispatch from its Tokio correspondent, under yesterday's date, which says; On the night of March 22 the Japanese fleet renewed the attempt to bottle up Port Arthur. Sixteen warships escorted seven merchant steamers to the mouth of the harbor, and under cover of the bombardment the steamers ran in and were sunk in the desired position. 300 Japanese officers and blue jackets volunteered for this duty. An official report is expected this morning.

Japan will not elect to fight Russia in Korea, nor attempt to bring an army over two hundred miles of terribly rough mountains from the Yalu River to the open country, and the towns on the Russian railway, but will operate at the Liao.

Special to The Times.

St. Petersburg, March 24.—According to information received here strong fortifications have been erected for the defence of Harbin and Liao Yang. The construction of batteries at New Chwang continues to be feverishly pushed, and it is believed that that place will shortly be in a condition to resist even a determined assault by the Japanese.

FOUND GUILTY OF MURDER

L'Orignal, Ont., March 23 — The trial of Goyette for the murder of D. Coolugan and his son Thomas, was concluded today. The Coolugan girls stated that prisoner had treated them kindly up till the time of the tragedy. He brought liquor to the house, but had not drank much of it. Mr. Proulx opened his defence by a statement to the jury that they did not dispute the killing, but that they would prove that prisoner did not realise the enormity of his act, and could not repress the impulse which led him to commit the deed. The defence offered evidence to show hereditary insanity in the prisoner's family, but the Crown objected, and the court suggested that Mr. Proulx had better give evidence as to the prisoner's insanity, before giving evidence of hereditary insanity. A number of witnesses were called to do this, and one of them, Mrs. Grenier, testified that prisoner boarded with her at Lavaltrie, Que., and that on one occasion after he had been drinking for eight days he wanted to know how he could best kill himself. He thought he had lived long enough.

Mrs. Goyette, wife of the prisoner, stated that he was kind to her when he was not drinking. Evidence was given to show that prisoner's father, brother and niece were of unsound mind.

Dr. Clarke of Kingston Hospital for the Insane and Dr. Nelson Beemer, of Mimico Asylum, were called for the defence, but both doctors stated that they saw nothing to indicate that he was mentally unsound or not responsible for his acts. Mr. Justice Teetzel's charge to the jury was strongly against the theory of insanity. The jury returned in half an hour with a verdict of guilty of murder, and his Lordship sentenced the prisoner to be hanged on Thursday, April 28 next. The prisoner on being sentenced broke down and apparently realized what was happening.

KEENE.

—It is with the deepest regret that we chronicle the death of Mrs. Walsh, which occurred on Friday morning, March 18th. The deceased, who was 65 years old on St. Patrick's day, had been ill for about two years, and death came not unexpected.

The late Mrs. Walsh, who was a Roman Catholic, was highly esteemed by all who had the pleasure of her acquaintance. She was earnest and consistent in religion, and her life was a model of charity and goodness.

Besides her husband she leaves five sons and three daughters to mourn her demise;—Frank, Fred and Leo, at home; Thomas, who is principal of the high school at Strathcona, N.W.T.; Albert, of Winnipeg; Mary of Rochester; Catherine, who is a sister at St. Paul, Minn., and Margaret and Kathleen at home.

The funeral took place on Monday to the Catholic church here, where a solemn requiem mass was celebrated by Rev. Father O'Brien, and thence to the Roman Catholic cemetery in Peterborough. The pall-bearers were her three sons, Frank, Albert and Fred, James Quinn, James Walsh, a nephew of deceased and Dennis O-Brien another nephew.

—Another old and highly respected resident of Keene for many years, died very suddenly on Friday last in the person of Mrs. Gourley, at the advanced age of 75 years. She had been in her usual health till Friday at noon, while eating her dinner, she suddenly expired. The deceased lady has led a retired life for a number of years, on account of ill health. She was of a quiet disposition, and led a holy life, free from display and ostentation. Her husband predeceased her a number of years ago. Two sons and two daughters survive, Katherine at home, John of Edmonton and Samuel and Mary of the United States. The funeral took place on Sunday to the Roman Catholic cemetery after services in St. John's Catholic church by Rev. Father O'Brien. Requiescat in pace

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but like wise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 25 1904

SHOULD POLAND REVOLT?

A dispatch from Berlin states that a revolution of the Russian Poles is an imminent possibility, should the Russian reverses in the far east continue. The Poles are anxiously awaiting further developments in Russia's struggle with Japan, and the fall of Port Arthur or Vladivostok would probably mean an uprising of the Poles, which would seriously embarrass and possibly cripple Russia. The dispatch adds;

It is also learned that one of the agreements arrived at when the Czar and Emperor Francis Joseph met at Murzsteg was in regard to mutual protection against the Poles. It is said that both Austria and Germany have promised to protect the Russian boundary should it be left undefended on account of events in the Orient.

The Polish question is one of the reasons why Germany has been so anxious to please Russia. The Russians expelled from Germany as anarchists have been mostly Poles.

It has been forty years now since the Poles subsided into inertia, if not acquiescence. Their century-long struggle was virtually ended in 1863 when the government of Poland was formally incorporated with that of Russia. Four years previous there had been an unsuccessful revolution and the spirit of the Poles was crushed and broken. There had been so many fruitless revolutions and resultant partitions. Russia, Prussia, and Austria had partitioned the once strong kingdom until its integrity was a dead letter and the government was one in name only. Poland was originally about the size of Ontario, but in the voracious partitioning by triumphant powers there was none too much territory for the trio of conquerors to quarrel over. It was in 1772 that the first partition occurred, Russia taking 42,000 square miles, Prussia 13,000, and Austria 27,000. The second partition occurred about twenty years later, Russia taking 96,000 square miles and Prussia 22,000. The third partition occurred in 1795, Russia again taking the lion's share; 43,000 square miles, Prussia 21,000, and Austria 18,000. There was another effort of Poland to throw off the yoke of the conqueror in 1830 and still another in 1863. Every effort has been unsuccessful, and Poland's history for the past century and a quarter has been a bloody and sombre one. Its history is filled with heroic deeds and great figures; but like Hungary, it has gone down in defeat over and over again until hope itself is almost crushed out.

Should the Poles revolt again there seems little hope for them. They are too feeble themselves even if combined with the outraged Finns, to throw off the yoke, and European selfish interests would not interfere in their behalf, without a further partitioning that would simply mean a transfer of the nationality of the tax collector. There is no Kosciusko to lead Poland to a great struggle today. Even Kosciusko's efforts were futile. Without one like him Poland's outlook is indeed dark and dismal.

BRITISH RULE

Perhaps the most remarkable instance in recent times of the rapid development of a purely virgin region into a rich and prosperous state is to be found in the Malay Peninsula. In a communication to 'The London Times, Sir Frank Swettenham, since 1874 a resident British official and now the governor of the Straits Settlement, thus summarises the facts;—

> "In less than thirty years four small Malay States, jungle-covered, pathless, unknown, have been turned into flourishing communities, with a total revenue of over two millions sterling per annum, a trade of ten millions sterling per annum, three hundred and fifty miles of excellent railway, thousands of miles of roads and telegraphs, great public buildings, schools, hospitals, waterworks— in fact, all the machinery of the most modern administration —with no debt of any sort, and a balance of one and a half millions, ready to be spent on further railway extension and other works of development."

Three things have contributed to this great success —the tin mines, cheap Chinese labor, and most important of all, able and intelligent rulers. For it can hardly be doubted that if the British Government had failed to secure men to represent it who sought to understand those whom they ruled, and who made their interests their chief aim, the country would have remained practically a pathless jungle.

CANADIAN GAIN

Issues of the Liverpool papers of March 1st contain extended reports of an address by Mr. Chas. Lancaster to the Liberpool Chamber of Commerce on the subject of Canada and the mother country. Mr. Lancaster was one of the Liverpool delegates to the Montreal Congress of Chambers of Commerce to the Empire. He delivered an admirable address upon the resources of Canada and was very evidently a delegate who travelled through the country with his eyes wide open.

The Liverpool Post, a paper of high standing, follows this address with a column of editorial comment, which constitutes another valuable advertisement of this country.

Such addresses and comments have been pretty frequent in Great Britain since the return there of the delegates of the Montreal Congress. They illustrate the value to Canada of the holding of such congresses here, and of the desirability in general of bringing to Canada, whenever possible, meetings of the various important British scientific and industrial associations.

The Liverpool address also recalls the fact that one of the greatest of the world's industrial associations, namely the British Iron and Steel Institute, is to visit North America this summer. We have already emphasized the importance of vigorous Canadian attention to this very important body. It is to be hoped that the government is not overlooking the matter.

Are You Troubled by Sleeplessness?

Over-wrought Nerves Cause the Trouble—Build Up, Fortify the Nervous System with Ferrozone—Then You Will Sleep Soundly.

There is probably no remedy that soothes the nerves and drives away those long nights of wakefulness like Ferrozone. Every person whose sleep is restless should take Ferrozone like Mr. J. H. McGaw, who writes from Saskatoon as follows:

"I was bothered with insomnia last summer to such an extent that my health almost broke down. I was frightfully nervous. If it had gone on much longer I would have been a physical wreck. I read about Ferrozone, and concluded it was the sort of remedy needed. I bought six boxes, and took one tablet with every meal. A change was at once noticeable. I no longer labored under such great mental excitement, and was able to take things more quietly. Ferrozone improved my digestion. I picked up in spirits and strength, and in a comparatively short time sleep came the minute my head touched the pillow. Ferrozone completely rehabilitated my system, and has made me a different sort of man altogether.

FERROZONE [illegible]

Don't wait until your condition becomes nervous prostration; it's hard to cure. Take Ferrozone regularly and the cause of your sleepless nights will be removed. It always cures insomnia.

Ferrozone is the greatest health-giver the most valuable tonic, that money can buy. It will bring you lasting strength, vigor and health, at small cost. Only Ferrozone can do this so be sure that no dishonest dealer substitutes something represented "just as good." No other remedy is so good as Ferrozone, price 50c. per box or six boxes for $2.50, at all druggists or N. C. Polson & Co., Kingston, Ont.

THE LATE ALEX. POPE

He Was a Brother of Mr. Wm. Pope of Peterborough

A latter has been received by Mr. William Pope, of town, conveying the sad news of the death of his brother, Alexander Pope, aged 62 years, which sad event took place at Orleans, Neb., on the 16th March, inst.

The late Alexander Pope was the eldest son of the late John Pope, of Bridgenorth. In 1865 he was united in marriage to Ellen, daughter of the late Maurice Gorman, who with their thirteen children, ten sons and three daughters, survive him. He followed farming in Ennismore, and in 1881 moved with his large family to Nebraska, where he and some of his sons pursued farming. Two reside in San Francisco, Cal., one a merchant, and the other a civil engineer, and one in Chicago, a dentist.

He leaves to mourn his loss, besides his wife and children, one sister and five brothers. His sister, Mrs. Edward Crowe, of Campbellford, and two brothers, william and George, of town, John of Chemong Park, and two brothers in the United States. He had a large circle of friends and acquaintances, who will be sorry to hear of his death.

During his residence in this country he was highly esteemed, was of a kind and loving disposition, and a good citizen in every particular.

NEW POSTAGE REGULATIONS

Letters May be Insured Up to a Certain Amount

The postmaster-general has decided that on and after March 28, 1904, letters addressed to places within the Dominion of Canada may, under certain conditions, be insured for any amount not exceeding $25. The insurance fee, according to the following scale (as well as the postage and registered fee) must be fully prepaid;

Insurance fee	Limit of compensation
.03	$10
.04	$15
.05	$20
.06	$25

A good many registered letters are stolen by postoffice officials, and it is but seldom that the thief is punished. Frequently the public never hears of the theft, the thief being quietly dismissed and permitted to employ his talents elsewhere. And very often, when the public does hear of the theft, the transgressor is punished by dismissal only. We think that if the government would severely punish every thief it can discover, it could well afford to insure all registered letters at the old rates.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $35 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

THEBANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-29-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.
The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

SECURITY,
c-o Times,
Peterborough, Ont.

—THE—

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

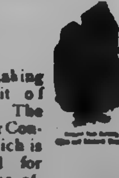
$75,000.00

This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904. An extra prize of $5,500.00 will be paid on orders received

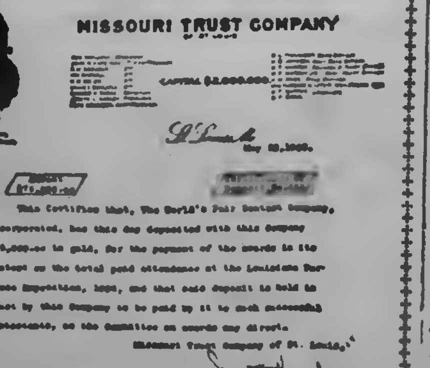
BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1889 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,500.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00



Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

CAPITAL $2,000,000

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00 This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

NOBLE MUMMY UNCLAIMED

Man Dead for Nine Years Still Lies in the Morgue

Ardmore, Pa., March 23.—A man who is believed to have belonged to a noble English family died from exposure in Wayne nine years ago yesterday, and his body still lies unclaimed in the morgue of S. P. Frankenfield's Sons.

Mack was employed for several years by R. H. Johnson, a contractor of Wayne. He was a man of education and culture, and, according to rumor, was the heir to a British title, which, for some mysterious reason, he would not or could not claim.

When the man died J. S. Pearce, at that time an undertaker, but who has since retired, embalmed the body and decided to hold it until it should be claimed. No one ever claimed it, and, as the embalming was unusually successful, a number of efforts have been made by museums to purchase the body, but Mr. Pearce says he will not surrender it except to some member of Mack's family.

The body has been viewed by thousands of people, many of them Englishmen, who hoped to identify it. The skin retains its natural color and the sandy moustache and hair remain as in life. The nose has become unnaturally sharp from having been pinched by people who doubted if the man was really dead. Over the head of the mummy a cuckoo clock is kept going to keep him from getting lonesome.

CHARGED WITH PERJURY

Brantford Constable Appears Before Commissioners

Brantford, March 22.—Police Constable Allan was on the carpet before the Board of Police Commissioners this afternoon, and some interesting evidence was submitted touching the police management of the Irene Cole murder. He was arraigned to answer a charge, made by Chief Vaughan, of the force, that Allan had made statements criticizing the conduct of the case, and had maliciously declared that the chief and Sergt. Wallace had sworn falsely at the Kennedy trial. Mr. W. C. Livingston was in attendance as counsel for Constable Allan, when the proceedings opened, but he was subsequently asked to withdraw, as the commissioners did not consider that it was proper that counsel should be present in a matter affecting discipline, which concerned only the board an employe.

The evidence was to the effect that Allan had said openly that Chief Vaughan and Sergt. Wallace swore falsely at the Kennedy trial when they said they knew nothing of the biscuit box which had been found in the Willows, for he himself had taken the box to the chief and explained that it had been purchased by a man resembling Kennedy, who had cleared out immediately after the crime.

Further, he claimed he had been deprived of a $25 liquor fine which was his by right. Constable Allan objected to the charges and wanted counsel.

The commissioners adjourned the case until Thursday. It is said the constable will make charges in his own behalf.

ANOTHER RUSSIAN LOSS

Russians Lost Seven Thousand Tons of Ammunition

Copenhagen, March 24.—On the authority of the general manager of the East Asiatic Company, a correspondent is able to state that the capture of the company's steamer Manchuria deprived Russia of seven thousand tons of ammunition intended for the long range guns in Port Arthur. It is said that if the Manchuria had reached Port Arthur safely the whole situation would have been changed. It is known that the Russian Government regarded the Manchuria's cargo as of the highest importance. While at Suez in October last year the Manchuria was partly burned. It was repaired at this port on rush orders from St. Petersburg for the special purpose of carrying the lost ammunition to the Far East. The cargo was valued at 3,000,000 crowns ($804,000). Its capture is said to account for the inability of the Russians to make effective use of their long range guns. The Manchuria was only two days' from Port Arthur, when it was seized. It was navigated by a Danish officer on formal leave of absence.

AN EXAGGERATION

German Missionary in Africa Defends Hereros

Berlin, March 23.—A missionary in South-West Africa has written to the Reichsbote defending the Hereros against the charges of massacring women and children, and the indiscriminate slaughter of men. He gives the names a number of women who had been reported killed, but who are still alive, although the Hereros had opportunities to murder them. Native Christians, the missionary adds, assisted a number of women and children to reach the military stations safely. One native, Eliphas offered his oxen to carry the women and children into Okahandja, notwithstanding the danger that the oxen might be seized. A missionary named Brockmann went on foot, with women and children, unarmed through the hostile Hereros to Okahandja, and one German unmarried woman who fled to Otjimbingue, through the warlike hordes, arrived unharmed. The missionary also related a case in which three Germans took refuge in his house, two of whom were traders and had a reputation for oppressing the natives, and the third, named Martens, who a year ago traveled through Hereroland, seeking for a spot to establish a farm, who gave the natives the impression of being fair-minded, and who maintained pleasant relations with them. Hostile Hereros came to the missionary's house and seized and shot the two traders, but they spared Martens.

CONSPIRATORS EXECUTED

Seoul, March 23.—Of thirteen Coreans, formerly military students in Japan, who were accused of conspiracy against the life of the Emperor and Crown Prince for the purpose of enthroning Prince Euiwha, who is now studying in America, three have been executed, and the others have been summoned to appear before a special tribunal.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $3.86 to $10 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $13.50. This being a general sample taken from the dump. The other two assays are $61.68 and $72.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 95,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

JAPAN IMITATES BRITISH NATION

Accepts England as a Model in All Things

HER FITNESS FOR THE SEA

Ambition of Japan is to Become a First-class Sea Power

London, March 24—The fitness of the Japanese naval officers to conduct war at sea was made apperent, even to Russian minds, at the very start of the war. That such fitness is never an accident, and that it can be acquired only by the hardest study and the most strenuous efforts is self-evident. Just how carefully the Japanese naval officers are trained is, however, little appreciated. An address on the subject by a Japanese naval lieutenant, K. Setu, delivered in England and reproduced in condensed form in a recent number of Engineering is illuminating.

Japanese youths are admitted to the naval colleges between the ages of 16 and 20. Last year 1,995 applied for admission, of whom 1,400 passed the physical examination. Of these but 400 passed in the educational tests, while only 180 were selected for admission.. Three years of hard study at the college are required, the reward being promotion to the rank of midshipman. Then comes rigorous training in all branches of duty at sea, and this training does not cease when the midshipman become sub-lieutenants or even lieutenants. Yearly essays are required of the young officers, and not as a formality, but as a test of real progress. Later on comes study at the higher naval college for lieutenants, commanders and captains of special ability.

It is especially interesting to note how important a place the study of English holds in the cirricula. The applicant for admission to the lower college may offer French, German or Russian as an optional subject, but he is required to pass an examination in English grammar and in translation from English to Japanese, and from Japanese into English. In his first year of work he gives seven hours a week to English, and in the two succeeding years six hours a week. This is due of course, first of all, to the fact that England, the "mistress of the seas," has been Japans model from the beginning, and, secondly, to the alliance between the two powers. The intimate relations of Japan with the United States gives added reason for the emphasis of the English language.

Commander Sato felt confident that in "one or two small particulars," his country had gone England "one better" in the matter of naval training, and Admiral Ingles, who heard the address, was inclined to give his assent, for he said that "the Japanese nation, so far as he knew, was unique; they combined every qualification of the East with every qualification of the West."

The "imitation" hypothesis concerning the Japanese must be exceptionally husky if it can survive a knowledge of such facts as these.

OLD FEUDS ARE NOW FORGOTTEN

The Anglo-French Aggreement Pleasant to Both Nations

AUGURS WELL FOR PEACE

Britain and France Will Settle Many Disputes Outside of Their Own Country

London, March 24—Paris, they say, is delighted at the prospect of an Anglo-French agreement amicably settling international differences in Egypt, Newfoundland, Morocco, Siam and West Africa. A well-informed Paris correspondent declares that it is already reflected in the balance sheets of leading establishments in the Rue De La Paix and the grand boulevards.

The Balfour ministry suffered a heavy electoral reverse in the farming community of East Dorset. Since the beginning of the year there have been ten elections and instead of six tories and four liberals there are now eight liberals and two tories.

Liberals Gaining Everywhere.

Everywhere the Liberals have secured largely increased polls. Indeed, taking the thirty contested elections since 1902, the ministerial vote has decreased 12 per cent. and the opposition vote has increased 45 per cent. The ministerial majority of 152 in the house of commons has now been reduced to 106, falling on fiscal questions to fifty, or even thirty-five.

"No black bread in England, no yellow labor in South Africa" is the radical war cry, and so clearly is it sweeping the country that the ministers themselves admit that a general election at the present moment would mean a tory route. Better, urge some tories, to have the dissolution at once and let the liberals come into power, only to get entangled with the house of lords over the education problem and with the nationalists over home rule, these together producing a deadlock from which a whole-hearted acceptance of Chamberlainism would be a welcome relief.

But the ministry, with a working majority of forty, is not eager to abandon the sweets of office. An early dissolution is not probable, unless Mr. Chamberlain, returning home invigorated next month, should decide otherwise. He is still the real master in the ministry.

Woman's Week in Parliament.

This has been the womens' week in parliament. By a majority of 144 the house of commons accepted the principle of an extension of the franchise to women, most of the Liberals and a large majority of the unionists supporting the principle.

No one takes the vote seriously, for no one anticipates that a non-party bill of this character would get beyond the principle stage in the present congested state of parliamentary business, when only urgent government measures have the smallest chance.

YOUNG GIRL ATTEMPTS SUICIDE

Nora Golden Found Unconscious But is Brought Round

Toronto, March 23—Disappointed in love, pretty little Nora Golden, a maid at 232 Jarvis street, tried to end her life last evening. She retired to her room and one of the girls in the house happening to call at her room some time later, found her lying on the bed to all appearances dead.

Dr. Jenny Gray was hastily summoned, and assisted by some of the members of the household she put forth every effort towards restoring consciousness. Finally the girl was taken to St. Michael's Hospital She revived and was violently sick, but the physicians are uncertain whether or not her attempt on her life will have any serious effect. The medium used was a mixture of gin and some powerful narcotic

She is eighteen years of age, and came to this city about three years ago. Her family reside at Mount Forest. For some time she has kept company with a young man, and her attempted suicide is ascribed to a lover's quarrel. She had frequently announced her intention of committing suicide.

POPE'S CRITICISM ALARMS

Caustic Comment Stirs Grave Anxiety in Paris

Paris, March 24—The pope's caustic criticism of French policy, in the course of his address to the cardinal yesterday, is receiving serious attention in the highest quarters here. It has been regarded as sufficiently important to call for an official report which is now in the hands of the authorities. It was at first thought that the unofficial reports of the pope's utterances might be overstated, but the official version fully bears out the gravity of his remarks.

They related chiefly to past and prospective laws for the suppression of teaching by the religious orders. The pope characterized some of the steps as contrary to liberty and civilization and he also criticised the arraignment of three French cardinals before the council of state for writing letters to President Loubet against the proposed extension of the law.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor." —London "Truth"

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers :

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever nonassessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co

110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTEMNT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zaluaipa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 foot level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fue or many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United Stateswhenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put *the property on a producing and self-sustaining* basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred feet capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut *238,231 feet of lumber* and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to that end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 20 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $50 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $26 25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. water power of 500 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER. Secretary-Treasurer. Boulder, Colo.

BOOMS CANADA STOCK

Minister Says Breeding Will Become Chief Farm Business

INDIA AT TURNING POINT

Missionary Says Natives Will Rise Against England if Japanese Win

Ottawa, March 24—The Minister of agriculture predicts that the raising of live stock will become the chief line of Canadian production, even in Manitoba and the Northwest, and that wheat and other grains will take a subsidiary position. This seems to most people an improbable outcome of the development of the agricultural industry of the Dominion. but the minister is sanguine.

In Canada the basis of agriculture is live stock. As an instance of the great growth and increasing importance of this industry, it is pointed out that the increase in the export poultry trade during the past four years rose from $16,000 to $300,000. This is principally attributable to the proper catering to the demand abroad for fattened fowls. Of the total value of exports from Canada last year, amounting to $214,000,000, more than $114,000,000 worth were represented by *farm products.*

Land Still Untilled.

In the last census the farm lands in Canada were valued at $1,000,000,000, farm buildings at $400,000,000, farm implements at $100,000,000 and live stock at $50,000,000. With 471,000 farms, only 7 per cent. of the available land has been tilled by farmers.

The climate, soil and local environment enables the highest quality of domestic animals to be raised. These conditions have been augmented by careful breeding from pure stock, and now we are exporting largely to South America, Mexico and the West Indies. It is declared that this country is at present behind only one other country in the world in organization of its agricultural industry, and that one is Denmark, now the most dangerous rival to Canada in the British markets.

WILL OUST CHRISTIANITY

Shanghai, March 23.—A proclamation of the rebel leader Yuan, who at the head of a thousand opium smugglers, recently defeated a detachment of Chinese troops, says he has no intention of causing trouble to the Chinese or to the foreigners in China; but being determined to eradicate the false foreign religion he will raise 10,000 men, march to the Western Ocean and destroy the Christian religion of foreign countries. The proclamation especially condemns the Roman Catholics.

ANARCHISTS BUSY

Liege, Belgium, March 23—Another Anarchist outrage was attempted this morning, but the infernal machine, which was placed on the window sill of the residence of Police Commissioner Binet, was discovered in time to prevent any damage being done. The machine was identical with the one which was exploded on the morning of March 18 outside the residence of Commissioner of Police Laurent, and which wrecked the house killed an artillery officer, Major Papin, and seriously wounded half a dozen other persons.

How's This

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 1[illegible] tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 1[illegible] feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS*,

C. L. ARZENO, General Manager.

603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty-five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31.52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest, but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

For prospectus and further particulars address,

PYRAMID GOLD & COPPER MINING CO.

16 EAST KING STREET, LANCASTER, PENNA.

Deadly "La Grippe"

Or Epidemic Influenza is Caused by an Air Germ. The Most Scientific Remedy is Catarrhozone.

Two years ago, the medical journals commented widely on the marvellous success of Catarrhozone, which assisted very largely in stamping out the epidemic raging at that time. Cases that had resisted all other treatment were at once relieved and through the great healing powers of Catarrhozone further progress of the malady was arrested.

It is doubtful whether in the whole range of medicine a more lasting cure can be found. If a patient has any warning of the approach of La Grippe he has only to inhale the germ killing vapor of Catarrhozone a few times daily and escape entirely.

Even as a preventive of colds and catarrh it is a wise precaution to always carry a Catarrhozone Inhaler in your pocket. At the first shiver or sneeze you can ward off an impending attack by merely inhaling a few breaths of Catarrhozone Fatal consequences can often be avoided in this way. The Inhaler is beautifully finished and made entirely of hard rubber. It can be conveniently carried in the vest pocket ready for use in church, at work, in the theatre, street car, anywhere, at any time. The complete Catarrhozone outfit contains a large bottle of inhalant, sufficient to keep recharging the inhaler for two months. It costs $1.00 and is guaranteed to cure. Sold by all druggists or sent direct to your home by mail if the price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford, Conn. U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Purse Lost

On George street, near the Grand Central Block, on Thursday, a pocket book containing a small sum of money. Finder will be rewarded by leaving same at Times Bookstore.

Gardner Wanted

A man to look after garden and take care of horse. Salary $20 per month and brick house rent free. A splendid position for a steady and sober man with family. Apply at Times Bookstore for address.

Gift to Hockey Club

Three fully paid up shares, totalling $30, in the Peterborough Hockey Rink Company, have been generously donated to the Peterborough Hockey Club by Mr. J. A. Culverwell. The Club is deeply grateful to him for the great interest he has always manifested in its welfare. The shares are to be sold and souvenirs are to be purchased with the proceeds and presented to the members of the team.

Moving Pictures

Peterborough will see the first moving pictures in Canada of the Japanese attack on Port Arthur; also the great Chicago Theatre Fire, Uncle Tom's Cabin, and 40 other subjects by the London Bioscope Co., at the Opera House Friday night and Saturday matinee at 2.30 this week. Tickets, 25c; matinee 10 and 20 cents. Tickets to be had from the Fire Co.

Nearing Completion

The large addition to Mount St. Joseph is nearing completion, and promises to be an imposing structure and a credit to the Community of St Joseph and Diocese of Peterborough. Those who have been entrusted with the erection of this building have made good progress, and when the interior is completed the good Sisters will have an institution modern in all its details, and adequate to meet the pressing needs of the Order.

The Case Enlarged

Another immense crowd of curious citizens attended the police court, expected back in the Legislature yesterday morning, as it was expected that further evidence would be given in the case of Jesse Arples. His Worship Mayor Roger, who officiated in the absence of Magistrate Dumble, enlarged the case till Tuesday next.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 2-3 of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal

Mr. R. B. Rogers Entertains

Last evening Mr. R. B. Rogers, Superintending Engineer of the Trent Valley Canal, entertained the delegates of the Transportation Commission at the Y.M.C.A Hall last evening. Many stereopticon views were shown, depictive of scenes along this proposed water route, and each was thoroughly explained. All present enjoyed themselves, and complimented Mr. Rogers on his furnishing them with such a pleasant evening.

Lady Minto Returns Thanks

Her Excellency, Lady Minto, has sent the following letter of thanks to Mrs. C. B. McAllister, in view of the recent remittance to the Cottage Hospital fund, by Peterborough citizens;

Dear Mrs. McAllister;

I have received the generous subscription of $210 which you have been good enough to collect in Peterborough toward the Cottage Hospital endowment fund, and I should be so much obliged if you would kindly convey my grateful thanks to the subscribers for their liberal response and substantial assistance towards the scheme which I have so much at heart. It is a great satisfaction to know that these hospitals are being erected in needy districts owing to the sympathetic interest taken in them throughout the country and I am greatly indebted to you for the part you have taken in giving me such material assistance.

Believe me, with kind regards,

Yours sincerely,
MARY MINTO.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—The back streets are still in a bad condition, owing to the water and slush.

—The members of the Transportation Commission will visit the Lift Lock this morning.

—A hot summer is predicted by many scientific men throughout Canada and the United States.

—The report that there was some defect in the Auburn dam has been officially denied.

—Peterborough nurses are in favor of the formation of an Ontario Nurses' Association.

—A budding cherry tree is a curiosity to be seen at Mr. Wm. Cowie's on Simcoe street.

—Last year at this time the farmers were getting ready to plough. This year the snow plow is still kept handy for use.

—Judging from the number of Easter bonnets being bought by the fair sex, there will be a good attendance at church on Easter Sunday.

—A meeting of the Girls' Guild of St. John's church, was held in the school-room last evening, and a good attendance of members was present.

—One of the most artistic photographs ever made in Peterborough can be seen at the entrance to Mr. Whiten's stylish studio. Go and see it for yourself.

—The remains of the late Mr. Alex. Erskin, who died at Lakefield on Wednesday, were interred in the Little Lake cemetery yesterday afternoon.

—The Committee of Management of the Peterborough Protestant Home gratefully acknowledge the gift of a kitchen range from Mr. Adam Hall, and a clothes ringer from Mr. W. R. G. Higgins.

Mr. Frank Young, of Young's Point, returned from Toronto yesterday with his new boat, "Stoney Lake," which will be a splendid addition to the service on the back lakes. It will be the fastest boat plying on the back waters, having a speed of 16 miles an hour, being 23 feet longer and 4 feet wider than the largest boat on the lakes.

—An exchange tells of a school ma'am named Hatch who has taught seventy-two terms of school, never missing but *half* a day, when she got stuck in a snowbank. It is estimated the willow gads she has used placed end to end would reach across Manitoba and tickle the brown end of Ontario. The crayons she used if placed in an upright position, the top one would be frozen into a solid icicle. The quid of gum she has chewed placed side by side would reach from here to yonder. She has spanked several senators and judges, and several men have kept company with her who now have grandchildren; yet she still teaches the young idea how to shoot.

—When you open your newspaper it may cause you to feel some wonder if you know that in all probability, yours are the first hands that have ever touched its inside pages. The reason for this is that the paper is made from wood pulp. The woodman cuts down a spruce, it is hauled to the mill. There machinery strips off the bark, reduces the wood to pulp, and makes it into paper. At every turn, cranes, derricks, chains, cogs, rollers, steel teeth and other mechanical contrivances keep the material out of human hands. The immense rolls are wound by machines, loaded into cars and wagons by machinery, put into pressrooms and on presses by other machinery, and finally printed and folded without having been directly touched by any human hand. This is a mechanical marvel of today, which is, no doubt, duplicated in other branches of industry. It is very striking in the newspaper industry, which stands in the very front rank of mechanical perfection.

WRECK ON GRAND TRUNK

Switch Left Open Near Protestant Home—Engine and Car Damaged

At 3.30 o'clock yesterday afternoon an accident occurred on the Grand Trunk, near the Protestant Home. A single car was standing on the siding, and the signalman, John Lohdry, had been instructed to dig the car out, as it was frozen in too hard for the shunting engine to dislodge it. Londry was at work doing this when he suddenly heard a double-header coming up from the south. He had left the switch open and the double-header dashed down the siding. The engine was slightly damaged and the box car was almost completely demolished, but fortunately no person was injured.

Watch Found

Owner may have same by calling at 342 Stewart street, and paying expenses.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. R. F. McWilliams will not receive this afternoon.

—Mr. and Mrs. Chas. Armstrong, of Havelock, are visiting in town.

—Mr. George Parks, of the Bank of Commerce, Toronto, is home for his holidays.

—We are pleased to state that Mr. J. Stuart, of Stewart st., is recovering from his recent illness.

—Mr. William Miller, who with Mrs. Miller has been spending the past three months in Toronto with relatives, is in town for a few days.

—Mr. M. Thwaite, District Fishery Overseer, Oshawa, was a guest of the Snowden House, last night. He leaves for Keene and Hastings this morning, on an official visit.

—Mr. Thos. Robinson, of the firm of Robinson Brothers, was in town yesterday purchasing two carloads of bailed hay. He is staying at the Cavanagh House.

—Mrs. Bird and Mrs. Latimer, of London street, were called to Hastings yesterday morning by a message, saying that their sister, who resides in that village, was dying.

—Miss Josephine Morrow who has completed her course in nursing at Phelps Sanitarium, Battle Creek, Mich., has returned home. Miss Morrow graduated with honors in her work and is being congratulated by her many friends in town.

—The Rev. Walter Creswick, rector of Brighton, (formerly of Young's Point), who has been very seriously ill for the past two months, is now convalescent, and will probably be able to resume his duties in a few weeks' time.

JIST SUM THINGS

BY SI JONES

The ladies is all on pins and needles these days owin ter the "millinery openins" and all us men kin be narvous over is that its "purse openin" tim fer us. Wuman in perticklar about her headgeer, but she don't giv a continental fer her husband's bank book, when an Easter hat is in question. But ye kant blaim them so mutch. Tha works hard,—scoldin the sevvents an lookin arter there husbands, if tha don't jest behave ter suit there ideas, whitch is sometimes diffikult. Then agin, ye kin allus make sure, when tha gets a new hat, they'll attend church reglarly—for a while ennyhow.

Yesterda bein pretty fine I stroled round amung sum of mi ole merchant frends whom I knowd years ago an whom I've knowd ever since. Tha had sum fine displays I kin tell ye. We hev some of the finest stores in Canada right here in Peterburrow, an' there prices is to suit. Ye kin buy everything frum a paper of pins ter a parler suit or a full dress suit, jest as cheep as ye cood in Toronto, an yet there is sum peple who think becaus Eatons ir Simpsons is department stores an sells pins fer 2 cents a package insted of 3, that they are cheper than our own merchants. Tha never reckon the postage, but them sum people shood orter hev been born with longer ears, an we'ed hev less cause ter be surprised.

• • •

Doorin Aprile the ratepayers of our city will get a chanc to vote fer a collegit institoot. This hes been talked of fer sum time an most of thise solid headed citizens hev expressed theirselves in favor of hevin the new bildin. We hev er good Board of Eddication, an altho I'm not a man of larnin miself I know those fellers know their bizness. We hev a fine larg, growin city her an we shood be up with the times. If we didn't giv our boys a good eddication we kan't expeckt ter hev good citizens. An we kan't give them this eddication unless we hev the proper means ter do it. I understand that all our best bizness men are in faver of havin this matter ter the Board of Eddication, an them's my sentiments tew.

GRADUATE NURSES MEET

And Discuss Subjects of Interest to Themselves and Public

A meeting of the graduate nurses of Peterborough was held in the Y.W.C.A. parlor at 2.30 p.m. Wednesday. The attendance was most gratifying, seven different training schools being represented.

Miss Coleman, Lady Superintendent of the Nicholls Hospital, presided, and after the object of the meeting had been explained, gave a short address upon the need of "State Registration for Nurses."

After this followed a free discussion of this question, as well as the more immediate one, the formation of an Ontario Nurses' Association, and Miss Thompson gave a most interesting account of organization for protection of nurses, as well as the public, in the city of Cleveland. Miss Bolster then told what steps had already been taken in Canada in this direction, and in view of what had taken place in the past, expressed belief that the formation of a provincial association would be of great aid in securing their aim.

Miss Coleman then urged upon those present the advantage to be derived from attending the Toronto meeting.

Miss Wilmot and Miss Mahoney were appointed delegates from the Nicholls Hospital Alumnae and Miss Staunton also hoped to be present and help represent Peterborough.

Trent Valley Canal

The Trent Valley canal was begun in 1830. Since that time there has been spent upon it, according to the figures given by Mr. Emmerson in replying to Mr. Lennox, a total of $6,548,000. There are two ways of extending it to the waters of Lake Ontario. The route via Port Hope is estimated to cost $6,000,000 and the route via Trenton $4,000,000.

$500 REWARD! FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of *Dr. Pierce's Favorite Prescription* now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

The Vice-President Independent Order of Good Templars.

An experience which many women have was related by Miss Agnes Stebbings, of 251 East 5th Street, New York City, as follows: "I had very poor health for a year until life looked dark and dreary to me. Had headaches, backache, also pain, my sleep was broken and fitful. I longed for health. Tried several medicines but none were of any lasting benefit until I took Doctor Pierce's Favorite Prescription. I soon realized that I had found the right remedy. It helped nature to throw off the poisons that saturated the system, removed all pains and strengthened the digestive organs, and brought the roses of health back to my cheeks. This medicine if taken occasionally keeps the system in perfect condition, helping it to throw off the disease and consequences of exposure to dampness. I am pleased to give it my endorsement."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of 31 one-cent stamps for the paper-covered book, or 50 stamps for the cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

HE LIKES THE TIMES

A Paper That Reflects the Healthy Impulses of the Community

We are in receipt of a letter from a subscriber, which is liable to make this great family journal feel proud. Our correspondent says,

The paper that best reflects the healthy impulses of this community is the Morning Times, its excellencies being so numerous that to classify them would be tiresome, other than to mention its fearless and unwavering advocacy of those fundamental principles of law and order without which no safety is assured and progress is impossible. Since the first issue of this paper it has not deviated from a high and correct purpose, nor has it failed in condemnation of wrong, however popular the habiliments in which it has been clothed. In vigorous fashion The Times has disapproved of the frequent display of violence in labor disputes, and while it has stood for condemnation of this wrong, it has done so in the interests of labor itself. No class can lose more by these disturbances than does the element which depends upon mutual understanding for a safe and secure foundation of employment. So plain is this proposition that no argument is necessary, and while it required a bitter experience to convince the vicious, ignorant and pig-headed of their error the lesson has made so deep an impression that it will be regarded as well worth the cost. In matters municipal The Times has always been regarded as a fearless advocate of the rights of the people and a protector to the ratepayer.

(Operating in Gilpin County, Colorado)

Capital stock 1,500,000 shares. In Treasury 1,000,000 shares, Fully paid and non-assessable.

Owns seventy acres of patented ground in one of the richest sections of Gilpin County.

Five lode claims all of proved value.

Three miles of placer territory that is known to carry good values.

There are great Fortunes in Placers.
Placer Mining gives large returns.
Placer Mining brings quickest profits
Placer Mining insures large dividends.

A small block of charter member stock is now offered at FIFTEEN CENTS PER SHARE for the purpose of equipping the placers with a Hydraulic plant for their operation. CASH OR MONTHLY INSTALMENTS.

A clean, legitimate proposition.
Best of references will be furnished.
For prospectus and full particulars address

The Cooperative Investment and Exploration Company
311 Quincy Building - Denver, Colo.

Are You Looking FOR A **Good Investment?**

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for. and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

75,000 RUSSIAN TROOPS NEAR LIAO-YANG

Japanese at Shan-Hai-Kwan are Secretly Enlisting Chinese as Regular Troops, Over 3,000 Russians at Wiju.

The local branch of the Red Cross Society is making energetic preparations to aid the wounded and refugees. It is appealing for funds, and Yuan-Shih-Kai, Viceroy of Chili, and other officials have promised financial and material support. Five hospitals are being built, and medical missionaries will give their services.

It is reported that Japanese at Shan-Hai-Kwan are secretly enlisting Chinese as irregular troops.

New Chwang, March 25—A heavy rain is prevailing and the ice in the river is rapidly shifting. Boats are now crossing the river. The first mail steamer is expected to arrive Saturday.

A civilian who has arrived from Liao-Yang reports that there are 70,000 Russian troops between Liao-Yang and Hai-Cheng.

The nervousness caused by expected looting is being increased by a constant influx of strange natives, who are supposed to be brigands. House-holders are arming their servants.

Seoul, March 25—According to a report from the Corean Government of Wiju, 4,500 Russian troops have crossed the Yalu River since Feb. 1, of which 3,000 are stationed at Wiju.

CZAR SAYS THAT WAR MUST END

By a Complete Victory For the Russian Bear

THE CZAR A BRAVE MAN

Russia Cannot Afford to Boycott the United States

St. Petersburg, March 25 — The Czar is determined that the war shall be ended in Japan, and that at no far distant date. The peace treaty must be signed in Tokio, he declares entirely to Russia's own terms, and the emperor of Corea will awake to find that he is a subject of the Czar.

U. S. AND RUSSIA.

St. Petersburg, March 26 —Minister of Interior Von Plehve said yesterday.

"Why should America be hostile to Russia? You want commerce, and by opening up Manchuria we further your interests. Russian and American interests do not clash. One compliments the other. Russia is an agricultural nation.

"There is room for us both in the Far East. We do not desire to hamper American industry in China but neither can America expect that will neglect ours."

Prof. Ozeroff of Moscow University declares that it would be "absurd" for Russia to declare a boycott against American commerce. Such a move would seriously injure Russia herself.

If the importation of American flax were stopped all Russian linen manufactories would have to shut down and hundreds of thousands of workmen would be without bread. Prof. Ozeroff said that at a time when Russian commerce is suffering badly from war, to increase the people's difficulty by such homeopsical movements as this intended boycott would be a crime against the nation.

Washington, March 26—Count Cassini said yesterday;

"I cannot understand why there should be any sympathy for Japan in the United States. The war was unprovoked and unnecessary.

"The idea of Japanese success as an end of this war is preposterous. America is getting most of her news from Tokio, and that accounts for the misleading statements which have converted a few cunning strokes by a treacherous nation into decisive victories.

"Russia is well able to defend her rights and her authority, and when she strikes it will be in a manner worthy of her strength and dignity. The principal achievements of Japan thus far have been an attack at midnight on ships whose crews were asleep and unaware of the existence of war, and a fight at Chemulpo between two Russian ships and a large Japanese fleet.

"In both cases Japan showed a significant disregard for the usages of civilized nations."

CZAR A BRAVE MAN.

St. Petersburg, March 26—If the Czar does go to war it will be principally to maintain peace between commanders Kuropatkin and Alexieff.

In every war Russia engaged in, the commanding generals fought each other, each trying to make his confrere lose as many engagements as possible.

The Czar is afraid of a repetition of this fatal habit and will probably depart for the East the moment difficulties arise between his generals.

Though Nicholas doesn't look it, he is credited with much fortitude. True, he does not like the idea of being blown up or poisoned, but if he went into battle "he would prove himself a man," says those who know him best.

Alexieff and the other commanders are doing their utmost to keep the Czar at home, also the grand dukes, his uncles and nephews, who exhibit an outward desire to spill their blue blood for the fatherland.

"As a matter of fact, royalty is a nuisance in the field," said a leading general to your correspondent. "It needs always looking after, and usually a number of crack infantry and cavalry regiments have to be detached to guard the precious life of every single prince."

BASKETBALL.

Mr. Ernest Best, the able manager of the Peterborough Y.M.C.A. Basketball team, has arranged for the team to take a trip in a couple of weeks. One of Toronto's best teams is expected to play here next week, and during the following week the Y.M.C.A. "Best" team will play in Toronto and Hamilton. The local boys are practising hard, and expect to do honor to themselves in the two cities they intend visiting. The Y.M.C.A. team will be composed of the following players; Forwards, N. Miller, E. Fitzpatrick; centre, Hodgson; backs, W. Campbell, W. Richardson.

STEAMSHIP LINES HAVE RATE WAR

Struggle Will Affect the Port of Montreal

MR. HANNA ON SITUATION

Part the Cunard Line Played in the Transaction—Traffic Returns

Montreal, March 26—There is a rate war raging among the big steamship lines. It has already affected the rates of lines plying to and from Montreal and Liverpool. It is a sharp and bitter struggle and is playing havoc with many of the companies who are standing and watching the progress of the battle.

It is a fight for steerage business.

The whole question hinges on the withdrawal of the Cunard line from the steamship agreement which regulated the schedules. That withdrawal was made in July last. Rates, however, were not disturbed until recently, when an agreement was entered into by the Cunard Company, and the Austro-Hungary Government which practically gave the Cunard line the monopoly of all steerage passengers from the ports of that country for a period of ten years.

This step aroused the competitive spirit of the continental lines, who depend for a great portion of their revenue on the very passengers that the Cunard were after. The continental lines retaliated by making a large reduction in the rates for passengers from Scandinavian countries. The Cunard people had previously carried over 40 per cent. of these passengers. The gauntlet was therefore thrown down to the Cunard Company by the continental lines and the battle was on. The Cunards ignored the action of their competitors and the dropping of the rates began.

THE FIRST BIG CUT.

The first big cut was made by the Cunard Company when they reduced the rates from Scandinavian ports for steerage passengers to the United States from $30 to $18. The continental lines met this attack by reducing the rates from continental ports such as Rotterdam, Antwerp, etc., from $34.50 to $24.50. The English and Canadian lines were affected by the loss of the Scandinavian passengers to a considerable extent.

That was the information given to a correspondent on enquiry at the Allan and other offices of lines plying to this country. Mr. George Hannah, of the Allan line, said that the rate of steerage passengers on their lines, from Scandinavian ports had been reduced $2.

Meantime the war is said to be waging merrily and as the rates on the continental lines were always high the cut is playing havoc with returns.

The Trent Valley Canal

The following is from Friday's Toronto Globe;

J. H. McClelland, a wholesale coal and wood merchant of Peterborough, made the most effective address of the afternoon. He was brief, practical and enthusiastic, and was heartily applauded by the audience. Dealing first with freight rates on fuel, he furnished figures showing how with a water highway Peterborough could save from $15,000 to $20,000 a year on fuel freights. The reason, he said, for the demand on a large scale for the completion of the Trent Canal was the rapid development of the northwest. That development had raised the problem of transportation into a national issue, and he would venture to say that had that development not taken place the present royal commission on transportation would not have been appointed. He asserted that if the Government could lease the power privileges along the canal between Peterborough and Trenton to the same advantage that they had leased them between Peterborough and Kirkfield, a return of four per cent. could be obtained upon the outlay required to complete the canal.

Mr. Bertram said Mr. Clelland had introduced an entirely new phase of this question in the matter of power leases, from which the Government might derive a revenue, for if the investment could be made to pay for itself it became an entirely different question. They wanted all the information on that subject they could get.

Moving Pictures

There was a good attendance at the entertainment put on in the Opera House last night by the London Bioscope Co. The pictures were of the best seen here yet, and these were interspersed with musical selections, feats of ventriloquism, etc. There will be a matinee this afternoon.

ADVERTISE IN THE TIMES

Two Views of the Harbor of Shanghai, always a Centre of activities in the Far East.

CANADA UNITED ON PREFERENCE

Sir Chas. Tupper Interviewed in London

THE CANADIAN BOUNTIES

Sir Hibbert Believes the Matter Could be Easily Arranged

London, March 26—Sir Charles Hibbert Tupper, who is now in London in connection with the Yukon case, in an interview with a correspondent, said that the English people should understand that Canada was unanimous for the preference. That fact would be more clearly shown during the debates of the present session at Ottawa. The Conservative party were absolutely united on the subject. The reason that more had not been said is that Canadians do not want the British people to think that Canada cannot do without the preference. The preference is desirable from a wide Imperial standpoint, and would be a powerful incentive to the British settlement of Canada. And if the Colonies made too much of a fuss just now, the British electorate might think that the preferential movement was solely for the benefit of the Colonies.

THE CANADIAN BOUNTIES.

Discussing the Canadian bounties on iron and steel, Sir Hibbert Tupper said that Canada could not, of course, agree to destroy her industries, but would give a fairer field for the British manufacturer than for foreigners. If the British people valued the preference at all, there ought to be no difficulty in negotiating the whole question. The Colonies had already made such tariff concessions as preclude the notion of their selfishness.

THE ALASKAN DESISION.

Regarding the Alaskan decision, Sir Hibbert condemned the Canadian Government for laying the blame on Lord Alverstone. Lord Alverstone probably had an explanation and could give it if he cared to, or if the British Government so desired.

TREATY-MAKING.

Sir Hibbert ridiculed Sir Wilfrid Laurier's treaty-making demands, and said that the Government, making a treaty, must have the power of enforcing it.

Municipal Auditor's Report

The following is taken from the Provincial Auditor's report for the year, 1903;—

County of Peterborough—I found the County Treasurer's books in such a condition that until they were properly written up I could not make my usual inspection. I notified the Treasurer to that effect and he was to let me know when the books were ready, which has not been done. I thought it better under the circumstances, to let the Warden and Council know the real state of affairs, which I did in a letter dated the 8th October. No reply as yet received.

WEATHER NOTES

Colder.

AUSTRALIA WILL GRANT BOUNTIES

To Iron and Steel Industries of the Commonwealth

IS DISCUSSED IN ENGLAND

Chamberlainites Say That Mattea will be One for Future Negotiation

London, March 26—Australia's desire to follow Canada's example by the Government Bill now before the Federal Parliament at Melbourne, for granting bounties to the local iron industries, causes much comment here.

"This," says the Daily News "is one of the rocks on which Chamberlain's scheme on the Colonial side is bound to go to pieces."

The Chamberlainites reply; "Nothing of the sort. It has first to be decided whether these Canadian and Australian bounties do really operate in the restriction of British trade. Many British iron and steel manufacturers say that the Canadian bounties have had practically no effect here. If, however, they did operate prejudicially, the matter would naturally come under consideration in the Intercolonial Conference, charged with framing a reciprocal Inter-Imperial treaty for subsequent submission to each legislature."

Kroupatkin to Lay Down Peace Terms In Tokio and Defy the Whole World

Will Wipe Japanese out of Existence with New Fleet

Cares Nothing of Intervention of the European Powers

London, March 25.—What General Kroupatkin says of Russia's new fleet, after pointing out that the Russian fleet at present is useless. "The fleet will raise the blockade of Port Arthur, and the balance of naval power will be reversed. To every Japanese ship we will be able to oppose one ship and a half. We then shall claim of our sailors important and decisive work. At the same moment we hope, with the help of the Almighty, to have driven the Japanese out of the continent to the sea. Europe may talk of intervention, but she may meddle or act how and when she pleases. We shall not concern ourself about her. It is at Tokio and nowhere else we shall sign the conditions of peace."

The correspondent who sends this telegram adds; "That is what General Kroupatkin said. I vouch for the truth of these statements, of which statesmen can make their own profit."

BRITISH MEN-OF-WAR ON THE LOOKOUT

Constantinople, March 26—British men-of-war are constantly patroling the Bosphorus as the conviction gains strength that Turkey has secretly conceded to Russia the right to pass her Black Sea fleet through that outlet.

If any attempt will be made day or night, war between England and Russia will be instantly declared, or rather will be opened without declaration, for the British ships will fire on the Russians on sight.

The Turkish government informed the British ambassador that her batteries at Kawak and Poiras are ready to fire on Russian ships attempting to pass, but the English remain unconvinced and insist upon doing their own patrol duty.

The British man-of-war Harrier is stationed at the mouth of the Dardanelles with decks cleared, and several other British ships are at Therapia.

—A good story is told of a Peterborough County farmer who came into the city with a jag of wood. Although he was asking only the moderate sum of $9 for it, he could not sell it. One cheap guy offered him $6.50, but it was refused, and the farmer decided to stay in town until next day, in the hope that he would then be able to get something like a decent price. When he went out into the hotel yard the following morning the wood was gone, stakes and all, and on the sleigh was this placard; "Wood quite satisfactory. Will take another load at the same price. Moses Muggins."

Oshawa will have a senior lacrosse team on the field this season.

BELKAN TROUBLE IN NEAR EAST

Turks Surround Large Force of Albanians

REVOLT NOT SUPPRESSED

Albanians Refuse to Recognize Reform Scheme of Powers

Salonica, Macedonia, March 26 — Twelve batalions of Turkish troops, commanded by Shakir Pasha, have surrounded 10,000 Albanians at Babatope. Shakir Pasha has asked for reinforcements. Ten additional batalions will be sent to him. Pending their arrival Shakir Pasha is negotiating with the Albanians.

London, March 24—The announcement from Salonica, March 3, that the Albanian revolt had been suppressed, was, it appears, somewhat premature. It originated from Turkish sources, where it was believed that the acceptance of the offer of exemption from the cattle tax at Ipek, Albania, would satisfy the Albanians. New evidences of a determined revolutionary movement were reported from Mitrovitsa March 4 and 9, and it was announced at Constantinople that the Albanians had increased their demands, refusing to recognise the reform scheme of the powers, and demanding the withdrawal of new taxes, the abolition of the new civil tribunals, exemption from military service outside their own province, and the pardon of Hassan Bey, the revolutionist, who was exiled in 1903. Since then Shakir Pasha, with a large force, has been parleying with the revolutionists under instructions from the Porte, which is desirous of settling the Albanian movement, so as to avoid complications while negotiating with Bulgaria, and in the face of continued troubles in Macedonia. The dilatory tactics of Shakir Pasha are reported to have emboldened the Albanian revolutionists, who, according to the meagre information contained in the despatches received since March 9 have been massing at various points, and it would appear from the Salonica despatch received today, which was the first report of any considerable assembling of the insurrectionists, that Shakir Pasha is still continuing the negotiations looking to a settlement, and that the despatch of reinforcements may be intended as a demonstration in force, with the object of securing a final acceptance of his terms.

IN BRITISH TERRITORY

Berlin, March 26—The governor of the Cameroons telegraphs that the native revolt has spread across the river into Nigeria, which is British territory. A British custom house was attacked by the rebels on the 10th of March.

BY OUR SPORTING EDITOR

FOOTBALL.

The Y.M.C.A. Football Club held a meeting last evening in the Association Hall and elected the following officers for the ensuing year;

Hon. President—Hon. J. R. Stratton.

President—W. D. Campbell.

Vice-President—B. Simpson.

Secretary-Treasurer—J. T. Anderson.

There were about fifteen present, and the question of suits and practice nights were discussed.

The Quaker Football Club held their second meeting at the Crown Hotel Thursday evening when the election of officers was continued from last meeting, resulting as follows;—

Hon. President—Mr. A. P. MacDonald.

President—Mr. M. J. Kirn

1st Vice-President—Mr. T. J. Grant

2nd Vice-President—Mr. O. Callender.

Manager—Mr. J. E. Sullivan

Sec'y-Treas.—Mr. I. D. Moore

Captain—Mr. W. E. Perdue

Team Committee — Captain, L. Brooks and J. Guerin.

Executive Committee—Secretary, O. Callender and F. Guerin.

The colors of the club will be red and white. It was decided that the team practice on Monday and Thursday evenings and they will get out as soon as the Oval is in shape. The meeting was well attended and the members are all enthusiastic. The prospects for a successful season are bright.

LACROSSE.

The annual meeting of the Athletic Lacrosse Club was held in the Y.M.C.A. Hall last evening, and a goodly number was present. The officers elected were;

Hon. President—H. R. H. Kenner.

President—J. J. Howden.

Vice-President—Dr. Wightman.

Secretary-Treasurer—E. Best.

Assistant Secretary—R. M. Glover.

Manager—Fred Clarke.

E. Best and F. Clarke were appointed delegates to the C.L.A. Convention at Toronto on Good Friday.

The Club decided to keep the same name, but did not decide about colors. The Treasurer's report was submitted by Mr. H. Rush. Mr. R. M. Glover was chairman of the meeting. Mr. Geo. Robertson acted as secretary in the absence of Mr. Clarke.

It was also mentioned that Mr. J. J. Howden would like a meeting of the different sporting organizations of the city to be called for the purpose of arranging for a permanent athletic grounds at Riverside Park. The representatives appointed to attend this meeting were Messrs. E. Best and F. Clarke.

GOLF.

The annual meeting of the Ladies' Golf Club will be held on Tuesday afternoon at four o'clock.

LIQUOR TRADE DRAWS THE KNIFE

Prohibition Agitators Compel Declaration from Other Side

POLITICAL GOVERNED VOTE

Strong Words From Wine and Spirit Journal

Under the caption of "The Situation in Ontario," the Wine and Spirit Journal for March just issued, speaking for the wine, spirit and allied industries, gives a straight talk to the government to beware.

"There is now but little doubt that the retail and hotel trade in the Province of Ontario will shortly be face to face with restrictive legislation," it says. "As it seems quite certain that our industry is to be dragged into the arena as the football for strategical politics, it is as well to definitely announce that the liquor vote in the Province of Ontario, with all its auxiliary support, must and will become a single political unit, whose support must and will be extended to that party which best protects its legitimate interests. Individual freedom in politics, which the trade has long sought to observe, must in all probability come to an end—and there is no good reason why we should be other than perfectly frank in the matter.

Politics Governed Vote.

"If the temperance problem in this province was being dealt with on purely moral grounds, and in response to an honest public opinion, there would be nothing left for the trade to do but to bow to the will of the people. As is quite well known, however, the referendum of 1902 was a political move, and 75 per cent. of the vote, both for and against the measure, was instigated on political motives; and it was therefore in no way an expression of public opinion. The measure now being proposed by the government, whatever its ultimate form may be when submitted to parliament, will be prompted solely by political considerations, and the trade, reluctant as they may be to be dragged into politics, have no recourse but to enter the fray as a solid body.

To Be Met by Organized Trade.

"The small coterie of rabid prohibitionists who are responsible for harassing the government at present, should learn the valuable lesson of 'leaving well enough alone.' The liquor trade of the province have persistently and consistently minded their own business, observed the laws, and refrained from attempts to influence or interfere with the legislature of Ontario. But the present attempt of the professional prohibitionists to take advantage of the weakness of the government and make harassing and absolutely unnecessary legislation the price of their continued support must be met by the open and active hostility of the organized trade.

Represent Balance of Power.

"Experience has repeatedly shown the solidity and power of the liquor vote and any of the administration or party pressing that vote beyond the point of reason are simply inviting their own downfall. The trade in this province represent beyond all doubt the balance of political power; and while it has always been the principle of the trade that this weapon should not be drawn except under extreme provocation, it begins to look very much as if the prohibition agitators have at last compelled us to draw the knife completely from its sheath. This cold fact is well worthy of being laid on the table, while the question of 'how much the trade will stand' is being discussed by the Ontario government."

AN INTERESTING PICTURE

Members of Five Generation Taken by Mr. G. E. Whiten

One of the most interesting photographs ever seen in Peterborough is that now possessed by Mr. F. J. Doughty. The photo is of five generations, and the representatives are; Mrs. F. J. Doughty and her son Charles, the former's mother, Mrs. Chas. Edwards, of Lang, also Mrs. Doughty's grandmother, Mrs. John Edwards, of Keene, and lastly the latter's mother, Mrs. Murdock, of Victoria County, who is, of course, the great great grandmother of Charlie. She is 77 years of age, while the little fellow is only six months old.

The different members of this long-lived family came to Peterborough especially to obtain this excellent photograph, and the remarkable feature about it is that the youngest of the group has nine grand parents living.

The group was taken by Mr. G. E. Whiten, and is an excellent piece of work. This unusual photograph may be seen at the Studio, 188 Hunter street.

Purse Lost

On George street, near the Grand Central Block, on Thursday, a pocket book containing a small sum of money. Finder will be rewarded by leaving same at Times Bookstore.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 26 1904

THE TRADE OF NEUTRALS MENACED

Reports that one or more Russian fleets are at sea revive the interest of neutrals in the question of trade with the belligerent countries. It will be remembered that Russia made an extreme interpretation of contraband of war in her proclamation. She threatened to seize, not only arms and munitions, horses, mules and army supplies, but coal in all cases, food or clothing ordered by or consigned to Japan, machinery for ships and telephone and telegraph materials. These latter articles always have been considered contraband in some cases; but we cannot remember that any power ever has gone so far in condemning them since the treaty of Paris.

When this proclamation was issued it attracted little attention. Japan had swept the Russian fleets from Eastern waters and locked up the remnant of them in fortified ports. The Russian ships coming around through Suez had turned back to the Mediterranean after loitering in the vain attempt to pick up some British colliers. Neutral traders had about come to the conclusion that they were safe from Russia. Japan was another matter. All shipments from Canada and the United States to Russia by the Pacific were countermanded. Traders selling to that country had to ship to Europe and take their chances over the Siberian railroad.

But shipments to Japan were made with the greatest freedom from America, and we think from Europe also. Colliers from Wales are strung all along the route. There are reports of horse buying in Hungary. Army supplies have been bought liberally in this country and forwarded without fear. We do not hear of arms and other strict contraband; but it is certain that many cargoes of food and clothing are afloat in the Pacific. Doubtless these are consigned to the government, though Japan may have been more cautious. In any event, it is certain that the ships will be intercepted, if it is true that Russian cruisers are ranging the Pacific, and will have no end of trouble to get clear.

This may make complications. Neutral trade is the explosive question in modern wars. Nations have to use the greatest tact to avoid trouble over it. Great Britain seized German shipments to South Africa in the Suez canal, and then paid damages to avoid a painful dispute. In the Spanish war, the United States seized as few goods as they could and released or bought those they could not help seizing. We understand that Japan has avoided trouble by buying neutral goods seized on the way to Russia. Russia can hardly do this with goods seized on the way to Japan, because she could not get them to her ports. In fact, we do not see what she can do with them since the Alabama method of sinking and burning has gone out of fashion. Perhaps the Japanese navy will save all trouble by gathering in the escaped cruisers before they can intercept any ships.

EDITORIAL COMMENT

The boys will be allowed to smoke cigarettes until their mothers can cook well enough to wean them from the habit.

China has denounced the treaty with the United States under which she agreed to the U. S. exclusion of Chinese. This means that in six months the treaty will be abrogated. It is feared that there will be difficulty experienced in the U. S. Senate in framing a new treaty.

There will be no Lord's Day legislation introduced into the Ontario Legislature this session, owing to the uncertainty on the question whether such legislation lies within the jurisdiction of the Province or of the Dominion. But the attitude of the government is friendly toward a reasonable measure.

A newspaper without opinions is like a man without brains, like a woman without sympathy, like a youth without enthusiasm, says the Chicago Chronicle. And it might have added that a newspaper that has not the courage of its convictions may as well not have any opinions. And a newspaper whose "opinions" are machine-made is a monstrosity.

A London despatch intimates that the French shore difficulty has been disposed of by negotiations between Great Britain and France. If that be true a very troublesome question is out of the way. It will greatly influence Canadian sentiment toward the admission of Newfoundland into the Dominion. We hope to see Sir Wilfrid add such union to his many achievements for the good of Canada.

IN TROPICAL MEXICO

THE BADGER MEXICAN PLANTATION COMPANY'S ENTERPRISE.

Large Area of Fertile Land Purchased—Situated in the Beautiful Trinidad Valley

One of the most laudable of ambitions is financial independence, and this can only be attained by personal effort which involves investment. The advantages of associated capital are becoming more and more apparent every day, and the individual of limited means must give way to cooperation of money, of brains and of power. But the greatest caution, the greatest forethought, and the best judgment must be used by the small investor, and a careful perusal of the history of the Badger Plantation Company, will show it to be one of the safest investments in America today.

A commission of solid business men, whose experience and investments in tropical Mexico had thoroughly demonstrated the profits made in the raising of rubber, sugar cane, coffee and other products, determined to secure the best attainable lands suitable for that purpose. These able men journeyed to Mexico and saw for themselves the excellent tracts of partially developed lands, and, after considering the results already obtained, they purchased 3,650 acres. This land is in the famous Trinidad valley, in the state of Vera Cruz, and no other district in Mexico is the home of so many rich private American plantations. Situated on the Vera Vruz and Pacific Ry., and also on the Trinidad River, the best river and rail market facilities are afforded.

The soil is of remarkable fertility and of great depth, the accumulation of ages of decay of the richest tropical growth, such as now covers the land. The rainfall is abundant, exceeding 100 inches annually, and frosts are unknown, while on the other hand the temperature rarely exceeds 100 degrees. Not 100 acres of this large area of land are waste land, and good roads, well built, connect with all the neighboring towns and plantations. Over twenty-five thousand trees have produced for the past two years, an average of one pound of the highest grade coffee per tree, and there is an equal number of rubber trees, ranging in age from three to seven years. In addition to these, over seven hundred thousand trees will be planted this year. The plantation equipment is most complete, and consists of brick houses, the best of machinery, and fenced pastures well stocked with horses, cattle, pigs, poultry, etc. A sugar cane nursery has been planted and over one thousand acres of cane will be planted upon the fertile river flat.

This Company is incorporated under the laws of the State of Maine, with a capital of $1,000,000 and one-fifth of this has been used for the purchase of its lands and their valuable improvements. The balance of the stock is in the treasury of the Company, to be sold only for development purposes, and the honest purpose and businesslike management of this enterprise is thus evident, and should commend itself, without question, to all thoughtful investors. Mr. Roland Kidd, of Peterborough and Toronto, is the local fiscal agent of this progressive concern.

Gained Ten Ponnds

His Weight increased Many Pounds His Health and Strength Completely Restored by Ferrozone the Great Food Tonic.

Mr. A. L. Godfrey is well known to everyone in Victoria, where he has been engaged in business for many years. "Last winter I had la grippe" he writes, "and recovered very slowly. When well enough to leave the house I was many pounds lighter than my usual weight. My appetite was poor and my blood was thin. Ferrozone did me untold good. I recovered my weight in a short time and have felt like a different man ever since. I consider Ferrozone a wonderful tonic and a first class remedy for people who are run down. My reasons for believing Ferrozone so good are due to its bringing me health after doctors and many other medicines failed. My weight has increased at least ten pounds, my blood is strong and my system is in a very vigorous condition. Ferrozone did it."

FERROZONE PRODUCES NEW TISSUE

From Nelson, B. C., comes the strongest possible proof that Ferrozone is a flesh-making, strengthening remedy. Mrs. G. C. Alker writes:—"A few months ago I was run down, tired, and nervous. I had once before been benefitted by Ferrozone, when living in Boston, and started using it again. Ferrozone at once gave me a splendid appetite, toned up my nerves, and actually made me fat. I used Ferrozone regularly and increased my weight several pounds. My cheeks filled out and became rosy. My nervous trouble disappeared, and I haven't had a single day's illness since using Ferrozone."

Ferrozone supplies the system with nourishment in a condensed form, and builds up weak constitutions to a state of permanent good health. It restores all weak organs, perfects digestion, enriches the blood and fortifies the nerves.

If it is better health you are seeking, you can find it with Ferrozone. Don't be misled into accepting a substitute or any article represented as "just as good." Ferrozone is unexcelled and it is in your interest to get it when you ask for it. Price 50c per box, or six boxes for $2.50, at all reliable druggists or by mail from N. C. Polson & Co., Kingston, Ont. and Hartford, Conn., U.S.A.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

THE CLUTCH OF CHANCE

"The race is not to the swift, nor the battle to the strong, . . but time and chance happeneth to them all."—Eccl. IX:II.

For the man who wins, there is pomp and pride,
And the laurel wreath, and the cheer, beside;
And for him who fights but in fighting, fails,
There are echoes still of the trumpet calls—
But there is no balm in his bitter lot
If he meets defeat with his fight unfought.

There are sore defeats that are all unknown,
And they send their gloom to the proudest throne;
And they plunge their shade on the humblest life—
For they bring no stress and they bring no strife;
By a time or chance is the loser caught,
And he knows defeat ere his fight is fought.

There are singers mute—and their hearts are wrung,
And their souls are thrilled with the songs unsung;
There are men who dreamed of a picture fair—
But the hand is still and the canvas bare;
And the others, too, with the goals unsought—
They have seen defeat with their fights unfought.

If a man goes down with his sword aflash,
And has heard the lance and the armor crash—
If he loses then, he will shed no tears;
He hath dealt his blows, he has heard the cheers;
But is soul must shrink from he knows not what
When he meets defeat with his fight unfought.

—Chicago Daily Tribune.

MISMATED

By

WILLARD JONES

(Copyright, [illegible], by Daily Story Pub. Co.)

TWO men and two women, two romances and two tragedies—and the sequel, that's all.

But stay, perhaps it was four romances and four tragedies. Judge of that for yourself from the story.

It was all natural enough—the most natural thing in the world, and very strange and unconventional, too. Two splendid young fellows, two attractive girls—all comrades from childhood. One young fellow an artist by nature and environment, by heredity and cultivation; the other a matter-of-fact boy gifted with an allotment of common sense which amounted, if he only had known it, to positive genius; and two girls, one a beauty of so rare perfection that she would fill every aspiration of the most artistic mind—form, features, coloring, expression, all so perfect that she would have been an ideal model for any painter, sculptor or poet; the other a peculiar sort of girl, with none of the conventional attributes of beauty, irregular—even homely— of feature and complexion, and so far devoid of attractions and graces as to repel rather than attract admirers and friends, except that she was lithe of body and springy of step —but gifted with a fire of eye and a vivacity of movement and of manner that compelled attention and admiration even while the keen analysis and biting sarcasm of her original mind repelled it. With the one there was the attraction of physical perfection, with the other the more insidious influence of essential vitality.

Of course, Clarence Cole, artist that he was, was enamored of Gracia, with her soft, correct lines and rich glowing color. And equally, of course, John Bedwell, became the slave of Alice Beattie.

And here lies the story.

For years all four had been chums and companions. Clarence and Gracia had been accepted juvenile sweethearts, as also had John and Alice. So, in the natural order of things there were two weddings, and the four young people were paired off in matrimony as they had been as sweethearts, took a wedding trip together and settled down to live happy ever afterward after the manner of heroes and heroines in all well-regulated stories.

And now comes the strange part of it all.

Odd as it may seem, after these two well-paired young couples had been married for a twelvemonth and had lived most happily, it all began to pall upon all four of them—in a way.

For the first few months Clarence lived in a perfect dream of bliss. All of the perfection of Gracia's physical perfection sank into his artistic consciousness. And Gracia—well, what more had she to desire than this handsome and talented consort—perfect in form, manner and devotion and advancing all the time in the estimation of the world?

And yet there was not the most perfect harmony of life and impulse with these two—and as it may seem. Clarence sought,—alas, in vain—beneath the surface perfection of Gracia's wonderful beauty the real attributes of character promised so abundantly. And he found them not—alas and alack, he found them not! He saw all the promises turn to ashes and finally suspected that his beautiful wife was but a whitened sepulcher—from his point of view. Of course, he asked too much, being an artist.

And Gracia? The long months brought to her also the bitterness of dead leaves. Her handsome and talented husband did not yield to her the adoration and happiness she had so warmly craved. She could not guess why, but there was something lacking —something real and essential to her nature. As the months went by he appeared more and more to her as a promise than a reality. She was not at all an idealist; she wanted to see and feel—not dream.

And so they drifted apart and came almost to despise one another, because, alas, they understood one another not at all.

And the other couple—John and Alice—life went almost as badly with them. Alice, with her superabundant intelligence and vitality, grew to feel as the months went by that her sturdy and commonplace husband did not understand her. She appreciated his sterling worth and his unyielding reliability, but she could always touch bottom—there was no depth to explore. Her unconquerable vitality rebelled at the hard-and-fast bounds she found in character. She adored his and she told herself again and again that he was the sort of man to tie to —one of the salt of the earth; but her unquenchable spirit rebelled at bounds and rules, and it got so she fairly hated figures, facts and reason. She longed for flights into the mystic realm of ideality, into those realms where vital forces could override rules and methods.

Well, you can see for yourself that John could not understand anything of that sort. Honest, conscientious, sterling John could move only along the lines of his own understanding. And he resented, in a manly and honest way, the breach Alice had placed between them. He had disregarded no obligation, no duty, no sacrifice. He had been altogether unselfish and faithful, and somehow he had not succeeded in welding his life with that of his wife. His hopes, his ideals had been shattered.

Now, mind you, all this time, while these thoughts and ideas had been percolating through the minds of these four simpletons, they had, all of them, been constant companions and friends.

So it was that the artistic mind of Clarence began to appreciate the depths and wealth of the nature of Alice—contrasting it to the narrowness and poverty of that of Gracia. And by that same token Alice awoke one day all of a quiver with an appreciation of the tremendous sweep of the nature of Clarence along the lines of her own aspirations.

It was a dangerous discovery, and as it came to these two people it nearly floored them.

The harder they fought the more tense the new situation grew. To the soul of each the commonplace qualities of wife and husband grew more oppressive as they realized in each other the joys of perfect appreciation and perfect fellowship. The end was certain as the multiplication table, and finally they gave up the struggle for conventionality and honor and resolved to shatter their vows and their reputations, to give up kindred, associates and home and wreck the structure they had been building since childhood and flee to an unknown country, there to begin a new life in which their mutual love would be ample compensation for all they left.

Brave in their resolution, but guilty in the consciousness of the great wrong they were doing their loyal consorts, the two slipped into a close carriage on the evening of the 16th of June, 1899, and were driven rapidly to the depot, where they boarded a train bound for New York, there to sail for European shores, where they had planned to begin their new life.

In the meantime both John Bedwell and Gracia Cole had felt the widening breach in their respective homes, although neither had the slightest suspicion of the state of affairs between Clarence Cole and Alice Bedwell. Being thrown together much, Gracia began to take a new delight in the society of the sturdy John Bedwell. She could understand his mental attitude, his plain, everyday talk, his natural human methods, whereas Clarence's high-strung, artistic impulses and idealities oppressed and bewildered her. And John, disappointed and puzzled at his failure to understand Alice and weld his life with hers, and resenting the attitude of inferiority she placed him in, looked with new eyes upon Gracia and realized her surpassing beauty. And as he talked more and more to her and found that she understood so thoroughly his thoughts and aspirations, his heart warmed toward her. Finally he awakened with a start to the realization that he loved her and that his love for Alice was dead. And presently she found her own heart had gone out to John. So when the fires of the new love had attained fever heat both were more ready to obey their impulses than the others, for they had not the condescending pity—rather a sting of injured pride.

John methodically wound up his business affairs and looked up a new location where he could reestablish himself safely, and it came to pass that on the evening of June 16, 1899, he entered a close carriage with Gracia and they were driven rapidly to the depot, where they boarded a train bound for San Francisco, there to take steamer for Australia.

The two trains stood on the same track, the engines heading in opposite directions. Both left at exactly 11 o'clock. Shortly before that hour the two couples, who had left the same depot on their wedding journeys only two short years before, and who were now fleeing from each other, passed through the gate but a moment or two apart, boarded the separate trains and were whirled away in opposite directions as fast as the steam monsters could carry them.

The strange part of the affair is that neither couple ever knew that the other had eloped, and the friends of both had no suspicion of anything wrong, but wondered deeply at the sudden and mysterious departure of the four.

A Handy Affair.

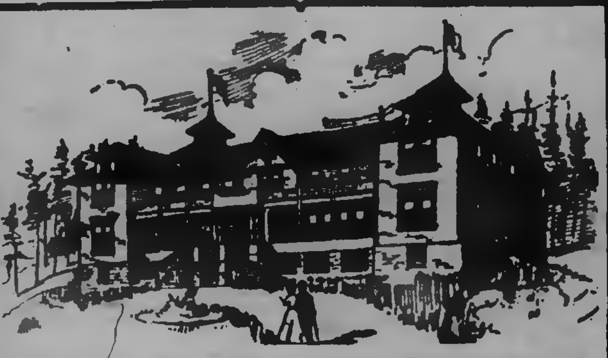
There is an emergency clause in the sultan's constitution, says the Chicago Tribune, which always enables him to act at once when he needs money from any of his rich subjects.

More Dwellings Needed

The scarcity of houses for the past year or so in the town has assumed serious dimensions, and the outlook for the coming spring is not encouraging. A hundred new houses would scarcely meet the town's present requirements. A number of families have had to be satisfied with getting a room or two with another family, or living in flats in the business parts of the town. In consequence of the prevailing famine the town's progress is much handicapped and there is no legitimate reason why men of means should not relax their hold on their bank accounts and invest in building tenement houses, which cannot fail to be a paying venture, even with the high rate of taxation levied by the town. Rents are correspondingly high, and there is a clear margin of six or seven per cent. for the man who will take hold and try to help the town in its present dilemma.

ADVERTISE IN THE TIMES.

HELP NOW. "Canada's Greatest Charity." **HELP NOW.**



Muskoka Free Hospital for Consumptives

☞ **Not a single patient has ever been refused admittance because of his or her poverty.**

FROM THE YUKON

—From Bishop of Selkirk, Caribou Crossing, Yukon: "The trifling remittance ($10.00) herewith enclosed, is intended to express our sympathy for the sufferers in other parts rather than imply a special need for your institution here."

CONFEDERATION LIFE ASSOCIATION

—J. K. Macdonald, Esq., Managing Director Confederation Life Association, in sending cheque for $500.00 from his Company, says: "I am pleased to be able to be the medium of helping on so good a work."

Funds Urgently Needed

The financial reports for the year just ending show that to keep the doors of the Free Hospital for Consumptives open, maintaining the number of patients for which accommodation has been provided, not less than $25,000 is required for the year now entered upon.

Since the Free Hospital was opened (18 months ago) 224 patients have been received. The help the institution has been to these people—all from the wage-earning and poorer ranks of life —cannot be estimated in human language.

—Edward D. Heddon, Solina, Ont., on leaving the Free Hospital, writes: "I cannot speak too highly of the institution from which I have received so much benefit. I can but tender my best thanks for the kindness shown."

—Minnie Linklater, Hamilton, writes: "I have spent over nine months at the Free Hospital for Consumptives. I believe I have been greatly helped, and shall never hesitate to use my influence to further that good cause."

There is no endowment, excepting the provision made by three life insurance companies for six beds for the current year. Only by the continued contributions of the Canadian public can the work be maintained.

Patients are accepted from every part of the Dominion, and there have been in residence during the past year patients from Prince Edward Island on the east to the Northwest Territories on the west.

Contributions may be sent to SIR W. R. MEREDITH, KT., Vice-President National Sanitarium Association, or MR. W. J. GAGE, Chairman of the Executive Committee, Toronto, Can.

IDEAL BONDS

Have you time to investigate the "Ideal Income Bonds" of the

LONDON LIFE

SATISFACTION......
They are in every way deemed MORE SATISFACTORY and desirable than lands, stocks, houses or debentures.

PROTECTION......
They afford better and MORE COMPLETE PROTECTION than any other system yet devised.

FOR HUSBAND, WIFE and CHILDREN......
The same income that is payable to the husband for life will also be payable to the wife for life if she is the same age. If older the income will be larger; if younger the income will be proportionately smaller. After the death of the husband and wife the residue of the Bond goes to the children or heirs.

$450.00......
Per year will be the INCOME PAYABLE on $10,000 bond maturing after 45 years of age.

$470.00......
Per year will be the INCOME PAYABLE on $10,000 maturing after age 50.

$500.00......
Per year will be the INCOME PAYABLE on a $10,000 bond maturing after 55 years of age.

$540.00......
Per year will be the INCOME PAYABLE on a $10,000 bond maturing after 60 years of age.

$600.00......
Per year will be the INCOME PAYABLE on a $10,000 bond maturing after 65 years of age.

$680.00......
Per year will be the INCOME PAYABLE on a $10,000 bond maturing after 70 years of age.

TRUSTEES......
It is not necessary to appoint a Trust Company to administer these bonds as the LONDON LIFE becomes your trustee under Government supervision.

IDEAL INCOME BOND BOOKLETS......
Booklets explaining advantages of these Bonds mailed to any address.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for. and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

MOTHER OF FOUR CHILDREN.

The trustees, secretary, and other officers of the Free Hospital for Consumptives at Muskoka are daily in receipt of many piteous letters.

A few days since Mr. W. J. Gage, of Toronto, Chairman of the Executive Committee of the National Sanitarium Association, received a letter from a resident of Quebec, pleading for the admission of a victim of the dread white plague, living about a hundred miles south-east of Montreal, and asking if it were not possible to admit her into the Free Hospital. The writer says: "The applicant is a Mrs. Wm. Paterson, the mother of four children and the wife of a farmer in a place called Goshen, in the township of Windsor. The doctor says that her left lung only is troubled. She is able to go about, but her appetite is very bad. I believe if she could be admitted into the Free Hospital for Consumptives she might be cured. She could not pay much, if anything. Kindly let me know if you could receive her."

We are told by Mr. Gage that applications for admission to the Free Hospital reach the secretary from all points in the Dominion, and patients have been received from Prince Edward Island on the east to Alberta on the west. Two hundred and twenty-five patients have been admitted in eighteen months, and not a single patient has been refused because of his or her poverty.

We can hardly think of any charity that appeals more pathetically for the support of the Canadian people.

Subscriptions may be sent to Sir Wm. R. Meredith, Kt., Vice-President of the National Sanitarium Association, or to Mr. W. J. Gage.

WOMAN'S WORLD

CORINNE B. ECKLEY.

An Expert Anatomist, College Professor, Inventor and Author.

There lives and labors in Chicago a woman of international fame and of such high and rare and scientific attainment as to make her unique among womankind. Her life, devoted on the one hand to her work and on the other to her charming home, is the life of the ideal woman, concerned, as it is, with real world's work and genuinely domestic felicity and culture.

This woman is Corinne B. Eckley, expert anatomist, professor of anatomy in two colleges, head instructor in anatomy in the *Chicago College of Physicians and Surgeons*, University of Illinois; author, inventor, and one of the most successful lecturers and demonstrators of human anatomy in America. Mrs. Eckley is the wife of Professor William T. Eckley, the noted American anatomist and man of science, whose untiring labors in the art of dissection have done so much to simplify and make easy one of the most difficult branches of human knowledge.

Mrs. Eckley has the rare distinction of membership in the American Association of Anatomists. But one other woman has been honored in this way. She is co-author with her husband of several important works, among which are "Regional Anatomy of the Head and Neck," "Anatomical Nomenclature" and "A Manual of Dissection," books that are constantly used by surgeons. Her inventive genius was disclosed in a most unexpected way. Formerly longitudinal division of the spinal bones was made with crude tools and much labor. Mrs. Eckley devised a peculiar and most useful instrument to do this difficult work, the laminectomy forceps, a device that insures a successful and easy solution of the problem.

In her home life Mrs. Eckley is most enviably happy. Her comfortable home in Jackson boulevard is well ordered and excellently managed, and to see her at work supervising the making of preserves from fruits grown under her eye on her farm in Michigan one would hardly suspect that this busy housewife is an honored member of the American Society of Anatomists and the author of text books on anatomical nomenclature. "When I am in my home," she says, "I live; when I am away from home I work."—Chicago Tribune.

The Art of Resting.

Rest and sleep are the Sisters of Mercy who go about to smooth wrinkles away from women's foreheads and otherwise repair the ravages of too strenuous days. The idea of constant occupation is all wrong, and the woman who has acquired the art of resting—for it is an art—will be able to show in middle age a face luminous with life and youth when her industrious sister is sear and gray.

This is not a plea for idleness, because whatever her condition in life may be the woman who has nothing to do is not only unhappy, but dangerous. She is bound to stray over into the country of the arch enemy and find the mischief especially reserved for unoccupied hands.

The homekeeper who carries the affairs of her household on successfully is entitled to the honors of the general in the field of war. But there are times when she must rest in her tent if she would continue strong and capable of carrying on the long campaign. Then she must go to her room and lock the door upon her cares and her family alike and throw herself down for a sweet, reviving snatch of slumber.

Nature makes no mistakes even if she does shock the community, and no matter what the hour may be it is time to sleep when one feels sleepy, and a wee nap in the very midst of the morning work will sometimes prove a source of splendid strength for the remainder of the day.—Exchange.

Frugality and Economy.

Frugality and economy are home virtues which are needful to the prosperity of the home.

Said great and good and growling old Dr. Johnson: "Frugality may be termed the daughter of prudence, the sister of temperance and the parent of liberty. He that is extravagant will quickly become poor, and poverty will enforce dependence and invite corruption."

The need of practicing economy belongs to every one, whether in the possession of an income no more than sufficient for a family's requirements or of a large fortune which banishes financial adversity from the mind.

To manage a little well is a vast and glorious merit in house managing.

Said famous Bishop Hall: "He is a good wagoner that can turn in a little room. To live well in abundance is the praise of the estate, not of the person. I will study more how to give a good account of my little than how to make it more."

This is the part of wisdom, particularly since those who manage a little well are the most likely to succeed in the management of larger matters and also to have the larger matters to manage.

But woe to the frugality that is allowed to degenerate into parsimony or meanness.

Draping an Arched Doorway.

An unusual treatment of an arched doorway was noticed in a house recently. Often a pole is placed above the highest point in the arch, from which a lambrequin or curtain falls straight, an arrangement which, of course, destroys the arched effect. In this doorway, however, the arch was preserved in a simple and effective way. A curved frame of soft wood about three inches wide was made to fit the arch, its shape and appearance suggesting an elongated skirt hanger. This was first covered with a piece of the lambrequin material, shirred on, with a short, fringed crosspiece of the same festooned from one side to the other in graceful fashion. The whole thing was then hung up on three hooks placed for the purpose on the wall at the point at either end of the arch.—Table Talk.

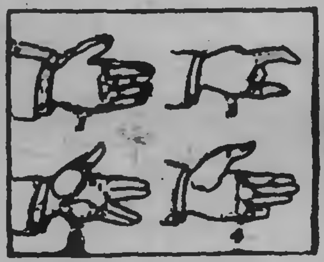
FUN IN YOUR FINGERS.

Tricks That Appear Simple, but Are Sometimes Impossible.

It is interesting to see what tricks can be done with one's fingers.

These seem simple enough just to look at, but when one comes to try doing them, my, how hard some of them are!

Fig. 1 shows a stunt that a good many people can do; but others can't do it at all, no matter how hard they try. It consists of pressing close together the two intermediate joints of the middle fingers of your two hands while the ends of the other fingers and the thumbs are together. Then separate the thumbs and move them up and down. Next join the thumb and try the same thing with the little fingers. So far, easy enough. Your friends will smile and say, "Oh, give us something hard!" "All right," you may say. "Now try the same thing with the ring fingers." This will prove too much for most of our friends. They will find that they cannot separate the ring fingers without at the same time separating the intermediate joints of the middle fingers.



TRICKS WITH THE FINGERS.

Fig. 2 shows you something that is very difficult for some people. Form one group of the middle and index fingers and another of the little fingers and ring fingers. Then bring these two groups together and separate them like scissors without disturbing either group.

Fig. 3 shows a stunt that many people find impossible to do. This is to bend the end joint of your index finger, keeping the other joints all straight. Try it. Very likely you will find you can do it with one hand, but not with the other.

Then there is the last stunt—to turn the little finger in, keeping all the other fingers stretched out and close together.

A PRETTY ROOM.

The Way Little Florence Fixed It Up to Look "Be'ful."

Little Florence was in great glee. She said she had made the room look "be'ful" for mother's friends that afternoon. She climbed into the great chair by the fireplace to admire her work. Over each picture she had placed a large green leaf, and there in front of the mirror, in the vase Uncle Jack brought from Venice last year, was a whole bunch of leaves. The room looked like a garden, and her own bright face was like a blossom above the green leaves in her hand.

But mother cannot find her little girl. Florence is not where she should be.

"Ah, at last I have found you, dear!" says mother. "What are you doing, Florence?"

"Just resting. I'm so tired from reaching up to the pictures! Isn't the room be'ful? And, oh, mother, I'm so tired! Please, may I have my nap?"

The little head was bobbing over, and mother could not be cross with her darling, even though the leaves that brighten the room were from the best palm. The poor lady only sighed for her plant and tried to explain to Florence when she woke.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $90 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $42.86 and $79.60 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet [illegible] it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co., Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, *President.* E. F. NORTON, *Secretary and Treasurer.*

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down [illegible] feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 5x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,[illegible] feet.

In addition to the above there are four small shafts, with a combined depth of about [illegible] feet; [illegible] feet of tunnels, and at least [illegible] feet of open-cuts, upraises, etc.

All told, there is 4,[illegible] feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the *Flowery* and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a good. and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 26th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the [illegible]-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.

FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

·DRS. KENNEDY & KERGAN·

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. **Cures Guaranteed or no Pay.** We treat and cure: **Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.**

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorised agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 9-28-02.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. [illegible], Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1902.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1902.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 9-28-02

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1902.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

MEN AND WOMEN WITH MONEY

I offer you a safe 7 per cent. investment. Your money absolutely safe. Dividends sure and regularly paid. You can get full particulars by addressing

SECURITY,
c-o Times,
Peterborough, Ont.

—THE—

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

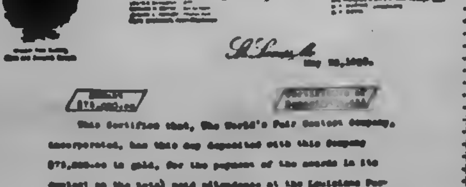
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1889 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1 00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,000.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 40 nearest correct estimates, $50 each	2,000.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 The World's Fair Contest Co, which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

This Certifies that, The World's Fair Contest Company,

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

MUCH VACANT LAND YET.

Dangers of an Overcrowded Population Are Still Remote.

The material development of the country is quietly progressing at a remarkable rate in one direction which is not given much popular attention. More than 22,824,299 acres of the public lands were turned over to private individuals last year. This means that an area almost equal to that of the state of Indiana has within that time been added to the productive regions of the United States. Most of these newly opened lands were homesteaded by farmers, as will be seen from the following figures: There were 54,305 patents of all classes issued within the year. Of this number 47,654 are classed as agricultural, 4,904 as Indian allotments, 1,104 as mineral patents, 200 as coal patents, 276 as private land claims, 187 as railroad patents and 40 as swamp land patents. The total sum which the government got by way of fees and commissions for issuing these patents was $11,024,744. Under a recent law the most of the receipts from the sale of public lands will henceforth be set aside for reclaiming arid lands by irrigation.

In the public domain there are still unappropriated 380,979,807 acres of surveyed lands and 591,976,169 acres of unsurveyed lands, or a total of more than 970,955,000 acres. A great many tracts in this immense area of course will always remain uncultivated and unsettled, but it has been estimated that when the contemplated system of irrigation shall be put into working order so much good land will be opened that a population as large as the whole nation's present population could find room there to thrive prosperously and contentedly.

Rapid strides are now being made in the developing of the public domain. The excitement and uproar of former pioneer days are absent in this work, but the process is marked and very effective. The passenger traffic on western railroads is evidence of this fact. Agreeable reflections arise in contemplating that the United States still owns so much arable public land. The dangers of an overcrowded population by immigration or natural increase are still remote. The census for many years to come will not show an excess of people above what the west will need in settling up its vacant lands.—Kansas City Journal.

Machines That Think.

The sewing of buttons on shoes and on garments is no longer done by hand in modern factories. There is a machine that sews 5,300 buttons on garments in nine hours, or more than eight expert sewers could possibly do in the same time. This machine requires no expert operator. A boy or a girl runs it.

And in one insurance office where it was formerly necessary for a force of clerks to copy names on reference cards to be filed in various places one clerk now writes the name on a single card with metallic ink, clamps it in a holder with a number of blank cards and flashes an X ray through the packet. Thus by a single motion one man writes, or, rather, prints, all the cards.—World's Work.

London's Roman Wall.

The destruction of Newgate brought to light another section of the ancient Roman wall which surrounded London and served as a fortification of the city. The whole extent of the wall has now been fairly well traced, and parts of it are still used as cellars and warehouses. The only portion of it that is still above ground is a bastion in the Church of St. Giles, Cripplegate. The ground of London is estimated to have risen at the rate of nearly a foot a century, and doubtless from time to time many rich finds of antiques will be unearthed, especially if a start is made to construct high buildings on the American plan.—Cleveland Plain Dealer.

Return to Calfskins Predicted.

Said a dealer in finished calfskins recently: "I am strongly of the opinion that the time is not far distant when we shall see a general return to the calfskin. At present and, in fact, during the past ten years shiny or lacquered leather has made a sensational inroad into calfskins, and while the leather is constantly being perfected and will undoubtedly be popular and standard for a long time to come the calfskin shoe will regain its old time favor. No leather that has been produced is the peer of a well made calfskin, and I am assured that it will again become the standard leather.—Shoe and Leather Dealer.

He Began Early.

The advantage of beginning a career at an early age is shown by the precocity of Edward Penfield, the designer and illustrator—that is, if Mr. Penfield is to be believed. It is told of him that he was once showing a piece of his early work to a friend, who, knowing that Mr. Penfield is yet under forty, asked in astonishment at what age he began to study art. With seeming reluctance Mr. Penfield gave the following explanation: "When a baby I was left in a basket at the door of the Art Students' league. They took me in and gave me a bottle of Chinese white and water. I cried for more, and so they set me to work."

Puffy Eyes.

Puffy places under the eyes are usually due to some kidney disorder. Cold water should be taken freely, say a glassful half an hour before each meal and about two hours afterward. This treatment will not only cause the flabbiness to disappear, but will also render the complexion clear and the general health better.

Living In Rome.

Think of securing a cook for $7 a month! That is the price Mrs. Maud Howe Elliott says she pays in Rome. A seamstress works for 50 cents a day, and an up to date doctor receives $1 for a visit. Good hotels charge 12 francs (about $2.40) a day. Meat, chickens, eggs, fish, fruit and groceries are also cheap, but their cost is made up for by the exorbitant price of all imported groceries. Even the very rich cannot procure rapid transit, steam heat or express service, conveniences which the great majority of Americans enjoy.

ADVERTISE IN THE TIMES.

AN APPEAL TO THE FASHIONABLE SET IN CANADA.

"Lally Bernard," the Well-known Toronto Journalist, Writes from England of the Battle Against Consumption in Muskoka.

Lally Bernard, of the editorial staff of the Toronto *Globe*, writing to that paper from London, England, where she is now a resident, shows most clearly that the battle against the great white plague is one that should interest all classes of the community. It will be remembered that this writer entered *incog.* as a patient in the Muskoka Free Hospital for Consumptives, and afterwards in the *Globe* told of real life in that institution. In her present article she says:

"To-day I have found a letter at the club which nearly missed me, having been addressed 'Lally Bernard.' May I express to my unknown correspondent my warmest thanks for the kindly appreciation for the little I have been able to do in the battle being waged against tuberculosis in Canada. The need of sympathy and interest is a tremendous one, and I am always puzzled when I find really well educated and intelligent people in Canada so criminally ignorant of the extent of the danger, and the means which are being taken to combat it.

"It may be of some interest to those who feel as I do in regard to the responsibility which rests upon each and all to aid in this fight against a most insidious foe, when I tell them, that here in London, where I have been for only a few days, I have already come across the dread enemy four times. First of all, in the back garden of our humble quarters in Kensington I espied, when morning dawned, a tent with two beds in it. I enquired of our landlord why the tent was there, and was told a long story about the coronation and quarters for some boys coming up from the country, and that he, the landlord, had subsequently found it more agreeable to sleep in the tent than in the basement bedroom he had formerly occupied. A little later, in conversation with the lady who secured the lodgings, I learned that the landlord's son was obliged to sleep in a tent! Comment was needless.

"In looking for quarters I found a charming home of a young doctor and his wife, where extraordinarily moderate terms were asked for really exceptionally good accommodation. The doctor in question had been 'ordered south,' and his wife had to keep the house going by accepting 'paying guests.'

"Yet again, in the third place, I found that the lady who was at the head of the establishment had not only lost her husband from the dread disease, but had managed one of the most fashionable sanitariums in England, and her knowledge of the treatment and the extent of the problem in England showed me how tremendous was the need for care and watchfulness in our own country.

"May I ask my correspondent to use all possible influence to make the question of combating tuberculosis one of interest in the 'fashionable set' to which she evidently belongs. I know full well, from the little experience I have had, how tremendously a little genuine interest and help might lighten the burden now resting on the shoulders of the authorities of the Free Hospital for Consumptives at Gravenhurst. It is, of course, far away from wealthy centres, and out of sight is to be out of mind.

"I can quite understand that until people have seen forty or fifty patients together in different stages of consumption they do not realize what an immense amount of aid might be given by those who are fortunate enough to be free from the disease and by those who have little else to do than to invent or learn some new form of recreation.

"Mrs. Torrington has kindly promised me to try and get musical societies and people interested in music to provide a pianola for the Hospital, and I feel sure it will be of immense benefit to the patients. Surely my correspondent who evinces such sympathy with the cause could make that sympathy take a practical form and organise a hospital library where books worth reading might be supplied, with some system similar to that of the Aberdeen Association, which has done such excellent work."

[Note.—Readers—and may their number be many—who desire to assist in the work of the Muskoka Free Hospital for Consumptives may send their gifts to Sir Wm. R. Meredith, Kt., Vice-President, National Sanitarium Association, Toronto, or Mr. W. J. Gage, Chairman of the Executive Committee.]

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

Strength From Proper Breathing.

The Japanese, although men of very small stature, are among the strongest in the world. Any boy of fourteen or fifteen who will faithfully practice their system of producing strength will find himself at the end of a few months able to cope in feats of power with the average man of twenty-five, and all this without the dangerous practice of lifting very heavy weights.

It should always be remembered that rest must be taken after each exercise. While resting try deep breathing. Stand erect, though not in a strained position, and at each breath draw the abdomen in and throw the chest out. As the breath is exhaled let the chest fall inward again and the abdomen outward. From twenty minutes to half an hour is a long enough time to devote to jiu-jitsu, and this includes the time spent in breathing during rests, for deep, correct breathing is in itself one of the best exercises possible. In inhaling draw the breath through either the nostrils or the mouth, as preferred. In exhaling always let the breath escape through the mouth.—St. Nicholas.

The Really Clever Pose.

There is much more intellectual cleverness among the girls of today than there was fifty years ago. A flippant cousin says: "It does not pay for a girl to be clever. Men are afraid of you if you are, and the other girls hate you." But between a pedantic prig and a well educated woman there is a vast difference. The really clever women are those who disguise their learning and pose as amiable and charming idiots.—Ladies' Field.

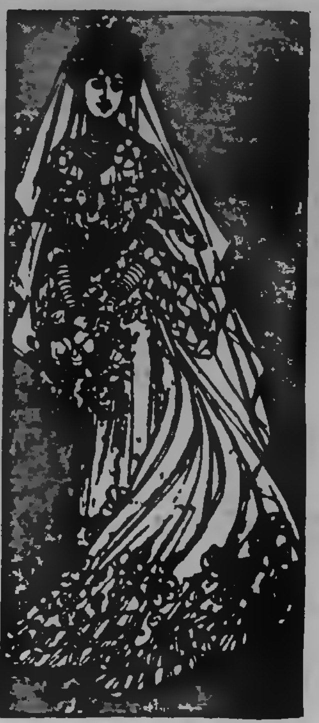
Carefulness In Toilet.

Nothing is a more positive sign of a careless woman than torn gloves and untidy shoes, waistbands that sever connections or collars that part company with the shirt waist. Try not to be one of them. You defeat your own ends and neither look well nor feel comfortable. Dress carefully and aim at plainness and neatness rather than a more showy style of costume.

WAISTS AND FANCY EFFECTS

Blouses of Chiffon and All Over Lace. The Flat Stole.

The most fashionable and really the most practical waist, although it is rather expensive at first, is of ecru net trimmed with shirred insertions of yellow lace and embroidered figures. This is made up over a slip of white china silk, and the whole thing will clean or wash beautifully.



BRIDE'S DRESS.

Crepe de chine waists in white and pale colorings are largely taking the place of the stiffer silks. They are trimmed with embroidery, white or dyed lace, and many of them are made very dressy by the addition of chiffon.

Whole waists of chiffon trimmed with lace are very dressy, but, alas, very perishable. The all over lace waist trimmed with taffeta bands seems to be the most practical to wear under a coat, and it can be softened around the neck by the addition of a tulle bow.

Owing to the low dressing of the hair tulle bows are now worn in front under the chin instead of at the back of the neck.

The wide flat stole is with us to stay, and every tailor made is improved by the addition of this charming piece of neckwear. When not of fur it is of heavy dyed lace and cloth, of chiffon and lace or of white or pale gray feathers. In any case it must harmonize with the gown.

The picture shows a bride's dress of crepe de chine and fine lace. There is a tucked yoke, a big bertha and wide flounced sleeves, which give a picturesque air to the whole. The shirred skirt has its fullness increased around the feet by a double chiffon frill.

JUDIC CHOLLET.

Write Notes to Themselves.

"Actors are great hands to write 'mash' notes to themselves," said a stage manager. "The leading young men, you see—the heroes that marry the beautiful girls—are supposed to attract to the theater myriads of young women. They draw big pay on this account; their friends talk seriously of the powerful, almost hypnotic, influences that they exert on romantic females. This power is the stock in trade of the actor who travels on his beauty instead of on his art, and he must always have tangible proof of it. So if the young women don't come up each mail with a bunch of authentic mash notes, he sees to it anyway that he gets mash notes all right. He times them so that they reach the theater during rehearsal. The manager every afternoon brings them to him—a half dozen pink and blue and cream envelopes, smelling of violet and orris. He takes them with a guffaw, reads them, passes them around. Every one pretends to be amused at their silly contents, but the minute the actor's back is turned the murmur passes back and forth: 'They're fakes. He wrote them himself. He spends two hours a day writing himself mash notes.' To tell the truth, this actor gets a number of authentic mash notes, but nobody believes it. It is thought that every note is a fake."—Washington Post.

"Barber, Barber, Shave a Pig."

In pig killing there is no more exciting moment than that of removing the bristles from the carcass. With such haste does the operation sometimes have to be accomplished that in a certain country family it was begun one day with a pair of fine brass candlesticks before the usual utensils could be found.

When Salmon P. Chase was at Kenyon college, which was then presided over by his uncle, Bishop Philander Chase, he encountered a similar difficulty and cut the knot with unhesitating decision. The bishop and most of the elders went away one morning, and young Salmon was ordered to kill and dress a pig while they were gone. He found no great trouble in catching and slaughtering a fat young "porker," and he had the tub of hot water all ready for scalding.

This process should have loosened the bristles, but either the water was too hot or the pig was kept soaking too long; at any rate, when the boy began scraping the bristles not one of them could be started. In pig killing phrase, they were "set." What could he do?

Then he bethought him of his cousin's razors, a fine new pair, just suited to the use of their owner, a spruce young clergyman. He pilfered them and shaved the pig from toe to snout.—Youth's Companion.

Gardner Wanted

A man to look after garden and take care of horse. Salary $30 per month and brick house rent free. A splendid position for a steady and sober man with family. Apply at Times Bookstore for address.

THE FIRST ATTACK

A Canadian Lady Saw the First Bombardment of Port Arthur

Sherbrooke claims that probably the first letter to arrive in this country from a resident of Port Arthur during the first days of the war was that received Thursday by Mr. W. C. Webster, of Coaticook, from his daughter, Mrs. Arthur T. Short. The writer, with her husband, went to Port Arthur some years ago.

Her letter is dated Shanghai, February 14, and is in part as follows;

"We arrived here on Saturday at 4 o'clock.

"A week ago Sunday the Japs sent transports to take away the Japanese residents, but we never believed trouble was so near, nor did the Russian officers. On Monday we knew that war was certain and spent the whole day packing our things. Luckily the ship could not go that night. At 11.30 p.m. we heard a lot of cannon firing, but supposed it to be the Russians trying their forts. We finished packing about 2 a.m. and got to bed.

"At ten a.m. Tuesday we all started for the ship (Fu Ping) where we met people, who told us the Japs had really been there the night before.

"It happened this way. The Russian fleet was lying just outside the harbor. Some war vessels came along from the direction of Dalny. They signalled the Russian fleet 'We are from Dalny.' this being done in Russian signals. Naturally the Russians thought they were some of their own ships and when they got near and inside the guard ship they called out in perfect Russian, 'What is the news of war?' and joked a bit, then the nasty, sneaky little Japs sent the torpedoes going right and left, and then ran away. They badly disabled three of the Russian ships, the Pallada, Retvizan and Czarevitch. The Pallada can be mended, but the other two are too large for the docks. You see it was some time before the Russians began firing. There was not as many Russian officers in the forts as there ought to have been, and the navy officers were nearly all at Mrs. Stark's, at a party, so they had to hurry away rather unceremoniously and get to their ships, and then the Japanese ran away.

"We went to our ship, which expected to sail every moment, but the Russians gave orders that the ship should not sail that morning.

About 11.30 the Japs came back and the fight began fast and furious, shells falling on all sides, so we decided the best place for us was our own house, as the steamer was crowded and if a shell struck her she would probably sink. We were perfectly calm and collected, but some of the women and children began to cry and got fearfully frightened.

"We got back all right from the ship, but soon a boy rushed in and told us the ship was about to go. We went back and waited all the afternoon. The firing stopped at 12 o'clock. This time the Russians being ready gave the Japs all they wanted. The ship was not allowed to go that night but the captain said to come back in the morning.

"Before returning to the house we took a look around the town. It was a most desolate looking place, hardly anyone stirring, all business places closed, the windows all smashed, cargoes scattered everywhere and smashed where a big shell had burst. In the Clarkson garden opposite the office was a big shell not yet burst.

"We went to the port and a torpedo boat came in with a lot of wounded sailors, a great number on stretchers, some in blankets, and others with their heads all done up. It was an awful sight and I shall not soon forget it.

"That night the street lights were turned off and the order was given for all lights to be turned as low as possible so as not to light the sky, or give a reflection. The next morning the weather was cold. We never had such a day.

"The following day Mr. Adams, a passenger, who was on his way to Manilla, rushed in and said the boat would leave at three o'clock sharp. We barely had time to catch the boat.

"We were just going out of the harbor when bang went three shots into the bow of our boat. The captain stopped immediately. Five Chinese passengers were badly wounded and the ship caught fire a little which was quickly put out.

"You see, the Wenchow, another English boat had tried to go out earlier, and had been stopped, the order being that if a ship goes out or comes in without first obtaining permission, the guard ship fires on her. Clarkson & Company are agents for these ships, and when the permit was given for the Fu Ping to go, Clarkson and Company should have informed the guard ship, which they neglected to do.

"The captain naturally got very angry, not knowing the reason, and started to abuse the Russians. We had to wait for a time till things were fixed up, but finally got away all right.

"We stopped at Wei Hai Wei. The ship was simply besieged with reporters, and the story of some of the passengers and the captain himself told would simply make your hair stand on end. I think each one tried to

DOCKING HORSES TAILS

Municipalities May Pass By-law Forbidding It

The docking of horses' tails is a silly fad, according to Dr. Routledge, member of the Legislature for Middlesex, and will be given up when women say they will not drive behind a docked horse. Of the cruelty of the operation he spoke eloquently to the Agricultural Committee of of the House. "Why, you might as well cover me with molasses and tie me to a tree in fly-time," he said. Dr. Routledge had two bills before the committee by which he sought to accomplish his aim, one giving municipalities power to pass by-laws prohibiting docking, and the other forbidding the granting of any prize or award at an agricultural fair to any horse which had been docked.

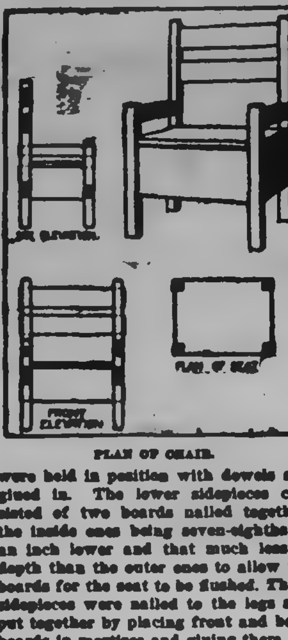
This discussion evoked a good deal of difference of opinion, and was practically a repetition to that which took place in the House the other day. On the one side it was argued that the practice is cruel and useless, and on the other that it is not hurtful if properly done, and is called for by a large trade. The Minister of Agriculture opposed both bills.

The committee passed the bill to permit municipalities to prohibit docking, by a vote of 13 to 7, and threw out the other one.

A ROOMY ARMCHAIR.

Plans by Which a Substantial One May Be Made at Home.

A good, roomy armchair is welcome in every home. In making the sketch and measurements of the chair illustrated, which is a very comfortable piece of furniture, great care was taken to allow for a generous seat, with arms broad enough to sit upon. The sides were put together first. The uprights were held in position with dowels and glued in. The lower sidepieces consisted of two boards nailed together, the inside ones being seven-eighths of an inch lower and that much less in depth than the outer ones to allow the boards for the seat to be flushed. These sidepieces were nailed to the legs and put together by placing front and back boards in mortises and gluing them before setting them in place. The back rest was a three inch post sawed in half and mortised, with crosspieces nailed in. The stick to support the back was one inch square. The chair was stained with Flemish finish. The back rest was hinged to the back board, as indicated in the illustration. The back legs were made shorter than the front ones. The cost was $4.75.—Ladies' Home Journal.



PLAN OF CHAIR.

Mozart's Musical Memory.

Mozart had a wonderful memory of musical sounds. When only fourteen years of age he went to Rome to assist in the solemnities of holy week. Immediately after his arrival he went to the Sistine chapel to hear the famous "Miserere" of Allegri. Being aware that it was forbidden to take or give a copy of this renowned piece of music, Mozart placed himself in a corner and gave the strictest attention to the music and on leaving the church noted down the entire piece. A few days afterward he heard it a second time and, following the music with his own copy in his hand, satisfied himself of the fidelity of his memory. The next day he sang the "Miserere" at a concert, accompanying himself on the harpsichord, and the performance produced such a sensation in Rome that Pope Clement XIV. requested that this musical prodigy should be presented to him at once.

Molasses Candy.

It is a mistake to suppose that good candy will hurt children. A distinguished London physician, Dr. Fothergill, says that molasses taffy containing both sugar and grease is an ideal preventive for children of a consumptive tendency.

The following is a good recipe for molasses candy: A quart of molasses, one-half cupful of vinegar, a cupful of sugar, butter the size of an egg and one-half teaspoonful of soda; dissolve the sugar in the vinegar, mix with the molasses and boil, stirring frequently until it hardens when dropped from the spoon into cold water; then stir in the butter and soda, the latter dissolved in hot water; flavor to taste, give one hard final stir and pour into buttered dishes; let cool and pull.—Cooking Club.

Cleanliness.

Cleanliness is in itself one kind of loveliness. You often see a girl whose features are not any too fine, but you remember her as being neatly clad. Her collar is snowy, her cuffs nice and carefully pinned, her frock is well brushed and her shoes shiny. There are many ways of being attractive, and to be trim and neat and "cleany" is one of them. These are the days when the girl with whispy locks hanging about her ears and skirt wandering away from bodice at the waist line is entirely out of the running. The woman who has bona fide brains inside of her head and who does everything well because she wants to will give careful attention to the way she gets into her clothes.

Pretty Lamp Shade.

To the housekeeper a new lamp shade is always welcome. A pretty one is made by covering a wire frame with rose pink silk. A thick quilling of white silk finishes it at the top. The "waist" is gathered in by white ribbon and tied in bows every inch or so. It is finished at the foot by two ruffles of the silk, headed by white quillings. The ruffles are embroidered in white flowers.

The First Corset.

The first corset—not counting ancient modifications of the Grecian zone and girdle—was introduced into France by Catherine de' Medici. It was a strange affair and fashioned after the style of a knight's cuirass. The framework was entirely of iron, and the velvet, which decorated the exterior only, served to hide a frightful and cumbersome article of torture.

Good Scheme.

Hicks—You keep duplicates of all your old love letters? What an idea! Wicks—Yes; when I have done something particularly foolish I just read over one of these letters. It is quite encouraging to know that I'm not nearly so much of a fool as I used to be.

Our Boundaries Extending

Another piece of the Township of Smith is to be taken in to the corporation. The area extends from Smith street to the Communication road and Dickson street, containing about 80 houses and adding about 100 to the population of Peterborough. The necessary steps are being taken by the Council to effect the union.

RUN BY MOUSE POWER.

A Thrifty Scotchman's Scheme For Operating His Thread Mills.

Thrift is generally acknowledged to be one of the leading characteristics of the native of Fifeshire, and it never was more forcibly exemplified than in the person of David Hutton, a native of Dunfermline, who actually proved that even mice, those acknowledged pests of mankind, could be made not only to earn their own living, but also to yield a respectable income to their owners.

About the year 1820 this gentleman actually erected a small mill at Dunfermline for the manufacture of thread—a mill worked entirely by mice. It was while visiting Perth prison in 1812 that Mr. Hutton first conceived this remarkable idea of utilizing mouse power. In an old pamphlet of the time, "The Curiosity Coffee Room," he gave an account of the way in which the idea dawned on him. "In the summer of the year 1812," he wrote, "I had occasion to be in Perth, and when inspecting the toys and trinkets that were manufactured by the French prisoners in the depot there my attention was involuntarily attracted by a little toy house, with a wheel in the gable of it that was running rapidly round, impelled by the insignificant gravity of a common house mouse. For 1 shilling I purchased house, mouse and wheel. Inclosing it in a handkerchief, on my journey homeward I was compelled to contemplate its favorite amusement. But how to apply half ounce power, which is the weight of a mouse, to a useful purpose was the difficulty. At length the manufacturing of sewing thread seemed the most practicable."

Mr. Hutton had one mouse that ran the amazing distance of eighteen miles a day, but he proved that an ordinary mouse could run ten and a half miles on an average. A halfpenny's worth of oatmeal was sufficient for its support for thirty-five days, during which it ran 736 half miles. He had actually two mice constantly employed to the making of sewing thread for more than a year. The mouse thread mill was so constructed that the common house mouse was enabled to make atonement to society for past offenses by twisting, twining and reeling from 160 to 120 threads a day, Sundays not excepted. To perform this task the little pedestrian had to run ten and a half miles, and this journey it performed with ease every day. A halfpenny's worth of oatmeal served one of these thread mill culprits for the long period of five weeks. In that time it made 3,350 threads of twenty-five inches, and as a penny was paid to women for every hank made in the ordinary way the mouse at that rate earned ninepence every six weeks, just one farthing a day, or 7s. 6d. a year.

Taking sixpence off for board and allowing 1 shilling for machinery, there was a clear yearly profit from each mouse of 6 shillings. Mr. Hutton firmly intended to apply for the loan of the empty cathedral in Dunfermline, which would have held, he calculated, 10,000 mouse mills, sufficient room being left for keepers and some hundreds of spectators. Death, however, overtook the inventor before this marvelous project could be carried out.—Edinburgh Scotsman.

A Surprised Duke.

Just after the late Duke of Richmond and Gordon received the latter half of his title—he was created Duke of Gordon in January, 1876—he was sent to this country as president of the British commission to our centennial exposition. While in this country he heard of a certain picture owned by a country woman in which he thought he might be interested, and so wrote to her, using the official stationery of the commission and signing himself, as a peer does, simply by the names of his title, "Richmond and Gordon."

Much to his surprise and a good deal to his disgust—for he had precise ideas as to his dignity as a duke—the letter which he received in answer to his was addressed, "Messrs. Richmond & Gordon," and began, "Gentlemen!"

Reading In Bed.

Commenting upon the recent discussion of the habit of reading in bed, American Medicine concludes that if the position is literally prone the habit is bad, because in such a position the eyes are fixed upon the book in a straining and harmful way and the book cannot be sufficiently illuminated.

But if one sits propped up by pillows, in much the same position of the head and trunk as when in a chair, there can be no evil consequences, provided a good rich light is rightly placed behind and at one side of the head.

The greatest argument for reading in bed is that the attention is not distracted by the discomfort of the body, the noises and interruptions usual at other times. Let one take an erect position of the body and head, be assured he has a good oculist and that his light is strong, white, steady and properly placed. He may then read with impunity until drowsiness cautions him to stop.

DRESS HINTS.

Whenever it is possible it is a good plan for an elderly woman to wear silk.

Don't have any loose ends or staring pins. Let your clothes be carefully put on. Have an air of good grooming.

Unbleached muslin shrinks much in the washing. Therefore allow an extra inch in each yard when making a garment to allow for this peculiarity.

The auburn haired woman will always look her best in black or brown, and dark green will display the lights of this most lovely shade of hair to advantage.

Tucked chiffon when crumpled and shabby looking may easily be freshened up by passing a hot iron over the wrong side of the material. This makes the tucks have the raised appearance they had when new.

The Literal Truth.

Dunne—What do you mean by sending me word that you were not in? Debts—I didn't. I sent you word that I was out. Dunne—Well, and what did you mean by that? Debts—Exactly what I said. I am out of cash.—Cincinnati Commercial Tribune.

PROSPFCTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000. 80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSIE
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatever. The ore is of such grade that it does not need milling, as it is ready concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN.

Mr. Edwin J, Hulbert, M.E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

What are the advantages of the LONDON LIFE?

Briefly stated the principal points are:—

Undoubted Financial Standing.

Assets $107.70 for every $100.00 Liabilities.

Reserve Basis
one half per cent. greater than Government statute calls for.

Accumulating Profits
reported to the Government as a LIABILITY instead of an asset.

Assets
reported to the Government at ledger or cost value, and never more than market value.

Contingent Fund
provided for unforseen liabilities.

Special Reserve Fund
accumulating to eventually put all old business on a one per cent. higher reserve basis than Government statute calls for.

Interest Earnings
for 1903, 5½ per cent. This is larger than any other company of similar age.

Profits Paid to Policyholders
better than most companies and equal to the best.

Expenses Moderate
The Company has an enviable record for economical management, as is evidenced by comparing the cost with any other company transacting Ordinary and Industrial business.

Its Premium Rates
compare favorably with the leading Canadian Companies and are lower in most cases than those charged by foreign Companies doing business in Canada.

Endowments at Life Rates.
The London Life is the first Canadian Company to offer Endowment insurance at premiums charged for life policies. (Write for booklet entitled "Endowment at Life Rate.")

What Then with all the above advantages the LONDON LIFE is certainly the RIGHT COMPANY TO INSURE IN

For all information apply to

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

I R CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

1123 BROADWAY, NEW YORK

OFFICERS AND DIRECTORS

HON. W. A. SIMMONS, PRESIDENT, Formerly Collector of Customs, Port of Boston, Mass.	NEW YORK
A. EDWARD ROEBER, VICE-PRESIDENT, With the John J. Mitchell Company.	NEW YORK
M. K. GOLD, SECRETARY AND TREASURER, Formerly with the Clark Syndicate Companies.	NEW YORK
HOWARD E. MARSH, CONSULTING ENGINEER, Marsh Manufacturing Company.	NEW YORK
FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner, formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 800 tons per day will weigh less than 1,800 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a pack or more of sand, either ordinary house or ore sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,800 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 10 cubic yards, 100 feet haul in 10 hours at a cost of 18 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate this field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. *Hereafter the levels will be 100 feet apart.* As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fue or many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United *Stateswhenever we feel prepared to invest the money.*

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemised in the statement.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $300 per ton, and the Company owns 9 000 feet on this vein.

Ore running from $18 to $50 per ton is continually being shipped from the gold property, and [illegible] samples taken from widely different portions of the vein system averaged [illegible] per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 500 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

DROP SHELLS ON ENEMY

SANTOS DUMONT ENGAGED BY THE JAPANESE

He Will Drop Dynamite from his Airship on Russians

New York, March 24.—Commissioned, he says, by the Japanese Government to experiment with war balloons and airships, and, if possible to develop his plans of dropping dynamite on warships. Santos Dumont, the Brazilian aeronaut, is on the Kron Prinz Wilhelm of the North German Lloyd line, speeding eastward upon his secret mission for the Mikado, says the American.

Prior to leaving this city on Monday Santos Dumont confided his purpose to friends, and said he intended to proceed directly to Japan. He will take one of his airships stored in Paris.

CHINESE MAY REFUSE.

Pekin, March 24.—The report that the Russian military attache here has applied for a passport and permission to visit Chang-Wen-Tsu, where General Ma's troops are stationed, and also for a special letter of introduction to the general is confirmed. The Chinese Foreign Office is not inclined to comply with the attache's request.

PLEASE ALL PARTIES.

Pekin, March 24.—The Russian and Japanese notifications regarding contraband of war differing somewhat, the Chinese Government has applied to Sir Robert Hart (the Inspector-General of Customs in China) for advice in the matter. Sir Robert has advised it to prohibit the giving of any assistance to Japan, according to the Russian notification, or to Russia according to the Japanese notification. (Pekin should also, be placarded with notices prohibiting the natives from assisting either of the belligerents.

CHINESE MUST NOT BUY.

Tien-Tsin, March 24. — Viceroy Yuan has prohibited the Chinese from purchasing the Chinese newspaper Chippao on the ground that it had published an untrue article referring to the bad conduct of the Imperial troops on the border which tended he claimed, to incite the people.

MILITARY WRITERS NOT BUSY

Mr. Ford Says They Have Few Duties of a Legitimate Nature

London, March 25—Military writers for the London press have been granted a furlough since they have no occupation except to discredit the meagre news received one day from the seat of war, and contradicted the next.

The London Journals, which have incurred large liabilities for the enterprise in securing the services of a costly staff for reporting news of the campaign, are awaiting with impatience the discretion of censors and the sluggish movement of events.

The Japanese fleet must be credited with high steaming power, for it is reported one day after another at points far removed from one another. One of the latest bulletins reports it near the coast approaches of Yinkow. The news is not intelligible and judgments respecting the real objective points of the operations of either side are worthless.

RUSSIA AND CANADA

Toronto, March 25— The Globe's Ottawa special correspondent wires; The feeling here is that the British Government should stand firmly behind the Canadian authorities in opposing the Russian attempt to secure a revision of the sealing regulations in the Behring Sea at a conference called purely and simply for the purpose of assessing the damages due to Canadian sealers. If the British Government does not back up Canada it will cause great dissatisfaction and disappointment here. The motive for the action of the Russian Commissioners is believed to be a desire to conciliate the United States, and in thus attempting to further postpone the settlement of financial obligations which have now been overdue for many years, Russia is held to be guilty of conduct unworthy of a first class power.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31.52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the *Pyramid Gold & Copper Mining Company* is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore. and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $[illegible].
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of [illegible] acres. This property has produced over $[illegible] in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least [illegible] tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over [illegible] acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $[illegible].

Tunnel B of the Black Queen Company is now going in at a rate of [illegible] feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies [illegible] feet from Apex, and open sufficient stoping ground to make an output of [illegible] tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being [illegible] feet beneath the surface. We have [illegible] feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

The above will cheerfully be paid to lawful money of the United States, by the undersigned, proprietors of Dr Pierce's Golden Medical Discovery, if they cannot show the original signature of the individual volunteering the testimonial below, and also of every testimonial among the thousands which they are constantly publishing attesting the superior curative properties of their several medicines, and thus proving the genuineness and reliability of all the multitude of testimonials volunteered by grateful people, in their behalf.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

THE REASON.—There is no medicine equal to Dr Pierce's Golden Medical Discovery, for purifying the blood. It carries off the poisons which contaminate the life fluid. It increases the activity of the blood making glands and gives the body an increased supply of pure, body-building blood. It builds up the body with sound, healthy flesh instead of flabby fat, promotes the appetite, feeds the nerves, and so gives to weak, nervous people vitality and vigor.

"About a year ago I had a very bad cough and feared it would run into consumption," [illegible]

To gain knowledge of your own body—in sickness and health—send for the People's Common Sense Medical Adviser. A book of 1008 pages. Send 21 one-cent stamps for paper-covered, or 31 stamps for cloth-bound copy. Address Dr R. V. Pierce, 663 Main Street, Buffalo, N. Y.

A man to work in garden. Free house. Apply to George Giles, Monaghan, Peterborough P.O., or at Times Bookstore.

Y.M.C.A.

The Strangers' Fellowship Club will hold a reorganization meeting at 7.30 o'clock this evening in the Y.M.C.A. parlors. All strangers are invited to be in attendance.

Mission Board Meets

The local Home Mission Board of the Peterborough Association of Baptist churches met this week in the Y.M.C.A. parlors and passed appropriations for the Home Mission churches in this district.

Y.W.C.A.

The regular Sunday service of the Y.W.C.A. will be conducted by the members of the Association, and the regular Board meeting will be held on Monday at 3.30 o'clock, with Prayer Circle at 3 o'clock.

Grasshopper Club

The Grasshopper Club held an informal dinner at Long's parlors on Thursday evening, at which the following officers were elected;

1st O. G. H.—R. Cameron.
2nd O. G. H.—J. Lundy.
Scribe—H. Robinson.
Treasurer—R. Thompson.

Obituary

Yesterday morning death visited the home of Mr. Nelson Sage, lot 6, concession 8, Monaghan, and carried away his little four-year-old daughter, Jessie Helena. The cause of the child's death was meningitis. The funeral will be held this afternoon at 2 o'clock to the Little Lake cemetery.

MAY

Will be a good month to go to St. Louis World's Fair, the Great Fifty Million Dollar Exposition. The Grand Trunk will be the route and from Peterborough will sell 15 day tickets for $21.50, 30 days for $28.70 Do not forget stop-over will be allowed at Detroit and Chicago and intermediate Canadian Stations. Information at the G. T. R. City Office

Nurses Donate

A donation of $10 has been received by Mrs. Hughes-Charles, secretary-treasurer of the Deep Sea Mission, from nurses in a hospital in Waterbury, Conn., in aid of St. Anthony's Hospital, Labrador. The list of contributors are; Dr. Mary Brown, Miss Bradshaw, Miss Lewis, Miss Emily Morrison, and one who does not wish her name mentioned.

Park St. Church

The Rev. A. H. Brace will conduct both services at the Park street Baptist church tomorrow. The morning subject will be "Gold Fields Within Easy Reach" and in the evening the pastor will speak on "The Hero and His God." An open session in the afternoon Sunday school, with presentation of papers. All seats free. Short, hearty services. Hymn books provided.

Young Men's Guild

The Young Men's Guild of Charlotte street church entertained the male members of the congregation last evening. An interesting address was delivered by Mr. J. Fife, and a short but interesting musical program was much appreciated by those present. After this dainty refreshments were served, and all present spent a most enjoyable evening.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. Crowe, of Campbellford, was in town yesterday.

—Mr. J. McCabe, of the Deering Harvester Co., was in town yesterday.

—Mr. Charlie Armstrong and Mrs. Armstrong, of the Graham House, Havelock, were in town yesterday.

—Mr. George Metcalfe, of Peterborough, has been visiting friends in Elgin during the week.

—Rev. J. O. Davidson, rector of St John's church, left for Havelock yesterday, where he preached the regular Lenten service last evening.

—Messrs. Bert Stewart, E. Jones, H. Jackson, who have been in town for the winter, returned to Manitoba on Thursday.

—Mrs. George Cluxton, of Peterborough, who has been visiting her sister, Mrs. A. W. Stevenson, Drummond street, is now the guest of her son, Mr. Lawrence Cluxton, Union avenue.—Montreal Herald.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—There was no police court again yesterday morning.

—The sound of wheels is again heard on our streets, and the splash of mud may soon be expected.

—Call at the Times Bookstore and see the many beautiful novelties offered away below cost.

—The Government dredge "Trent" is engaged deepening the river near the entrance of the Canal raceway.

—A reception to Business College students will be held in the Y.M.C.A. parlors on Tuesday evening next.

—St. Andrew's choir will practise tonight at 8 o'clock sharp. All members are requested to be present.

—See the north window of the Times Bookstore! Any article in the window for 10 cents; some worth 25 cents.

—Division No. 1 A.O.H., will give a progressive euchre party on April 13th in the C.O.F. Hall, Hunter street. An enjoyable time is expected.

—Rev. J. Bastow will speak at the Y.M.C.A. tomorrow afternoon, at 4 o'clock, and Mr. John Miller will sing.

—Mr. M. H. Howley, of this place, has taken a position as clerk in the National Hotel, at Peterborough.—Norwood Register.

—A special meeting of the committee on the drill shed site was held last evening to confer with the Board of Education.

Some of our citizens think it would be better to have the canals removed from our city streets before talking of the Trent Valley proposition.

—A business meeting of the Primary and Junior Union was held in the Y.M.C.A. last evening, and a good representation of members was present. A collection was taken up.

—Mr. Albert Keenan, of Havelock, was arrested on Wednesday afternoon last for assaulting Mr. S. Clark at the West End. He was brought to Peterborough by Constable Graham.

—So many reports have been received of the Japs bottling up Port Arthur, that one would think the yellow chaps weren't used to the bottle.

—A special meeting of the Ladies' Aid Society and Choir of Charlotte street Methodist church was held at the parsonage, and final arrangements were made for the Easter Bazaar and Nation Tea to be given in the near future.

—Mr. Geo. A. Kingston, a High School teacher, of Campbellford, has purchased from Mr. J. T. Vasper, the Herald newspaper, and hence becomes publisher and editor. The Times wishes him every success in his new venture.

—One of the most beautifully arranged windows in town is that of Mr. Cressman, the popular George street merchant. Interspersed with the dainty spring hats and trimmings are handsome vases of the choicest cut flowers, which add greatly to the general effect.

PORT HOPE DELEGATES PRESENT THEIR CASE

TO THE COMMISSION YESTERDAY AFTERNOON

What Port Hope Wants is Still Another Survey—Canal's Outlet Discussed

The first to give evidence at the Transportation Commission's meeting yesterday afternoon was Mr. H. J. Wickham, of Toronto, who formerly was a resident of this city. In his remarks he claimed that the Trent Valley Canal would not be a rival, but an ally, of the Welland Canal, and it would assist the railways rather than be injurious to them. Taking into consideration the fact that a 200,000 bushel steamer could make 20 trips per season from Port Arthur to Midland in one season, there would be some two hundred thousand bushels in favor of Midland over Port Colborne. He also submitted evidence with regard to maritime transportation, and directed the attention of the Commission to the influence which is being brought to bear by foreign government in obtaining a through rate. In this connection he advocated a policy which would render fully appreciable the advantages to the entire country of the existing means of transportation.

Port Hope was represented by a delegation headed by Col. Ward, M.P., who called on Mr. J. F. Clarke as the first speaker. Mr. Clarke expressed himself to the effect that all were agreed to a man that the canal should, in the interests of the country at large, be completed. He dwelt upon a deep waterway, the importance of local trade, and lastly on the great necessity for a thorough investigation as to the outlet of the Trent Canal. Port Hope believes that the best possible grain route between the Georgian Bay and Lake Ontario is that of the proposed Trent Valley Canal. The speaker thought that to construct the canal via Port Hope is the cheaper, quicker, safer and more direct route from the Georgian Bay to the sea board, besides having the advantage of a first-class harbor on Lake Ontario with sufficient depth of water to admit the largest vessels on the lake. He also said that an ample outlet for the products of the great North-West should be provided within Canada itself, so that our country would be as far as possible, independent of the United States.

Mr. Harold Barrett agreed with all that had been said about the completion of the canal, and urged the plan for a complete survey, as he considered that the Port Hope route was the better. There would be no rock-cutting by this route, and the canal would have a course almost entirely through natural valleys. The harbor at Port Hope has a depth of fourteen feet, and would be capable of looking after the business of the canal. The distance from the Otonabee River to Port Hope is 19 miles, 13 1-2 miles is canalage; whereas the distance to Trenton is 56 1-2 miles, 19 miles being canalage, and 22 miles improved river navigation. The height of land was 62 3-4 feet between Port Hope and Rice Lake, and the latter was 370 feet above Lake Ontario.

Mr. Rogers in his report of the Port Hope route, includes $900,000.00 for two hydraulic locks, $100,000.00 for high level bridges, and $300,000.00 for the Port Hope harbor. There are no corresponding items in Mr. Rubidge's report of the Trenton route. We firmly believe that the cost of the canal via Port Hope will be much less than by Trenton.

Col. Ward, M.P., was next to speak, and he referred to Mr. Blair's promise in the House of Commons, of a new survey of the routes, and an examination as to the depth of water in the two harbors. The estimate of $350,000 for the harbor was considered far too large, and Col. Ward stated that he believed Port Hope would give the harbor away in event of the canal finding an outlet there. In answer to Mr. Bertram, the speaker said he could not state definitely regarding the rights of way of what returns would be made for improvements. He, however, thought that the town would give a $450,000 asset, the harbor, to the Government for canal purposes.

Mayor Quinlan spoke briefly on the proposed project, and intimated that he had been authorized to offer the Government the Port Hope harbor, which had cost them $450,000.

Mr. F. Outram then briefly mentioned the question of the open lake stretch, when he stated that the gaps at the mouth of the river were equally rough to the open stretch.

Trenton's representatives spoke next and the first speaker was Mr. W. S. Jaques, president of the Board of Trade of that town.

Mr. G. W. Ostrom, the next Trenton speaker, supported all the general evidence on the canal question, but contended that the Trenton route was undoubtedly preferable to that of Port Hope. He cited Mr. Blair's opinion, as expressed to him that the Port Hope route was not a feasible one.

Mr. P. J. O'Rourke characterized the contentions of The Port Hope delegates that there was no danger of the passage on the lake from Port Hope as being absurd. He concluded by expressing a hope that the Commissioners would recommend the speedy completion of the canal.

RAIDED HOUSE

Five Inmates Arrested on Charge of Keeping a Disreputable House on Charlotte Street.

Yesterday morning P. C. Adams and High Constable Cochrane, headed by Chief of Police Rossel, raided an alleged house of ill-fame at 209 Charlotte street, and arrested Mrs. Smith, Mr. Edward Herrin, better known as "Tidy," Mrs. Albert Field, and John Harrow.

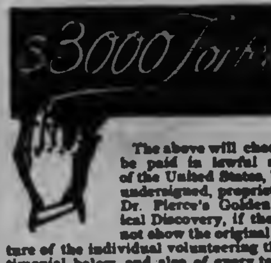
Two small children, a girl aged 4, and a boy of 16 months, were taken charge of by Constable Cochrane. The little girl is a cripple, and both children were in a wretched condition, but they are now being taken care of at the Children's Shelter.

The prisoners appeared before Magistrate Dumble yesterday morning, but all pleaded not guilty. They will appear again on Monday morning.

DIED

SAGE.—On Friday, March 25th, 1904, Jessie Helena, only daughter of Mr. Nelson Sage, aged three years.

Funeral will take place Saturday at 2 p.m., from the family residence, lot 6, con. 8, North Monaghan, to Little Lake cemetery.



The above will cheerfully be paid in lawful money of the United States, by the undersigned, proprietors of Dr. Pierce's Golden Medical Discovery, if they cannot show the original signature of the individual volunteering the testimonial below, and also of every testimonial among the thousands which they are constantly publishing attesting the superior curative properties of their several medicines, and thus proving the genuineness and reliability of all the multitude of testimonials volunteered by grateful people, in their behalf.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

THE REASON.—There is no medicine equal to Dr. Pierce's Golden Medical Discovery, for purifying the blood. It carries off the poisons which contaminate the life fluid. It increases the activity of the blood-making glands and gives the body an increased supply of pure, body-building blood. It builds up the body with sound, healthy flesh instead of flabby fat, promotes the appetite, feeds the nerves, and so gives to weak, nervous people vitality and vigor.

"About a year ago I had a very bad cough and feared it would run into consumption," writes Hon. Geo. W. Lynch, of 17 Mason Street, Worcester, Mass. "When a severe attack of coughing would come on vomiting would set in. Matter accumulated in nose and my tonsils were irritated. After reading of the wonderful cures resulting from Dr. Pierce's Golden Medical Discovery began to use it, with some doubt as to the good it would do me, I am frank to say. But, after I had used one bottle I noticed quite a change for the better. Ordered five more bottles and before I had used them all the cure was complete. There is not now a trace of cough or cold in my system and my health is perfect."

To gain knowledge of your own body—in sickness and health—send for the People's Common Sense Medical Adviser. A book of 1008 pages. Send 31 one-cent stamps for paper-covered, or 50 stamps for cloth-bound copy. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

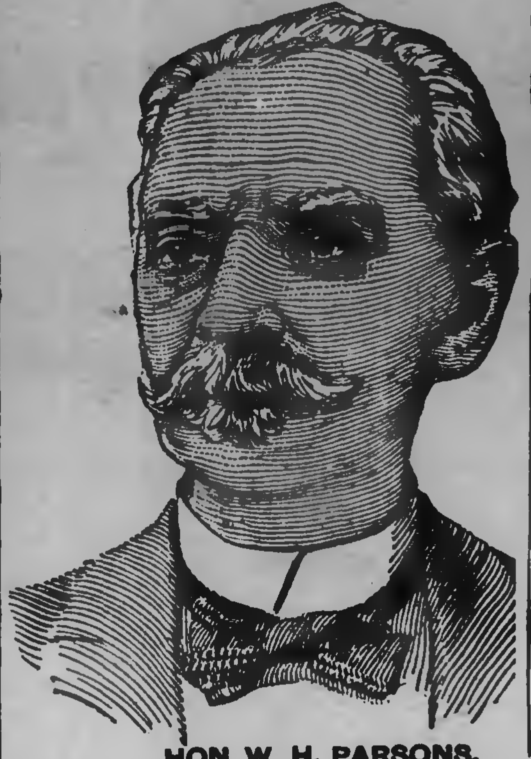
SANTAL-MIDY
Standard remedy for Gleet, Gonorrhœa and Runnings IN 48 HOURS. Cures Kidney and Bladder Troubles.
MIDY



JUDGE OF THE SUPREME COURT
Was Alarmingly Afflicted With La Grippe.
Cured by Pe-ru-na.

HON. W. H. PARSONS.

Pe-ru-na cures more cases of la grippe than all other remedies combined.

W. H. Parsons is Ex-State Senator and Ex-Special Judge of the Supreme Court of Texas, also Brigadier-General in Confederate Army. In a recent letter from 925 H Street, N. W., Washington, D. C., this prominent gentleman says:

"Upon the recommendation of personal friends and many strong testimonials as to the efficacy of Peruna in the treatment of the numerous symptoms of the grippe with which I have been afflicted for four months past, I have been induced to undergo a treatment with this justly celebrated formula. I feel a decided change for the better after using it only one week. It is especially good in toning up the stomach and has had a decided effect upon my appetite. I therefore feel much encouraged that I am on the road to complete restoration.

"My numerous friends in Texas, where I have had the honor to command a brigade of her Veteran Cavalry in a four years' war, may accept this voluntary testimonial to the merits of Peruna as a sense of obligation on my part for its wonderful efficacy."—W. H. Parsons.

There is no remedy in the world that meets the conditions produced by la grippe better than the remedy, Peruna. Peruna strengthens as it renovates, soothes while it stimulates, heals as it expurgates. Peruna is not a purgative, or cathartic, or sedative, or stimulant, nor a vegetable or mineral poison. It reaches the source of all diseases of the mucous membranes by its action on the vaso-motor system of nerves.

Every person who has had la grippe during the last year should take a course of Peruna. No one need expect perfect recovery unless they do so. The grippe has produced catarrhal inflammation of the whole mucous membrane, and good health is impossible until these are restored to a normal condition. This Peruna will do. A great many remedies have been suggested for this condition from time to time, but Peruna appears to be the only remedy that has any substantial value in these cases. It has never failed to give satisfaction during forty years' experience and still occupies the unique position of being the leading (if not the only) specific remedy for the after-effects of la grippe.

Henry Distin, the inventor and maker of all the band instruments for the Henry Distin Manufacturing Co., writes the following from 1441 South Ninth street, Philadelphia, Pa.:

"I had a bad attack of la grippe last December which lasted more than three months, and which left me with catarrh, and several of my friends advised me to try Peruna. I began with a bottle the first week in March and it certainly did me a great deal of good. I was so well satisfied that I purchased another bottle and followed the directions, and can say that it has cured me."—Henry Distin.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

A reward of $10,000 has been deposited in the Market Exchange Bank, Columbus, Ohio, as a guarantee that the above testimonial is genuine; that we hold in our possession authentic letters certifying to the same. Every one of our testimonials are genuine and in the words of the one whose name is appended.

RUSSIANS HOT AFTER A FORCE OF 8,000 JAPANESE INFANTRY.

Are Operating East and South-east of the Japanese Line of Communication Between Ping-Yang and Anju

St. Petersburg, March 28—News has just been received here that a considerable force of Cossacks is operating east and south-east of the Japanese line of communication between Anju and Ping-Yang, with the object, apparently, of preventing a junction of the Japanese troops who have landed on the east and west coasts of Corea. Scouts belonging to this force captured near Chunan, thirty miles south-east of Anju, a party of Japanese scouts, with a Corean guide. They extracted from the guide a statement that 8,000 Japanese infantry, and several field guns had arrived at Yangtok from Gensan, after passing five passes with the greatest difficulty, owing to the slippery going. The passes were covered with snow, the surface of which was alternately thawed and frozen. Frequent avalanches added to the trials of the passage of Massulion Pass, which is 2,700 feet high. The worst difficulties, however, were met in the Aobinion Pass. The Japanese, who marched in four columns, arrived in an exhausted condition. Many of them were on the sick list. Immediately the news reached headquarters, Gen. Linevitch sent two Cossack divisions from Syunchon and Soukchon to operate along the road from Ping-Yang to Yangtok. They occupied the town of Sountchen and the Pouriugan Pass, west of the town. Three sotnias of Cossacks were sent across the mountains to stop the Japanese advance. The Cossacks expect to intercept and attack the Japanese as they leave the Mamounion Pass. The country thereabout is very difficult, and it is hoped that, owing to this fact, and the probable exhaustion of the Japanese, the latter will be unable to make a serious resistance.

—The season is at hand when the leanly housewife arms herself with a broom, a feather duster, various brushes and cloths, and proceeds to stir up the winter's crop of microbes once called spring house-cleaning. And and bacilli in the time-honored proto the nasal passages, bronchi and lungs of the family furnish excellent breedroscopical mischief makers. And the doctors smile.

FRENCH SHORE IN NEWFOUNDLAND

Further Reports That the Difficulty Has Been Settled

MONTREALERS IN DEMAND

Messrs. Ames, Hodgson and Drummond Asked to Speak at English Meetings

London, March 28.—The latest information obtainable in reference to the French shore question in Newfoundland, which has been the subject of recent negotiation between France and England, and in which a settlement is reported to have been reached, is that France formally renounces her territorial rights on the French shore and her police rights in Newfoundland waters. She receives, as compensation for the French subjects inhabiting the French shore, about three million francs, and all French fishermen will have the same rights for fishing and catching bait as the British fishermen.

TRADE WITH DENMARK

The representatives of fifty-eight Danish agricultural associations have unanimously charged the president of the Agrarian League of Denmark, with request that the British ambassador at Copenhagen, assure his Government of the most earnest desire on the part of the Danish farmers to strengthen the friendly relations existing by facilitating commercial intercourse through the free exchange of their products.

THE IRON TRADE.

The proposals of the Chamberlain Tariff Commission having been put before the members of the British Iron Trade Association, ninety per cent. of the replies desire some change in the present system, while declining in the majority of cases to commit themselves to the precise character of such changes.

DEFENDS THE CHINESE.

Sir Gilbert Parker, in addressing the Manchester branch of the Imperial South African Association of the Chinese in Africa, defended the ordinary Chinese laborer from having known him in British Columbia. He pointed out that the C. P. R. might not have been finished, but for 8,000 Chinamen, who kept steadily at work.

EMIGRANTS FOR CANADA.

The Allan liner Bavarian takes out on her next trip 1075 emigrants, mostly English, and many from Lancashire. The Dominion liner Southwark has also sailed, carrying a large party bound for the Northwest, and also a party of children from Dr. Barnardo's Home.

SUES ON HUSBAND'Z NOTE.

Mrs. Cunningham, the widow of an officer in the Northwest Mounted Police, is suing her family doctor for the recovery of £1,600 on a promissory note. Cunningham went to the Northwest in 1895, and his wife not hearing, has presumed him to be dead.

MONTREALERS IN DEMAND.

Mr. Geo. E. Drummond has had urgent requests to address meetings in different parts of the country, but has expressed his regret that he is unable to comply. Mr. Ames and Mr Hodgson speak at Leeds and Cardiff.

THE AUSTRALIAN COMMISSIONER

The High Commissioner of the Australian Commonwealth in London will have a salary of £3,500 a year.

—Time is money, they say, remarked the chronic loafer as he bit off a fresh chew of tobacco. Well, maybe it is, rejoined a city grocer, but if it's all the same to you I wish you would spend a little more money here, and a little less time.

ADVERTISE IN THE TIMES.

ANOTHER WAR CLOUD APPEARING

Greece is Getting Ready to Tackle Turkey Again

WILL AWAIT OPPORTUNITY

And Will Strike Her Old Foe when the Time Comes

London, March 28.—Advices from Athens says that Greece is arming as she never armed before, and will be ready to strike Turkey when an opportunity is afforded, through the Balkan troubles.

News from Greece is not reassuring in connection with the outlook for peace in the Balkans to learn that Greece is preparing for an increased armament. The president of the council, M. Georges Theotokis, confronted Parliament with the startling proposition that for all practical purposes and with other nations concerned in the Macedonian problem were doing, the military forces of Greece could not be called an army, and that Hellenic interests needed much stronger protection than they at present possessed. Greece at present is driven to the limit to secure men for the army Two cases of exemptions are thereby abolished. The only sons of men still able bodied and the eldest sons of men still living will henceforth be called to the service. This modification of law will furnish an effective annual addition to the ranks of the Grecian army of over 12,000 recruits. Service is to be for two years, but it will be optional with the authorities to defer the enrollment for two months, and to grant leave during the summer and autumn should circumstances permit the exercise of economy, while in times of peace it will be permissible to pass into the reserves a certain number of men four months before the expiration of the second year, and even in exceptional cases after six months' instruction, preference being given to only the eldest sons. The practical effect of the elastic arrangement is that critical times like the present the number of recruits will be doubled while when the political outlook is good the new classes of conscripts will be relieved of much service for which they would be liable.

TRANSPORTATION COMMISSION

Trenton Protests Strongly Against Port Hope Route

This Transportation Commission has closed and the canal question has been thoroughly threshed out. W. S. Jacques, G. W. Ostrom, and P. J. O'Rourke, representing the Trenton Board of Trade, in giving their opinions, strongly opposed the Port Hope route because of the open lake navigation.

J. P. Secord, R. J. Sanderson and H. Hale appeared for Orillia. They urged the importance of the canal for local traffic, the saving of freight rates, the building up of existing and establishment of new industries. Sixteen municipalities were tributary to Lake Simcoe. The district had outgrown the capacity of the Grand Trunk.

Capt. Vanalstine fixed the rate for profitable carriage from Midland to Montreal at 1 1-4c a bushel. He did not favor the open route from Port Hope to Quinte.

Government Superintendent R. B. Rogers, who was present to answer questions, did not favor Port Hope. The canal would be completed next year to Balsam Lake. There were many water powers to be developed on the Trent, but none on the route to Port Hope. Mr. Bertram pointed out that there did not seem to be much basis for the statement that had been made that the Government could provide for the outlay in completing the canal by leasing power privileges, since at present the Government owned only four power sites on the entire canal so far. Mr. Rogers stated that there were power sites to be developed on the Trent.

Mr. Bertram then declared the Commission closed.

JAPS SUSPECT SPY

Committee Will Ascertain Whether Legislator is Aiding Russia

Tokio, March 28—A sensation has been caused in the diet by an accusation made against Teisike Akiyama, a member of the house of representatives and publisher of the Nivoku Shimbun, of being a paid advocate of Russia. The house has appointed a committee to investigate the accusation. The Nivoku Shimbun which has been assailing the government, has been suppressed. At the time of Kuropatkin's visit to Japan it published simultaneously with the Pekin Journal the text of a friendly agreement which it declared had been concluded by Russia and Japan.

A TRIP UNDER WATER

Diver Plans to Walk From La Crosse to St. Louis

La Crosse, Mich., March 28.—As soon as the water of the Mississippi River is warm enough Henry Hoffman, a diver residing here, will start to walk from this city to St. Louis, about 600 miles, on the bed of the river. Hoffman was once a deep sea diver and claims he can make the trip in safety in four months. He will be accompanied by a boat carrying air pumps and provisions, and claims he will leave the water only for meals and to sleep. Hoffman has already ordered a special diving suit in which to make the novel trip.

RUSSIAN TRAITOR HANGED

Executed on the Charge of Selling War Secrets

St. Petersburg, March 28.—It now transpires that shortly before the war an official in the ammunition supplies department called upon M. Kurino with an offer to sell certain papers connected with the possible supplies which could be furnished from the entire central Warsaw district, and a plan of the various points to which the same could be sent. This was referred to the Japanese military attache, and after a long conference, the matter being referred to the home government, the official was given 5,000 roubles.

The official in question was arrested yesterday and taken to the Fortress Peter Paul, where it is stated, he was summarily hanged as a traitor. It further is stated that the tactics pursued by the Japanese evidently are aimed at special points where stores are gathered. Detailed knowledge of the whereabouts of the same has been disclosed by the enemy and has led to inquiries followed by yesterday's arrest.

For some time special precautions have been taken here to prevent leakages in information. Many changes have been made in officials every newcomer receiving special caution as to the necessity for the greatest reserve.

RUSSIANS LOYAL TO CZAR

Government Denies State of Siege in Force, only to Avert Revolts

St. Petersburg, March 28— Reports that a state of seige such as has been proclaimed in Siberia and in Saratoff province, south-eastern Russia, through which the Siberian railroad runs, will be extended to the whole of European Russia is officially declared to be absolutely false. No such measure has even been contemplated, it being considered unnecessary.

The authorities express the greatest satisfaction with the internal situation of the empire. The hearty patriotic response which the war with Japan has met with in all parts of Russia has profoundly impressed the authorities. All the reports received by the ministry of the interior indicate that the critics of the government instead of profiting by the war, have been almost completely disarmed.

Two attempts at anti-government demonstrations in Kieff and Odessa, according to these reports, found the temper of the people violently opposed to them. Within the last fortnight only a single incident occurred which could be construed as an evidence of disaffection. This was the throwing of a bomb at Vilna, the capital of the Lithuania government in western Russia, a few days ago, and up to date the author and purpose of the outrage have not been discovered.

AN ALARM SOUNDED

Vienna, March 28— The campaign of alarm in the Vienna press on the subject of Chinese intervention in the war has elicited an authoritative statement on the real attitude of Japan. After setting forth with lucidity the action of the Chinese government as to China, the communication concludes that though Chinese support in many respects would be an advantage to Japan her government cannot run the risk of Russia's occupying other Chinese provinces or risk seeing the Chinese question raised again by massacres of foreigners in China, which would accompany any Chinese participation in the war. Japan while regarding the war necessary, feels no desire to complicate the conflict or make the Chinese question a European issue.

Pekin, March 28.—The Wai Wu Pu (ministry of foreign affairs) has refused the Russian military attache a passport to inspect Chinese forces in Manchuria and Mongolia, but has furnished him a Chinese escort to accompany him on the same inspection.

LOCAL - SPORTS.

BASEBALL.

Lindsay baseball team will not go to Florida for their first practice, as was reported. They have decided that it would be too hot for them down there.

LACROSSE.

Lindsay will likely enter a team in the lacrosse league, and they intend sending delegates to to C.L.A. convention to be held in Toronto, on Good Friday.

CHINA IS NOW READY FOR WAR

Pessimistic View of the Situation Entertained

WILL FRANCE INTERFERE?

This is the Vital Point that is Disturbing Europe at Present

Berlin, March 28—The semi-official Post last night published a communication from a well known diplomatist who states that in the French capital a very pessimistic view is taken of the tension which undoubtedly has set in between Russia and China, and that all fears regarding the attitude of China toward the war seem to be approaching a realization.

Despatches have been received at the Quai d'Orsai from Pekin stating that the Chinese government still denies it has any intention of abandoning its attitude of neutrality, but everything goes to show that it really is waiting only for a favorable opportunity to take part in the hostilities. The Russian government has received similar reports from its minister in Pekin, and is taking measures in consequence.

In the last day or two an exchange of views of an exhaustive character has taken place between the Russian and French governments as to China's intervention in the war, but no decision has yet been reached as to the lines of action to be adopted by France in this eventuality.

The answer of the Chinese government to the threatening despatches sent in by Russia is awaited with anxiety.

In view of the relations which the Post maintains with the foreign office here a statement of this kind in its columns is important.

MAY NOW ENTER THE DOMINION

Newfoundland May Become Part of Canada

FRENCH SHORE QUESTION

The Way Paved for the Union of the Colony with Canada

London, March 28—It is anticipated that the renewal of official negotiations for the entry of Newfoundland into the Canadian Confederation will be an early sequel to the Anglo-French understanding now almost completed between Lord Lansdowne and M. Delcasse. Three million francs is thought a quite reasonable compensation to the dispossessed French lobster factories on the treaty shore.

It is understood that Newfoundland will be expected to concede to the Canadian fishermen whatever fishing and bait-catching rights are given to the French fishermen under the new arrangements.

The existence of this French shore quarrel has been the chief obstacle in the way of the federation negotiations between Sir Wilfrid Laurier's Government and the Government at St. John's.

JAPAN'S LAST OFFER

Tokio March 28.—The documents submitted to the Lower House shows that Japan's last note offered to recognize Manchuria outside of Japan's political sphere provided Russia recognized Corea as outside of hers. This signal concession, instead of placating Russia seems to have led her to imagine she could obtain everything by insistence, and that Japan would sacrifice everything rather than fight. The whole correspondence shows that Russia was inventing frivolous pretexts for delay, and never had the least inclination to make concessions worthy of the name. It shows also that St. Petersburg subordinated itself to Alexieff throughout despite Japan's remonstrance that his influence did not make for peace.

WARSAW.

The following sensational account was handed your correspondent last week, and although he cannot vouch for the veracity of the statement, he hands it on and the reader may take it for what he thinks it is worth. "What might have resulted in a fatal accident occurred on one of the principal thoroughfares of this great metropolis one afternoon recently. While a teamster, seated upon a load of hay and driving a team of heavy draught horses past one of the places of business, he felt himself and his load being swiftly attracted towards the main entrance to said building, the door of which was standing open. In less time than it takes to write these words he and the hay had passed the entrance fairly, the suction seeming to come from this place. Upon entering he saw nothing before him but the fiery entrance to an air-tight heater, into which, through a hole in the floor, only his head appearing above, a young man was throwing wood. As a drowning man will grasp at a straw, so the teamster grasped for something which he saw shining on the wall. His efforts seemed hopeless until finally he reached it and held on. It happened to be a handle put there for that purpose and had saved a great many lives. Needless to say the load of hay was gone before the heater's door, or the draught could be closed; and was lost and in two minutes was ascending heavenward at the rate of 100 miles an hour. Just 10 seconds elapsed from the time the load left the street until it struck the fiery monster. The young man on being questioned, said he had missed several tons and supposed they had gone the way of the load of hay. He had, however, taken the precaution to have the remaining ones attached by a chain to the wall.

THE RUSSIANS CAPTURE A FORCE OF CHINESE REGULAR TROOPS SATURDAY

Special to The Times.
St. Petersburg, March 27—A report from Vladivostok says that a mine has been discovered under the fortress, with wires leading to a Chinese house in the town.

Special to The Times.
Tien Tsin, March 27—It is officially announced here that at noon to-day the Russians proclaimed New Chwang under martial law.

Special to The Times.
St. Petersburg, March 27—It is stated that one Russian torpedo boat was sunk in an engagement at Port Arthur this morning, but it is thought the vessel can be approached.

Special to The Times.
St. Petersburg, March 27—It is stated on apparently reliable authority that Admiral Makaroff's report of his reconnoiterances of Elliot Island yesterday contained the startling statement that they captured a junk filled with Chinese regular troops, which was being towed by a Japanese gunboat.

Special to The Times.
Chefoo, March 27—At 3 o'clock this morning another attempt was made by the Japanese to block the entrance to Port Arthur and bottle up the Russian fleet by sinking four stone laden steamers in the entrance to the harbor. They were convoyed by 8 torpedo boats. As the Japanese fleet, consisting of 16 ships, neared Port Arthur, they were soon discovered by four Russian torpedo boats, acting as scouts. When the four steamers approached the harbor, they were sunk by the guns of the fort and the Russian ships lying in the outer harbor, which opened a terrific fire. The Japanese fleet remained off Port Arthur until daylight and disappeared. The Russian fleet weighed anchor and sailed off the harbor. The fate of the crews on the steamers is unknown. Since the arrival of Admiral Makaroff the Russians have been far more active.

TOWN BOOKS AUDITED

Messrs. Blatch and Jackson of Ottawa Have Completed Their Work

Messrs. G. L. Blatch and J. H. Jackson, both chartered accountants, of Ottawa, who have been in Peterborough for the past month, auditing the town accounts, completed their work on Saturday evening, and have left for their eastern home.

"How did you find the books, Mr. Blatch?" was asked by a Times reporter.

"Well, things generally were in good shape," was his laconic reply, and he refused to speak further on the subject until their report comes out next week.

SATURDAY'S MARKET

Slower Than Usual—Scarcity of Butter and Eggs

Saturday's market was not as brisk as usual, owing to the bad condition of the county roads, which allowed only a few farmers to get in. Several suburban residents had to walk miles to attend the market, as they were afraid to take out their horses and one man who was driving from Otonabee lost his horse on the road, as is reported in another column. Butter and eggs were scarce and the prices ran much the same as last week.

Poultry was also very scarce and was more expensive even than usual. The few turkeys sold brought $1.50 and $2.00 each, and chickens sold for 95c and $1.00. Pork was worth 8c. and 9c.

TALKS WITH THE BOYS

Interesting Series of Series of Lectures to be Given at Y.M.C.A.

Arrangements are about completed for a series of talks to boys from twelve to sixteen years old, at the Y.M.C.A., commencing Monday evening, April 4th, at 7.30. As this is holiday week we feel at liberty to make an exception to the rule that no schoolboys are allowed in the building after six o'clock, and this will give an opportunity for the working boys and school boys to associate themselves a little more. An effort will be made to dismiss the meetings before nine o'clock, and we ask the co-operation of the parents in making these meetings the success and help they are intended to be to the boys of Peterborough, and especially to those who are members of the Association. Something special in the way of singing, etc, will be given and an effort to make them interesting and decidedly boys' meetings.

A meeting will be held on Good Friday morning at 10 o'clock to make final arrangements. Admission will be by ticket only, and same can be had from the office or members of the Boys' Executive next week. Subjects and speakers as follows;

Good Friday, April 1st—"A Boy's Decision," speaker Physical Director.

Monday, April 4—"A Boy's Ways" speaker, Secretary.

Tuesday, April 5—"A Boy's Make-up," Physical Director.

Wednesday, April 6— "A Boy's Chums," Physical Director.

Thursday, April 7—"A Boy's Religion," Physical Director.

Friday April 8—"A Boy's Inheritance," Physical Director.

The Boys' Executive of the London Association are making an educational tour that week, and will be in Peterborough from Tuesday noon to Wednesday noon, and during their stay a Boys' Conference will be held. A lively week with the boys is expected.

Ye Weary Tenants

It was a springtime evening.
Old Caspar's work was o'er,
And he within his dining-room
Was cussing. He was sore.
Before him on the table lay
A letter which had this to say—

"Dear Sir: I have to tell you
That rents are being increased.
And you'll agree with me, I think,
That you can pay at least
A third more than your present rent.
This house don't bring me in a cent."

It was a wild-eyed Caspar
That read that billet-doux.
He couldn't find a house in town.
No more I'll bet, can you.
Of Caspars there is many a score,
Their cry is: "Oh," for landlord's gore!"

"I GUESS I GOT DE SPRING FEVER"
me too

ADVERTISE IN THE TIMES.

A SHOOTING ACCIDENT

Mr. Robt. Angott Accidentally Shot Through the Hand

to save wear and tear.

While out with a gun yesterday afternoon, Mr. Robt. Angot, a Frenchman, who boards at the Montreal House, received a charge of shot through the fleshy part of his hand, between the thumb and index finger, by the gun accidentally discharging. The hand was badly lacerated. Dr. Coughlin was called, and the wound was dressed. The patient is at St. Joseph's Hospital.

An Exciting Experience

Mr. John Latimer, representing Messrs. Alex. Elliott & Co., of Peterborough, has returned from a visit to Bancroft and Maynough. Between these two points he was snowbound, and according to a citizen's story, his horse was buried in the snow at one point. Mr. Elliott himself is reported to have had to walk about fifteen miles owing to the deep snow on the roads.

Condition of the Streets

The streets at present are in a most deplorable condition, and many suggestions have been offered for their improvement. In speaking of the match on Saturday, a prominent citizen remarked, "Why not have the streets cleaned with the new machine which was purchased last year. It is standing there idle while the streets are in a shameful state. In other large towns and cities the streets are well scraped in the spring of the year and the refuse is carted to the town parks to be used as a fertilizer. Why not do that here?" This appears to be a good suggestion and is well worth the consideration of our town fathers.

Absent for 29 Years

Mr. T. Barnecott, a former resident of Peterborough, visited Mr. Sandy, G.T.R. station agent, last week, and leaves to-day for his home in Aylmer. Mr Barnecott came to Peterborough in 1869, and left in 1875. While here he was superintendent of St. John's Sunday school for three years, during the rectorship of Rev. Mr. Beck's.

"It's the first time I've seen my old church for twenty-nine years," remarked Mr. Barnecott as he walked into St. John's yesterday morning, "and it does my heart good to be here again."

AMONG THE CHURCHES

ALL SAINTS.

The Rector, Rev. W. Major, conducted both services at All Saint's church yesterday. In the morning his subject was, "What hast Thou done?"

BETHANY TABERNACLE.

Pastor Stenergel spoke at both services yesterday. In the morning he gave the fourth of a series of sermons on the Book of Revelations, his subject being, "The letter of Jesus to the Church of Pergamus; or the Church and the World." In the evening the subject was, "What to Believe and how to Believe it."

CHARLOTTE STREET

In the morning the pastor preached an able sermon on the subject; "Measurements of Conscience," and in the evening the subject was, "The Fruits of Repentence." Both services were well attended.

MARK STREET

The pastor, Rev. J. G. Lewis conducted both services, and in the morning he preached an excellent sermon on "An Introductory Study of the Sermon on the Mount." In the evening the subject was, "Lessons from the Broken Tables of the Law."

ST. PAUL'S CHURCH

Rev. J. A. Wilson, B.A., assistant pastor, preached at the morning service, and the evening service was conducted by Rev. Dr. Torrence. Special collections were taken up for the renovation of the church, which were liberally responded to.

ST. ANDREW'S

Both morning and evening services were conducted by the Pastor, Rev. J. G. Potter, and his morning text was from Deut., 26: 46. Mr. Glass, of Toronto, sang the beautiful solo "Jesus is Calling Today," and the morning anthem was Hawley's "Gently Lead, O Gently Lead Us."

Write Notes to Themselves.

"Actors are great hands to write 'mash' notes to themselves," said a stage manager. "The leading young men, you see—the heroes that marry the beautiful girls—are supposed to attract to the theater myriads of young women. They draw big pay on this account; their friends talk seriously of the powerful, almost hypnotic, influences that they exert on romantic females. This power is the stock in trade of the actor who travels on his beauty instead of on his art, and he must always have tangible proof of it. So if the young women don't come up each mail with a bunch of authentic mash notes, he sees to it anyway that he gets mash notes all right. He times them so that they reach the theater during rehearsal. The manager every afternoon brings them to him—a half dozen pink and blue and cream envelopes, smelling of violet and orris. He takes them with a guffaw, reads them, passes them around. Every one pretends to be amused at their silly contents, but the minute the actor's back is turned the murmur passes back and forth: 'They're fakes. He wrote them himself. He spends two hours a day writing himself mash notes.' To tell the truth, this actor gets a number of authentic mash notes, but nobody believes it. It is thought that every note is a fake."—Washington Post.

"Barber, Barber, Shave a Pig."

In pig killing there is no more exciting moment than that of removing the bristles from the carcass. With such haste does the operation sometimes have to be accomplished that in a certain country family it was begun one day with a pair of fine brass candlesticks before the usual utensils could be found.

When Salmon P. Chase was at Kenyon college, which was then presided over by his uncle, Bishop Philander Chase, he encountered a similar difficulty and cut the knot with unhesitating decision. The bishop and most of the elders went away one morning, and young Salmon was ordered to kill and dress a pig while they were gone. He found no great trouble in catching and slaughtering a fat young "porker," and he had the tub of hot water all ready for scalding.

This process should have loosened the bristles, but either the water was too hot or the pig was kept soaking too long; at any rate, when the boy began scraping the bristles not one of them could be started. In pig killing phrase, they were "set." What could he do?

Then he bethought him of his cousin's razors, a fine new pair, just suited to the use of their owner, a spruce young clergyman. He pilfered them and shaved the pig from toe to snout.—Youth's Companion.

A PRETTY ROOM.

The Way Little Florence Fixed it Up to Look "Bu'ful."

Little Florence was in great glee. She said she had made the room look "bu'ful" for mother's friends that afternoon. She climbed into the great chair by the fireplace to admire her work. Over each picture she had placed a large green leaf, and there in front of the mirror, in the vase Uncle Jack brought from Venice last year, was a whole bunch of leaves. The room looked like a garden, and her own bright face was like a blossom above the green leaves in her hand.

But mother cannot find her little girl. Florence is not where she should be.

"Ah, at last I have found you, dear!" says mother. "What are you doing, Florence?"

"Just resting. I'm so tired from reaching up to the pictures! Isn't the room bu'ful? And, oh, mother, I'm so tired! Please, may I have my nap?"

The little head was bobbing over, and mother could not be cross with her darling, even though the leaves that brighten the room were from the best palm. The poor lady only sighed for her plant and tried to explain to Florence when she woke.

—A handsome sign which reads "Tully, Merrill and Meredith" has been placed over the large store recently vacated by Gough Bros.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 28 1904

MOBS AND THE MILITIA

In the discussion in the House of Commons on the proposed militia bill, a clause that came in for considerable discussion was that which seems to require the use of the permanent corps, alias the regulars, wherever available in the suppression of riots, and to keep the volunteers in the back ground unless re-inforcements may be necessary to the permanent corps. One member advocated this on the ground that the volunteers should not be exposed unnecessarily to the ill-will and assaults of mobs.

We are not sure that that was a judicious view, says the Ottawa Journal. The volunteer militia was meant for business, irrespective of the drawbacks, and the idea of screening the force from scoffs or contumely at the hands of mobs, where the public good may involve that, seems rather a small one. It strikes us that it would be better for the volunteers to take on duty of that kind rather than that the permanent corps should be too freely used. The permanent corps is composed of regulars, who would have less public sympathy in such matters and be an excellent target for assertions that they were reckless with their weapons. The volunteers are citizens who have the sympathy of a great portion of the public in any duty they are called on to take, and after all there is something worth while in the law and order of the country being maintained by the citizens themselves rather than by professional soldiers.

There is no reason why the matter should not be left optional to the good judgment of the authorities in any particular case, but there seems to us a good deal of reason against any sort of legislation favoring the idea of the use of the permanent corps every time in civic trouble before the volunteer militia.

EDITORIAL COMMENT

Lay the main to give the Westinghouse works fire protection, and cut the appropriation for deputations' jaunts.

Kouropatkin is quite a boaster. He has Japan defeated and invaded already.

Hear Pattypiece and Rowell at the Liberal Club to-night. All are welcome. Grits and Tories alike.

The Provincial Secretary's Department has issued a circular to License Inspectors urging strict enforcement of the liquor laws. Failure to do so will result in dismissal.

The Wine and Spirit Journal, the organ of the liquor trade, in a leading article, challenges the prohibitionists to war to the bitter end. We give the article in full by way of showing exactly how the trade views the situation.

The rush to the Northwest has begun. Settlers from the Old Country, from the Western States, and from the older provinces, are now pouring into it. Ontario is sending its quota but what is our loss is the Northwest's gain.

The Dominion Government proposes to raise a naval reserve force of 2,000 men, to be trained if possible on the Atlantic and Pacific coasts. Later on this force will be increased, and then we may expect to see some training done on the Grimsby coast by Mr. Smith's horse marines.

An Ottawa despatch says: "The Lord's Day bill, which the Government are being urged to have enacted as a Federal statute, provides against all Sunday labor except works of necessity." But that is not very illuminating. What we have been trying for some time to get is a definition of what is a work of necessity. We take second place to none in our desire to preserve the Day of Rest, but we should object strongly to a return to the Blue Laws; and we should be sorry to see a measure adopted that would prove unworkable.

JIST SUM THINGS

BY SI JONES

The transportashun kommishun was in sesbun on Friday and the da before yesterdy an tha certinly jawked kanal enuff ter mak a dozen rivers. Tha were ther frum all over even bellevile who showed themselves as mutch interested as if tha hed been tawking buckie or shinny, an thats sayin a grate deel. Nearlie evry delegate said the same thing. Tha was of wun mind as twere. Tha all wanted the other 30 miles of the kanal did rite away. As Mayer Roger sed in his openin speech, it il onle take erbout five milion dollers ter complete the job an i kant see why the government hez been so long erbout doin it. It shows more than a lack of money sumwhere. But medickal evidence wood be better than mine, so i ll not say nothin.

• • •

A frend of mine wunce sed he didn't beleeve in advertisin mutch. He'd poor luck in bizness. He changed his mind an begun advertisin evry day. Now he hez wun of the best stoars in peterburrow. It pays ter change one's mind wunce in er while. Another frend of mi nabors hed lost er dog whitch he valued very mutch. It hed been gone er week when he advertised in the mornin' Times. Next mornin befor he hed receved a look at his ad in the paper the dog hed been brot back none the worse of wear. Ever since that experence he, —the man—hez had grate faith in advertisin in er good up ter date paper. Another man frum out in ther countrie a short distance advertised two consequtive days fer er housekeper, an ten days arterwords he was maried ter the womin who ansered his ad. Now he hez the ad pasted on the mariage page of his famlie bible and de delites in tellin his frends that "advertisin pays."

Best Way to Rear Healthy Children

Develop Their Strength With Ferrozone Which Makes Rich Blood, Hardy Muscle, Steady Nerves.

Children brought up on Ferrozone are known by their strong rugged frames, their chubby cheeks and healthful appearance. Mothers find it an indispensable tonic and body builder, and in thousands of homes no other remedy is used.

EVERY CHILD IMPROVES ON FERROZONE

Mrs E. Montgommery, of Pittsburg, writes; "A little neice came to visit me, and noticing her pale looks and haggard looks, I started her on a course of Ferrozone. The change that girl underwent in a few weeks was marvellous. Her appetite chirped up, she had more spirit and ... hard a rosy color came into her cheeks that I never saw there before. I weighed my neice about the time she started to pick up, in seven weeks she gained almost eight pounds, and just looked the picture of health. I think this should be an example to many mothers, and I hope that others will try Ferrozone for their little boys and girls. I am thoroughly convinced that it's the most strengthening tonic. It has my strongest endorsement."

The reason that Ferrozone works so beneficially with children is that it acts directly on their blood, freeing it of all unhealthy matter, at the same time giving it an additional supply of iron. This at once results in more strength, new spirit and renewed vitality. Just one tablet at meal time works wonders.

You must be sure to get Ferrozone. Refuse to accept any article the druggist may say is just as good. Get what you ask for, Ferrozone, and the result we guarantee will be satisfactory. Price 50c. per box or six boxes for $2.50. By mail from N. C. Polson & Co Kingston, Ont. and Harford, Conn, U.S.A.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Red Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 28th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-22-03.

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

MEN AND WOMEN WITH MONEY

I offer you a safe 7 per cent. investment. Your money absolutely safe. Dividends sure and regularly paid. You can get full particulars by addressing

SECURITY,
c-o Times,
Peterborough, Ont.

THE
Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

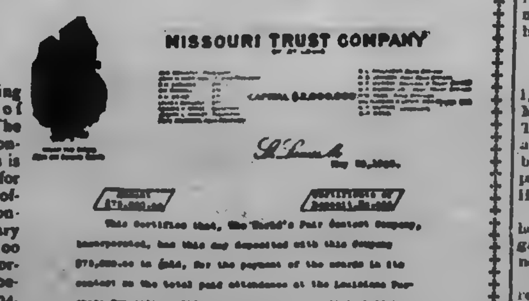
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904. An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1889 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,000.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

CAPITAL $2,000,000

This Certifies that, the World's Fair Contest Company, incorporated, has this day deposited with this Company $75,000.00 in Gold, for the payment of the awards in the contest on the total paid attendance at the Louisiana Purchase Exposition, 1904, and that said deposit is held in trust by this Company to be paid by it to each successful contestants, as the Committee on awards may direct.

Missouri Trust Company of St. Louis,

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00 This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

PREFER DEATH TO SHAME

WAR DESTINED TO BE MARKED BY SUICIDE

Russian Officers Take their Lives Rather Than Bear Disgrace

Special to The Times.

St. Petersburg, March 26.—This war seems destined to be marked by the suicide of officers who have failed to achieve success.

The rumor has been confirmed, unofficially, that Vice Admiral Stark, recently dethroned at Port Arthur, has attempted to kill himself while in a state of despondency.

Admiral Stark was in command of the sea forces at Port Arthur when war broke out, and was entertaining so lavishly at his own house at the time the Japanese made their first attack at midnight, that he thought the cannonading was from his own ships at practice beyond the promontory. Only when a shell burst in the garden of an adjoining residence did he and his staff become sober enough to realize what was actually transpiring.

After Viceroy Alexieff had conducted an inquiry into the situation at the time of the attack, and is said to have shot down a lieutenant whom he regarded as most culpably guilty, he temporarily relieved Stark, granting him a "sick leave." When Makaroff arrived the command was turned over to him entirely, and now the disgraced officer is said to have attempted to bury his shame in death.

Some three weeks ago, when the Japanese first invaded Manchuria at Possiet Bay and were said to be marching upon Kirin, panic became supreme in that city. The military governor, finding it impossible to restore order or reassure his constituents, killed himself.

Russian officials who examined the merchant vessels sunk by the Japanese at the entrance to Port Arthur harbor found in one of them the body of the captain, as a member of the crew who had been captured on landing, having swam across the channel, said they would.

"We are lost, the scheme fails!" said the Japanese captain, according to the sailor's story, when their discovery was made by the watch-dog Retvizan and heavy balls shattered the deck and sunk the vessel. "I will never face my superiors with a report of such a disaster," the captain continued, in the same breath, "and, placing a navy pistol to his temple, fired. He dropped to the floor and the sailor plunged overboard.

The officers report that they found the pistol beside the commander's body, and near him was a chart, showing the course the ships were to take in order to make a success of the Hobson scheme.

COMING TO CANADA

Two More Shiploads of Emigrants Leave England

London, March 25.—Mrs. Cunningham, widow of an officer of the North-West Mounted Police, is suing the family doctor for the recovery of £1,000 on a promissory note. Cunningham went to the North-West in 1895, and his wife, not hearing from him, presumed him dead.

CHAMPIONS CHINESE.

Sir Gilbert Parker, addressing the Manchester Branch of the Imperial South African Association on the proposal to take Chinese to South Africa, defended the ordinary Chinese laborer, having known him in British Columbia. He held that the Canadian Pacific might not have been finished but for 8,000 Chinamen who kept steadily at the work.

DENMARK AND BRITAIN.

Representatives of 58 Danish agricultural associations have unanimously charged the president of the Agrarian League of Denmark to request the British Ambassador at Copenhagen to assure his Government of the most earnest desire on the part of Danish farmers to strengthen the friendly relations existing by facilitating commercial intercourse through the free exchange of their respective products. The High Commissioner of Australia in London will have a salary of £3,500.

COMING TO CANADA.

The Allan Liner Bavarian takes out 1,075 emigrants, mostly English. Many of these are from Lancashire. The Dominion Liner Southward has also sailed, carrying a large party bound for the North-West; also a party of children for Dr. Barnardo's Home.

The Admiralty Court yesterday held that the steamer Lake Michigan was to blame for the collision near Dungeness on Feb. 10.

Mr. Geo. A. Drummond, of Montreal, has had an urgent request to address meetings in different parts of the country. He expressed regret at being unable to comply. Messrs. Ames and Hodgson of Montreal will speak at Leeds and Cardiff.

TO AID NAVIGATION

Government Will Improve and Safeguard Canadian Routes

Ottawa, March 24.—The Canadian Government will expend this season one million dollars in the installation of new aids to navigation and in the improvement of existing works along the great lakes and the St. Lawrence and the Atlantic and Pacific coast to safeguard shipping by Canadian routes, and to secure for vessels minimum insurance charges. The new Lighthouse Board has within the last fortnight approved of works involving an outlay of at least a quarter of a million, whilst other contracts are in contemplation that bring the total up to the sum named, which is twice what was laid out in 1903. Hon. Mr. Prefontaine is thoroughly alive to the necessity of removing the stigma that has attached in certain quarters to Canadian routes of navigation, and his colleagues are prepared to heartily back him up in the determination. A considerable share of the outlay is to improve lighthouses that were almost allowed to fall to pieces under the parsimonious economy that reigned in the last few years of the Conservative regime.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.63 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.66 and $79.66 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet more it should meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1890, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become ~~large and~~ continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,600 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes, in this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

PAPERS DODGE THE RULE

HOW WAR CORRESPONDENTS HURRY MESSAGES

Campaigners Objected to Japs Providing Necessities

New York, March 25.—An interesting letter has been received from the Herald's war correspondent at Tokio, written before he went to the front. He says:

The telegraphs of Japan are owned by the Government. oFr years it was the rule that all messages must be prepaid. No arrangement for sending messages collect was possible.

One of the most surprising changes effected by this war has been an arrangement by which telegrams may be sent to newspapers and paid for by the receiver. This was effected only on the guarantee by the cable company which receives the messages from the Japanese Government wires that it would be responsible for the charges.

But here comes in the wonderful regulation. A press telegram is a message intended for publication, and the rule is that it must be published in the next issue of the paper after it is received, and a copy of the paper sent to the delivering telegraph office. For such messages a less rate is charged than for ordinary commercial messages.

There is also what is known as the "urgent" rate. If a man is in a great hurry to get through an important message, he may pay the urgent rate and have it take precedence of all other messages on the wires except urgents filed before his or Government business. The newspaper men out here have been in the habit of taking advantage of these three rates as circumstances warranted in order to catch editions of their papers. The time occupied in transmission by a message at press rates is known to them, as is that of a message at "full rate," the ordinary commercial price, and at urgent rates.

By taking into account the difference of time between here and New York, a man may gauge his chance of catching any edition of his paper and if the importance of his news warrants he will send it at full rate or urgent.

DODGING THE RULE.

But under the Japanese regulation there is only one rate for a press message, and that is the press rate. Messages to newspapers will not be accepted, even if prepaid, at full rate or urgent. Accordingly, is a newspaper man wishes to send such a message to his office, he must direct it to a private addess and prepay it.

No amount of argument has been able to effect a reconsideration of this decision. The Japanese Government is unable to comprehend the fact that a telegram for publication may be sufficiently valuable to warrant a newspaper in paying three times the commercial rate of it.

Then came the crusher. It was officially intimated to several men on the same day that they would be expected to take with them into the field only what luggage one servant could carry. Jupiter Pluvius, frogs adn fishes! No tent, no sleeping bag, no fur rug, hardly even a fur coat, no cook stove, no typewriter, not even a comfortable mess kit! You might as well either not try to go or make up your mind to live in your saddle pockets and draw rations from the army, which is likely to mean told quantities of rice and plenty of hot water.

"Oh, pickles!" exclaimed the London artist, who has been campaigning since Bull Run, and dashed madly off to consult the Military Attache of his legation.

"WE SHALL HAVE JAM."

That brought matters to a crisis. Some genius proposed to establish a field canteen. A man appeared who said he represented two well known Tokio firms who are contractors to the Government, and proposed on their behalf to undertake to furnish transportation for the foreign correspondents and to have up with every column which they accompany a steady supply of European food.

"My word!" cried the London artist, back breathless from his legation, "we shall have jam after all!"

WAR OFFICE GIVES IN.

The War Office at first refused to agree to the plan, but it was explained to them that the scheme was really a good one. It would save the Government from a lot of annoyance and trouble looking out for the comfort of the mob of foreigners as well as from expense. Moreover, it would tend to make the foreigners more comfortable and therefore better satisfied, and for that reason less likely to take unpleasant views of the situations about which they wrote.

The War Office grasped the idea. They had been figuring on supplying the correspondents at Government expense, a thing which none of the correspondents desired, and they were glad to know that the newspaper men much preferred to provide for themselves and to be under no pecuniary obligation whatever to the Government. The plan went through. The War Office told the man with the proposition that he could have the desired permission and there was joy again in the camp of the campaigners.

MAKING UP FOOD LIST.

Last night there was a general meeting to settle details. First and most important was the matter of transportation. Every man wanted something different, but agreement was finally reached. So with other matters, and finally the great question of the list of stores that should be kept on hand by the field caterer was reached.

"Flour!" sung out an American, naming the first item.

"Bacon!" cried another American.

"Sardines!" said a Britisher.

"Jam!" echoed the London artist.

The chairman wrote it down, and added eagerly;

"Yes; lots of it!"

So it went through the various items forty men considered absolutely essential and, wonderful to relate, there was almost immediate agreement on one kind of smoking tobacco. Last on the list was champagne, the suggestion of an Englishman.

The limit of transportation for which it was agreed to ask was fixed at 300 pounds for each correspondent, not to include that of his interpreter. When it had been settled and the contractor had his papers ready he go again to the War Office for confirmation of the bargain, the meeting broke up and there was a general adjournment to a place where thirst may be quenched.

"When I was in the Soudan," said the London artist, "I had six camels and two horses, and even then had not enough."

"Let's see," said an American, "that would be three camels for Scotch, two for jam and one for food, with a horse for your clothing and one for yourself. What more could you want?"

"Pickles!" replied the Britisher, emphatically.

But what does it matter? Today comes the news that the Japanese have already got twenty thousand men in Seoul, and the land movements we have been waiting so long to see have begun without us.

The General Staff calmly announces that when "the two armies are in contact" the correspondents will be permitted to go to the front.

GRAND TRUNK PACIFIC

Mr. Hays Has a Conference with the Premier

Ottawa, Ont., March 26—Messrs. C. M. Hays and W. Wainwright, of the Grand Trunk Railway, were here yesterday in conference with the Premier. Last year the Commons passed an act incorporating the Grand Trunk Pacific Railway, and giving that company a charter to build a transcontinental railway. That company has never materialized and this season a new transcontinental railway agreement is laid before Parliament, the parties being the Government on the one part and the Grand Trunk Railway of Canada on the other. It is pointed out that the agreement does not embody a charter to the G.T.R. to construct this new road, and that, therefore, it will be necessary if the work is to be proceeded with at once for Parliament to pass the bill amending the original Grand Trunk Railway Act so as to enable that company to construct, or contract for the construction of, the proposed new western section. It is understood that Messrs. Hays and Wainwright are here in connection with this matter.

THE SINEWS OF WAR

How Russian Coffers are Being Filled Now

St. Petersburg, March 26—Every observer of Russia's stupendous, slow-moving preparations must recognise that the Slavs are maturing a terrible ordeal for the Japanese. Organised Russian life is in motion. Cities, towns, and villages are contributing men and money. Word has gone out to the most remote districts that the country is passing through a great crisis and the peasants are learning the part they are expected to play.

Provincial councils, town and district councils are arranging to obtain provision and forage directly from the farms. The demand has been carefully estimated and the supply will be taken from the producers in accordance with an equitable plan. This will eliminate the corrupt agents who simply act for the central Government.

Money, clothing, and useful articles of all kinds are filling the coffers and warehouses of the Red Cross Society, for the aid of the suffering soldiers. Moscow heads the list of subscriptions with 2,000,000 roubles ($1,030,000) given by the municipality and nobility, in addition to 1,000,000 roubles ($515,000) from the Mutual Credit Society. Even peasant children have sent in their little savings of twenty to thirty kopecks (10 to 15 cents.) High social circles in Grand Ducal and even the Imperial palaces have started workshops producing tons of clothing for the troops.

ADVERTISE IN THE TIMES.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00
Officers:
J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer
Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME, A. J. SANBORN, ALEX J. CHAPTON.
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non-interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT
LA ZACUALPA RUBBER PLANTATION COMPANY
Incorporated Under the Laws of the State of California.

La Zaluaipa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain for all others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against, or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marlee boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against f rest fires. Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 ag inst fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 eet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. snaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 fee' apar'. As soon as the next level is reached we will again cross cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supe vision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mi'l. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fue or many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United Stateswhenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

For full particulars apply to the Peterborough Brokerage Co., City Agents. Peterborough; W Gallon, Agent, Apsley; Roland Kidd, Toronto; G. Hilliard, Lakefield; D. L. McKINNEY, SECRETARY, SIOUX FALLS, S. D.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 20 feet wide, 8 feet of which runs from $10 to $200 per ton, and the Company owns 9 000 feet on th s vein.

Ore running from $18 to $50 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $[illegible] per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 80 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER Secretary-Treasurer, Boulder, Colo.

THE FARM LABOR PROBLEM

SALVATION ARMY OFFERING A SOLUTION

Five Hundred Men in England Anxious for Employment in Canada—Farmers Must Aid with Passage Money

A partial solution of the farm laborer question is being attempted by the international headquarters of the Salvation Army in London, Eng., Col. J. P. Taylor has come to Canada to see if the means can be found to bring to this country the five hundred applicants who have appealed to the army for assistance to bring them to this country. Since the return of Col. Lamue, of the immigration department of the army, who was in Canada last summer, the press of the Salvation Army has taken the matter up, with the result that many of the artisan and laboring class of Great Britain have written, asking for help to emigrate to Canada. The Salvation Army immigration department has taken the position that, as the farmers of Canada wish something which the Old Country can supply, the farmers should assist the applicants.

"The list of men applying for assistance to come to this country," said Colonel Jacobs, of the Salvation Army, "is made up of able-bodied men, not one over the middle age, and they have all said that they were willing to work on the farms. They are of all classes, mostly made up of men who have mastered a trade, but men with a trade at their fingers' ends are at a discount in the Old Country. They wish to come to this country, work on the farms, and, after a few years, take up land of their own.

"Most of the men are married," he continued, "as you will see by this list," and he pulled out a tabulated form, showing the different occupations, ages and other information about the applicants. "Many of these people think about their children more than themselves, feeling that there is more chance to rise in life with the new country. You must understand, however, that these men are not vagrants in any sense of the word, and to prevent vagrants from imposing on us, we have sent an officer around to enquire into each individual case, and whether the person really does need assistance for his passage over, which only costs about $50.

"Any person requiring a laborer," Col. Taylor said, "would be asked to advance only part of the passage money. I have authority to use the cable so as to insure prompt attention. The Salvation Army would be the security which they have for their money."

Mike is a married man,—a very much married man. He has married no fewer than four times, and all his wives are still to the fore.

According to Michael's own account at the Dublin assizes, where he was tried for bigamy and found guilty, his experiences have not been altogether satisfactory. The judge in passing sentence, expressed his wonder that the prisoner could be such a hardened villain as to delude so many women.

"Yer honor," said Muke, apologetically, "I was only thryin' to get a good one, an' it's not aisy!"

FOREST FIRES IN BRITISH

Many Timber Limits Badly Damaged by Fire

Quebec, March 28—The report of the Crown Lands Department shows the following losses amongst others by last spring's forest fires; Seventy thousand to eighty thousand white pine logs in townships of Baskatong and Scottecast side of the Gatineau belonging to Gilmour and Hughson and the Edwards Company. Twelve thousand logs on the Rouge river and tributaries, belonging to Charles Chirch and Sons, with three camps. Thirty miles of Geo. H. Perley and Co.'s limits of Rouge River, totalling 3375,000 logs; one hundred and fifty-five thousand logs belonging to Riordan paper mills on west side of river Rouge, thirty-one thousand logs in township of Prevost, while Hon. Richard Turner estimates the damage to his Lake Edward limits at $30,000 to $50,000. Reference is made to other reports of losses not printed in the report.

IMPROVE OUR ARMY

Field Telegraph Service to be Organized Shortly

Ottawa, March 24.—The supplementary estimates for the Militia Department will contain provision for the organisation of the engineering branch of the militia service upon a more thorough basis. They will permit of the establishment of seven more engineer companies and the purchase of the equipment without which engineers cannot be prepared for the work they would be called on to perform in active service.

Probably the most important branch of the engineers in the Imperial army is the field telegraph by which the various units of an army in the field are kept in constant touch with each other. This is to be established in Canada this season. It is a mounted unit throughout and provided with cable wagons which follow fighters on the march and keep them in communication with the guiding hand of the campaign.

The work of the pontoon companies or sections is to be considerably extended and material acquired in sufficient quantity for at least purposes of training.

In addition to the foregoing there will be organized what are known as mounted engineer troops, which can keep up with cavalry and assist the latter in overcoming any physical difficulties that present themselves on the march.

Later on the Minister will add to the Canadian engineers a balloon section like they have in most of the regular armies. At least one balloon will be purchased, and men will be taught how to use it for purposes of observation. This service, by reason of its novelty, will find plenty of willing recruits wherever it is organized. Competent instructors will be secured for these various services from the Imperial army whose services will be employed till we have men of our own familiar enough with the duties to take their places. Canadians will be attached to the British army to learn field telegraph, pontoon, and other engineering work over there.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1 00. Full Paid and non-assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75 cents

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 1[illegible] feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Gardner Wanted

A man to look after garden and take care of horse. Salary $30 per month and brick house rent free. A splendid position for a steady and sober man with family. Apply at Times Bookstore for address.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offe a limited amount of stock of

Consumers' Coal Company, Limited.

Incorporated under the laws of South Dakota, with a capital stock of $200,000 with shares at $1 each.

The officers of the Company are C. F. Buman, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $200,000 capitalization, in shares of $1 each, $110,000 worth is issued, the first small allotment of this was sold at 60c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have 231 acres underlaid with three distinct veins, or layers of coal which are 4 feet thick each. The first one at a depth of 90 feet, it is this vein which we are now mining, the second one is at a depth of 200 feet and the third at 4[illegible] feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft a total depth 5[illegible] feet. The mine is fully equipped and in good repair and working order Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than 200 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than 50c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from $2 25 to $2 50 for Mine Run and $2 75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 20 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $500 each. we predict that this stock will be worth not less than $2 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colrado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton, and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for. and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Lung, Throat and Catarrhal Troubles

Cold in the Head Cured Quickly if You Breathe Fragrant, Healing

Catarrhozone

The ordinary method of treating catarrh by the stomach is a very indirect way and, as experience has demonstrated, a very useless method to employ.

Fragrant, healing Catarrhozone, is breathed. the air, laden with minute particles of this healing balsamic liquid, spreads itself over the whole area of inflammation.

It reaches the very root of disease instantly destroying by its antiseptic properties the germ life which excites and maintains the disease. Its soothing and healing action is at once apparent to the whole diseased surfaces. It cures quickly and it cures permanently.

We affirm that no proprietory medicine has ever brought forth from the people as many voluntary testimonials as Catarrhozone has received.

MRS. M. J. WHITNEY, Clay Street, Topeka, Kan., was cured of nasal catarrh, and say, "I owe Catarrhozone an immense debt of gratitude. It cured me of the most disagreeable catarrh after many doctors had pronounced my case incurable. I do not cough any more, my breath is sweet, and my respiration regular since using Catarrhozone."

MRS. JAMES TWEEDIE, of Jay Bridge, says; "For years my daughter doctored for catarrh. She had dropping in the throat, hawking, nausea, and could not sleep at night. The first day's use of Catarrhozone benefitted and it cured so the catarrh never returned."

MR. B. SHELDON, of Leamington, Ont., says; "For two years I unsuccessfully sought a remedy to cure my son of catarrh but permanent results were not attained until Catarrhozone was used. It cured my little boy like magic and he has been quite free from catarrh ever since."

REV. D. R. SMITH, of Whitehead, N.S., says; "Catarrhozone permanently cured me of chronic catarrh of the nose and throat from which I suffered for many years, I heartily recommend Catarrhozone."

MR. R. McCALLUM, of Spring Brook, Ont., says; "A sample of Catarrhozone benefitted me more than years of treatment with doctors, and by using the dollar outfit I was completely cured in a few weeks. I recommend Catarrhozone as the most satisfactory cure for catarrh on the market. Every word said for it is true."

MR. S. T. WRIGHT of Skeads Mills Ont., says; "I had a bad attack of sore throat, with inflamed tonsils and sore chest. I inhaled Catarrhozone and it cured my trouble. I greatly admire its pleasant and soothing effect."

MR. JAMES FERGUSON, of Perth, Ont., writes;—"I have used Catarrhozone for sore throat and cold in the head and find it is a good remedy. I highly recommend it."

MISS CLARA B. COLBY, of London, Ont., writes;—"I had a continuous cold in the head for years, and never used anything giving such quick results as Catarrhozone. I am delighted at last to find a remedy that positively cures colds. I strongly advocate Catarrhozone; it cures every time."

Catarrhozone cures without drugs and disagreeable medicine. It is Nature's cure—soothing, healing and pleasant to use. You simply inhale the medicated vapor of Catarrhozone through a Catarrhozone Inhaler and get cured quickly. Two months' treatment costs only one dollar. It can be sent by mail and used right at home any time during the night or day. Sold by druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn, U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Horse Was Drowned

As a man named Heatherly, who resides in Otonabee, was driving to Peterborough on Saturday morning, the horse suddenly slipped off the high road into the deep slush and water at the side. Before the owner could extricate the poor beast it was drowned. This is the second report of this nature that has reached us, and is evidence of the terrible condition of our country roads.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the 'Electric City,' which is fast becoming a leading manufacturing centre in Canada.

Over [illegible] of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

Death of Mrs. Condon

Sad we are to have to chronicle the death of Maria Condon, beloved wife of Mr. Peter Condon, of Smith, who passed away on Friday last, at the age of 65. The funeral was held yesterday morning to St. Mary's church Cemetery, Young's Point.

Mission Cellar Flooded

Owing to the spring freshets the cellar of St. Paul's Mission is flooded with water, and in consequence there was no church or Sunday school there yesterday. Owing to the situation of the building, it is practically impossible to prevent a catastrophe of this kind.

Blaze on Hunter Street

A slight blaze at Mr. Jno. Clancy's hotel, on Hunter street, Saturday evening, gave the fire brigade a run. The fire originated near the roof, and was presumable caused by a hot stovepipe. It was soon extinguished, however, and no great damage was done.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—There was no police court on Saturday morning.

—Radium has been recently discovered in Haliburton County.

—Next Friday will be Good Friday and All Fool's Day as well.

—The farmers claim that there will be plenty of eggs for Easter.

—Examinations for admission to High School will be held on June 28th, 29th, and 30th.

—A boy fell into the Peterborough creek the other day and now he is taking cough mixture.

—Lent is nearing its close. Next Sunday will be Easter, a day of rejoicing, millinery, and boiled eggs.

—The Government is erecting a new wharf at Hiawatha which will cost $1,5000, and which is expected to be completed in about two weeks.

—A citizen has suggested that the town clock be illuminated, which would certainly be a step much appreciated by the public. At present it can't even see to strike right.

—The funeral of the little daughter of Mr. and Mrs. George Paxman, who passed away early Saturday morning, was held in the afternoon of the same day.

—Several local bakers will present to their customers one and a half and three pound loaves, for the first time today. The prices will be five and nine cents respectively.

—The gospel meeting at the Y.W.C.A. yesterday afternoon was most interesting, and was led by the Association girls. The regular monthly meeting will be held this afternoon at 3.30 o'clock.

—The men's meeting at the Y.M.C.A. yesterday afternoon was conducted by Rev. J. Bastow, of Murray street Baptist church, and his subject was, "The Chief Prize." Mr. J. Miller sang a solo.

—The Salvation Army Band was increased last week by the arrival of two bandsmen from Redding, England, one of whom will play the E Trombone and the other a bass. This brings the membership of the Band up to 24.

—The following item of local interest has been handed to the Times.—"Mr. Wm. Snowden, of Peterborough, has been again appointed fishery inspector of the Peterborough creek, by Inspector Thwaite."

—Hon. J. R. Stratton has been appointed as one of the Honorary Vice-Presidents to represent Ontario at the World's Tuberculosis Congress at St. Louis.

—Sunshiny days and freezing nights are said to be signs of a plentiful supply of maple sap. If that is the case we ought to have plenty this year.

—'Taint good judgment to plant a field and then never cultivate it—it ain't good judgment to plant a store and then not cultivate it with advertising.

—The fire bell rang this morning about 11 o'clock, but the alarm proved to be false. These miscreants, who send in such alarms, will be most severely dealt with if the police ever apprehend them.

—In a recent analysis of the town water at Lindsay, it was found that there was one gallon of sewage to a million of water. That ought to cause the doctors to smile.

—Mr. Van Blaricum, formerly connected with a Peterborough paper and until recently on the staff of the Free Press, has accepted a position on the Ottawa Evening Journal.

—Mr. Jos. McConnell in the Lindsay Watchman-Warder says; —"If reports are true people interested in the water supply of the Kawartha lakes should take steps to stop its control getting into the hands of Peterborough power companies."

—According to the Postmaster-General's report for the year ending Jan. 30th, 1903, no less than 118 letters addressed to the T. Eaton & Co., Toronto, and containing $309.79 went astray. This should be a warning to those who do not patronize home industry.

—Mr. J. A. Culverwell distributed a pamphlet around town on Saturday morning, descriptive of the proposed Trent Valley Canal. The sheet contained a very good map of the intended route of the canal, and also a cartoon from the Brooklyn Eagle, which was published in Friday morning's Times.

—On a certain night one of two old and somewhat eccentric Peterborough County characters called on the other to transact a little business. The host lighted a candle that he might examine some documents, but immediately blew it out again when they had finished, leaving both sitting in the dark. "Why did you blow out the candle?" asked the caller. "Oh, we can talk just as well in the dark as in the light, and it saves the candle," was the reply. They continued their conversation for a short time, when the host heard some mysterious sounds coming from the direction of his caller's chair, and inquired what his friend was doing. "Why," said his friend, "it's dark in here, and no one can see me, so I thought I would take off my trousers to save wear and tear."

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. W. C. Turner paid Lindsay a visit on Friday of last week.

—Rev. George McCall was called to town on account of the death of his mother.

—Mr. John Lang, M.P., was in town on Saturday and gave The Times a call.

—Miss Ida Stinson of Hastings, is visiting Mrs. J. B. Harper, Stewart street.

—Mr. R. N. Joliffe spent last week in Cobourg, where he sang yesterday.

—Mr. Sydney Glass, of Toronto, leading tenor in St. Andrew's church, arrived in town Saturday.

—Mrs. H. G. Fitzgerald and her son Donald of Lakefield visited Peterborough friends last week.

—Mr. R. Hall, of Peterborough, paid a visit to Lindsay on Friday last, on business.

—Mr. Harry Knowles, son of Mr. F. B. Knowles, formerly of this city, died recently in Toronto.

—Mr. Joe. Symons, of Peterborough, was calling on his friends around Welcome recently. — Port Hope Guide.

—Mr. Will Bell, of Peterborough, was a recent visitor with his cousin, Mrs. Milton G. Welch, Zion — Port Hope Guide.

—Mr. John Heatherly, of Cavan, visited Peterborough on Saturday and was a pleasant caller at our sanctum.

—Mr. F. T. Butters has severed his connection with the firm of F. J. McPherson & Co., to accept another position.

—Mr. Fred and Miss Gaskin, of Denver, Colo., are visiting Peterborough friends. Mr. Gaskin has not been here for about fourteen years.

—Mr. Robert Lang and family, of Centreville, leave tomorrow for Alameda, Assa., where they will reside in future.

—Mr. James Elmhirst and Mr. James Stewart, of Otonabee, intend going west, the former to Carberry, and the latter to Strathcona.

—The wedding of Miss Alma Boucher and Mr. Fred Pete, was announced in St. John's church yesterday morning, to take place during the first week in April.

—Mr. J. H. Cruikshank, of Toronto, formerly of Keene, is in town on a short visit. He with his wife and family intend leaving soon for Calgary near which town in the far West they will make their home.

—The Mail and Empire says;—"Mr. Edwin R. Rogers, of Toronto Junction, made an efficient chairman," at the second annual banquet of the Toronto Retail Hardware Merchants' banquet in Toronto on Friday evening last. Mr Rogers formerly resided in Peterborough and is a brother of Mr. R. B. Rogers, of this city. He is also a brother of Col. J. Z. Rogers

—The engagement is announced of Miss Annie E. Locke, daughter of Rev. Mr. Locke, formerly of the George street church, to Mr. Walter B. Sparling, of Toronto. The marriage will take place at the residence of the bride's parents at Omemee, on Thursday afternoon, March 31st.

Gardener Wanted

A man to work in garden. Free house. Apply to George Giles, Monaghan, Peterborough P.O., or at Times Bookstore.

How Health is Gained.

The story of a great deal of the unhappiness of women is a story of lost health. Women wonder how it is that little by little the form loses plumpness, the cheeks grow hollow and sallow, and they feel tired and worn-out all the time. In a large proportion of cases when women are weak, run-down and falling off in flesh and looks, the root of the trouble can be traced to womanly diseases which undermine the general health. The proof of this is that women who have been cured of painful womanly diseases by the use of Dr. Pierce's Favorite Prescription have recovered their general health, gained in flesh and in appearance.

$500 Reward for Women Who Cannot be Cured.

The proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb, which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"I suffered for three years with ovarian trouble," writes Mrs. Ann [illegible] Women's Athletic Club, of the [illegible] Milwaukee, Wis. "The treatment I took did not do me a particle of good, until a good neighbor who had been using Dr. Pierce's Favorite Prescription advised me to give it a trial. The next day took my first dose, and it was my first step toward recovery. In nine weeks I was a different woman; my flesh which had been flabby became firm, complexion clear and my eyes bright. It was simply an indication of the great change within from pain and suffering to health and happiness."

Dr. Pierce's Pleasant Pellets invigorate stomach, liver and bowels.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100.00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31.52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 500,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservatively organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest, but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

For prospectus and further particulars address,

MOBILIZATION OF ARMY IN MANCHURIA COMPLETE

Russia is Ready to Give Battle—Troops Placed to Resist Attack on NeW-Chwang

London, March 29—The Seoul correspondent of the Daily Mail says that in an engagement on March 28, which the Japanese infantry had with Cossacks between Anju and Chong Ju, the Japanese were victorious, but lost 50 killed.

St. Petersburg, March 28—Russia is ready for actual war. The mobilization of the Manchlurian army is complete.

A BIG STRIKE IS THREATENED

Montreal Likely to Have Serious Labor Troubles

WILL FIGHT THE UNIONS

Claim is Made That Master Builders are Preparing for Trouble Ahead

Montreal, March 29.—The Montreal Brotherhood of Carpenters and Joiners have formulated a new schedule of wages which will raise the maximum rate from 22 1-2 to 25 cents an hour. Copies of the schedule, now being distributed among employers for their signatures, if signed, will become effective on April 1. The officials of the Brotherhood state that they are determined to put up a big fight. In a communication addressed to the Star today, and signed by the officers of the Montreal District Building Trades' Council, the statement is made that at the last conference with the Master Carpenters' and Joiners' Association it was distinctly understood that if the men would accept 22 1-2 cents per hour for last season 25 cents per hour would be granted for the coming season without any trouble. The men, they say, will try to avoid a strike, but they want it understood that there is to be no backdown, and that the fight, if inaugurated, will be to a finish. They claim that the wages paid to the carpenters and joiners in Montreal are about 25 per cent. lower than the wages paid to the other building trades, and this is one of the reasons why the fight will be a bitter one.

That the Master Builders will line up against the Brotherhood this coming spring seems certain. It is said, on good authority, that at a meeting of a number of contractors a solemn agreement was entered into by the members to stand as one man to fight not only the proposed demand for advanced wages to be made April 1, but to do all in each member's power to smash the Union strength in the building trades. It is said that each man stands pledged no matter what may be the result, to start the season with the announcement that no man shall be asked whether he is a Union man or not, and that non-Union and Union men will be at all times on the same basis. In a word, the Unions are to be ignored, and the "open-shop" policy is to be inaugurated.

FRENCH SHORE TROUBLE

A Parisian Journal Confirms Some of Rumored Terms

Paris, March 29.—The Echo de Paris has a despatch from London, giving what purports to be additional details of the Anglo-French agreement. The main outlines of the convention settling definitely the Newfoundland questions are as follows; France formally renounces all territorial claims to the French shore and police rights in Newfoundland waters, and receives in exchange, as compensation for the French subjects who are residents of the shore, about £20,000. All French fishermen will have the same rights as British. France also receives a strip of territory on the Sokato frontier, South-West Africa. Then follows the Moroccan and Egyptian questions. No attempt is made to settle these, but only to eliminate from them such elements as might imperil the existing good understanding between the two countries.

WORST STORM ON RECORD

Many Thousands of Cattle Believed to have Perished

Broadview, N.W.T., March 29.—The blizzard which has swept the West during the past forty-eight hours is the worst on record. Trains are completely tied up, and will not move for days. It is believed that the loss of cattle on the ranges between here and Medicine Hat will be appalling. No living creature unprotected could live through such a storm. The wind was at the highest at midnight on Thursday, and at that hour it was not possible for a human being to stand upright. Stock en route in open cars is standing on side tracks and on the main line, and many cattle have perished. When the trains stopped for a few moments they were embedded in drifts as high as the tops of the cars, and were unable to start. The blow to the ranching industry in the Canadian West is the worst in twenty-five years.

—Owing to the great and sudden rise of water in the creek many narrow escapes have been reported. The water rose over four feet in some places and the property in the immediate vicinity of the creek has been threatened. Owing to the earnest efforts of several citizens it is thought the danger has been averted.

FEAR AN ATTACK UPON NEUCHWANG

Not Sure Whether Brigands or Japs Will Make It

CONDITIONS IN RUSSIA

The Reported Danger of a Revolution is Ridiculed

London, March 28.—The Times has the following from Paris; A despatch from Neuchwang, dated the 26th inst., says; "There is much alarm here on account of the assembling about the city and suburbs of bands of Chinese brigands, intent on pillaging in case of the Russians retreating and abandoning the country for the time being. The Europeans are preparing an organized defence.

"It is reported at Neuchwang that a Japanese attack is imminent."

BAD ROADS NORTH OF YALU.

London, March 28.—The Times has the following today;

Neuchwang, March 25.—According to a traveller's account, the mountain roads north of the Yalu River are impassable owing to the snow, and should the Russian army in Corea be defeated they would have no way of retreat open, while to reinforce it would be very difficult.

NEWS FROM PORT ARTHUR.

A traveller who has just arrived from Port Arthur says the attack by the Japanese on the 22nd was inefficient so far as the town was concerned, but the fire was concentrated on the fleet and the harbor. The station buildings along the Russian railway are protected by bags of millet fascines and earthworks.

THE RUSSIAN FLEET.

London, March 28.—The Times has the following despatch today; On board The Times special steamer Haimun, near Port Arthur, March 28th, via wireless telegraphy to Weihaiwei.—Steering towards Chefoo this morning we sighted five Russian battleships and cruisers, just north of Hwangchingtau Island, thirty miles southwest of Port Arthur. They were steaming in the diection of Port Arthur, their exposed flank protected by the torpedo-destroyer flotilla in line. We made out the rearmost ship to be the Bayan.

This explodes the idea that the Russians are completely port-bound. Their ships are evidently patrolling the entrance to the Gulf of Pechili systematically. If the reports from Japanese sources are correct, that Admiral Makaroff is getting his damaged vessel fit for action, we may yet witness a decisive naval battle.

HOW TO BE GOOD

Professor Says Fruit Will Cure Liquor and Tobacco Habits

St. Louis, March 29.—Apples are a sure cure for the drink and tobacco habits and for the low morals which lead to crime, says John T. Stenson, director of the pomology at the World's Fair. Pamphlets setting forth the efficacy of apples as a cure of bad habits will be distributed with 1,000,000 apples on Apple Day, Sept. 27.

In order to work a sure cure by means of the apple diet, Professor Stenson advises that when one has a craving for a smoke an apple be substituted; if a drink of liquor is desired take an apple in its place; if there is a tendency to do something desperate, sit down and quietly eat an apple and reflect over it.

Just what medicinal property is contained in the apple to eradicate bad habits Mr. Stenson does not pretend to say.

Senator Cockrell's moral life and his high standard of statesmanship is cited as an incident of the reigning influence of apples. It is a well-known fact that the senator makes his lunch of apples every day to the exclusion of all other food, and has kept up this diet for thirty years.

A MIXUP ABOUT HOGS

Kingan Fined in Havelock Assault Case—Contradictory Evidence

At the County Police Court yesterday some extraordinary evidence was heard in the Havelock assault case. Stephen Clark and Kingan, both residents of Havelock, had a quarrel, and yesterday's proceedings were most interesting, in that one side denied flatly what the other side swore to be gospel truth. Clark called upon Kingan at the residence of a Mr. King, with whom the said Clarke worked. In her conversation with Clark, Mrs. King enquired the cost of hogs. Clarke remarked that they "were worth $6." Kingan protested that they were worth a quarter less. Clarke got vexed and called Kingan something strong, whereupon the latter placed his strong fist on Clarke's countenance, and was the first to draw blood. Clarke also swore that Kingan "threatened his life," but that wouldn't go down. Judge Edmison found Kingan guilty of assault but didn't think he wanted to kill Clarke, so he fined him $5 without costs.

WILL LOCATE HERE

Montreal Shops of C.G.E. are Being Brought Here—Staff to be Increased

The Montreal shops of the Canadian General Electric Company will be removed to Peterborough. The eastern employes will also become citizens here, which will mean that the question of building must soon be seriously considered. A portion of the machinery has already arrived and the machinery will be forwarded at once.

"This will mean much for Peterborough, remarked a prominent citizen at the C.P.R. station last evening, "and there will of course be a decided increase in the general staff. They recognize the fine advantages we have here in Peterborough and they consider it to their advantage to make use of these."

DEATH OF MR. WM. JAMES

Peterborough Citizen Passed Away Sunday Night After a Lingering Illness

Sad we are to have to report the death of Mr. Wm. James, of 391 Sherbrooke street, which occurred on Sunday night, after a prolonged illness. Deceased has resided in this city for over 30 years, and was at the time of his death 62 years of age. Born in England, he came to Canada about 31 years ago and settled in the Province of Quebec, from which place he came to Peterborough and ever since has resided with his brother Charles, at whose home he passed away. His only living relatives in Canada, besides his brother Charles, is an adopted daughter, Mrs W Moodie, of Toronto.

The late Mr. James was a staunch member of Charlotte street Methodist church, and in politics was a Liberal.

The funeral will take place from deceased's late place of abode, 391 Sherbrooke street, this afternoon at 2.30 o'clock, to the Little Lake Cemetery.

CONTRACT ABOUT FINISHED

Mr. O'Toole Almost Through Here—A Citizen's Opinion

One of the finest dams in America is that just about completed by Contractor O'Toole, for the American Cereal Company. Work was first commenced in August, 1902, and Mr. O'Toole has spared neither time nor pains to make a lasting structure, and, needless to say there is every evidence of his having achieved success.

"It is one of the finest, best built, and finest looking dams I have ever seen," remarked a citizen to The Times yesterday, "and I have seen many during my sixty-five years of life. I have assisted in building dams for the past forty years, and you cannot beat O'Toole far nor near. He is a fine fellow too," and he lit his pipe, and taking his blackthorn walked slowly away

The power house is being rapidly finished, and a test will shortly be made, but those who know, like the above citizen, are unanimous in pronouncing that it will be a grand success. During his stay in Peterborough Mr. O'Toole has made many friends, who will greatly regret his departure.

ST. LOUIS GOLD MINING CO.

One the Most Progressive Companies in America—Development Constantly Going On.

Another most progressive mining Company is that known throughout America as the St. Louis Gold Mining Co., operating in the Deer Creek District, Baker County, Oregon. For many years the presence of gold mining veins in this district has been known to various persons, and the origin of these views was believed to cause the existence of so many rich placer mines in that vicinity. These placers had been worked in earlier days by rude methods, but today they are yielding handsome profits by the operation of modern appliances.

The Company owns six full claims in the Deer Creek district, of the Sumpter Gold Fields, located about four and one-half miles from the city of Sumpter; also mill site and water rights. The claims, known as the Mamie, Mark Hanna, Big Oregon, Number Two, First Chance and Wide Gauge, comprise 120 acres of the most promising mineral ground in the district. About 1000 feet of development work has been done, which consists mainly of tunnels and short shafts. The ore taken out assayed at $9 to $36 per ton, and many open cuts and test pits prove that the ore bodies are permanent and continuous.

The whole property presents a proposition which must appeal to the business instincts of the practical miner, and to those of investors, who recognize the advantages to be gained by modern treatment and the use of scientific methods. It is the company's plan to extend the present tunnel to a distance of 1600 feet and to erect a forty stamp mill and cyanide plant, with a daily capacity of 100 tons. The least value yet obtained across the entire forty feet is $3.60 per ton, and as the total expense connected with this has been $1.25 per ton, there has been a clear profit of $2.35 per ton.

Gold mining has placed more people in comfortable circumstances, and made more millionaires during the past decade, than any other business or profession, and the large majority of this wealth has resulted from comparatively small investments. The remaining shares are offered at an exceedingly low figure, and full particulars may be had from Mr. Roland Kidd, the Toronto and Peterborough agent for this progressive company.

George St Church

On Thursday afternoon a mass meeting of the wives and mothers of the members of George street church will be held in the schoolroom of the church.

On Easter morning, commencing at 7.30 o'clock the Epworth League will hold a sunrise prayer meeting. These meetings are always well attended, and all are cordially invited to attend.

On Good Friday morning there will be service at 11 o'clock to which the general public are invited.

Horace N. Allen, United States Ministert to Korea

SAVED FIVE TOTS BY DARING AGT

Motorist Could Not Stop His Machine

DEED OF GREAT BRAVERY

Ran Fleeing Motor into Telegraph Pole to Save Children

Mount Vernor, N.Y., March 29—Warren Manney, a young man of this city, who recently bought a high speed motor cycle, had a thrilling experience while out on a spin, and through his daring and presence of mind saved five children from being killed or injured. All went well until Fifth street was reached. Here the rider let the machine out and was going down grade at the rate of about thirty miles an hour, when he discovered that the brake would not work, owing to the sprocket on the pedal shaft being loose and the machine was running away.

Unable to apply the check Manney soon found himself going at the rate of nearly fifty miles an hour, with no alternate but to sit still on the runaway machine and take his chances with death. On the way down the hill the cycle grazed a trolley car which bounded across its path from a side street. As Manney flashed past the trolley car he sent up a mental prayer of thanks that his life had been saved, but the next instant he had another cause for horror and dismay, for directly ahead of him, at Fifth avenue, he saw a group of five little children playing in the street.

He yelled at them to get out of the way, but they only stood still and laughed at him. The danger didn't appeal to them. They though the machine would turn aside when it reached them. Seeing that the children wouldn't move from the path of death, Manney, who is an experienced wheelman, resolved to take a desperate chance to save their lives and his own.

Heading the heavy machine for a telegraph pole, he jumped. The children stood, and while the rider went rolling over and over on the ground, sustaining a fractured hip and shoulder. The machine hit the pole and was utterly demolished, and the pieces were subsequently brought back to the city in a wagon. It was reported today that two of the children of Mayor Brush were among those who escaped being mowed down.

PROMISED TO LIVE BETTER

Occupants of 203 Charlotte Street Acquitted—Many Witnesses Heard

"I put them all out, time an' agin," said Daniel Shannon as he straightened himself up in the witness box yesterday morning, to testify in the case against John Hearn, Mrs. Smith, Edward Hearn and wife, and Mrs. Fields in the Police Court yesterday morning.

Daniel referred to visitors who occasionally called at 203 Charlotte st. Several other witnesses were called but no convicting evidence was given. The court adjourned at 12.30 and met again in the afternooon at 2 o'clock when more witnesses were heard. No evidence was introduced that the house was disorderly or a house of ill-repute, so his Worship after giving some good advice, which the prisoners promised to seriously consider, dismissed them all. Mrs. Smith was asked to take a prolonged trip to other climes.

Daniel O'Connell acted for the defendants.

Officers Elected

The following officers have been elected by the Stranger's Fellowship Club:—

Hon. Pres.—E. B. Edwards, K.C.

Hon. Vice-Presidents—The ministers of the town.

President—Robert K. Harding.

1st Vice-President—Jas. Garrard.

2nd Vice-President—Geo. Robertson.

Secretary—G. L. Galley

Executive—Officers, and Stanley Cunniff, R. S. Morrell, R. Cameron, and R. J. P. Dermer.

DOWIE ATTACKS KING EDWARD

"Could Only Reach Heaven by Skin of His Teeth"

ADELIADE IS UP IN ARMS

Zionite Leader Prohibited from Using Any Public Building

Sydney, N.S.W., March 27. – The Mayor of Adelaide has forbidden "Elijah" Dowie the further use of the Town Hall or any other corporation building, because of his having utter improper sentiments about the King. The superintendent of public buildings, instructed by the Prime Minister, has prohibited Dowie from using any building under Government control. A cheque that he had deposited for rent of the Jubilee Exposition Building has been returned to him, and the agreement canceled. Consequently Dowie will be practically unable to speak in any public building in Adelaide. An American has been asked to persuade him to leave before the public irritation caused by his utterances culminated in violence. Dowie is at present missing from his hotel. His whereabouts is unknown.

Among the other things that Dowie said concerning the King was that no one imagined that he had much religion to spare, and that he would only get into Heaven by the skin of his teeth.

In Justice to the Police

Several reports have been current regarding the actions of young men in various parts of the city. These false rumors have resulted in our police being severely criticised. This seems unreasonable. If these citizens who notice these peculiar acting individuals would carry their reports to police headquarters, instead of running to newspaper reporters, it might be much better for all concerned. Morning after morning there is a clean sheet at the police court, which surely is evidence of the proficiency of our local force. These reports are of course false or imaginary and the originators are in reality the only offenders.

SON OF PREMIER VISITS CANADA

Scions of Famous French Families Now in Dominion

SON OF AN EX-PREMIER

One Visitor is Francis Waddington and the Other the Comte des Garets

Montreal, March 29.—"I have visited Canada several times during the past few years, and I am very much impressed with your country. The progress and prosperity on every hand are apparent."

These were the words of Mr. Francis Waddington, of Paris, a scion of a famous French family, to your representative at the Windsor Hotel. Mr. Waddington is accompanied on his Canadian tour by the Comte des Garets, a member of one of the old royalist houses. Both gentlemen are here on a pleasure trip, with a view of seeing something of the Dominion, especially Lower Canada.

Mr. Waddington, who is a young well built man, of about 26 years of age, is a son of ex-Premier Waddington, who played an important part in the government of the French Republic. Mr. Waddington speaks English fluently and referred in a modest way to the career of his father. The late Premier Waddington was also French Ambassador to the Court of St. James, and afterwards filled for some time a similar important post in the city of St. Petersburg. Although Mr. Waddington would not admit it, it is well known that owing to the broad views of the late French statesman, especially during his tenure of the post of ambassador in the English capital, the present entente between the English and French nations was carefully fostered.

Mr. Waddington good-naturedly begged off passing any opinion as to the present condition of French politics on the ground that he took very little interest in affairs. He appeared to be more interested in Canada and Canadian development than in the political issues of his own country.

"We intend to go to Ottawa after our stay in Montreal is concluded," said Mr. Waddington. "We have already spent a few days in the ancient capital of Canada. We want to see quietly what you have to show us."

COURT OF REVISION MEETING

Several Cases Disposed of at Last Night's Meeting

The Court of Revision met in the Council Chambers last night, with all the members present. The first case discussed was that of Mr. Wilson of McDonnell street, who desired some changes made. His property was measured out according to the survey of Mr. Cameron, but a late survey intruded on his property to such an extent that he had only about two feet left to admit of his building a verandah. His plea was sustained.

Mr. Spry appealed against the assessment on a portion of some property, leased for life to Mr. and Mrs. Cooney and the survivor. The lessors were to pay all taxes, but refused to pay taxes on a portion of the property upon which a sidewalk had been built. It was decided that the tax bill would be served on both tenant and owner, who will have to settle the question between them.

Mr Haskell had been charged with taxes for rooms occupied by him at 64 Simcoe street, This had been standing for three or four years, and Mr. Haskell claimed a mistake, and asked that an error of $300 excessive assessment for the year 1900 be blotted out. It was decided that the assessment be lowered by $200

A lengthy discussion ensued as to who should pay the taxes on a certain lane off Aylmer street. It was decided that the property owners pay in proportion to their frontages.

Several unimportant communications were read and disposed of. Several remissions of dog taxes were allowed, and many appeals for exemption from statute labor were granted.

The Collector asked for authority to collect taxes from the Ashburnham Light and Power Company. This was granted.

The Court passed a resolution to the effect that the Brock street sidewalk which has been complained of, should be replaced.

In the case of McNamara against the Cordage Works it was decided to make an endeavor to bring about an amicable settlement.

MEETING OF CHARITY BOARD

List of Accounts Read and Ordered to be Paid

A meeting of the Charity Board was held in the Town Clerk's office last evening with the following members present;—Messrs. Rush, chairman, Fowler, Brown, Batten, Miller and Stock.

The following list of accounts was ordered to be paid on motion by Messrs. Batten and Fowler;—

A. Allison	$3 00
Greene Bros	6 00
Waller & Co	4 00
A. J. Warne	7 50
R. C. Braund	3 00
Miss Grandy	5 00
J. J. Howden	2 00
T. B. Maniece	4 00
House of Providence	12 00
J. H. Savigny	7 10
White & Gillespie	20 00
Jas. Edgcumbe	16 00
H. Edmonson	25
Martin Kylie	50
John Sherwood	50
Robt. Duncan	50
T. H. Brooks	10 00
W. H. Halpin	4 00
M. J. Dunford	3 00
Peter Connal & Son	4 00

Statement of orders given;—

	Since last meeting	In 1904
Groceries	$82 00	$224 50
Wood	106 80	208 05
Tickets	——	6 15
Sundries	3 00	36 75
	$191 80	$675 45

Peterborough Presbytery

The Presbytery of Peterborough met in the Cobourg Presbyterian church on Tuesday of last week. Rev. C. S. Lord was elected Moderator, and Rev. Wm. Beattie Clerk, pro tem. The chief business was the matter of the call from Baltimore and Coldsprings congregations to Rev. J. Skene of Hillsdale, in the Barrie Presbytery. The call was sustained and ordered to be sent to the Clerk of the Barrie Presbytery for action. The provincial arrangements were made for the induction about the end of April. Mr. Lord asked and was granted leave from duty in Grafton to engage in Mission Work in the North West for six months.—Cobourg Post.

BRITISH WILL INVADE THIBET WITH LARGE ARMY

Fighting Force Consists of a Thousand Rifles With Four Guns and Two Maxims

Special to The Times.

London, Monday, March 28—A despatch to the Daily Mail from Pharijong, Thibet, says that Gen. Macdonald, commanding the British expeditionary force, will advance with his main body today.

The fighting strength of the expedition is 1,000 rifles, four guns and two maxims. It is expected that the Thibetans will attack between Tuna and Gyantse.

EXAMINATION FOR RHODES SCHOLARS

Oxford Said to Have Arranged a Weeding-out Test

THE TREATY-MAKING POWER

A Large Party of British Mayors and Aldermen Will Visit America

London, March 29.—The Oxford authorities have arranged they be allowed to hold a qualifying or weeding-out examination in connection with the Rhodes scholarships. The papers Dr. Parkin had trouble with at the New York Customs are the result of that examination. I am told that the examination would be dropped as opposed to the suggestions made in Rhodes' will. From the State of Nebraska between fifty and sixty candidates have entered for examination.

CHINESE LABOR.

Mr. George Harwood, M.P., addressing a union meeting in Bolton to protest against the admission of Chinese into South Africa, said that the Portuguese Government had tried indentured Chinese labor in South Africa thirty years ago, and after ten years' trial the scandal was found to be so great that the British Government insisted that Portugal should cease to employ this labor.

THE TREATY-MAKING POWER.

The Morning Post referring to Arnold-Forster's remarks on Colonial contributions to Imperial defence, says that as long as the whole cost of protecting Canadian interests in commerce is paid by the British taxpayer, Canada cannot expect to negotiate treaties without reference to the interests of Britain.

LORD CECIL'S CRITICISM.

Lord Hugh Cecil, speaking at Shrewsbury, said that the Chamberlain fiscal proposals were not the result of scientific research and statesmanship, but rather the ready resource of an emotional politician, anxious to do something in a matter on which he was not clear, what he ought to do.

BRITISH MAYORS COMING.

Two hundred and fifty mayors, aldermen and councillors, have signified their intention of visiting the United States this summer. The program give June 18th as the date for a visit to Toronto.

Special Services

Last evening the first of a series of special services was held in the George street Methodist church. A good attendance of young people was present as the service was especially for them. This evening and to-morrow evening the services will be continued, commencing at 8 o'clock sharp. All are invited.

Government Salaries Here

By the official blue book, issued by the Department of Public Works, Ottawa, we find the following salaries paid in Peterborough; John Irwin, caretaker Post Office, $300 per year; Wm. Taylor, Customs House, $360; Geo. H. Giroux, clerk, $900 per year; S. Clegg, $1600. R. T. Hill, slidemaster, Buckhorn, receives $250 per year.

CONCRETE HOUSES

It is stated that Hamilton's building inspector has decided not to permit the erection in the city of concrete houses of more than two stories within the fire limits. The statement sounds more like a huge joke than anything else.

Without doubt the many excellent cement factories which have become established in Canada will cause an ever-increasing use of this substance for building purposes, and apart altogether from these industries, the demand, sooner or later, has long been sure to become more general.

This certain result is not based on the ever-increasing price and scarcity of brick so much as it is upon the fact that taking material for material, a good Portland cement is in many respects by far the better article.

Concrete walls are more durable. They are more impervious to heat and cold. They keep their appearance better. They are also cheaper and much more safe in case of fire.

Instead of attempting to restrict the construction of such buildings the Hamilton inspector and all other building inspectors should be glad to know that in the very near future their erection is likely to become quite general.

—In reference to the conference held on the street railway question on Saturday afternoon, nothing was made public. It was thought, though, from a remark made to a Times reporter yesterday afternoon, that the railway will be in operation this summer.

—If it continues cold we may have some more skating this evening.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. I would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH '29 1904

SPARE THE TREES

There is scarcely a farm in Ontario that has not been robbed of its magnificent heritage of beautiful trees in the most ruthless way, trees that if standing today would lend a new charm to the country-side and be a shelter from the sun for grazing cattle. There are many in our cities who would give a thousand—perhaps several thousand dollars to secure for their lawns the magnificent walnuts we are debating about selling. Such stately trees are unpurchasable. They lend a grace to the street and embellish the whole town. The scarcity of an article makes its value. So apart from sentiment we will be repaid by keeping these trees, for the longer they are retained the more valuable they become. Besides, we have no moral right to destroy that which cannot be replaced and which will be a joy and a benefit to those coming after us. Trees that annually renew their twigs and foliage have no definite existence, and practically die of old age, but they are known to have attained fully 2,000 years. These trees of ours, it is safe to say, will last for centuries. We should also remember that every tree cut down in cleared districts like Dundas and vicinity, results in a loss to the community. Arboreal growth of any ordinary type requires a considerable amount of moisture, and accordingly of rainfall, and as nature ministers to her own wants it is generally supposed to be a preventive against drouth, and therefore a benefit to the community. The pleasure in the beautiful and practical is beneficial and should be permanent.

CONCRETE HOUSES

It is stated that Hamilton's building inspector has decided not to permit the erection in the city of concrete houses of more than two stories within the fire limits. The statement sounds more like a huge joke than anything else.

Without doubt the many excellent cement factories which have become established in Canada will cause an ever-increasing use of this substance for building purposes, and apart altogether from these industries, the demand, sooner or later, has long been sure to become more general.

This certain result is not based on the ever-increasing price and scarcity of brick so much as it is upon the fact that taking material for material, a good Portland cement is in many respects by far the better article.

Concrete walls are more durable. They are more impervious to heat and cold. They keep their appearance better. They are also cheaper and much more safe in case of fire.

Instead of attempting to restrict the construction of such buildings the Hamilton inspector and all other building inspectors should be glad to know that in the very near future their erection is likely to become quite general.

EDITORIAL COMMENT

It may be said without encroaching on the province of the clergy that no woman has properly observed Lent who has spent forty days thinking about an Easter hat.

Good Complexion Rich Soft Skin

Bring Joy to Every Woman's Heart, and Draw Admiration from Every Man How to Improve Your Appearance.

The true source of beauty is health, so at the first signs of failing health everyone should take proper steps to regain and maintain health.

When beauty begins to fade you can be almost certain that some derangement of the functional activity is secretly undermining strength and vigor. This must be stopped, and can be stopped by Ferrozone, which vivifies all bodily functions so quickly that an improvement in health and looks immediately follows.

Ferrozone increases the appetite and improves digestion. This stimulates nutrition and quickens the formation of rich pure blood. Better blood means stronger nerves. Increased nerve force reduces the wear and tear on the body. Strength develops, spirits rise an all-round improvement follows.

A rebuilding process is started by Ferrozone that results in a plump, well developed figure; the complexion becomes clear and rosy, pale hollow cheeks fill out and sunken eyes take on a new lustre and brightness.

No lady can afford to miss the benefit that invariably follows the use of the grand restorative. Ferrozone is a tonic, a rebuilder and regulator of unqualified merit. To its enduring and lasting results thousands have testified. In a convincing letter from her home in Lansdowne, Mrs. F. G. Butler says;

"For years I had a sallow complexion. I did everything to improve it but didn't succeed till I used Ferrozone. It improved the condition of my blood and in a few weeks brought a rosy flush to my cheek. I took one Ferrozone tablet at meals and gained strength and flesh. I can strongly recommend Ferrozone to every woman who wants clear healthy complexion. Ferrozone did wonders for me."

Ferrozone is the best, quickest and most permanent road to health. You should get it right away. But beware of a substitute and be sure to get Ferrozone when you ask for it. Price 50c. per box or six boxes for $2.50, at all druggists or by mail from the Ferrozone Company, Kingston, Ont.

Machines That Think.

The sewing of buttons on shoes and on garments is no longer done by hand in modern factories. There is a machine that sews 5,300 buttons on garments in nine hours, or more than eight expert sewers could possibly do in the same time. This machine requires no expert operator. A boy or a girl runs it.

And in one insurance office where it was formerly necessary for a force of clerks to copy names on reference cards to be filed in various places one clerk now writes the name on a single card with metallic ink, clamps it in a holder with a number of blank cards and flashes an X ray through the packet. Thus by a single motion one man writes, or, rather, prints, all the cards. —World's Work.

London's Roman Wall.

The destruction of Newgate brought to light another section of the ancient Roman wall which surrounded London and served as a fortification of the city. The whole extent of the wall has now been fairly well traced, and parts of it are still used as cellars and warehouses. The only portion of it that is still above ground is a bastion in the Church of St. Giles, Cripplegate. The ground of London is estimated to have risen at the rate of nearly a foot a century, and doubtless from time to time many rich finds of antiques will be unearthed, especially if a start is made to construct high buildings on the American plan.—Cleveland Plain Dealer.

Return to Calfskins Predicted.

Said a dealer in finished calfskins recently: "I am strongly of the opinion that the time is not far distant when we shall see a general return to the calfskin. At present and, in fact, during the past ten years shiny or lacquered leather has made a sensational inroad into calfskins, and while the leather is constantly being perfected and will undoubtedly be popular and standard for a long time to come the calfskin shoe will regain its old time favor. No leather that has been produced is the peer of a well made calfskin, and I am assured that it will again become the standard leather.—Shoe and Leather Dealer.

He Began Early.

The advantage of beginning a career at an early age is shown by the precocity of Edward Penfield, the designer and illustrator—that is, if Mr. Penfield is to be believed. It is told of him that he was once showing a piece of his early work to a friend, who, knowing that Mr. Penfield is yet under forty, asked in astonishment at what age he began to study art. With seeming reluctance Mr. Penfield gave the following explanation: "When a baby I was left in a basket at the door of the Art Students' league. They took me in and gave me a bottle of Chinese white and water. I cried for more, and so they set me to work."

Strength From Proper Breathing.

The Japanese, although men of very small stature, are among the strongest in the world. Any boy of fourteen or fifteen who will faithfully practice their system of producing strength will find himself at the end of a few months able to cope in feats of power with the average man of twenty-five, and all this without the dangerous practice of lifting very heavy weights.

It should always be remembered that rest must be taken after each exercise. While resting try deep breathing. Stand erect, though not in a strained position, and at each breath draw the abdomen in and throw the chest out. As the breath is exhaled let the chest fall inward again and the abdomen outward. From twenty minutes to half an hour is a long enough time to devote to jiu-jitsu, and this includes the time spent in breathing during rests, for deep, correct breathing is in itself one of the best exercises possible. In inhaling draw the breath through either the nostrils or the mouth, as preferred. In exhaling always let the breath escape through the mouth.—St. Nicholas.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

FRENCH SHORE IN NEWFOUNDLAND

Further Reports That the Difficulty Has Been Settled

MONTREALERS IN DEMAND

Messrs. Ames, Hodgson and Drummond Asked to Speak at English Meetings

London, March 28.—The latest information obtainable in reference to the French shore question in Newfoundland, which has been the subject of recent negotiation between France and England, and in which a settlement is reported to have been reached, is that France formally renounces her territorial rights on the French shore and her police rights in Newfoundland waters. She receives, as compensation for the French subjects inhabiting the French shore, about three million francs, and all French fishermen will have the same rights for fishing and catching bait as the British fishermen.

TRADE WITH DENMARK

The representatives of forty-eight Danish agricultural associations have unanimously charged the president of the Agrarian League of Denmark, with request that the British ambassador at Copenhagen, assure his Government of the most earnest desire on the part of the Danish farmers to strengthen the friendly relations existing by facilitating commercial intercourse through the free exchange of their products.

THE IRON TRADE.

The proposals of the Chamberlain Tariff Commission having been put before the members of the British Iron Trade Association, ninety per cent. of the replies desire some change in the present system, while declining in the majority of cases to commit themselves to the precise character of such changes.

DEFENDS THE CHINESE.

Sir Gilbert Parker, in addressing the Manchester branch of the Imperial South African Association of the Chinese in Africa, defended the ordinary Chinese laborer from having known him in British Columbia. He pointed out that the C. P. R. might not have been finished, but for 8,000 Chinamen, who kept steadily at work.

EMIGRANTS FOR CANADA.

The Allan liner Bavarian takes out on her next trip 1075 emigrants, mostly English, and many from Lancashire. The Dominion liner Southwark has also sailed, carrying a large party bound for the Northwest, and also a party of children from Dr. Barnardo's home.

SUES ON HUSBAND'Z NOTE.

Mrs. Cunningham, the widow of an officer in the Northwest Mounted Police, is suing her family doctor for the recovery of £1,000 on a promissory note. Cunningham went to the Northwest in 1885, and his wife not hearing, has presumed him to be dead.

MONTREALERS IN DEMAND.

Mr. Geo. E. Drummond has had urgent requests to address meetings in different parts of the country, but has expressed his regret that he is unable to comply. Mr. Ames and Mr. Hodgson speak at Leeds and Cardiff.

THE AUSTRALIAN COMMISSIONER

The High Commissioner of the Australian Commonwealth in London will have a salary of £3,500 a year.

ANOTHER WAR CLOUD APPEARING

Greece is Getting Ready to Tackle Turkey Again

WILL AWAIT OPPORTUNITY

And Will Strike Her Old Foe when the Time Comes

London, March 28.—Advices from Athens says that Greece is arming as she never armed before, and will be ready to strike Turkey when an opportunity is afforded, through the Balkan troubles.

News from Greece is not reassuring in connection with the outlook for peace in the Balkans to learn that Greece is preparing for an increased armament. The president of the council, M. Georges Theotokis, confronted Parliament with the startling proposition that for all practical purposes and with other nations concerned in the Macedonian problem were doing, the military forces of Greece could not be called an army, and that Hellenic interests needed much stronger protection than they at present possessed. Greece at present is driven to the limit to secure men for the army Two cases of exemptions are thereby abolished. The only sons of men still able bodied and the eldest sons of men still living will henceforth be called to the service. This modification of law will furnish an effective annual addition to the ranks of the Grecian army of over 12,000 recruits. Service is to be for two years, but it will be optional with the authorities to defer the enrollment for two months, and to grant leave during the summer and autumn should circumstances permit the exercise of economy, while in times of peace it will be permissible to pass into the reserves a certain number of men four months before the expiration of the second year, and even in exceptional cases after six months' instruction, preference being given to only the eldest sons. The practical effect of the elastic arrangement is that critical times like the present the number of recruits will be doubled while when the political outlook is good the new classes of conscripts will be relieved of much service for which they would be liable.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company

Limited.

Incorporated under the laws of South Dakota, with a capital stock of $[illegible] with shares at $1 each.

The officers of the Company are C. F. Bumann, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home offices in South Dakota as required by law. Of the $[illegible] capitalization, in shares of $1 each, $[illegible] worth is issued, the first small allotment of this was sold at 60c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have 281 acres underlaid with three distinct veins, or layers of coal which are 4 feet thick each. The first one at a depth of [illegible] feet, it is this vein which we are now mining, the second one is at a depth of [illegible] feet and the third at [illegible] feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth [illegible] feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than [illegible] tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than 80c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease as our fixed expenses will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and town people and, therefore, we have no freight or cartage to pay. We receive from $2 25 to $2 50 for Mine Run and $2 75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 10 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $[illegible] each. We predict that this stock will be worth not less than $2 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,

C. F. Bumann, President.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

(Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers :

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

(Principal Office and Place of Business)
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co

110-111 HENNE BUILDING · LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gagnon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 28th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

RUSSIANS LOYAL TO CZAR

Government Denies State of Siege is Necessary to Avert Revolts

St. Petersburg, March 28— Reports that a state of seige such as has been proclaimed in Siberia and in Saratoff province, south-eastern Russia, through which the Siberian railroad runs, will be extended to the whole of European Russia is officially declared to be absolutely false. No such measure has even been contemplated, it being considered unnecessary.

The authorities express the greatest satisfaction with the internal situation of the empire. The hearty patriotic response which the war with Japan has met with in all parts of Russia has profoundly impressed the authorities. All the reports received by the ministry of the interior indicate that the critics of the government instead of profiting by the war, have been almost completely disarmed.

Two attempts at anti-government demonstrations in Kieff and Odessa, according to these reports, found the temper of the people violently opposed to them. Within the last fortnight only a single incident occurred which could be construed as an evidence of disaffection. This was the throwing of a bomb at Vilna, the capital of the Lithuanian government in western Russia, a few days ago, and up to date the author and purpose of the outrage have not been discovered.

RUSSIAN TRAITOR HANGED

Executed on the Charge of Selling War Secrets

St. Petersburg, March 28.—It now transpires that shortly before the war an official in the ammunition supplies department called upon M. Kurino with an offer to sell certain papers connected with the possible supplies which could be furnished from the entire central Warsaw district, and a plan of the various points to which the same could be sent. This was referred to the Japanese military attache, and after a long conference, the matter being referred to the home government, the official was given 5,000 roubles.

The official in question was arrested yesterday and taken to the Fortress Peter Paul, where, it is stated, he was summarily hanged as a traitor. It further is stated that the tactics pursued by the Japanese evidently are aimed at special points where stores are gathered. Detailed knowledge of the whereabouts of the same has been disclosed by the enemy and has led to inquiries followed by yesterday's arrest.

For some time special precautions have been taken here to prevent leakages in information. Many changes have been made in officials every newcomer receiving special caution as to the necessity for the greatest reserve.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1.20 a ton. Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3.00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

THE
Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

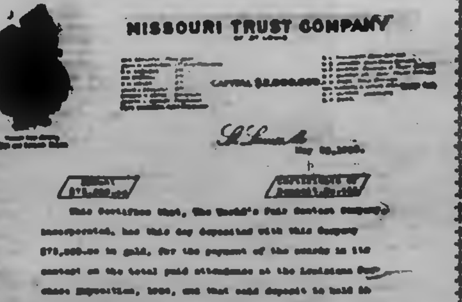
$75,000.00

This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904. An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1880 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,000.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 250 nearest correct estimates, $10 each	2,500.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00



MISSOURI TRUST COMPANY
CAPITAL $2,000,000

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.

HOW WE ARE ABLE TO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000. and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible. This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether a subscriber or intending subscriber, as it is intended as a great National Contest.

CHINA IS NOW READY FOR WAR

Pessimistic View of the Situation Entertained

WILL FRANCE INTERFERE?

This is the Vital Point that is Disturbing Europe at Present

Berlin, March 28—The semi-official Post last night published a communication from a well known diplomatist who states that in the French capital a very pessimistic view is taken of the tension which undoubtedly has set in between Russia and China, and that all fears regarding the attitude of China toward the war seem to be approaching a realization.

Despatches have been received at the Quai d'Orsai from Pekin stating that the Chinese government still denies it has any intention of abandoning its attitude of neutrality, but everything goes to show that it really is waiting only for a favorable opportunity to take part in the hostilities. The Russian government has received similar reports from its minister in Pekin, and is taking measures in consequence.

In the last day or two an exchange of views of an exhaustive character has taken place between the Russian and French governments as to China's intervention in the war, but no decision has yet been reached as to the lines of action to be adopted by France in this eventuality.

The answer of the Chinese government to the threatening despatches sent in by Russia is awaited with anxiety.

In view of the relations which the Post maintains with the foreign office here a statement of this kind in its columns is important.

MAY NOW ENTER THE DOMINION

Newfoundland May Become Part of Canada

FRENCH SHORE QUESTION

The Way Paved for the Union of the Colony with Canada

London, March 28—It is anticipated that the renewal of official negotiations for the entry of Newfoundland into the Canadian Confederation will be an early sequel to the Anglo-French understanding now almost completed between Lord Lansdowne and M. Delcasse. Three million francs is thought a quite reasonable compensation to the dispossessed French lobster factories on the treaty shore.

It is understood that Newfoundland will be expected to concede to the Canadian fishermen whatever fishing and bait-catching rights are given to the French fishermen under the new arrangements.

The existence of this French shore quarrel has been the chief obstacle in the way of the federation negotiations between Sir Wilfrid Laurier's Government and the Government at St. John's.

BIG G

MEN AND WOMEN.

[illegible]

FOREST MINING CO.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $16 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $46.65 and $79.60 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 8x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a pre-written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 8th, 1903, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $100,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 700-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the abov company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fue or many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United Stateswhenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to them and extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developedwill pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $60 per ton is continually being shipped from the gold property, and 54 samples taken from widely different portions of the vein system averaged $20 25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 600 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to [illegible] two 50 ton mills, one on each property. To obtain funds for this purpose a limited [illegible] of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER. Secretary-Treasurer. Boulder, Colo.

JAPS SUSPECT SPY

Committee Will Ascertain Whether Legislator is Aiding Russia

Tokio, March 28—A sensation has been caused in the diet by an accusation made against Teisike Akiyama a member of the house of representatives and publisher of the Nivoku Shimbun, of being a paid advocate of Russia. The house has appointed a committee to investigate the accusation. The Nivoku Shimbun which has been assailing the government, has been suppressed. At the time of Kuropatkin's visit to Japan it published simultaneously with the Pekin Journal the text of a friendly agreement which it declared had been concluded by Russia and Japan.

A TRIP UNDER WATER

Diver Plans to Walk From La Crosse to St. Louis

La Crosse, Mich, March 28.—As soon as the water of the Mississippi River is warm enough Henry Hoffman, a diver residing here, will start to walk from this city to St. Louis, about 600 miles, on the bed of the river. Hoffman was once a deep sea diver and claims he can make the trip in safety in four months, He will be accompanied by a boat carrying air pumps and provisions, and claims he will leave the water only for meals and to sleep. Hoffman has already ordered a special diving suit in which to make the novel trip

AN ALARM SOUNDED

Vienna, March 28— The campaign of alarm in the Vienna press on the subject of Chinese intervention in the war has elicited an authoritative statement on the real attitude of Japan. After setting forth with lucidity the action of the Chinese government as to China, the communication concludes that though Chinese support in many respects would be an advantage to Japan her government cannot run the risk of Russia's occupying other Chinese provinces or risk seeing the Chinese question raised again by massacres of foreigners in China, which would accompany any Chinese participation in the war. Japan, while regarding the war necessary, feels no desire to complicate the conflict or make the Chinese question a European issue.

Pekin, March 28.—The Wai Wu Pu (ministry of foreign affairs) has refused the Russian military attache a passport to inspect Chinese forces in Manchuria and Mongolia, but has furnished him a Chinese escort to accompany him on the same inspection.

JAPAN'S LAST OFFER

Tokio March 28.—The documents submitted to the Lower House shows that Japan's last note offered to recognise Manchuria outside of Japan's political sphere provided Russia recognized Corea as outside of hers. This signal concession, instead of placating Russia seems to have led her to imagine she could obtain everything by insistence, and that Japan would sacrifice everything rather than fight. The whole correspondence shows that Russia was inventing frivolous pretexts for delay, and never had the least inclination to make concessions worthy of the name. It shows also that St. Petersburg subordinated itself to Alexieff throughout despite Japan's remonstrance that his influence did not make for peace.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."—London "Truth"

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty-five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31.52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservatively organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore. and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 900 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Tuberculosis The Lungs Cured

The World's Greatest Physician Eulogize Catarrhozone, which kills all the Germs Heals the Membranes, Cures Thoroughly.

That consumption is due to the presence of germs in the air passages is now admitted by all physicians. Before the disease can be cured of course these germs must be killed. Liquid medicine taken into the stomach can't possibly reach the air cells of the lungs, and is therefore useless.

Catarrhozone never fails to kill the bacilli of consumption for the following reasons, which are plain to every thinking person;

First—Each breath of medicated air you draw through Catarrhozone Inhaler is at once sent through every air cell and air passage in the throat, bronchial tubes and lungs; it is thus sure to reach the nest of the consumption germs.

Being a powerful antiseptic Catarrhozone at once kills these germs and establishes such a healthy condition in the lungs that microbes can't live there. Once the cause of the disease is removed it is only a matter of time till you get well and strong again.

That Catharrhozone does permanently cure Tubercular Trouble can no longer be doubted. Ample evidence of its marvellous merit is witnessed every day. Thousands have been cured after all else has failed by this great germ destroyer, which is inhaled to the very source of the disease.

Mrs. G. P. McCluskiy, writing from Salt Lake City, U.S., says; "My doctor ordered me to Colorado, where I first used Catarrhozone. I inhaled it probably twenty times a day. In one week it stopped my cough completely, and it was not very long in taking every bit of soreness and hoarseness out of my throat. The antiseptic vapor of Catarrhozone must certainly have killed all the germs of consumption in my lungs, for I came home in seven months a 'cure.' My doctor says Catarrhozone is a marvel. It is of the greatest assistance in lung trouble, and cured me permanently."

Not only consumption but every form of catarrh and throat trouble is easily cured by Catarrhozone. Two months' treatment costs $1.00. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont. For a quick and certain cure use only Catarrhozone.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

Mr. F. Lynch left for the West last evening.

—Mr. W. F. Trude, of Lakefield, was in town yesterday.

—Judge Weller, of this city, spent Sunday in Cobourg.

—Mr. James Stubbs, the entertainer, left yesterday to begin a tour east of Toronto.

—Miss Mary Seens, of Bailieboro, is the guest of The Misses Robertson Reid street.

—Mr. David Curtis, of Centreville, and formerly of this city, left for Manitoba last night.

—Mr. R. N. Jolliffe returned yesterday morning from Cobourg, where he spent Sunday visiting friends.

—We are pleased to learn that Mr. Dan Devine has completely recovered from his accident at Lindsay.

—Mr. Robert Stuart, of the American Cereal Company, left for Chicago on Saturday afternoon.

—Miss Ethel Thornton has returned from Toronto, where she spent a week visiting her sister, Mrs. Wood.

—Mrs. James Pilling and son, Roy, who have been visiting friends in Port Hope and Cobourg, returned home on Saturday.

—Mr. George Perks, of this city, attended the funeral of his grandmother the late Mrs. (D.) Perks, at Port Hope on Saturday afternoon.

—Miss Eileen Fair returned home yesterday from Millbrook, where she has been visiting for the past few weeks.

—Miss E. W. Nicholls, returned missionary from Bombay, India, is visiting her relatives, the Misses Nicholls, McDonel street.

—Mr. and Mrs. J. A. Culverwell have taken a house at Chemong Park for the summer. They will go to the Park the latter part of May.

—Mr. R. R. Hall, of Peterborough, has been appointed one of the provisional directors of the newly incorporated Canadian Consolidated Oil Company."

—Mr. A. Smedley, who has been a valued member of George street choir left this morning for a point in Virginia, where he has accepted a position with a concern as machinist.

—Mr. Geo. L. T. Bull, who has been practising law in Burke's Falls for some time, arrived in town on Saturday and is opening up an office on the corner of Hunter and George streets, over Madill's drug store.

—Mr. Samuel McElroy, Peterborough, was in town Saturday and made a pleasant call at the Guide office. We are pleased to learn that "Sam" is enjoying the best of health and prosperity in the Electric City. —Port Hope Guide.

—Mr. Fred Plummer, of town, who was among the third Canadian Dragoons, who enlisted here, left Saturday morning on a trip to North Dakota, where he proposes to reside in future. "Fred's" old comrades will wish him prosperity.

—Rev. Mr. Holsh has received word from Rev. E. A. Langfeldt, who at the time of writing was in Merseburg, Germany. He proposed leaving on March 24th for London, and would probably sail early in April from Liverpool. He is in good health.

—Mr. J. R. Bottorff, Secretary of "The Elwood Tinworkers' Gold Mining Co.," whose property is situated in Lardeau, B.C., was in town on Saturday and gave The Times a pleasant call. Mr. Bottorff has arranged to place a limited amount of stock for sale in Peterborough in the hands of Mr. Joseph Mills, the well known fiscal agent. The proposal is an exceedingly good one, and the advertisement will appear in to-morrow's issue.

—Mr. Jos. H. Louden, who so capably filled the position of engineer on the str. City of Peterborough last year, left town on Saturday for Wallaceburg, Ont., where he has accepted a position as chief engineer on the str. Norseman, commanded by Capt. W. J. Cauldwell, of Port Hope, who has many acquaintances in Peterborough, and who is recognized as one of the best navigators on the Great Lakes. Joe's many friends regret his departure from town.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—Jesse Arries will appear again at this morning's Police Court, on the charge of highway robbery.

—The postponed meeting of the Young Men's Guild of George street church will be held on April 5th.

—On Good Friday evening the Mission Band of George street church will give a musical entertainment. The children, assisted by Miss White, will present a beautiful Cantata.

—The Strangers' Fellowship Club will hold a tea on Saturday evening, April 9th, when the officers will be installed.

—Pound packages of best quality notepaper at Times Bookstore for only 19 cents. Also big bargains in fountain pens; a guarantee with every pen.

—At the Charlotte street Epworth League meeting last evening, Mr. Elcome delivered an interesting address on "Sparrows." A good attendance listened to the discourse of Mr. Elcom.

—An absurd report has been circulated to the effect that the Fifth Ward citizens are anxious to have the union repealed, but Ald. Adams asserts that the majority are satisfied.

—Owing to [illegible] not being a sufficient number [illegible] members present to make a quorum [illegible] the meeting of the Board of [illegible] called for last night, there [illegible] business transacted.

—Owing to the blizzard recently in the Northwest, the C.P.R. has been instructed not to accept, for one week, any car-load shipments of settlers' effects for points west of Winnipeg.

—A large consignment of canoes have been ordered from the Peterborough Canoe Company for shipment to several Hudson Bay Posts, in Northern Ontario. About 75 have already been forwarded and an equal number will be rushed forward as soon as they are completed.

—What might have been a serious accident occurred near the C.P.R. station yesterday afternoon. The pole on one of Undertaker Comstock's rigs, dropped suddenly between the spirited horses, and they, becoming frightened, dashed away. They were soon caught, however, and no damage was done.

—The Owen Sound Advertiser says; "The members of the Owen Sound deputation who were on the electric light inspection trip last week, were very well entertained by the companies whose establishments they visited. At Toronto they first called on the Canadian General Electric Company and were taken in hand by a representative of the company, Mr. McBurney, and who showed them through the works and accompanied them on the trip to Peterborough, which town they visited after Toronto."

WOMAN'S WORLD

CORINNE B. ECKLEY.

An Expert Anatomist, College Professor, Inventor and Author.

There lives and labors in Chicago a woman of international fame and of such high and rare and scientific attainment as to make her unique among womankind. Her life, devoted on the one hand to her work and on the other to her charming home, is the life of the ideal woman, concerned, as it is, with real world's work and genuinely domestic felicity and culture.

This woman is Corinne B. Eckley, expert anatomist, professor of anatomy in two colleges, head instructor in anatomy in the Chicago College of Physicians and Surgeons, University of Illinois; author, inventor, and one of the most successful lecturers and demonstrators of human anatomy in America. Mrs. Eckley is the wife of Professor William T. Eckley, the noted American anatomist and man of science, whose untiring labors in the art of dissection have done so much to simplify and make easy one of the most difficult branches of human knowledge.

Mrs. Eckley has the rare distinction of membership in the American Association of Anatomists. But one other woman has been honored in this way. She is co-author with her husband of several important works, among which are "Regional Anatomy of the Head and Neck," "Anatomical Nomenclature" and "A Manual of Dissection," books that are constantly used by surgeons. Her inventive genius was disclosed in a most unexpected way. Formerly longitudinal division of the spinal bones was made with crude tools and much labor. Mrs. Eckley devised a peculiar and most useful instrument to do this difficult work, the laminectomy forceps, a device that insures a successful and easy solution of the problem.

In her home life Mrs. Eckley is most enviably happy. Her comfortable home in Jackson boulevard is well ordered and excellently managed, and to see her at work supervising the making of preserves from fruits grown under her eye on her farm in Michigan one would hardly suspect that this busy housewife is an honored member of the American Society of Anatomists and the author of text books on anatomical nomenclature. "When I am in my home," she says, "I live; when I am away from home I work."—Chicago Tribune.

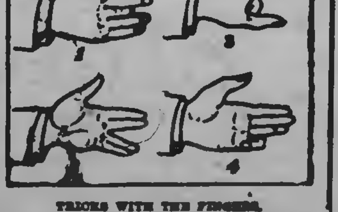
FUN IN YOUR FINGERS.

Tricks That Appear Simple, but Are Sometimes Impossible.

It is interesting to see what tricks can be done with one's fingers.

These seem simple enough just to look at, but when one comes to try doing them, my, how hard some of them are!

Fig. 1 shows a stunt that a good many people can do; but others can't do it at all, no matter how hard they try. It consists of pressing close together the two intermediate joints of the middle fingers of your two hands while the ends of the other fingers and the thumbs are together. Then separate the thumbs and move them up and down. Next join the thumb and try the same thing with the little fingers. So far, easy enough. Your friends will smile and say, "Oh, give us something hard!" "All right," you may say, "Now try the same thing with the ring fingers." This will prove too much for most of our friends. They will find that they cannot separate the ring fingers without at the same time separating the intermediate joints of the middle fingers.



TRICKS WITH THE FINGERS.

Fig. 2 shows you something that is very difficult for some people. Form one group of the middle and index fingers and another of the little fingers and ring fingers. Then bring these two groups together and separate them like scissors without disturbing either group.

Fig. 3 shows a stunt that many people find impossible to do. This is to bend the end joint of your index finger, keeping the other joints all straight. Try it. Very likely you will find you can do it with one hand, but not with the other.

Then there is the last stunt—to turn the little finger in, keeping all the other fingers stretched out and close together.

4 lbs. Black or Green Tea for $1.00. Equal to any 40c Tea on the market

Somewhere in the world life is at stake every minute of the day. Right at our own doors, perhaps, is going on a struggle as grim and fierce as any fight or flight on record. You hear the hollow tearing cough; see the ooze of blood which tells of the wounded lungs; mark the emaciated body and hectic cheek, and know a life is at stake.

The use of Dr. Pierce's Golden Medical Discovery has saved many a life in just such a crisis. It cures obstinate, deep-seated coughs, stops the hemorrhage, strengthens "weak" lungs, and restores the emaciated body to its normal weight and strength.

There is no alcohol in the "Discovery," and it is absolutely free from opium, cocaine, and all other narcotics.

"I desire to send you this brief, unsolicited testimonial," writes Rev. Joseph H. Fesperman, Barium Springs, Iredell Co., N. C. "In the case of my daughters was suffering on account of a severe cough, hectic fever, wasting of flesh and other symptoms of diseased lungs. I promptly gave her Dr. Pierce's Golden Medical Discovery with gratifying success, and she now enjoys excellent health. This experience caused me to recommend Dr. Pierce's medicines to my neighbors, who, without exception, used them with favorable results."

Dr. Pierce's Common Sense Medical Adviser, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay customs and mailing *only*, or if cloth-bound volume is desired send 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Eleven Russian Warships in A Seaworthy Condition Fleets Manoeuvring Close Together in Open Sea.

Thinks Japanese Await for Prearranged Signal

A CHALLENGE TO THE WHOLE WORLD

Russians Haul Down Other Flags at Neuchwang

BRITISH FLAG REMOVED

rom the Property of Citizens of American and or British Nationality — One Cause for Surprise

SIX INCH HOWITZER GUNS

The six inch guns shown in this picture give an excellent idea of the weapons upon which the Japanese army will depend largely in siege work

Special to The Times.

London, March 29—A correspondent of The Times at Weihaiwei says: A Chinese junk, which arrived here this afternoon, reports having seen this morning eleven Russian seaworthy Russian vessels manoeuvring in the vicinity of the Japanese fleet, which was also manoeuvring. No firing was heard here.

London, March 29—The military correspondent of The Times today says:—Not the least of the surprises has been the immunity of the Russian railways from destruction, and even attempts at demolition. Yet the Japanese had studied the whole theatre before the outbreak of war, and know more about the circumstances of the country and the population, outside of the immediate neighborhood of the railway and the Russian garrisons than the Russians themselves.

There has been ample time to despatch emissaries and raiding parties landed during the night from various points of the coast, toward the interior, and it is difficult to account for the immunity of the Russian communications except under the assumption that the Japanese are wanting in resource and audacity, or, alternatively, that all preparations have been made, and that at a given signal on a given day and hour they will reach the stage for execution. Nothing that has yet occurred entitles us to cast doubts upon the intelligence and resource of the Japanese. We are, therefore, forced to fall back upon the other alternative, and believe that the hour for action has not yet struck, and will synchronize with the delivery of the blow by the main army.

Neuchwang, March 29—The civil administration last evening notified all the foreign Consuls and residents of Viceroy Alexieff's order placing the city and Port of Neuchwang under martial law, explaining that it had been ordered to safeguard the commercial interests.

Special to The Times.

Neuchwang, March 29— American and British flags were today removed by the Russian military from the property of citizens of American o British nationality.

VERY STRONG EVIDENCE AGAINST JESSE ARRIES

THE NOTORIOUS "HUGGER" WAS COMMITTED FOR TRIAL

Several Witnesses Heard Yesterday—Another Charge Lodged Against Him—His Victim's Evidence.

For the past three weeks great excitement has prevailed owing to the arrest of Jesse Arries on the serious charge of assault and highway robbery, and yesterday morning the police court was crowded to the doors with an assembly of citizens, all anxious to get another glimpse of the notorious Jesse.

The prisoner looks none the worse for his incarceration, and prison life evidently agrees with him, and the strong web of evidence that is being woven around him suggests very forcibly that he will be given a chance to enjoy that life still further. His face bore no great signs of nervousness, but his eyes constantly wandered from one face to another, occasionally resting with a malignant expression on the "man with the pencil." While the young lady, whom he is accused of assaulting, was giving evidence, he watched her intently, and even smiled brutally when she described her struggle with her assailant. At a first glance he might perhaps be considered an innocent, but a more careful scrutiny of his features suggests degeneracy.

On being asked by His Worship how the prisoner wished to plead, his counsel, R. F. McWilliams, declined to elect, and the victim of the assault on March 8th was called. In a clear, impressive voice she outlined the thrilling experience through which she passed on that eventful Tuesday evening. She was walking along Aylmer street near the crossing at Edinburgh street, about 8.30 o'clock, when she suddenly heard a man's footsteps behind her. She was not alarmed as she thought it was a man returning from work. When about four paces behind her the noise of footsteps suddenly ceased, and in another instant she was pounced upon from behind, her arms pinned to her sides, and thrown heavily face downwards on the ground.

"Not a word out of you, now!" exclaimed the inhuman brute, and immediately clapped his hands over her mouth, and began a search of her pockets. Finding nothing, he asked "Where's your money? Tell me where your money is!" Finally he discovered the chatelaine bag suspended by a silken cord from her coat. He jerked this off, after dealing his victim several heavy blows with his clenched fist, and, being alarmed at the young lady's cries, ran quickly off.

The clothing of the assailant was described, and corresponded with that of the prisoner. He was a man similar in size, and the lower portions of his face was like that of the deceased. His footwear was either old rubbers or shoepacks. Arries was called out of the box and witness stated positively, "That's the size of man," and that his general appearance was that of her assailant.

John Sanderson, grocer, at corner of Aylmer and McDonnel streets, was the next witness. Sanderson remembered a young man visiting his store on the evening of the assault, between eight and nine o'clock. He purchased two cigars, and, without being asked, remarked concerning a cut on his hand. He said that he had slipped and fallen against a tree. He paid for the cigars with a one dollar bill.

Mr. Wm. Lockhart, who was in the store at the time, was next called. He had been a schoolmate of the prisoner, and identified him as the man who bought the cigars. He also swore that prisoner wore a pair of moccasins and leggings that night.

The next witness, Eric Kimble, swore that on the night of the assault he met Arries near the Postoffice. In the conversation which ensued, he said that prisoner remarked, "Did you hear of the young lady being assaulted tonight, between eight and nine o'clock." Witness had not heard of it. "I wouldn't wonder if they'd arrest me for it," was Jesse's remark. Witness asked why he thought that, and prisoner remarked, "because I've been locked up before."

After hearing all the evidence, His Worship committed the prisoner for trial.

JAPAN MAKES RADICAL CHANGE IN HER PLANS

Some Startling Information Has Been Received at St. Petersburg

THE NEUTRALITY OF CHINA IS TO BE VIOLATED

According to the Report Invasion of the Celestial Empire is to Be Made at Once

St. Petersburg, March 30.—Information received by the War Office indicates that Japan, finding it difficult to effect a landing in Manchuria, proposes to land her army in neutral Chinese territory on the west coast of the Gulf of Leao-Tong, either at Tien-Kian-Cheng, in Kin-Chou Bay, or at Shan-Hai-Kwan. The violation of Chinese neutrality would give an entirely new phase to the war.

Although slow to believe that Japan deliberately contemplates a violation of her pledge to respect neutral territory, the reports received at the Ministry of War are so specific that they compel consideration.

The presence of disguised Japanese soldiers acting as spies along the Shan-Hai-Kwan road has been established and the Russian agents report that there is every indication of an intended landing on the west coast of the Gulf of Lao-Tong.

COMPLETE CHANGE OF PLAN.

The information conveyed by these agents seems to coincide with other information, indicating a complete change in the Japanese plan of campaign or of its entrance into a second stage, practically involving the adandonment of further heavy landings of troops in Corea.

According to advices received by the government there are only about 70,000 Japanese troops in the hermit kingdom at present. It is considered possible that the Japanese reckoned on a complete mobilisation there sooner, but that the difficulties met with in the transporting of troops from Japan and over the roads in Corea proved more serious than expected, and the Japanese found themselves unable to deliver a frontal attack in Manchuria before the Russian troops arrived in sufficient force to check them.

At any rate, the latest advices indicate that the Japanese will not send many more soldiers into Corea. They may make a diversion at Possiet Bay in the direction of Vladivostok, but their main objective henceforth will be in the Gulf of Leao-Tong.

EASIER TO LAND IN CHINA.

If the information received is correct the Japanese have discovered that a landing on the peninsula is too hard a nut to crack and have elected to land on the Chinese side, where there will be no army to repel them. The only points feasible for landing are Chin-Wan-Tao and Tsen-Kiau-Cheng, which are connected by rail, respectively, with Shan-Lai-Kwan and Kau-Kiau, on the Pekin railroad. A landing at either places would give the Japanese possession of a splendid strategic line by which to strike the Russian flank and, if desired, to hold Pekin in subjection.

The Russians have little faith in the Chinese generals Ma and Mu, who might disregard orders from Pekin and join forces with the Japanese.

RUSSIANS NOT CAUGHT NAPPING

The Russian military authorities have felt themselves compelled to consider the foregoing possibility and to take the necessary precautions. The international complications which might arise out of a Japanese landing on neutral Chinese territory have also received careful consideration, for, although it is specifically declared that it is not believed Japan would dare violate the agreement made in response to the note of United States Secretary of State Hay, as well as in Japan's other public declarations, there is reason to affirm that the Russian line of conduct in such a contingency has already been decided upon in principle. The assurance obtained from Pekin require that the Chinese authorities should oppose with their army such a step on the part of Japan.

IT MEANS AN UPRISING.

A high Russian official said to the Associated Press; "It would have worse consequences for other powers than Russia if Japan should enter neutral territory, for such a step would obviously be of the purpose of inveigling China into the fight. If Japan would be successful in this there would be an uprising against foreigners which would be tenfold greater than the "Boxer" affair. The mere possibility is pregnant with all sorts of dangers, but we can hardly believe that Japan will venture to violate the neutrality of China as she did that of Corea."

It is learned that the Russian military attache at Pekin is now at New-Chwang watching the movements of the Chinese troops.

TRENTON ROUTE WILL BE THE BEST

Engineers Report on Trent Valley Canal

COSTLIER BUT MORE RETURN

Harbor Has Advantage of Being on Inland Waters of the Bay of Quinte

Ottawa, Ont., March 29—Mr. R. A. F. McLeod, C.E., of Ottawa, who was detailed by Mr. Schreiber, Chief Engineer of Railways and Canals, to report on the alternative routes of the Trent Canal, from Rice Lake southerly, declares unmistakably in favor of the Rice Lake to Trenton route, although the difference of cost in favor of the Port Hope route is $144,567. Mr. McLeod points out that the difficulty of navigating Lake Ontario with canal boats in stormy weather is a great objection to the Port Hope route. The material for canal construction is better on the Trenton route, and the deep cut on the Port Hope section is avoided by taking the river route. He says, moreover, that the diversion of water from its natural course will be a source of great expense to the Government, complaints being made that the water sometimes falls very low in the Trent River.

The largest public benefit would be obtained by constructing the canal through or near the towns of Hastings, Campbellford, Frankford, and Trenton, where there are now large mills and factories. A very large amount of water power will be more available at the various dams on the Trent River than on the Port Hope route, and would be a valuable asset for the Government. The harbor at Trenton is much larger and safer than that of Port Hope, and it has the additional advantage of being on the inland waters of the Bay of Quinte.

Mr. McLeod met Mr. Smith, M.P., and a number of Port Hope gentlemen on the ground last September, but after hearing their arguments i favor of Port Hope, he still adhered to his preference for the Trenton route.

To Clear at $1 50

Webster's Dictionary, the new common edition, 1,500 illustrations and an appendix of 10,000 words. Indexed and leather bound. Only a limited number left. Will be sold for one dollar and fifty cents each. Times Bookstore.

—Farmers may be seen almost every day around the Peterborough hotels now, looking for help for the coming summer. Very few farm hands seem to be available and wages must necessarily be even higher than last season, but as farmers have been reaping the benefit of the growing times for the past few years, they can afford to be more generous with the working man than in the past.

PETERBORO' MEN IN BIG COMBINE

Local Capitalists Interested in Huge Oil Trust

A GAPITAL OF $15,000,000

Organization Will be Called the Canadian Consolidated Oil Company

The amalgamation of four Canadian oil companies is announced in the latest issue of the Ontario Gazette, viz.; The Grant Hamilton Company, of Toronto; the Canadian Oil Company, the Canadian Consolidated Company, of Hamilton, and the Sun Oil Manufacturing Company, of Hamilton. The capital stock of the company is put at $15,000,000, divided into 10,000 shares. The new company is incorportaed as the Canadian Consolidated Oil Company, but it is stated that the word consolidated will be dropped.

The head offices of the new company will be situated in Toronto. The provisional directors are J. Kerr, Petrolea; E. R. Clarkson, T. Ramsay and L. Bauer, Hamilton; D. B. Hanna, J. J. Main, W. D. Lumis, T. H. Hamilton, Joseph Wright and W. P. Bull, Toronto; W. J. Lovering, Coldwater; J. Playfair, Midland; W. J. Sheppard, Waubaushene; W. Irwin and R. R. Hall, Peterboro'.

It is stated that four other companies are expected to join the amalgamation, namely; The Gall-Schneider Company, of Montreal; the Union Petroleum Company of Canada and the Walker Oil Company, of Winnipeg, and the Sterling Oil Works, of Marietta, Ohio.

One of the shareholders of the Gall-Schneider Company when interviewed this morning, remarked; "We have been approached by this amalgamated company and some of the shareholders have conditionally sold their interests. These conditions have not yet been fulfilled, and so the deal has not been closed. Exactly one-half of the shareholders have consented to sell on these conditions, and the ohter half are Pennsylvania men. What they will do I cannot say. Personally, I have refused to enter into the merger, but I have named my figure, and will be willing to sell at that."

STUDENTS ENTERTAINED

Business College Boys Spent Social Evening at Y.M.C.A

It was one continuous round of youthful happiness and boyish merriment last night at the Y. M. C. A. Parlors, when about thirty of the Business College and High School students were entertained by the officers of the Association. Many games were played in the spacious parlor, such as "pip," "bowling", etc. A short but enjoyable programme was rendered, consisting of vocal, literary and gramophone selections. The genial secretary opened the programme with a neat address of welcome to the boys, and Mr. Aplin followed with several gramophone selections. Mr. J. T. Anderson recited, and "Cap" Sproule sang most acceptably "Kitty of Coleraine." A potato race was thoroughly enjoyed by the happy lads and all enjoyed themselves as only boys can.

Refreshments, consisting of coffee and sandwiches were served, and all left about 10 o'clock to dream over one of the happiest evenings they have spent in Peterborough.

A PROGRESSIVE CLASS

Young Men's Baraca Bible Class Held Semi-Annual Meeting.

The Young Men's Baraca Bible Class of the Murray street Baptist Sunday school at their last semi-annual business meeting elected the following officers;

Hon. Pres. and Teacher—Geo. Lee
Past Pres.—James Ellis,
Pres.—Walter Galbutt.
Vice.-Pres.—Luther Cross.
Sec.—Robt. Laing.
Asst. Sec.—John Hardwick.
Treas.—Edward Jewitt.
Librarian—Walter Miller.
Committees and Convenors—
Hustlers—James Ellis.
Membership—Raymond Bullick.
Social—Frank Weller.
Literary—Edward Sedgwick.
Musical—Bruce Quinn.
Athletic—H. Sackville.

The reports of the various committees showed that the young men were awake to their opportunities.

The Secretary's report was especially encouraging, showing that great interest had been taken in the study of the lesson and that marked progress had been made in the matter of membership.

The young men deserve great credit for the enthusiastic manner in which they have carried out the principles of their class, and the various duties assigned to each.

The next regular semi-annual meeting will be held in October next.

A HINT TO HUNTERS

Peterborough, March 29—To the Editor—Looking over the paper the other day I was somewhat amused to see how hard our learned men, even the Game Warden, have worked to study up some plan to make it more safe for hunters that go up to the bush to hunt.; Now let me tell you that I have hunted for fifty years and killed as many deer and other game as the most of hunters, and a good many more than some of them, and I never had to wear a red cap or a band on my arm, nor have one of the company I have goen with—nor a bottle of whisky in my pocket, and not one of us ever shot a man or shot at one, and yet I believe there will have to be something done for the safety of those who would like to have a couple of weeks' hunting and get home safe; and also them that don't care so much for hunting as they do for something else. Now, I believe it would not be amiss to ask a little pledge from every one that takes out a license to say that he will not indulge during the hunting season. And if any one objects we will have some idea who it is that does the wild shooting. My opinion is it would do more good than all the red caps that can be worn.

Yours truly,
AN OLD HUNTER.

STOPS AID TO RUSSIA

Sovereign of Mongolia Cuts Off Supplies to Army

PEOPLE MUST BE NEUTRAL

Russians Said to be Violating Rules by Keeping Troops in China

Newchwang, March 30—Prince Alatain, sovereign of Mongolia, en route to his capital, arrived in Kinchow yesterday from Pekin and Japan, where he witnessed the manoeuvres and mobilisation of the Japanese army. In accordance with the declaration of Chinese neutrality, Prince Alatain has commanded the observance of neutrality through Mongolia thus rendering illegal the large pony, beef and feed traffic, upon which the Russians are depending, which, notwithstanding his Japanese sympathies, he has found it impossible to suppress.

U. S. MAY END CRIMES

Missionaries Want America to Stop Official Cruelty in Congo

Washington, March 29.—With the object of enlisting the aid of the United States Government in a protest against the atrocities alleged to be perpetrated against natives of the Congo Free State by officials of the Belgian Government, the officers of home mission boards and missionaries who have been sent to the Congo are holding a conference here. They charge that King Leopold's representatives are practicing cruelties on the natives in order to extort rubber and ivory products from them.

Rev. Dr. T. S. Barbour, of Boston, is chairman of the conference, and Rev. William Morrison, sent by the Southern Presbyterian church as a missionary, is secretary. Revs. A. McLean, of Cincinnati, and S. H. Chester, of Nashville, are among the officers of mission boards in attendance.

JAPS WILL STUDY RELIGION

Come to See How Much It Enters Into Daily Life

Seattle, Wash., March 30.—A party of wealthy Japanese has arrived to visit the principal centers of the United States, inspect rolling-mills and factories of all kinds, look into the condition of the poor, examine the practical working of the laws and ascertain if possible whether religion enters to any appreciable extent into the actual daily life of the people.

One of the party, a graduate of Tokio University, said that, after most careful examination, absolutely unprejudiced and free from preconceptions, the Japanese had unanimously and unhesitatingly rejected the religion of the Europeans as something which they did not want and did not need.

Wednesday—Fair, and a little higher temperature.

INWARD THOUGHTS

PROPRIETOR GRAHAM — "Whether 'twas my fault or Harry's, that that race didn't come off on schedule time."

CHIEF ROSZEL—"Why some cranks are talking about an increase on the force, when I can't get enough to do to keep my hands warm."

JESSE ARRIES—"I never dreamed the public would ever have such an interest in me. Next time I treat a fellow to a cigar he'll know enough to keep quiet about it."

WM. SNOWDEN—"I feel satisfied with the winter's curling, but blowed if I don't wish the fishin' would hurry up."

WM. CROFT—"Now that the curlin' season's over I'll issue no more challenges. But my record for the winter was a clean one. Crack an egg on that."

CHIEF RUTHERFORD—"When are these improvements to be made in the fire system?"

THE SPORTING PUBLIC—"When the Turf Club members are going to settle down to business and arrange for the season's 'meets.'"

P. C. STEWART—"I was walking down George street yesterday morning, when I saw a young woman standing on the corner, and apparently anxiously awaiting some friend. I asked for the cause of her anxiety. 'O, nothing, thank you,' she replied, 'I'm only waiting for the car.'"

—Pound packages of best quality notepaper at Times Bookstore for only 19 cents. Also big bargains in fountain pens; a guarantee with every pen.

ATHLETIC WORLD

BY OUR SPORTING EDITOR

SPRINTING

The five mile foot race between Dave Belland and Burns which is billed for April 16th, will come off on Saturday April 9th. The course will be from the Oriental Hotel to Downer's Corners and return.

LACROSSE.

From present indications there will be no town League and consequently it will be up to the Vics to furnish lacrosse for the public this season. They intend entering a team in the Trent Valley League and to make the trips which this league calls for means considerable money. The Vics will start out with their subscription list this week and it is hoped that the public will be as liberal as possible with their contributions.—Port Hope Guide.

Fred. A. Clarke, manager of the Peterborough Athletics, is a popular candidate for the O.L.A. Council. Mr. Clark is well versed in lacrosse matters, and should prove a valuable man in the deliberations of the Council. He is bright and energetic and should be elected.—Toronto Star.

The following officers will manage the T.A.S. lacrosse club for the coming season;—

Hon. President—Rev. Dr. O'Brien
President—Will Crowley.
1st Vice-President—John Hayes.
2nd Vice-President—D. Holland.
Secretary-Treasurer—F. McFadden.
Manager—John McCabe.
Executive Committee— The Manager, Captain, O. O'Neil, W. Grady, James Dorris.
Grounds Committee—Messrs. A. J. Sharpe, P. Kane, C. Theobald, T. Corkery, John O'Brien.

BASKETBALL.

The Peterborough senior basketball team will play the Toronto Senior League champions, Central Y.M.C.A. gymnasium team on the 'Centrals' floor next Monday evening. An interesting game may be looked for.

HOCKEY.

The hearing in the injunction case of "Roddy" McMillan of Belleville against the O.H.A. is further adjourned till next Saturday.

BASEBALL.

A meeting of the Young Quakers Baseball Club will be held in the Y.M.C.A. this evening at eight o'clock. All interested in baseball are invited to be in attendance.

A meeting of the Canadian Cordage Company baseball team was held in the Oriental parlors last evening and the following officers were elected;—

Hon. Patrons—Messrs. Adam Hall, R. R. Hall and Hon. J. R. Stratton
Hon. Pres.—Mr. A. L. Sykes.
Hon. Vice Pres.—Mr. B. Fowler
Pres.—J. P. Connor
Vice.-Pres.—W. Mellis
Recording Sec.—B. Rickey.
Treasurer—D. Potter.
Manager—J. C. Carter.
Executive Committee—Mr. J. Noyes preparation room; J. McCurdy, spinning room; J. Carter, rope room; W. Mellis machine shop; W. Burton, wareroom; T. P. Connor, president.
Mascot—Roy Galvin.

"Red Led" Clancy was acting secretary and it was decided to enter a team in the Midland League.

A GOOD MINING PROPOSITION

Pyramid Gold and Copper Mining Company Has Brightest Prospects—Capital Stock $4,000,000.

One of the largest and most promising gold and copper mining properties in the great south-west is that known as the Pyramid Gold and Copper mining Company, whose property is fully paid for, has a clear title, and is free from indebtedness. It is incorporated under the laws of Arizona, and operates extensively in the great Copper Basin District, Yavapai County, Arizona. The property is comprised of twelve claims, containing nearly 200 acres, and a large amount of development work has been done at the sole expense of the officers and directors, which is evidence of the richness of this valuable property. The supply of ore is almost inexhaustible, and the latest assays average $31.52 per ton. One shaft of sulphide of copper is expected to assay at $75 and $100 per per ton, and there is an immense quantity of this metal.

These claims are situated about four and one-half miles from the railway station, and about thirty-five miles from Val Verde smelter, and a stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected. As mining operations are conducted 300 days every year, it may be readily seen what an immense profit will issue per year from one 100-ton mill, thereby enabling the company to pay large dividends.

The capital stock of the Pyramid Gold and Copper Mining Company is $1,200,000, and no salary will be paid any officer until the company's property is on a dividend paying basis. Every dollar obtained from the sale of stock is expended in a judicious manner for the equipment and further development of the property. A limited number of shares are being sold for 50c. per share, but as soon as sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

As this property is within a few miles of Senator Clark's rich United Verde Mines, which yield about $18,000,000 annual profit, and as the part already developed promises so well, this is, without doubt, one of the best inducements ever offered to investors. Full information and particulars may be had on application to the Peterborough Brokerage Company, the local fiscal agents of this progressive concern.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotency, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, [illegible] Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

UNION LABEL

PETERBOROUGH, MARCH 30 1904

CROWN LANDS

During the year 1903 there were sold for agricultural purposes 80,406 acres, aggregating in value $55,560.28. The collections on account of these sales, and those of former years were $65,640.27. There were sold for mining purposes 6,437 acres for $15,123.60. There was received on account of the conversion of mining leases into patents $7,117.75. The collections on account of mining leases were $14,868.63. There were leased for mining purposes 32,527 acres, at a rental of $33,177.61. The collection on account of fees and former leases was $48,412.59. The total area of Crown lands disposed during the year was 129,996 acres. The total collection on account of Crown lands was $147,014.66.

The volume of settlement in the newer parts of the Province during the year has been on the whole very satisfactory. The sales of agricultural lands have exceeded those of last year by 13,578 acres.

The great influx of home-seekers the last two or three years has been on so large a scale as to exhaust the land available for settlement in those areas which are convenient to navigation or colonization roads, but the rapid opening up of the region by new roads and railway construction will soon make available the immense area of clay land lying north into the Temiscaming region during and west of the present settlement, in which area a number of new townships were surveyed during the past summer. There was such a desire to obtain land in the Temiscaming region that a number of people applied for lands which they were not prepared to take possession of. The attempt to hold lands for long periods without making improvements was found to be a hindrance to the progress of that region, the great requirements of which is population. In order that no injustice might be done to those claiming lands, and that settlement regulations might be enforced, an officer, under the title of Homestead Inspector, has been appointed, whose duty it is to report to the Department upon cases where there is non-compliance with the settlement conditions as to residence, clearing, etc. It is expected that the presence of such an officer will have a good effect in causing people to be more prompt and active in going into actual residence and doing their share towards building up that country.

In other parts, such as from North Bay west to Sudbury, and from Sudbury to Sault Ste. Marie, considerable land has been disposed of, and a number of settlers have gone in. In the Wabigoon region there has been some increase in population, and it is hoped that certain industries of considerable magnitude which are projected in the town of Dryden, in this district, will have the effect of attracting population to the promising land available, and capable of affording homes for a number of people. There is believed to be a good field for settlement in the townships surveyed along the Nepigon River, which have been somewhat neglected because they lay off the line of the railway. The erection of a large pulp mill on this river, which is now assured, and the construction of the Thunder Bay, Nepigon & St. Joe Railway up the valley of this beautiful stream, will speedily bring it to the notice of people in search of homes.

The free grant districts have received a good deal of attention from those in search of free land. In the Thunder Bay Agency there has been a satisfactory growth in the population, a number of settlers having come in from the United States, and a few from the mother country. The railway construction which has been going on in that region during the past few years, has given employment at good wages, and the erection of wharves and elevators at Port Arthur and Fort William has caused the expenditure of large sums of money so that there has been plenty of employment at remunerative wages. The towns of Port Arthur and Fort William have made great progress, and now contain a population approaching 12,000. — Report of the Crown Lands Department for 1903.

WellBalanced Nerves

YOUR SUCCESS IN LIFE DEPENDS UPON THEM

If Lacking in Nerve Force, Build Up Your System With Ferrozone—It Has Helped Others—Let it Help You too

Happy is the man who can work unceasingly without fear of an "attack of the nerves." He gets along, prospers, rises to position of power, and importance. The strong man is pushed over the heads of his weaker brothers by virtue of being capable to do and act when necessity calls.

The weak nervous man is distanced before the race starts. But he shouldn't give up without trying what Ferrozone can do for him. This strengthening tonic has great power for building up people who are run down, tired and exhausted.

Ferrozone starts right at the root of the trouble, and drives all impurities out of the blood. Then it gives the blood an additional supply of iron and other strengthening elements which enables it to nourish the nerves back to normal condition. Once the nerves are toned up, indigestion and stomach trouble disappear. Then your system is in good order, and capable of being rebuilt in the proper way. Nerve tissue is formed, flabby muscles begin to harden, weak organs regain strength, and before long the half-wrecked man glories in the new-found vigor that Ferrozone has brought him.

You may have tried a hundred remedies; they may all have failed. But this mustn't influence you against Ferrozone, which is so different from other preparations. Ferrozone actually makes blood, and makes the kind of blood that is valuable in maintaining health. Then Ferrozone has a wonderful action on food, converting it into nutriment, so that everything you eat is going to be useful to your body.

Ferrozone is unexcelled as a rebuilding tonic for children, women and men, the young and old, in fact everybody can derive benefit from Ferrozone, which is specially recommended for chlorosis, anaemia, lassitude, weakness, and all disorders arising from impaired nerves or blood. Try Ferrozone yourself. Price 50c. per box or six boxes for $2.50. Sold by druggists and by mail from N C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

EDITORIAL COMMENT

Hon. C. S. Hyman, the member for London, has been renominated as chairman of the Railway Committee of the House of Commons. This means that the promised cabinet portfolio is deferred until Sir Richard gets good and ready.

A "made in Canada" fair will be held in Victoria, B.C., from 23rd to 28th, and will afford Peterborough manufacturers a favorable opportunity to put samples of their output before a wealthy class of customers with whom foreign manufacturers are seeking to get on the best terms.

The new Militia Act provides that the post of commander-in-chief shall be open to a Canadian officer. This means that British generals shall in future be prohibited from giving the service here the benefit of their experience, and also that the Canadian officer, having a political pull strong enough to get the position, will hold on to it for life. He will thus either become a barnacle, or be liable to be thrown out of place entirely by a change of government. Being at the top, this would be inevitable, there being no other office to which he could be relegated. Under such a command is it likely the service would be better advanced than it would by an infusion of fresh ideas every few years by an officer of training and large experience in the British service!

Early Gold Stampede.

The voyage of the Argonauts, the date of which is uncertain, was professedly a rush for gold, to be collected in fleeces placed in the torrents flowing down the flanks of Mt. Caucasus. But older much was the westward movement, which Chaldean records of 2800 B. C. chronicle, to the gold-bearing land of Meluhha, afterward known as Midian. Later on, but still at a very early period, there was a rush from Egypt to a spot inland from the present Suakim. Long afterward this was described by Diodorus Siculus, who left a map, still extant, showing the wells provided for the gold seekers between the Red sea and the mines. About 1000 B. C. there seems to have been another rush of miners in search of gold into South Africa. Its numbers can only be guessed at from the extensive remains that still exist.—Stray Stories.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

SON OF PREMIER VISITS CANADA

Scions of Famous French Families Now in Dominion

SON OF AN EX-PREMIER

One Visitor is Francis Waddington and the Other the Comte des Garets

Montreal, March 29.—"I have visited Canada several times during the past few years, and I am very much impressed with your country. The progress and prosperity on every hand are apparent."

These were the words of Mr. Francis Waddington, of Paris, a scion of a famous French family, to your representative at the Windsor Hotel. Mr. Waddington is accompanied on his Canadian tour by the Comte des Garets, a member of one of the old royalist houses. Both gentlemen are here on a pleasure trip, with a view of seeing something of the Dominion, especially Lower Canada.

Mr. Waddington, who is a young well built man, of about 28 years of age, is a son of ex-Premier Waddington, who played an important part in the government of the French Republic. Mr. Waddington speaks English fluently and referred in a modest way to the career of his father. The late Premier Waddington was also French Ambassador to the Court of St. James, and afterwards filled for some time a similar important post in the city of St. Petersburg. Although Mr. Waddington would not admit it, it is well known that owing to the broad views of the late French statesman, especially during his tenure of the post of ambassador in the English capital, the present entente between the English and French nations was carefully fostered.

Mr. Waddington good-naturedly begged off passing any opinion as to the present condition of French politics on the ground that he took very little interest in affairs. He appeared to be more interested in Canada and Canadian development than in the political issues of his own country.

"We intend to go to Ottawa after our stay in Montreal is concluded," said Mr. Waddington. "We have already spent a few days in the ancient capital of Canada. We want to see quietly what you have to show us."

FRENCH SHORE TROUBLE

A Parisian Journal Confirms Some of Rumored Terms

Paris, March 29.—The Echo de Paris has a despatch from London, giving what purports to be additional details of the Anglo-French agreement. The main outlines of the convention settling definitely the Newfoundland questions are as follows; France formally renounces all territorial claims to the French shore and position rights in Newfoundland waters, and receives in exchange, as compensation for the French subjects who are residents of the shore, about £20,000. All French fishermen will have the same rights as British. France also receives a strip of territory on the Sokato frontier, South-West Africa. Then follows the Moroccan and Egyptian questions. No attempt is made to settle these, but only to eliminate from them such elements as might imperil the existing good understanding between the two countries.

EXAMINATION FOR RHODES SCHOLARS

Oxford Said to Have Arranged a Weeding-out Test

THE TREATY-MAKING POWER

A Large Party of British Mayors and Aldermen Will Visit America

London, March 29.—The Oxford authorities have arranged they be allowed to hold a qualifying or weeding-out examination in connection with the Rhodes scholarships. The papers Dr. Parkin had trouble with at the New York Customs are the result of that examination. I am told that the examination would be dropped as opposed to the suggestions made in Rhodes' will. From the State of Nebraska between fifty and sixty candidates have entered for examination.

CHINESE LABOR.

Mr. George Harwood, M.P., addressing a union meeting in Bolton to protest against the admission of Chinese into South Africa, said that the Portuguese Government had tried indentured Chinese labor in South Africa thirty years ago, and after ten years' trial the scandal was found to be so great that the British Government insisted that Portugal should cease to employ this labor.

THE TREATY-MAKING POWER.

The Morning Post referring to Arnold-Forster's remarks on Colonial contributions to Imperial defence, says that as long as the whole cost of protecting Canadian interests in commerce is paid by the British taxpayer, Canada cannot expect to negotiate treaties without reference to the interests of Britain.

LORD CECIL'S CRITICISM.

Lord Hugh Cecil, speaking at Shrewsbury, said that the Chamberlain fiscal proposals were not the result of scientific research and statesmanship, but rather the ready resource of an emotional politician, anxious to do something in a matter on which he was not clear, what he ought to do.

BRITISH MAYORS COMING.

Two hundred and fifty mayors, aldermen and councillors, have signified their intention of visiting the United States this summer. The program give June 16th as the date for a visit to Toronto.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offe a limited amount of stock of

Consumers' Coal Company

Limited.

Incorporated under the laws of South Dakota, with a capital stock of $[illegible] with shares at $1 each.

The officers of the Company are C. F. Buman, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $[illegible] capitalization, in shares of $1 each, $[illegible] worth is issued, the first small allotment of this was sold at [illegible]c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different rail-roads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have [illegible] acres underlaid with three distinct veins, or layers of coal which are [illegible] feet thick each. The first one at a depth of [illegible] feet, it is this vein which we are now mining, the second one is at a depth of [illegible] feet and the third at [illegible] feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth [illegible] feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than [illegible] tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than [illegible]c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease, as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from $[illegible] to $[illegible] for Mine Run and $[illegible] for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 20 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $[illegible] each. We predict that this stock will be worth not less than $[illegible] per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,

GENERAL OFFICES:
1[illegible] Washington St., Chicago, Ills.

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co

110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

HOW TO BE GOOD

Professor Says Fruit Will Cure Liquor and Tobacco Habits

St. Louis, March 29.—Apples are a sure cure for the drink and tobacco habits and for the low morals which lead to crime, says John T. Stenson, director of the pomology at the World's Fair. Pamphlets setting forth the efficacy of apples as a cure of bad habits will be distributed with 1,000,000 apples on Apple Day, Sept. 27.

In order to work a sure cure by means of the apple diet, Professor Stenson advises that when one has a craving for a smoke an apple be substituted; if a drink of liquor is desired take an apple in its place; if there is a tendency to do something desperate, sit down and quietly eat an apple and reflect over it.

Just what medicinal property is contained in the apple to eradicate bad habits Mr. Stenson does not pretend to say.

Senator Cockrell's moral life and his high standard of statesmanship is cited as an incident of the reigning influence of apples. It is a well-known fact that the senator makes his lunch of apples every day to the exclusion of all other food, and has kept up this diet for thirty years.

WORST STORM ON RECORD

Many Thousands of Cattle Believed to Have Perished

Broadview, N.W.T., March 29.—The blizzard which has swept the West during the past forty-eight hours is the worst on record. Trains are completely tied up, and will not move for days. It is believed that the loss of cattle on the ranges between here and Medicine Hat will be appalling. No living creature unprotected could live through such a storm. The wind was at the highest at midnight on Thursday, and at that hour it was not possible for a human being to stand upright. Stock en route in open cars is standing on side tracks and on the main line, and many cattle have perished. When the trains stopped for a few moments they were embedded in drifts as high as the tops of the cars, and were unable to start. The blow to the ranching industry in the Canadian West is the worst in twenty-five years.

FEAR AN ATTACK UPON NEUCHWANG

Not Sure Whether Brigands or Japs Will Make It

CONDITIONS IN RUSSIA

The Reported Danger of a Revolution is Ridiculed

London, March 28.—The Times has the following from Paris; A despatch from Neuchwang, dated the 26th inst., says; "There is much alarm here on account of the assembling about the city and suburbs of bands of Chinese brigands, intent on pillaging in case of the Russians retreating and abandoning the country for the time being. The Europeans are preparing an organized defence.

"It is reported at Neuchwang that a Japanese attack is imminent."

BAD ROADS NORTH OF YALU.

London, March 28.—The Times has the following today;

Neuchwang, March 25.—According to a traveller's account, the mountain roads north of the Yalu River are impassable owing to the snow, and should the Russian army in Corea be defeated they would have no way of retreat open, while to reinforce it would be very difficult.

NEWS FROM PORT ARTHUR.

A traveller who has just arrived from Port Arthur says the attack by the Japanese on the 22nd was inefficient so far as the town was concerned, but the fire was concentrated on the fleet and the harbor. The station buildings along the Russian railway are protected by bags of millet fascines and earthworks.

THE RUSSIAN FLEET.

London, March 28.—The Times has the following despatch today; On board The Times special steamer Halmun, near Port Arthur, March 28th, via wireless telegraphy to Weihaiwei.—Steering towards Chefoo this morning we sighted five Russian battleships and cruisers, just north of Hwangchingtau Island, thirty miles southwest of Port Arthur. They were steaming in the direction of Port Arthur, their exposed flank protected by the torpedo-destroyer flotilla in line. We made out the rearmost ship to be the Bayan.

This explodes the idea that the Russians are completely port-bound. Their ships are evidently patrolling the entrance to the Gulf of Pechili systematically. If the reports from Japanese sources are correct, that Admiral Makaroff is getting his damaged vessel fit for action, we may yet witness a decisive naval battle.

SAVED FIVE TOTS BY DARING AGT

Motorist Could Not Stop His Machine

DEED OF GREAT BRAVERY

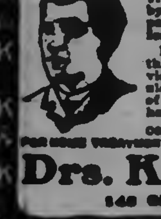
Ran Fleeing Motor into Telegraph Pole to Save Children

Mount Vernon, N.Y., March 29.—William Manney, a young man of this city, who recently bought a high speed motor cycle, had a thrilling experience while out on a spin, and through his daring and presence of mind saved five children from being killed or injured. All went well until Fifth street was reached. Here the rider let the machine out and was going down grade at the rate of about thirty miles an hour, when he discovered that the brake would not work, owing to the sprocket on the pedal shaft being loose and the machine was running away.

Unable to apply the check Manney soon found himself going at the rate of nearly fifty miles an hour, with no alternate but to sit still on the runaway machine and take his chances with death. On the way down the hill the cycle grazed a trolley car which bounded across its path from a side street. As Manney flashed past the trolley car he sent up a mental prayer of thanks that his life had been saved, but the next instant he had another cause for horror and dismay, for directly ahead of him, at Fifth avenue, he saw a group of five little children playing in the street.

He yelled at them to get out of the way, but they only stood still and laughed at him. The danger didn't appeal to them. They though the machine would turn aside when it reached them. Seeing that the children wouldn't move from the path of death, Manney, who is an experienced wheelman, resolved to take a desperate chance to save their lives and his own.

Heading the heavy machine for a telegraph pole, he jumped. The children stood, and while the rider went rolling over and over on the ground, sustaining a fractured hip and shoulder. The machine hit the pole and was utterly demolished, and the pieces were subsequently brought back to the city in a wagon. It was reported today that two of the children of Mayor Brush were among those who escaped being mowed down.



BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are back of by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. R. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

CONSULTATION FREE. BOOKS FREE. WRITE FOR QUESTION BLANK FOR HOME TREATMENT. CURES GUARANTEED OR NO PAY. 25 YEARS IN DETROIT.

Drs. Kennedy & Kergan,
148 SHELBY STREET. DETROIT, MICH.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

THEBANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-30-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.
The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— • • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

THE
Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

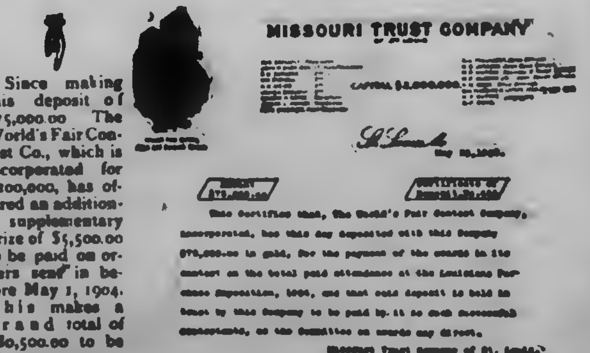
$75,000.00

This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1889 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,500.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00



MISSOURI TRUST COMPANY

This Certifies that, the World's Fair Contest Company, incorporated, has this day deposited with this Company $75,000.00 in gold, for the payment of the awards in the contest on the total paid attendance at the Louisiana Purchase Exposition, 1904, and that said deposit is held in trust by this Company to be paid by it to such successful contestants, as the Committee on awards may direct.

Missouri Trust Company of St. Louis.

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind That You Hold Your Own Certificates and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00 This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

FOREST MINING CO.
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $3.03 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, these, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $61.61 and $70.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.,
or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 8x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,050 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co. These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide' We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fue or many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United Stateswhenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemised in the statement.

Shares 40c. Each, par value One Dollar

For full particulars apply to the Peterborough Brokerage Co., City Agents, Peterborough; W Gallon, Agent, Apsley; Roland Kidd, Toronto; G. Hilliard, Lakefield; D. L. McKINNEY, SECRETARY, SIOUX FALLS, S. D.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because [illegible] waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 20 feet wide, 8 feet of which runs from $10 to $140 per ton, and the Company owns 9,600 feet on this vein.

Ore running from $16 to $50 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged [illegible] per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 50 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to [illegible] two 50 ton mills, one on each property. To obtain funds for this purpose a limited [illegible] unt of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

ANIMALS UNCAUGHT.

Some Kinds of Beasts That Have Never Been Caged.

Zoos Intensely Eager to Secure Specimens of Certain Rarely-Discovered Creatures of Foreign Climes.

"Oh, there are a good many animals that are still to be caught and exhibited in the menageries," said the old animal man, according to the Cincinnati Enquirer, reaching into the cage and scratching the head of a jaguar. "I can run off quite a list without stopping to think.

"All the zoos are crazy now for an okapi. That's the strange prehistoric beast that Sir Harry Johnston found alive in Eastern Africa. It's a cross between a giraffe and a horse, apparently, and a mighty big animal. There'll be big money for the circus that gets the first example, and there are some plucky and smart men in Uganda at this very moment looking for the brute.

"Nobody has been lucky enough or smart enough to catch a Kadiak bear alive and carry him to civilization. There's something like a beast for you—big as a calf, so that he'd make a roaring Rocky mountain grizzly look like a little brown bear alongside of him.

"Down in South America, somewhere behind the northeastern side of the Andes, a little north of the equator, is a beast that is the biggest rodent in the world. Travelers have seen pieces of its hide and its bones, and a few have glimpsed it as it sped through the dark primeval forests. It is a true rodent like the rat, but it is as big as a Newfoundland dog. That would be a good catch for a zoological garden.

"Another fine prize is down there in South America. It is a new species of jaguar, quite different from any that has ever been exhibited in the shows in any part of the world. It's a big black fellow, and tremendously fierce. Nobody has ever taken one alive.

"Then in the forests of the Amazon are two birds that would make their captor a famous man among zoologists. They are the bell bird, which has a voice exactly like a clear, ringing bell, and the 'Lost Soul,' which has a cry that makes the shivers creep along a man's backbone when he hears it in those dark, mysterious, silent, forbidding woods.

"In Burmah somewhere is a rhinoceros that has a black hide and big tufted ears. The hide has been seen by white men lots of times, but they haven't ever seen a living animal.

"Up in the Himalayas a man has been looking for years for—what do you suppose? A unicorn. He may be crazy—he may be right. He says that he has heard so many tales from the native hunters up there of the existence of a one-horned antelope-horse that he is bound to try and get one. I don't think there is any such thing myself, but then I didn't take much stock in the discovery of a primitive wild horse in Central Asia, either, and now the zoological gardens of Hamburg and New York both have living specimens of these horses—funny, big-headed little brutes that are representatives of some type of horse that must be hundreds of thousands of years old.

"Down in New Zealand, comparatively small as the land is, there are many animal and bird mysteries still. They say that there is a brand new—that is, new to the world—type of animal on the order of the duck bill down there yet. Darwin always thought that some day a veritable lizard-bird (not a flying lizard, but a true missing link between the birds and the reptiles) might be found there.

"One explorer followed mysterious footprints in the snow of the high mountains of New Zealand, but never came up with the beast that had made it. But they were such strange footprints that other scientists agreed with him that the thing that made them was quite unknown to the world, and must be a wonderful thing.

"So, you see, there is plenty of work still for us wild animal catchers. We haven't seen everything that there is to be seen, by a long shot."

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100.00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty-five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31.52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 500,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest, but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

For prospectus and further particulars address,

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before, smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a [illegible]

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 100 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from [illegible], and [illegible] sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Not Only Relief, but Lasting Cure

Is What You Get From Catarrhozone Which Eradicates Every Trace of Catarrh From the System.

Relief is a good thing, but we soon get tired of it and look for a remedy that will drive the seeds of Catarrh right out of the system. It is only a waste of time to trifle with internal dosing. You must treat Catarrh locally because it is a local disease.

The most sensible treatment is Catarrhozone which really does reach the diseased membranes in a most thorough way. Every case of catarrh can be cured if Catarrhozone is used. It unquestionably penetrates every air cell and air passage of the breathing organs. It completely destroys the catarrh germs and heals all the inflamed surfaces.

Every requirement of an ideal catarrh cure is embraced in Catarrhozone. Other treatments may have failed to even bring relief, but one trial is sufficient to prove merit in Catarrhozone not found in the ordinary snuff or wash that unscrupulous people sometimes recommend for catarrh.

If you are subject to colds, catarrh or throat trouble you will find quick relief and lasting cure in fragrant, healing Catarrhozone. Mrs E. P. Fairbanks, of Durham, was cured of chronic catarrh by this remedy and endorses it in the following letter, which speaks for itself:

"I suffered continually from catarrh which affected my throat. My nostrils were usually inflammed and I was greatly bothered with droppings in the throat which made me sick at my stomach. I had a bad taste in my mouth, and felt a ringing in my ears. I read of Catarrhozone and commenced to use it. In a few days it helped me more than I ever expected. I used it four times daily and in two weeks most of the disagreeable symptoms disappeared. I continued the Catarrhozone treatment for six weeks and was perfectly cured. The catarrh has never returned."

Every complete outfit of Catarrhozone sufficient for two months' use is guaranteed to permanently cure; trial size 25c. Sold by druggists or by mail from N. C. Polson & Co Hartford, Conn., U.S.A., or Kingston, Ont.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Celebrated Colored Singers

Last evening special services were held at the Salvation Army barracks when the celebrated colored singers, the Jones Sisters, presented an interesting programme. Beautiful vocal solos were excellently rendered and the instrumental selections were much appreciated by the large audience present. The entertainment will be repeated this evening.

Funeral of Late Wm. James

The remains of the late William James were interred in the Little Lake cemetery yesterday afternoon. The burial services were conducted by Rev. W. J. Jolliffe, of Charlotte St. Methodist church, and the pall-bearers were Messrs. L. Spry, R. Cooney, J. Bradley, S. Hall, R. Martin, and W. Martin.

Many sorrowing friends and relatives sent beautiful floral tributes, and a beautiful wreath was sent by the Canadian Order of Foresters.

Caught Live Wire

A young man named A. E. Green, an employee of the Canadian General Electric Company, met with a rather serious accident yesterday. While engaged in one of the shops he accidentally touched a live wire, receiving a severe shock. He fell heavily backwards and in falling struck his head on one of the machines, cutting a deep gash.

Dr. Young was summoned at once and the injured man's wounds were soon dressed. A few hours after he was able to walk to his home.

To My Old Customers

I wish to inform my old customers and the public in general that I will return to my old business of taking care of lawns, boulevards and gardens. Orders may be addressed to me at Peterborough Post Office, or at my residence, 499 Bethune street.

GEORGE LAWSON.

The attendance at the
Peterboro' Business College
is larger this year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGLE,
Principal

George Street Church

Last evening the second of the series of special services at George st. Methodist church was conducted by the pastor, Rev. J. P. Wilson. The speaker chose his text from the 8th chapter of Romans,—"He that spareth not His own Son, but delivered Him up for us all, how shall He not freely give us all things." Mr. Wilson delivered one of his ablest addresses, and his very large audience listened intently to the beautiful story he presented. Another service will be held this evening, commencing at 8 o'clock to which all are invited.

He Did Not Advertise

A young man residing in a neighboring town recently bought a shirt which was purchased in the east. Rolled up inside of it he found a note from a young lady who had worked on it, in which she said she would be pleased to correspond with the buyer of the shirt, provided he was matrimonially inclined. Of course the nice young man answered it on perfumed paper and used his rosiest language. In a short time he received an answer stating that the young lady had been married three years and had two children. Upon investigation to find out why he was too late, it was explained by the fact that the shirt had lain on the shelves of the local dealer for several years. He did not advertise. The Times is the best advertising medium in Eastern Ontario.

Those Who Know, Say No.

The Lindsay Post says;—

"There is a rumor in circulation that in the near future, the G.T.R. will put on a fast train between Peterborough and Toronto, which will make only two stops, at Lindsay and Blackwater. Even with the tedious stops at the many way stations cut off, doubt is expressed that the distance can be done in decent time, owing to the curves and twists in the line. A fast train to Toronto via Whitby, which would take the place of one of the two trains now running to Whitby, would stand a better chance of capturing the passenger traffic when the L. B. and P Railway is opened to the C.P.R. main line"

A thorough enquiry has been made in railway circles, as to the authenticity of the above but "those who know," say that there are no grounds for such a report.

Signs of the Times

Among the signs that the quiet season of Lent is fast drawing to a close, the most prominent is the activity around the millinery depots. During the past few days large numbers of ladies have been making the rounds of the different stores to compare notes on the creations of lace, straw, feathers, etc., which go to make the latest thing in hats and other headwear. The members of the fair sex firmly believe that luck goes with any new article of attire they wear on Easter Sunday, and the energetic merchant who is well up in the business takes great care to be supplied with a full line of millinery and mantles, tasty in design and beautiful in coloring, which will prove a temptation to the one who wishes to be well dressed when she dons her spring garments.

STREET RAILWAY ASSURED

Agreement Reached Yesterday Between Parties Concerned

The Times is pleased to be able to announce that the Peterborough Radial Railway Company and Mr. Stuart of the American Cereal Company, have come to an agreement regarding the Street Railway. The work of construction we understand, will begin in a few days and will be rushed to completion as quickly as possible. The old roadbed will be overhauled, and the rails and ties dug up and relaid, and the four and a half miles put into operation for early summer business. The line will be extended to Jackson Park to No. 5 Ward and to the river, below the locks.

This will be pleasing news to the citizens of the town, who have long felt the want of a street railway.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. T. O'Connell visited Lindsay on business yesterday.

—Mr. H. Taylor, of Orillia, is visiting friends in this city.

—Several students from the Lakefield Grove School are in the city for the holidays.

—Miss A. J. Brown has gone to Toronto, there to take a short course in the School of Art.

—Miss Mollie Blois, Peterborough, spent Sunday in town, the guest of her friend, Miss Pearle Wood, Smith street.—Port Hope Guide.

—Mr. Jos. Young, engineer on the Government steamer Empire, has gone to Lakefield, to prepare for the opening of navigation.

—Captain Scollard, of the steamer Majestic, has gone to Young's Point to look after the refitting of his vessel for the ensuing season.

—Mr. Wilmot Huycke, of Tweed, and Mr. Colledge, of Trinity College School, Port Hope, are the guests of Mr. J. Lundy.

—Messrs. D. Hammond and Gordon and Allan Campbell, of Trinity College School, Port Hope, arrived in town yesterday to spend their Easter holidays at home.

—Mr. J. A. Culverwell, of Peterborough, managing director of the Central Ontario Power Co., owners of Buckhorn and Burleigh water powers, was in town on Monday for a few hours.—Lindsay Post.

—Mrs. Hartley, of Water street, was waited upon by a number of friends on Monday evening and presented with a beautiful gold crescent set with pearls. She leaves shortly to join her husband in the United States.

—Mr. S. T. Spellman, formerly clerk at the National Hotel, has purchased the Grand Central hotel in Brockville, and will take possession on April 1st. He leaves today for that place.

—Mr. Alex Haddow and Mr. Herbert Fair were appointed delegates from the Young People of Park st. church to the annual Convention of the Baptist Young People of Ontario and Quebec, to be held on Good Friday, in the James street church, Hamilton.

—Miss E. W. Nicholls, who is visiting relatives in town, has been engaged in missionary work in India for about seven years, and while there had charge of the work at Bombay. On account of her health failing she was obliged to take a few months' rest, hence her visit to Canada.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—The backbone of winter has certainly been shattered.

—The past few days haven't been any too pleasant, but cheer up, we'll have one good fried day this week.

—Bring the children around to see the beautiful display of Easter gifts at the Times Bookstore.

—Messrs. Wm. Greer and T. Cavanagh shipped a carload of fine horses to Winnipeg yesterday.

—Torpedo hats are the latest creation in ladies' headgear this season. No doubt several men will explode when they see the bill.

—Beautiful assortment of Easter gifts at the Times Bookstore. Call and inspect them. You will be made welcome.

—To-morrow afternoon a mass meeting of the wives and mothers of George street church, will be held in the schoolroom of the church.

—A pair of men's gloves and a lady's chatelaine bag, were recently left at the Public Library and have been handed over to the police.

—A resolution was moved at the last meeting of the License Commissioners of East Durham, to cut down the number of hotel licenses in Port Hope to five.

—A meeting of the Girls' Guild of St. John's church was held in the Guild room last evening, which was well attended.

—If the flood from the creek had succeeded in washing off the nearby streets, it would have accomplished something creditable.

—The Never Learn Club purpose giving a dance in Foresters' Hall on Easter Monday evening. A Toronto orchestra has been engaged and a pleasant time is expected.

—The local nurses will likely send representatives to the organization meeting of the proposed Ontario Nurses' Association, to be held in Toronto on April 2nd.

—Mrs. James Latimer, of South Monaghan, passed away last week after repeated paralytic attacks. She leaves a family of three sons and two daughters to mourn her loss.

—The two fire wagons have been newly painted, and were brought to the fire hall yesterday. Owing to the condition of the streets, they will be used in future.

—A York, Pa., man is dying from blood-poisoning received while helping his wife on wash day. Any married man can see the moral of this sad tale.

—Mr. Webber Turner has an excellent collection of rare coins on display at J. J. Turner & Sons' show rooms. Among the collection are coins from almost every country in the world and some are very old and exceedingly rare.

—A meeting of the Firemen was held last evening for the purpose of settling matters in connection with the recent concert. This proved a financial success, and the net proceeds have been placed to the credit of the Firemen's Fund.

—On April 4th the Board of License Commissioners will meet to consider the transfer of Mr. Overend's license. This gentleman is the present proprietor of the C.P.R. Hotel but intends going out of business at an early date.

—At a meeting of the West Peterborough License Commissioners, on Monday afternoon, Mr. R. Walton was again elected chairman. April 25th was set as the date for the consideration of applications for licenses.

—Peterborough County farmers generally unite in the verdict that it has been a good winter for stock. The appetite of farm animals has been generally good, but little of the fodder has been wasted, and they will come out this spring in good condition.

—Mr. I. Richardson, of Millbrook, the well known cattle buyer, arrived in the city last night, and is a guest at the Snowden House.

—James Moloney, of Cordova, was fined $100 and costs on the first charge of selling liquor illegally, and sentenced to four months' imprisonment with hard labor on the second charge at the County Police Court on Monday. Moloney evidently expected to "get it hard," as he failed to put in an appearance.

—Easter this year falls on April 3rd, and the last time that this occurred was in 1836, nor will it happen again until 1983 A.D. During the last two years the feast days of eleven saints fell on Sundays; this will happen only in one case this year, and in one case in 1906.

THE FIRST LESSON
That the young girl has of womanhood is not seldom a painful one. She learns to know what headache means, and backache, and sometimes is sadly borne down by this new experience of life.
All the pain and misery which young girls commonly experience at such a time, may in almost every instance be

entirely prevented or cured by the use of Dr. Pierce's Favorite Prescription. It establishes regularity. It tones up the general health, and cures headache, backache, nervousness and other consequences of womanly weakness or disease.
"I received your letter some time ago, with advice about your wonderful medicine," writes Miss Stella Johnson, of 28 Brady Street, Dayton, Ohio. "I was troubled with severe pains every month when I wrote to you for advice. After receiving your letter and following its directions, I am now happy to say that after five years of untold suffering I have not had any pains since first using your 'Favorite Prescription.' I was induced through a friend to write to you and follow your kind advice. I thank God and Dr. R. V. Pierce for the health I now enjoy. I shall urge other women who suffer as I did to use your medicine."
"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.
Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.
FREE. Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

31 WILLIAM ST., TORONTO CAN

Are You Looking FOR A Good Investment?
If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.
If this is True, ARE YOU INTERESTED?
We Stand Ready to Prove the Following Statements:
We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men
We have enough ore already mined in these two properties to keep one fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.
We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.
We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.
We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.
We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at
30c. per share, par value $1.00
Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

MORNING TIMES WAR DESPATCHES

By Special Arrangement

JAPANESE GALLANTLY HELD GROUND DESPITE HEAVY FIRE OF ENEMY.

St. Petersburg, March 29—The first land fight of any consequence since the war in the Far East began took place on Monday morning in Northern Corea. The scene of the engagement was near the Town of Chong-Ju or about fifty miles north of Ping-Yang. The opposing forces consisted of four squadrons of the Japanese army and six companies of Russians. Official despatches from General Kuropatkin admit the defeat and retirement of the Russian forces, but claim that the Japanese suffered heavily—so heavily in fact that they were unable to occupy the commanding position, which the Russians were forced to evacuate. For more than half an hour a small force of Japanese, consisting of a squadron of cavalry and a company of infantry, which occupied the town, gallantly held its own in spite of the heavy firing from the hills, supplemented by a cross fire.

Chonju, a Corean town of considerable importance, situated some thirty-eight miles south of the Yalu River, passes into history as the scene of the first land engagement in the Russo-Japanese war. This country is mountainous and affords fine opportunity for defensive warfare. The Russians—a column of Cossacks some fourteen hundred strong, acting as a screen for retiring infantry—drove some Japanese scouts into the town and occupied a strong position overlooking it, from which they poured a hot fire upon the defenders. Japanese reinforcements came up and the Russians retired from their position, after an action in which, according to the Russian official report, the foe showed great gallantry and sustained losses so heavy that they were unable to occupy the position, from which the Russians retired in good order. Their losses were three men killed and three officers and twelve men wounded. Accepting the Russian account of Monday's skirmish, it is still evident that Japan in the opening of the land campaign, as at sea, has gained a decided success, and that the Russians are in retreat to the Yalu, where they will, no doubt, make their next stand. The Japanese army is at least 58,000 strong, probably more, while there are certainly not over 40,000 Russians on the line of the Yalu. To turn them out if they fight behind earthworks and strictly on the defensive will require 70,000 or 80,000 men, and the activity of the Japanese transports in pouring men ashore, as they are doing at Chinampo, is evidence that the Japanese staff does not wish to attack with an inadequate force, and invite such disasters as befell Sir Redvers Buller on the line of the Tugela.

IS PURPOSELY WAITING RUSSIAN MOBILIZATION

Japan Will Then Cut Off the Supplies of the Big Manchurian Army

MIKADO'S LAND FORCES NOW READY TO STRIKE

Military Experts Believe That Japan is About to Strike Some Hard Blows

London, March 31. Students of the military situation in the Far East are becoming convinced that the delay in the Japanese operations which was due to climatic difficulties, is now the result of a wish to permit the Russians to complete the mobilization of the main Manchurian army south of Mukden. It is apparent that the Japanese have made no effort whatever to prevent this mobilization, although they might at any time have dispatched raiding parties to destroy the railway. It is expected that when the majority of Kuropatkin's troops are in the region between Liaoyang and the Yalu River, the Japanese will attempt to cut the Russian communications and try conclusions within easy reach of the sea which is the true base of the Mikado's army. Meanwhile an entire army corps is ready for action in the northern end of Japan and can be moved at an hour's notice in the direction of any point where the Mikado's generals think the Russians are least able to oppose it.

According to all the experts, heavy blows must begin to fall within a few days. It is accepted as certain that wherever or in whatever manner Japan may attack it will reserve ample forces to execute those flanking movements which Japanese strategists have from the first pinned great faith.

While the situation at sea is regarded as less clearly under the complete mastery of Admiral Togo, it is not believed that Admiral Makaroff's vessels are in a position to do much damage. It is expected that they will remain close enough to Port Arthur so as to be in a position to retreat under cover of the shore batteries in case of emergency.

HOPES JAPAN WILL WIN

PROMINENT RUSSIAN OFFICIAL SO EXPRESSED HIMSELF

Engineer Sent Out by Russian Government Says it is Bad and Brought on War

Toronto, March 31.—A Russian who does not wish for Russian success in the war with Japan is Mr. Anatol D. Semenoff, civil engineer of Zemstov, Perm, Russia. He was sent America by the Russian Government, he says, to make a thorough investigation into the systems of sewage disposal. He called upon City Engineer Rust today, and will inspect the system here.

Mr. Semenoff expressed himself in the most pronounced terms as representing the voice of the people when he said that they were opposed to the war, and that it was the Government that was responsible for the trouble.

"What is your hope for the outcome of the war?" Mr. Semenoff was asked.

"It will be to the advantage of our people in Russia is defeated in this war. We have a bad Government, and the people want more liberty," replied Mr. Semenoff. "If Russia wins the people cannot hope for any more liberty than we have now, but if we lose we think it will be to our advantage."

"The Government say and the people pay," is the terse way in which Mr. Semenoff described the position of the people and the Government.

Mr. Semenoff was accompanied by his wife, who spoke English with greater fluency than her husband, and endorsed his views from the standpoint of the good of the Russian people. They have already visited Europe and the United States.

FROM THE SEAT OF WAR

Former Peterborough County Resident Writes the Times from Weihaiwei

In a letter received by the Times from a former Peterborough county resident, but now a resident of Weihaiwei, China, and holding a position there, he says; "Our position here, on the shores of the Yellow Sea, gives us an excellent opportunity of obtaining fairly authentic reports of the great struggle now going on to the north of us. The greatest excitement prevails among the Chinese people, especialy those around the coast line, and the wonderful readiness shown by the young men especially, to prepare for fighting at a moment's notive, is to be admired. Our British citizens, of whom there is a great number here, have manifested much displeasure over the rash acts of the Russians, and are much in sympathy with the brave little Japs, whose ultimate victory, is not for a moment doubted here. Up to date the Russians are strictly not in it at all. They have lost over two hundred men, and fourteen warships, and Port Arthur bears the marks of many Japanese shells. We feel confident here that the Russians are not intending to hold Port Arthur much longer, and that they will soon evacuate it and move northwards to Harbin, where the first land engagement will probably be fought, although there is much talk here of an expected engagement at Ping Yang, as a number of Russians are [illegible] near that point. Several Japanese refugees have fled southwards from Manchuria. Some of these poor unfortunates have been most brutally treated by these Russian demons, and although beaten robbed and bruised, they still retain their feelings of loyalty, and even in their wretched condition, they cheer loudly for their country and their leader. One report has reached me of a most pathetic incident in southern Manchuria. Several brutal Russians soldiers had forced an entrance to a Japanese home and after ransacking the house, beat and killed all the occupants but one young girl, whom they carried off for further torture. The poor girl finally escaped and, bruised and beaten, she managed to reach shelter. This is only one instance of the many cruelties of the Russian soldiers, and that they may be beaten to a man, is the sincere wish of every British subject in this place."

PROGRESS OF THE Y.W.C.A

Peterborough and Winnipeg Getting New Buildings

A meeting of the executive board of the Dominion Council of the Young Women's Christian Association of Canada was held Tuesday morning at the residence of the president, Mrs. T. M. Harris, 123 St. George street. The reports given by the national secretaries, Miss A. C. Macdonald and Miss Susie Little, showed a distinct advance made during the past few months among the local associations in organization and development of the work.

Peterborough is at present raising $25,000 for a new building, one-fourth of which is being given the Hon. G. A. Cox, and Mrs. Cox is furnishing the gymnasium. The association in Winnipeg is about to raise $75,000 for a new building, in which to carry on their rapidly increasing work.

In one city a manufacturer recently gave sixty memberships to his employes, in order that they might take advantage of the various classes of the association.

From the annual reports of the college associations, it is found that out of 1200 female students in the university colleges, over 84 per cent. are members of the Y.W.C.A. During the past year the number of Bible classes has doubled, and from fourteen colleges $714.40 was given to foreign missions.

The following are members of the executive board; Mrs. William Eakins, Mrs. J. W. Flavelle, Mrs. H. Howitt, Mrs. Robert Kilgour, Mrs. Thomas Kinnear, Mrs. Massey-Treble, Mrs. McPhedran, Mrs. George Porter, Mrs. D. E. Thompson, Mrs. Angus, Miss Ross, Miss Good and Miss Hoyles.—Toronto World.

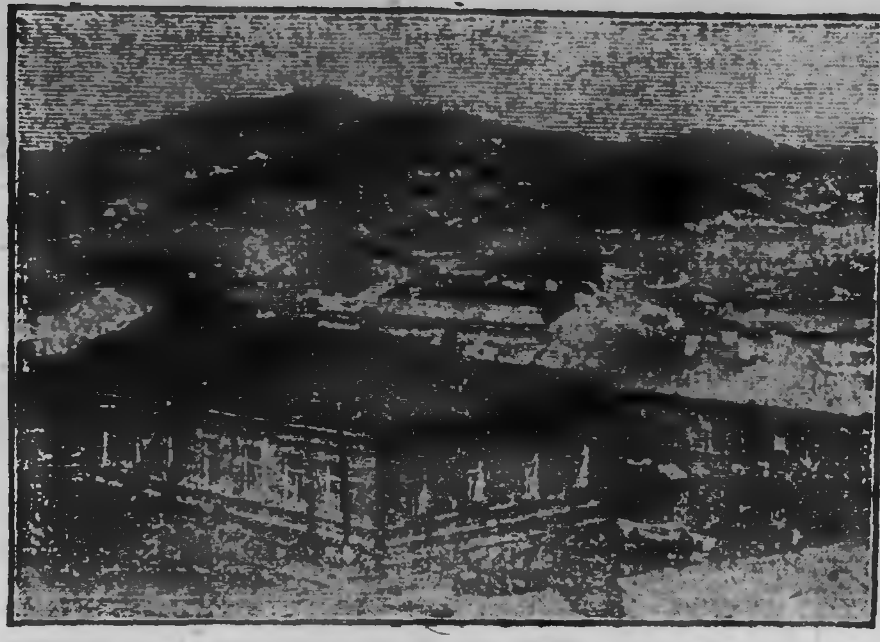
INWARD THOUGHTS

R. F. McWILLIAMS—"When a lawyer expresses an opinion it's up to the client to pay the express charges."

GEO. GIROUX—"Glad I didn't send my five when I answered Armstrong's 'ad.'"

WM ARMSTRONG—"And I read of the poor police force they had in Peterborough."

—Acting according to a suggestion in a recent issue of The Times, the street scraper was brought out yesterday, and the removal of a large amount of refuse from George street greatly added to its appearance.



Vladivostok is the terminus of the Trans-Siberian railroad and consequently a point of the strategic importance to the Russians.

HUBBARD DIED IN BRAVE FIGHT

Companion Writes of End of Labrador Explorer

PATHETIC DAIRY RECORDS

Graphic Description of the Suffering he Endured During his Last Days

The story of the death by starvation of Leonidas Hubbard, jr., the explorer, in Central Labrador, on or about Oct. 18 last, is told in a letter received recently from A. Dillon Wallace, a lawyer of New York, who, with a Cree Indian guide, George Elsom, accompanied Hubbard on the journey.

The letter is in part as follows—

"North-West River, Labrador, Dec. 3, 1903.—The story of our awful experience is too long to go into a letter. I will merely say that we plunged madly into the interior of an unknown country, into regions never before trod by white man, with almost no provisions. For our trip we should have had at least 550 pounds of flour—we had 120 pounds; we should have taken 120 pounds of bacon or pork—we had 25 pounds, and so on all down the line.

Lived on Caribou Meat

"On July 15 we left North-West River, and on August 1 were practically out of provisions. On Aug 3 we killed four geese, on Aug 12 a big stag caribou; from that forward we lived on the caribou meat, which we had dried but which was soon gone, and at long intervals a goose or duck or grouse we succeeded in killing with our rifles or pistols, and fish we caught with our rods.

"Early in September the weather grew too cold for the fish to bite. Until then we did very well, but after that we were often without anything to eat, and our meals were simply tea. Our salt and sugar were gone early, and we ate everything boiled and drank the water our food was boiled in. Birds, like grouse, ducks, etc., were eaten wholly—heads, entrails, feet and everything but the feathers—and every part of the fish."

These are but a few of the details of the fight for life made by these three men, which finally resulted in Hubbard's death and the narrow escape of the other two members of the expedition.

CONVENT NEARLY COMPLETED

Improvements at Mount St. Joseph Being Rapidly Made

The new chapel and other improvements at Mount St. Joseph are nearing completion, and the contractors, Messrs. Rutherford, are rushing the work as fast as possible. The beautiful chapel has a handsomely decorated ceiling and a handsome large chandelier, containing dozens of electric lights, is suspended from the ceiling about the centre of the edifice. The large room will, when completed and furnished, rank among the finest in Canada.

The chapel will be blessed on Sunday, and the convent will be opened at an early date. The able contractors are to be complimented on the beautiful work which they have so speedily executed.

—The special service at George st. Methodist church last evening was conducted by Rev. Henry McQuade, of Warsaw, and a very large audience was present.

THE DONATIONS TO OLD M'GILL

Vast Sum Which Has Been Given Since Inception

IT IS NOW OVER $6,500,000

This Includes Donations of Land, Endowments Special Sums for Chairs Buildings, Etc.

Montreal, March 30—Sir William McDonald's recent very handsome gift to the Students' Union is a further reminder of the extent to which McGill is indebted to Montreal citizens.

The list of benefactions to McGill University is a very long one. In addition to the large gifts of such men as the Hon. James McGill, Sir. William McDonald, Peter Redpath, Esq., Lord Strathcona, the Molsons, etc., there have been a large number of substantial donations which have not excited quite as much comment in the public press, but which have, nevertheless, been of much service to the University and the cause for which it stands. The total donations in land, buildings, apparatus, together with the Hon. James McGill's original endowment and donations in land reaches the value of $2,300,172.72.

Miscellaneous endowments reach the sum of $2,074,505.78, while special chairs have privately been endowed to the value of $962,393.32.

A sum amounting to $60,790.80 has been contributed to a fund for establishing scholarships, granting medals, etc. The total amount in donations of lands, endowments, etc., reaches in sum total the very handsome figure of $5,597,861.62

PORTABLE FENCE COMPANY

The First Annual Report Shows Marked Progress

The first annual meeting of the Canadian Portable Fence Company, Limited, was held on the 16th inst., and the reports showed a most prosperous business year. Although the company has been but six months in active operation, the certainty of its future success has been most clearly demonstrated. Large sums have been refused, the price being unfair influence and over-mastering control.

Among the stockholders are men of financial weight and standing, pledged to the support and success of the company, because they approve of the principles of its management. Stock is now being rapidly subscribed and the amount required is being quickly realized. The steel triangles or trusses, for this is practically a postless fence, will be required in limitless quantities throughout Canada during the coming year.

The stock already paid in has been largely invested in material, in the fitting up of the factory and office, and the exhibition of the fence in about forty places throughout Ontario, and the establishment of over thirty agencies. There is a large balance in favor of assets, and about $5,000 worth of fence is almost ready for shipment.

To Clear at $1.50

Webster's Dictionary, the new census edition, 1,500 illustrations and an appendix of 10,000 words. Indexed and leather bound. Only a limited number left. Will be sold for one dollar and fifty cents each. Times Bookstore.

CYCLONE REVEALS CRIME OF BIGAMY

Former Hamilton Woman Discovers Missing Husband

NAME APPEARED IN PAPER

House Was Domolished in Indiana and Publicity Ended in Five-year Sentence

Hammond, Ind., March 29—The Indiana harbor cyclone was a fateful Nemesis for James McInerny, of that city. It destroyed his house, and through the publication of his name in the Chicago papers, enabled Olivine Lebaie Anglais, of Chicago, his first wife, who had been searching for him and their daughter for 9 years, to ascertain his whereabouts.

Two years ago McInerny married 19-year-old Christine Johnson. With her friend, Francis McCormick, of Chicago, Olivine Anglais went to the Harbor and had McInerny arrested for bigamy. This afternoon a jury in the Hammond Superior Court sentenced the prisoner to five years in the State Penitentiary.

It was in 1889, at Hamilton, Ont., that McInerny, a contractor married Olivine Lebaie, who told him that she had been married before to Fred Anglais, who had deserted her and gone to the North-West Territory. Later she was informed that Anglais was dead. Two years after, a daughter was born to the McInerny couple. A traveling man told him that he had met Anglais in Manitoba at Portage La Prairie alive and well. McInerny then fled with his daughter. His wife moved to Chicago, and could find no trace of him until his name was published last Thursday.

Carrier Boys Wanted

Wanted at once, a good, smart, boy to carry a route in the south end. $1.50 per week paid. Apply at Times Office.

WEATHER NOTES

Thursday—Mild and showery.

According to the Japanese plan of campaign as published Viceroy Alexieff will have to keep on falling back until he gets to St. Petersburg. As to what will happen then the Japs apparently have not yet decided.

ANOTHER BIG BATTLE REPORTED NEAR PING YANG LAST SUNDAY.

Japs Attacked Temporary Fort Defeating the Enemy--Lost Over 100 Men? Japs Loss Small

Tokio, March 30—A mixed force of Japanese cavalry and infantry attacked and dispersed a force of Russians at Tyumjyn, near Ping-Yang, last Sunday morning.

The Russians had erected a temporary fortress, which was defended by a force of Cossacks, estimated at 600. The Japanese attacked in considerable force. The Russians offered a strong resistance at first, but finally fell back, abandoning the positions.

The Japanese sustained a loss of one officer and one sergeant killed and two officers and ten privates wounded. The Russians are reported to have left three dead behind, but to have succeeded in carrying off the wounded.

The Japanese force entered the town, cheering for the Emperor.

IF RUSSIA WINS

Chas. E. Smith Prophecies European Land Grab in Asia

Philadelphia, March 29.—"In the event that Russia is victorious in the war with the Japanese the probable result will be an agreement among the European nations for the partition of China. In this division each power would control its own territory, and, as we do not want and would not have any territory, we would not have an equal chance. Such a result certainly would be unwelcome."

So declared Charles Emory Smith, former ambassador to Russia, in an address before the monthly meeting of the American Academy of Political and Social Science to-night. The subject of discussion was "The Struggle in the Far East; Its Causes and the Issues Involved."

Mr. Smith said that no one will challenge the right of Japan to provide for her own protection, and that by every right of national life and safety she is entitled to take care that Korea shall not be in the hands of a hostile or unfriendly or menacing power.

Other speakers were William Dudley Foulke, United States civil service commissioner; Professor Lindley Miller Keasbey, of Bryn Mawr College, and Brigadier General James H. Wilson, U.S.A. President Edmund J. James, of Northwestern University, presided.

ATHLETIC WORLD

BY OUR SPORTING EDITOR

FOOTBALL.

A meeting of the Old Country Wanderers' Football Club was held at the Crown hotel last evening, when a good representation of Englishmen was present. It was arranged that the first practice should be held on Good Friday afternoon. All members are requested to meet at the Crown Hotel to-morrow afternoon at 2 o'clock sharp.

BASKETBALL.

The Junior Arrows accept the challenge of the Beavers to a game of basketball. F. McCoy, secretary.

LACROSSE.

Havelock, March 28 — Peterborough and Havelock lacrosse teams have organized and are patiently waiting to hear from Belleville and Campbellford, so we can at once make arrangements for the forming of a Trent Valley League. Now is the time to do this business as the season will soon be upon us.

A meeting of the Shamrock Lacrosse Club is called for Monday evening in the Y.M.C.A. All members are requested to be present, as there is important business on hand.

Last week's Hastings Star has the following to say in reference to the formation of a Trent Valley League; "To enter the O.L.A. nowadays means that you must have considerable 'pull' and plenty of the 'long green' to make any impression. We have material in Hastings for a good junior team, but we haven't the money, like some of our bigger neighbors, to secure outside help so as to be capable of holding the pace set by the teams that generally make up the junior series of the O.L.A. We suggest that the senior teams of Peterborough and Belleville be barred, for they are in the 'import' business at all times. While the Port Hope seniors have the same failing, they are not looking for something easy to go up against. By all means form a Trent Valley League, and be sure and have a residence rule."

The Sporting Editor of the Star must be suffering from the sudden change in the weather. We would recommend a little spring medicine before he again expresses himself on a subject about which he apparently knows so little.

BASEBALL.

A meeting will be held in the National hotel tonight at eight o'clock to arrange for the formation of a baseball club in connection with the C.G.E.

GOLF.

The following were the officers elected by the Ladies' Golf Club for 1904—

Hon. President—Mrs. Hamilton.

President—Mrs. A. L. Davis

Secretary-Treasurer —Mrs. R. R. Hall.

House Committee — Mrs. Davidson, Mrs. Burnett, Miss G. Hall, Miss Laura Davidson, Mrs. A. H. Stratton.

Captain—Miss J. Dennistoun.

Match Committee—Miss Clementi, Mrs. R. M. Dennistoun and Miss Halliday.

WEDDING BELLS

Nuptials of Mr. Robt. Routly and Miss Pearl Law, of Peterborough

A happy wedding was solemnized last night, when Miss Pearl Law, daughter of Mr. David Law, was united in marriage to Mr. Robert Routly, of town. The event was one of a very pleasing nature. The Rev. J. P. Wilson officiated, and in all due credit to him it must be said that he performed the ceremony in a masterly fashion. The ceremony was performed at the residence of the groom's brother, Mr. Walton Routly, and the wedding breakfast was served at Mrs. J. T. Braund's, sister of the bride, corner Smith and George streets. Fifty-seven friends and relatives sat down to the wedding breakfast, which, as usual, was highly pleasing to all concerned.

Among the guests were the father and mother of the bride of Ward Five, and father, mother, and sister of the groom of Brooklin, Ont. Miss Lizzie Smith of town, assisted the bride, and Mr. Wm. Routly, brother of the groom, acted the part of best man, while Master Stanley Braund performed the duties of page. Among other guests was Staff. Capt. MacNamara and the celebrated Jones Sisters, who played some pleasing selections, and sang some beautiful songs. The presents, which consisted of many useful and ornamental articles of silver and chinaware, were beautiful to behold, and speaks well of the high esteem in which the guests hold the happy couple. Among the gifts was a beautiful dining-room table and jardinier, accompanied by a fitting address presented by the firm of J. J. Turner & Sons and employes, where the bride has been an employe for some years past.

The happy meeting broke up at about 12 p.m., and all repaired to their homes, wishing the happy couple all good wishes.

MOVING TO PETERBOROUGH

Montreal Star; The Canadian General Electric Company received at Peterborough, Ont, today, the first shipment of machinery from their Montreal shops, which are being removed from that city to Peterborough, where in future all the manufacturing operations of the company will be carried on. The removal of the shops will not necessitate the erection of any new buildings. The general superintendent of the company states that about 150 skilled mechanics will accompany the machinery and will be employed at Peterborough. The officials of the company claim that there is no intention of closing the works here.

—Whiskers make the face seem longer.

—People who are interested in peculiar coincidences are requested to notice that Good Friday falls on a Friday this year.

—"That young man's mother was my mother's only daughter," remarked a lady to her friend yesterday as a gentleman passed through the market, and the friend took out his pencil and note-book.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This information entirely new and well worth [illegible]

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, MARCH 31 1904

THE WAR SITUATION

The editorial utterances of the Russian newspapers have exceptional significance, because, owing to the strict censorship of the press which prevails in Russia, it is generally fair to assume that these expressions reflect public opinion only in so far as it may commend itself to the Government. This does not, of course, imply that all editorial articles are officially inspired. Bearing this in mind, it is interesting to notice a change in the tone of the press of St. Petersburg. A few weeks ago the keynote was profound contempt for the Japs, combined with amazement at the audacity of "the insolent foe." A recent article in the Novoe Vreyma which is said to have attracted much attention, says;

"We know little of the enemy. It is certain, however, he is brave, bellicose, perfidious, and cunning, like all half savages of the East." The article concludes by counselling calmness and patience. Another article published by the Novosti, while declaring that there can be no doubt as to the result of the conflict, yet seems to anticipate at least the possibilities of defeat. "For Japan," says the Novosti, "the war is a life and death struggle. She places everything on one card. For Russia, it is really a colonial war, and even defeat would leave the Empire not greatly affected, while success would be sure to mean a great stimulus to the Russian colonization of Manchuria, where it is reasonable to suppose many soldiers will settle after the struggle is over. "But" it concludes, with ominous significance, "Russia should not pay too high a price for the colonial empire, and, therefore, should conserve, as far as possible, the army and the fleet." This reads like the language of sober second thought, and it would be interesting to know to what extent it reflects the opinions of the ruling classes in St. Petersburg.

The measure of success which the Japs have achieved with their navy, be it regarded at St. Petersburg as great or small, has evidently been sufficient to raise them in the estimation of the Russian and may well create some anxiety as to the result of the fight between the land forces. The Times military expert confesses to being mystified by the failure of the Japs so far to make any serious attempt to cut the railway communications between Harbin and Port Arthur and Vladivostok. He foreshadows the delivery by the cunning Japs of a vital blow of this bodies of Russian troops have been kind, purposely deferred, until great decoyed into positions on the Korean frontier where the destruction of the railway would leave them completely isolated from their base of supplies. He regards the thorough destruction of the railways as an easy feat for the Japs. Its accomplishment while the roads in Manchuria are blocked with snow would certainly involve a disaster of the first magnitude for Russia.

EDITORIAL COMMENT

According to the Japanese plan of campaign as published Viceroy Alexieff will have to keep on falling back until he gets to St. Petersburg. As to what will happen then the Japs apparently have not yet decided.

Do You Tire Easily?

IF YOU LACK STRENGTH ENERGY AND FORCE, IT'S BECAUSE YOUR BLOOD IS THIN AND WATERY

The Best Tonic is Ferrozone—Read of the Marvel it Performed For Three Sisters in Lawrencetown—It Can Do The Same For You

Speaking for herself and sisters, Miss Dorothea Bordman writes; "I am anxious to make known the great benefit that I and my sisters derived from Ferrozone. A short time ago I was tired out and depressed, and felt as if some severe illness was hanging over me. I was so nervous that I found it hard to keep up with my work. Noticing that many Canadian women were being built up by Ferrozone I sent for a supply, and took it regularly for a month. So great was the improvement that my sisters also took Ferrozone. Not one of us had a spark of color in our cheeks, but Ferrozone soon made our complexions ruddy. We soon had good appetites, slept better, and were helped a lot by Ferrozone. We still use Ferrozone, because we find it keeps our systems in a strong, healthy condition. It is certainly a wonderful tonic, and a fine remedy for weak women. Ferrozone has been worth its weight in gold in our family."

To take Ferrozone means you get more strength; means a reserve of energy, and protection against weakness and sickness. Ferrozone is a food medicine, that supplies the body with everything needed to build up the brain, blood and nerve tissues. If its health you seek, Ferrozone will bring it quickly. It is a food tonic that every woman should use. Refuse a substitute and see that you get the genuine Ferrozone. Price 50c. per box or six boxes for $2.50, at all Druggists or N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

ANNUAL MEETING

Of the Canadian Portable Fence Company Ltd., Held Recently

The first annual meeting of this company was held in the office, corner Jarvis and Esplanade streets, Toronto, on Monday, the 15th inst., at 11 a.m. The President, A. H. Cook, was in the chair. The attendance was large. The report was given by Dr. Bruce, Secretary-Treasurer.

The Company had been about six months in active operation; the work had been almost entirely limited to securing stock, fitting up the factory, advertising, and general preparation. The first thing was a statement of some of the principles of management. It was not a speculators company. It was intended to be essentially a farmers' company, in interest and management, a union of men who desire a safe and reasonable investment and a useful enterprise.

Large sums had been refused, the price being unfair influence and overmastering control. This had made the progress a little slower in the beginning, but already the wisdom of the course was seen and vindicated and approved.

Among the stockholders were men of financial weight and standing, pledged to the support and success of the Company, because they approved of the principles of its management. Stock was now being rapidly subscribed, and the amount required would soon be realized.

The field and prospective demand were without a visible limit. Wooden fencing was almost a thing of the past. Wire webbing was abundant, but steel posts were still wanting, and had become a necessity in Canadian fencing, especially in the North-West.

The steel triangles or trusses, "for this was practically a postless fence which they alone manufacture," would be required in limitless quantities. Already eager enquiries were coming in numbers from the Atlantic to the Pacific. The cost of the plant and machinery needed for the manufacture of these posts was not more than a fiftieth part of what is required to manufacture the accompanying wire webbing, while almost two-thirds of the value of the complete fence stood to the credit of this company.

The statement of Assets and Liabilities and the Auditor's Report followed.

The stock already paid in had been largely invested in material, in the fitting up of the factory and office, and the exhibition of the fence in about forty places throughout Ontario, and the establishment of over thirty agencies. The Ordinary Account showed a large balance in favor of assets, about $6,000 worth of fence being almost ready for shipment, although the factory had only been running a short time.

The electric power machine, which had been ordered, would be installed almost at once, and would enormously increase the output.

The Report was received and adopted, and a vote of thanks was passed to the President, the Secretary-Treasurer, and other officials of the Company.

The following gentlemen were then elected Directors; A. H. Cook, (the inventor of the fence), D. K. Ross, Dr. Geo. Bruce, Adam Hood, T. Mahoney.

Besides the above, the following Stockholders were noticed;—Alexander Pingle, Unionville, (chairman of the meeting); Wm. Smith, ex-M.P., of Columbus, and Charles Calder, directors of the company; Darius York Bellhaven; Gerald Dickson, B.Sc., Toronto; T. R. Galpin, Toronto; W. H. Hood, Toronto; J. E. Kennedy, George M. Kennedy, and L. N. Kennedy, Aurora; N. H. Brownlee, Thornberry; Chester R. Cook, Toronto.

At a meeting of the Directors, A. H. Cook was elected President; Adam Hood, Vice-President; Dr. George Bruce, Secretary-Treasurer.

LIPTON'S

People know what good TEA is. Over 53 million packages of Lipton's Tea sold every year in Great Britain—pretty good argument as to who sells the best TEA.

LIPTON'S TEAS

The Elwood Tinworker's Gold Mining Company.
ORGANIZED JULY 1902

CAPITAL STOCK $150,000
PAR VALUE OF SHARES $1.00.

The mining claims of this company consist of two full claims namely:

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres. These mines are situated in a very rich mining district—acknowledged to be the richest spot in minerals of like size in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.

General Manager of Mines, J. A. DURRAGH, M. E., Camborne, B. C; Secretary J. R. BOTTORFF; Local Fiscal Agent R. J. KIDD, Peterborough.

OLD MESA GOLD CO.

ARIZONA.

Company owns six mining claims in Big Bug Mining District, fifteen miles southeast of Prescott.

$40,000.00 IN FREE GOLD

has been mined from near the surface. Value of ore, $20 to $125 per ton in free gold. A long tunnel is being driven to intersect this rich ledge at great depth. The tunnel is now into the mountain 550 feet, and the work is being prosecuted night and day.

Capital stock $1,000,000.00, par value $1.00 per share.

Treasury stock selling at TWENTY-FIVE CENTS PER SHARE for development purposes only.

The property is managed by business men and mining men of Prescott, Ariz.

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

TRENTON ROUTE WILL BE THE BEST

Engineers Report on Trent Valley Canal

COSTLIER BUT MORE RETURN

Harbor Has Advantage of Being on Inland Waters of the Bay of Quinte

Ottawa, Ont., March 29—Mr. H. A. F. McLeod, C.E., of Ottawa, who was detailed by Mr. Schreiber, Chief Engineer of Railways and Canals, to report on the alternative routes of the Trent Canal, from Rice Lake southerly, declares unmistakably in favor of the Rice Lake to Trenton route, although the difference of cost in favor of the Port Hope route is $144,537. Mr McLeod points out that the difficulty of navigating Lake Ontario with canal boats in stormy weather is a great objection to the Port Hope route. The material for canal construction is better on the Trenton route, and the deep cut on the Port Hope section is avoided by taking the river route. He says, moreover, that the diversion of water from its natural course will be a source of great expense to the Government, complaints being made that the water sometimes falls very low in the Trent River.

The largest public benefit would be obtained by constructing the canal through or near the towns of Hastings, Campbellford, Frankfort, and Trenton, where there are now large mills and factories. A very large amount of water power will be more available at the various dams on the route, and would be a valuable asset for the Government. The harbor at Trenton is much larger and safer than that of Port Hope, and it has the additional advantage of being on the inland waters of the Bay of Quinte.

Mr. McLeod met Mr Beith, M.P., and a number of Port Hope gentlemen on the ground last September, but after hearing their arguments in favor of Port Hope, he still adhered to his preference for the Trenton route.

U. S. MAY END CRIMES

Missionaries Want America to Stop Official Cruelty in Congo

Washington, March 29.—With the object of enlisting the aid of the United States Government in a protest against the atrocities alleged to be perpetrated against natives of the Congo Free State by officials of the Belgian Government, the officers of home mission boards and missionaries who have been sent to the Congo are holding a conference here. They charge that King Leopold's representatives, are practicing cruelties on the natives in order to extort rubber and ivory products from them.

Rev. Dr. T. S. Barbour, of Boston, is chairman of the conference, and Rev. William Morrison, sent by the Southern Presbyterian church as a missionary, is secretary. Revs. A. McLean, of Cincinnati, and S. H. Chester, of Nashville, are among the officers of mission boards in attendance.

—Farmers may be seen almost every day around the Peterborough hotels now, looking for help for the coming summer. Very few farm hands seem to be available and wages must necessarily be even higher than last season, but as farmers have been reaping the benefit of the growing times for the past few years, they can afford to be more generous with the working man than in the past.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offe a limited amount of stock of

Consumers' Coal Company

Limited.

Incorporated under the laws of South Dakota, with a capital stock of $300,000 with shares at $1 each.

The officers of the Company are C. F. Buman, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $300,000 capitalization, in shares of $1 each, $110,000 worth is issued, the first small allotment of this was sold at 60c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have 321 acres underlaid with three distinct veins or layers of coal which are 4½ feet thick each. The first one at a depth of 260 feet, it is this vein which we are now mining, the second one is at a depth of 330 feet and the third at 460 feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft a total depth 561 feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than 200 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than 50c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease, as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and town people and, therefore, we have no freight or cartage to pay. We receive from $2 25 to $2 50 for Mine Run and $2 75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 20 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $600 each, we predict that this stock will be worth not less than $3 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

(Incorporated under the laws of the State of Nevada)

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON

Principal Office and Place of Business:
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims; to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Aria., 1-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 28th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 1-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Local Capitalists Interested in Huge Oil Trust

A CAPITAL OF $15,000,000

Organization Will be Called the Canadian Consolidated Oil Company

The amalgamation of four Canadian oil companies is announced in the latest issue of the Ontario Gazette, viz., The Grant Hamilton Company, of Toronto; the Canadian Oil Company, the Canadian Consolidated Company, of Hamilton, and the Sun Oil Manufacturing Company, of Hamilton. The capital stock of the company is put at $15,000,000, divided into 10,000 shares. The new company is incorportaed as the Canadian Consolidated Oil Company, but it is stated that the word consolidated will be dropped.

The head offices of the new company will be situated in Toronto. The provisional directors are J. Kerr, Petrolea; E. R. Clarkson, T. Ramsay and L. Bauer, Hamilton; D. B. Hanna, J. J. Main, W. D. Lumis, T. H. Hamilton, Joseph Wright and W. P. Bull, Toronto; W. J. Lovering, Coldwater; J. Playfair, Midland; W. J. Sheppard, Waubaushene; W. Irwin and R. R. Hall, Peterborough.

It is stated that four other companies are expected to join the amalgamation, namely; The Gall-Schneider Company, of Montreal; the Union Petroleum Company of Canada and the Walker Oil Company, of Winnipeg, and the Sterling Oil Works, of Marietta, Ohio.

One of the shareholders of the Gall-Schneider Company when interviewed this morning, remarked; "We have been approached by this amalgamated company and some of the shareholders have conditionally sold their interests. These conditions have not yet been fulfilled, and so the deal has not been closed. Exactly one-half of the shareholders have consented to sell on these conditions, and the ohter half are Pennsylvania men. What they will do I cannot say. Personally, I have refused to enter into the merger, but I have named my figure, and will be willing to sell at that."

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1 20 a ton. Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel 300,000 tons blocked out now. Values from $3.00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

THE
Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

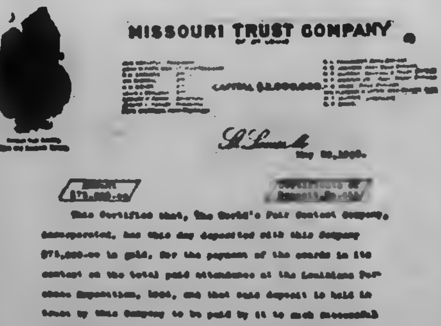
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1889 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,500.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $20 each	2,000.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000 00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

JAPS WILL STUDY RELIGION

Come to See How Much It Enters Into Daily Life

Seattle, Wash., March 30.—A party of wealthy Japanese has arrived to visit the principal centers of the United States, inspect rolling-mills and factories of all kinds, look into the condition of the poor, examine the practical working of the laws and ascertain if possible whether religion enters to any appreciable extent into the actual daily life of the people.

One of the party, a graduate of Tokio University, said that, after most careful examination, absolutely unprejudiced and free from preconceptions, the Japanese had unanimously and unhesitatingly rejected the religion of the Europeans as something which they did not want and did not need.

STOPS AID TO RUSSIA

Sovereign of Mongolia Cuts Off Supplies to Army

PEOPLE MUST BE NEUTRAL

Russians Said to be Violating Rules by Keeping Troops in China

Newchwang, March 30—Prince Alatain, sovereign of Mongolia, en route to his capital, arrived in Kinchow yesterday from Pekin and Japan, where he witnessed the manoeuvres and mobilization of the Japanese army. In accordance with the declaration of Chinese neutrality, Prince Alatain has commanded the observance of neutrality through Mongolia thus rendering illegal the large pony, beef and feed traffic, upon which the Russians are depending, which, notwithstanding his Japanese sympathies, he has found it impossible to suppress.

Brittle Rubber; Elastic Lead.

While liquid air has not proven itself the wonderful power which it was claimed to be at the start, it has found other fields in which its usefulness cannot be questioned, and, instead of driving machinery, it has come to be used in the treatment of certain diseases. It is still the subject of a great deal of experiment in the laboratory, and has recently been used in conjunction with that new wonder, radium, serving to prove new theories in regard to the latter. The lay mind will, however, probably be more interested in the action of liquid air on two substances much more common than radium, namely, lead and rubber. When the latter is immersed in liquid air it loses its elasticity and becomes brittle, and if dropped to the floor breaks like glass. Drop a ball of lead into the liquid air and it acquires all the elasticity which the rubber has lost, and will bound on the floor like the rubber in its normal state.—Science.

Not So Much of a Crime.

Crittick—Yes, he said he thought you wrote advertising poetry.

Post Aster—I hope you corrected his error.

"Oh, yes, I told him it was wrong to say 'poetry.' You merely wrote 'verses.'"—Philadelphia Press.

Russian Postage Stamps.

Russia is, or will be very shortly, the possessor of the oldest unchanged issue of postage stamps in the world. Until now Hong-Kong held that position. The first Hong-Kong stamps were issued in 1859 and are identical in every respect with those in use to-day. The head of King Edward is, however, soon to replace that of Victoria, and thenceforth the Russian issue, with the double eagle and shield of St. George, which first appeared in 1864-65, and is still running, will hold the long-time record.

FOREST MINING CO.
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $13.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet farther (this it should meet the contact) a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co. Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President. M. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 00 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Bule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 2S-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo, bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 foot level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail. We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position to not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day; one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 300 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proven the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,600 feet on this vein.

Ore running from $18 to $80 per ton is continually being shipped from the gold property, and 36 samples taken from widely different portions of the vein system averaged $28.25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 800 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to have 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

INSIGNIA OF SOLDIERS

Marks of Rank Prescribed by New Regulations.

They Designate at a Glance the Standing and Branch of Military Service to Which the Men Belong.

Although the general order prescribing the new uniform for the soldiers of the United States regular army was issued a year ago last July and went into effect on the first of the year, the men one sees about the streets are still clad in the traditional blue. But that is because there is still a supply of such cloth on hand and the government economically determined to use it up, says the New York Commercial Advertiser. The enlisted men do not get new suits until their old ones are worn out.

In some months' time we will no longer see the lads in army blue. They will wear the blue only on dress occasions; on service they will wear olive drab and on fatigue duty they will wear brown cotton duck. On some occasions in tropical service they will wear a uniform of white cotton duck.

The stripes on the trousers of the non-commissioned officers are of the following colors: Cavalry, yellow; artillery, scarlet; infantry, light blue; engineers, scarlet piped with white; ordnance, black piped with scarlet; post quartermaster sergeants, buff; the hospital corps, maroon piped with white; the signal corps, orange. Sergeants' stripes are one inch wide. A corporal wears a stripe half an inch wide. Musicians wear two stripes half an inch wide.

Thus by the color one can tell the arm of the service in which the enlisted man serves and the stripe shows his rank. By the dress cap one can tell at a glance the regiment and the company of the enlisted man, also his arm. Thus the cavalryman wears crossed sabers, the artilleryman crossed cannon, the infantryman crossed rifles, the engineer a castle. Ordnance men wear the shell and flame, post commissary sergeants a crescent of white metal, electrician sergeants a symbol resembling forked lightning, hospital corps men a caduceus, which is the snake-entwined rod that Mercury carried. The men of the signal corps wear two crossed flags and a torch. Band musicians wear a lyre of white metal, while field musicians of infantry and the engineers and trumpeters of cavalry wear a bugle.

There are many kinds of sergeants and many ranks. The chevrons on the sleeves tell what the bearer is. The regimental sergeant major, for instance, wears three bars and an arc of three bars. The regimental quartermaster sergeant also has three bars, but they are joined by three straight bars. The regimental commissary sergeant has the same insignia with a crescent in the angle. Squadron or battalion sergeant majors have three bars with an arc of two bars. The chief musician wears a bugle in his chevron, so does the chief trumpeter. The drum major wears two embroidered crossed batons. In the ordnance department the shell and flame are borne. The hospital corps and the signal corps also bear the insignia of their corps. First-class privates of engineers wear a castle of red cloth piped with white.

The chevrons of the sergeants of the line all have three bars. The first sergeant bears a lozenge also, a quartermaster sergeant a tie of one bar, a color sergeant a star, a stable sergeant of field artillery a horse's head. A corporal wears two bars and a lance corporal one bar.

A cook wears on his arm the insignia of a cook's cap, a farrier bears a horseshoe, a saddler a saddler's knife and a mechanic or artificer two crossed hammers. A first-class gunner wears an insignia of scarlet cloth representing a cannon projectile.

Besides these chevrons of rank there are chevrons for service and for service in war. The first is a diagonal half chevron of cloth of the color of the man's corps. For service in war the men wear a diagonal half chevron of white cloth piped with the color of the arm of service in which the man won the distinction. Men may wear as many of these chevrons as they earn.

The general order which prescribes the change of uniform goes into the minutest details regarding the dress of the officers and men of the United States army. When certain dress must and must not be worn is laid down in the regulations. The very braids on the swords' hilts are subject to rules of position and tying.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty-five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31.52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest, but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before, smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Air Carries Healing Medicine

THAT CURES COLDS, CATARRH AND DISEASES OF THE THROAT LUNGS AND BRONCHIAL TUBES

About the healing power of the air of the pine woods everybody knows, but to supply it in the form of medicine seemed almost beyond realization. After many years of careful study a scientific remedy now known as Catarrhozone has been produced which enables the sufferer to breathe into his lungs all the healing properties of the balsamic pine woods air. This marvellous remedy has conquered catarrh. It unquestionably does cure it permanently.

You cannot fail to be cured by Catarrhozone, because it reaches and destroys the cause of the disease. You simply inhale the antiseptic vapor. It instantly spreads to every part of the breathing organs. The micro-organisms infecting the diseased tissues of your nose, throat and lungs die instantly. There is nothing left to cause inflammation. Any spots that are raw and sore are quickly healed by Catarrhozone and you are soon completely cured.

It is impossible to breathe through a Catarrhozone inhaler without at once feeling better. Your head is cleared of mucous discharge, your nostrils are cleansed of all putrid matter, the phlegm is removed from your throat. Every trace of catarrh is searched out of the system by Catarrhozone, which thoroughly disinfects and purifies every organ of the body.

Catarrhozone is the only natural remedy for catarrh. It cures by cleansing and purifying all diseased tissues, not by deadening the stomach by drugs. It is a clean, simple and satisfactory remedy that is endorsed by the clergy, and universally prescribed by the medical profession because it is scientific and absolutely certain to effect lasting cures.

Don't be misled into accepting a substitute for Catarrhozone, which alone can cure thoroughly. It is so powerfully healing that colds disappear in an hour, coughs in two hours and even chronic catarrh in a comparatively short time. Two months' treatment $1, sample size 25c. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

That Bad Boy Again

The Sherbrooke street boy, who gained publicity a few weeks ago by concocting a story about being abandoned by his father on a train bound for the west, has again gained notoriety by boarding a train bound for Port Hope. The lad was put off the train at Fraserville and is being looked after by friends there.

To My Old Customers

I wish to inform my old customers and the public in general that I will return to my old business of taking care of lawns, boulevards and gardens. Orders may be addressed to me at Peterborough Post Office, or at my residence, 400 Bethune street.

GEORGE LAWSON.

Death of Mrs. Geo. Moncrief

The death of Mrs. Geo. Moncrief, from diphtheria, occurred at St. Joseph's Hospital on Tuesday night. Two of [illegible] children recently died from the same disease. The late Mrs. Moncrief was only taken to the hospital on Sunday. Her husband and a family of small children are left to mourn her loss. The funeral took place yesterday.

Oshawa Man Missing

The following has been received by Chief Rozzel from the Oshawa Chief of Police:—

"Missing—Since Monday morning, March 28th, Richard Joseph Wilkinson, aged about 40 years; five foot ten inches high; square shoulders; black hair and heavy black moustache; round face, black eyes; wearing black suit and black overcoat, with velvet collar; black peak cap; is a malleable iron worker and fairly well to do. His wife is very anxious about his whereabouts, and cannot understand his sudden disappearance."

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,

Principal

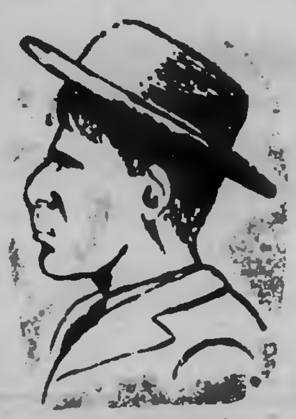
WM. ARMSTRONG ARRESTED YESTERDAY AFTERNOON.

CLAIMED TO BE EMPLOYMENT AGENT FOR ST. LOUIS EXPOSITION

Captured at the Post Office by Detective Parkinson—Remanded for Eight Days

WANTED 100 YOUNG MEN AND WOMEN, neat appearance; fair education; to remain in charge exhibits World's Fair, St. Louis; seven months; salary $35 monthly and board; fare advanced; five dollars deposit required as guarantee of good faith, half returned by remaining; send money, express order or registered letter, if more applicants than vacancies money returned. WM. ARMSTRONG, Box 348, Peterborough, Ontario.

The above advertisement has appeared for the past few days in the Toronto Mail and Empire, and the Ottawa Citizen, and on the surface appears quite enticing. The Mr. Armstrong referred to arrived in town some time ago, and his large mails point to the fact that his venture has been a paying one. About two weeks ago a message was received at the local police station from the Chief of the Ottawa force, and a clipping of the above notice was enclosed. The advertiser has ever since been under the watchful eyes of the officers of the law, and although suspicion pointed strongly to guilt, it was thought advisable to await further developments. Detective Parkinson, of the Dominion Police Force, arrived in town last Sunday morning, and the suspect has been under his constant surveillance ever since. The detective has been around the post office daily and Armstrong has been noticed obtaining registered mail up till Monday evening last. Several letters arrived on Tuesday, but under the detective's orders these were laid aside by the Postmaster. Yesterday one ticket was placed in Box 348 as a decoy, and about 3.30 o'clock in walked Armstrong. On going to obtain the letter he was confronted by Detective Parkinson, who had been waiting in Col. Rogers' office, and who immediately placed him under arrest.



WM. ARMSRTONG.

The police station was communicated with and P. C. Stewart assisted in escorting the prisoner to his cell. On his person was found the sum of $35.91 and a large bundle of letters. His victims have been many, and from all parts of Canada. Many young girls had sent beautiful photographs, and one comely young man had sent a picture of himself "as big as a barn door," as P. C. Stewart described it.

The prisoner is a young man, of about 28 or 30 years of age, and his clean-shaven face, with its thick-set jaw, stamps him as belonging to the criminal class. When seen by a Times representative, he was sitting on the bench of his cell, with his hat tilted back on his head and intently reading yesterday's issue of the morning Times. "How many papers have you in town?" he asked, without removing his eyes from the paper. "The only thing I'm interested in at present is the Japs and Russians," he quietly remarked, "but I see Dowie is havin' a hard time in Australia," he added, as he glanced down and across the column.

"Aren't you interested in the St. Louis Exposition?" the reporter asked, and the prisoner only smiled slightly, but would not express himself.

The prisoner Armstrong has been staying in town, at the Cavanagh House for about two weeks, and the hotel boarders understood that he was working as a machinist at the Edison Works. Each morning he arose and had an early breakfast and dressed in his working clothes, left for work. At noon and night he would return, begrimed with oil, and often remarked about his hard working qualities. When he arrived at hotel he registered as "F. H. Bradley, of Brockville," and his genial demeanor around the hotel was most unassuming. His room was well stocked with the latest magazines and there was a plentiful supply of writing materials and stationary.

Last fall the prisoner was hired by Mr. T. Cavanagh at Montreal to work in Messrs. W. & A. McArthur's lumber camps at Beaverstone, on the Georgian Bay, and at the time of his engagement he claimed to be a fisherman from Gaspe, Quebec. On his arrival in town, he stated that he had worked for the McArthur Co. for two months and then engaged with the Playfair Co. of the same place. He also stated that he had come down from the camps to Peterborough.

His supply of money was apparently not very large, as he was unable to meet his first week's board account, but latterly he has seemingly had plenty.

Several local young men were rather dubious about the inducements offered and desired an interview. They accordingly wrote to Box 348, and received a reply asking them to call at an address on Gilmour st. They accepted the invitation and, on calling at the address named, met the genial Armstrong, who emphasized the fact that a deposit of five dollars was necessary. The police will investigate this report, and no doubt the bedroom key found on the prisoner, will be that of his Gilmour street room, although he claimed that it was the key of his room in Pittsburg. A badge which read, "American Detective Association," was also found pinned on his vest.

The prisoner appeared before His Worship Magistrate Dumble yesterday afternoon, and was remanded for eight days.

SOCIAL AND PERSONAL

Few words of the People—What They Are Doing and Saying

—Chief Paudash, of Hiawatha, was in town yesterday.

—Mrs. Tate and Miss Tate, of Lakefield, were in town yesterday.

—Mrs. C. B. Routley and Miss Helen have returned from Kingston.

—Mr. John Craig, Lakefield, was down yesterday attending the market.

—Miss M. Mulcahy, of Keene, is the guest of her friend, Miss M. Grady, Lock street.

—Mr. G. A. Sanderson left today for Peterborough on a business trip. —Brockville Recorder.

—Mrs. J. T. Canniff and son, Douglas, leave for Napanee today to spend Easter with the former's mother.

—Mr. Thos. Routly, wife and daughter, of Brooklin, Ont., are in town, attending the wedding of their son, Robert.

—Mr. Fred. Gaskins and daughter Viva, who have been visiting his mother, Mrs. Wm. Gaskins, left for their home in Denver yesterday.

—Mr. J. Elmhirst, of Carberry, Man., who has been visiting friends in this city, left for his western home last evening.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—Be sure and get one of the fine pictures with the Easter number of the Pennsylvania Grit this week.

—The Ladies Auxiliary of the Y.M.C.A. will meet this afternoon at 3.30 o'clock in the ladies' parlor.

—A joint social of the Young Men's and Girls' Guilds will be held in St. Johns School House on Tuesday evening next.

—An At Home will be held in the T.A.S. rooms on Easter Monday night, which promises to be a most enjoyable affair.

—On April 12th an entertainment will be held in St. John's School House under the auspices of the Girls Guild.

—The St. Luke's Young Men's Guild will hold a minstrel show in the Ashburnham town hall on the evening of April 15th.

—There will be service at 11 o'clock tomorrow morning at the George street church, to which all are cordially invited.

—The meeting of the Grasshopper Club, which was to have been held at the Y.M.C.A. last evening, was postponed until next week.

—Kingston is also troubled with "Jack the Hugger," according to the Whig. There must be a large family of these chaps.

—According to Bradstreet's eighty-four per cent. of those who failed in business in 1903 did not advertise in the newspapers.

—The Times will contain each day an illustration depictive of scenes at the seat of war. Special arrangements have been made to furnish our readers with the latest and most interesting news from the Far East.

—Mrs. K. Eardley-Wilmot and Miss Helen Davies will sing at the lecture to be given by Prof. Clarke in the Y.M.C.A. Hall on the evening of April 5th.

—The April meeting of the Ministerial Association will be held on the second Monday of the month, instead of on the first Monday, owing to the latter being a holiday.

—At 10 o'clock on Easter Sunday morning a Fellowship meeting will be held at George street church, and at 11 o'clock the regular service will be conducted by the pastor, Rev. J. P. Wilson. There will be special singing and handsome floral decorations, and a large attendance is expected.

All kinds of Fresh Caught Fish for Good Friday. Store closes all day Good Friday.

Floods at Lily Lake

The G.T.R. is experiencing considerable trouble in keeping the water in check at Lily Lake, above Jackson's Point, and forces of sectionmen are working night and day to try and prevent any serious damage being done. The ice has formed in large quantities, and immense piles serve to turn the water aside. Dynamite has been brought into play, and the latest report states that the worst is now over. The G.T.R. has always had to battle with the spring freshets at this point, but this year, owing to the sudden thaw and great amount of snow, the trouble has been greater than usual.

Good Boys

Are the bad boys very often. The boy that's good for anything is generally pugnacious. He's a healthy animal and the healthy animal will always fight for his rights.

When a boy shuns the rough sports of his companions he is apt to be a weakling, and to be conscious of the fact.

A great many mothers have testified to the wonderful curing and strengthening power of Dr. Pierce's Golden Medical Discovery. All strength comes from food after it has been perfectly digested and assimilated. By curing diseases of the stomach and other organs of digestion and nutrition, "Golden Medical Discovery" enables the perfect nourishment of the body, which is thus built up in the only way a body can be built up—by food.

There is no alcohol in "Discovery," and it entirely free from opium, cocaine, and all other narcotics.

"Dr. Pierce's medicine has done wonders for my two boys," [illegible] over a year. [illegible] Medical Discovery and has not had one [illegible] My younger son had [illegible] his neck; had two lanced, but has not had any since he commenced to take your medicine."

Dr. Pierce's Common Sense Medical Adviser, in paper cover, sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. For cloth binding send 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Parry Sound Wharf," will be received at this office until Monday, April 25, 1904, inclusively, for the construction of a pile wharf at Parry Sound, District of Muskoka and Parry Sound, Ontario, according to a plan and specification to be seen at the office of H. A. Gray, Esq., Engineer in charge, Harbor Works, Ontario, Confederation Life Building, Toronto, on application to the Postmaster of Parry Sound, Ont., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the printed forms supplied, and signed with the actual signatures of tenderers.

An accepted check on a chartered bank, payable to the order of the Honorable the Minister of Public Works, for two thousand dollars ($2,000.00), must accompany each tender. The check will be forfeited if the party tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED GELINAS,

Secretary.

Department of Public Works,

Ottawa, March 25, 1904.

31 WILLIAM ST., TORONTO CAN

ADVERTISE IN THE TIMES.

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep on fifty ton mill running for two years if we should not break down another ton: and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

Cossacks Ambush The Japanese Force--Capture of New-Chwang Expected Within One Week's Time

Main Japanese Army Steadily Moving Forward

TAKING IMMENSE STORES WITH IT

The Russian Warships Out on a Cruise Experimenting

London, Thursday, March 31—A despatch to the Daily Mail from Seoul says that after their victory at Chong-Ju the Japanese advanced towards Koak-San, 13 miles from Chong-Ju, driving the Russians before them. The latter still occupy positions north of the Pakchon River. Apparently some force of the Japanese has reached that river. Some Japanese returning to the south state that 53 Japanese infantry, who were trying to advance north of the river were ambushed by Cossacks and destroyed. The correspondent says he doubts this report, and adds;—"Such reports as can be obtained here indicate that the main Japanese army is steadily following its advance guard northward from Ping-Yang, taking immense stores with it."

OUT ON A CRUISE

Russian Warships Twelve Miles Outside Port Arthur.

New-Chwang, March 31—It is reported that nine Russian warships are cruising twelve miles outside of Port Arthur directing the forts in experimental firing. The cruiser Askold is still further out at sea scouting.

Russian Battleship Rammed.

Paris March 30—A despatch to the Petit Parisien from St Petersburg, says that a private telegram from Port Arthur, dated March 29, states that while the Russian battleship Petropavlovsk was manoeuvring in the inner harbor there, she rammed the battleship Sevastopol, seriously damaging the latter. The naval staff at St. Petersburg deny any knowledge of such an accident.

Japs May do the Rechristening.

Moscow, March 30—The Gazette urges the rechristening of Port Arthur as Port Nicholas, the English name sounding badly to Russian ears.

FROM THE LAND SIDE.

Capture of New-Chwang Expected in a Week.

London, Thursday, March 31—A despatch to the Chronicle from New-Chwang says it is the best opinion that the Japanese have indefinitely deferred attacking New-Chwang.

A despatch to the Daily Mail from Shan-Hai-Kwan says, however, that the Japanese expect to capture New Chwang from the land side in a week.

Apologized for Flag Incident.

London, Thursday, March 31— The Times prints a despatch from New-Chwang, saying that the Russian police have apologized for hauling down the American flag there, and have rehoisted it over the correspondents' quarters. The Russians are already enforcing martial law on the west bank of the Liao River.

The Tein-Tsin correspondent of the Standard says that the effect of martial law at New-Chwang has been exaggerated. The discomfort thereof thus far has been small, although future developments may be unsatisfactory. The area included in the proclamation probably will be extended west of the Liao River.

An Easter Number

A truly Easter number is the April Canadian Magazine. The cover is a beautiful Easter design in colours, the special illustrations are suitable to the season, and the whole aspect of the issue is that of a notable occasion. To illustrate Mr. Carman's "Church Art in Rome" there are some reproductions of famous paintings and pieces of sculpture which are creditable alike to the engraver and printer. The delicate colour effect obtained in these reproductions show considerable enterprise and a high degree of skill. The stories are more numerous than usual, and well selected. They are from the pens of Hubert McBean Johnston, W. A. Fraser, A. Seton Fox, Alice Jones and Caroline Marriage. That by Mr. Fraser, entitled "The Tea Dance at Fort Donald," introduces some of the characters from "Blood Lilies," and is undoubtedly in his best vein. Jean Blewett writes entertainingly of "The Ways of The Child," and her contribution is beautifully illustrated. There are two serious, yet most informing articles. One is "Wheat Growing in Canada," by William Saunders, Director Dominion Experimental Farms, in which he proves that the Northwest may easily produce 800,000,000 bushels of wheat per annum, or four times the annual requirements of Great Britain. The other is "Soil Utilization," by E. Stewart, who shows that Canada can best employ her waste lands by turning them into forests. The departments are interesting and replete with photos, cartoons, and pictures of current interest.

CURZON CONVEYS HINT TO RUSSIA

Foe Must Never Occupy Territory on Indian Frontier

GREAT BRITAIN'S ATTITUDE

Peace of Country Must Never be Threatened by Encroachments

Calcutta, March 30.—In the course of the budget discussion today the Viceroy, Lord Curzon of Kedleston, declared that it was his express intention to return to India.

The Viceroy spoke for an hour and a half. Referring to their responsibilities in Asia, he said India resembled a fortress, beyond whose walls there existed on one side a glacis of varying breadth and dimensions, which they did not desire to occupy, but which they could not afford to see occupied by a foe. They were quite content that it should remain in the hands of allies and friends, but if unfriendly influences should creep up and lodge under its walls, they would be compelled to intervene because the danger of such unfriendly influences would grow up as a menace to their security. This, he said, was the secret of the whole position towards Arabia, Persia, Afghanistan and Siam.

Alluding to the contemptuous attitude of the Thibetan government in the face of the extreme patience of the Indian government, his Excellency said; "I have no desire to push on anywhere. The history of the last five years has been one of consolidation and restraint, but I would suffer any imputation rather than be an unfaithful sentinel and allow the future peace of the country to be compromised by encroachments from outside, which could only have one meaning."

REV. J. A. WILSON SPOKE

On Subject "Men Wanted" at Hastings on Monday Evening

At the final meeting of the Literary Society at Hastings, on Monday evening last, Rev. J. A. Wilson, assistant pastor of St. Paul's church, delivered an address on the subject, "Men Wanted." We quote the following from the Star;

"The Rev. Mr. Wilson, of Peterborough, spoke on the subject, "Men Wanted." Although the lecturer was called at the eleventh hour, only having about half a day's notice, he did ample justice to the subject. The speaker held the attention of the audience from start to finish, and in the splendid philosophical address that he delivered he demonstrated that the kind of men that were needed were men of integrity and character. History was extensively reviewed with the effect that men who were seemingly great and clever, were, in reality, shams, while on the other hand, men whose lives were apparently failures were great successes. The scarcity of absolutely honest men in history was referred to. Diogenes had rushed out into the streets of Athens, and, although there were thousands of men around him, he could not find an honest man. One of the greatest things that could be said about Queen Victoria was that she was a woman in the highest sense of the term. The moral and ethical standard that was set up by the speaker was of the highest possible efficiency, and could be obtained by all provided we were honest with ourselves. Genius, knowledge, art and learning were not to be deplored, but Lord Byron had all these and yet his life was a failure. The speaker's manner was irresistible and every point he made was firmly impressed on the audience. He concluded with strong scriptural references."

HAVE NO DESIRE TO JOIN CANADA

Statement of Newfoundland's Premier in House

A REPLY TO RESOLUTION

Views of Chambers of Commerce Congress Not in Accord with Colony

St. John's, Nfld, March 30.—In the Legislature tonight Premier Bond said that no correspondence had passed between the Government of Newfoundland and that of Canada respecting confederation. However, the Imperial Government, having forwarded a copy of a resolution adopted by the Congress of Chambers of Commerce of the British Empire, at Montreal, in August last, favoring confederation, the Newfoundland Government had replied that it could not concur that the present time was opportune for the opening of negotiations towards a union with Canada.

There was no desire on the part of the people of Newfoundland for the inclusion of the colony as a constituent part of the Dominion. On the contrary, the reply said, there was an evident desire that the colony should maintain it autonomy and continue to retain its honorable and independent position as part of the British Empire.

SEEKING A CONFERENCE

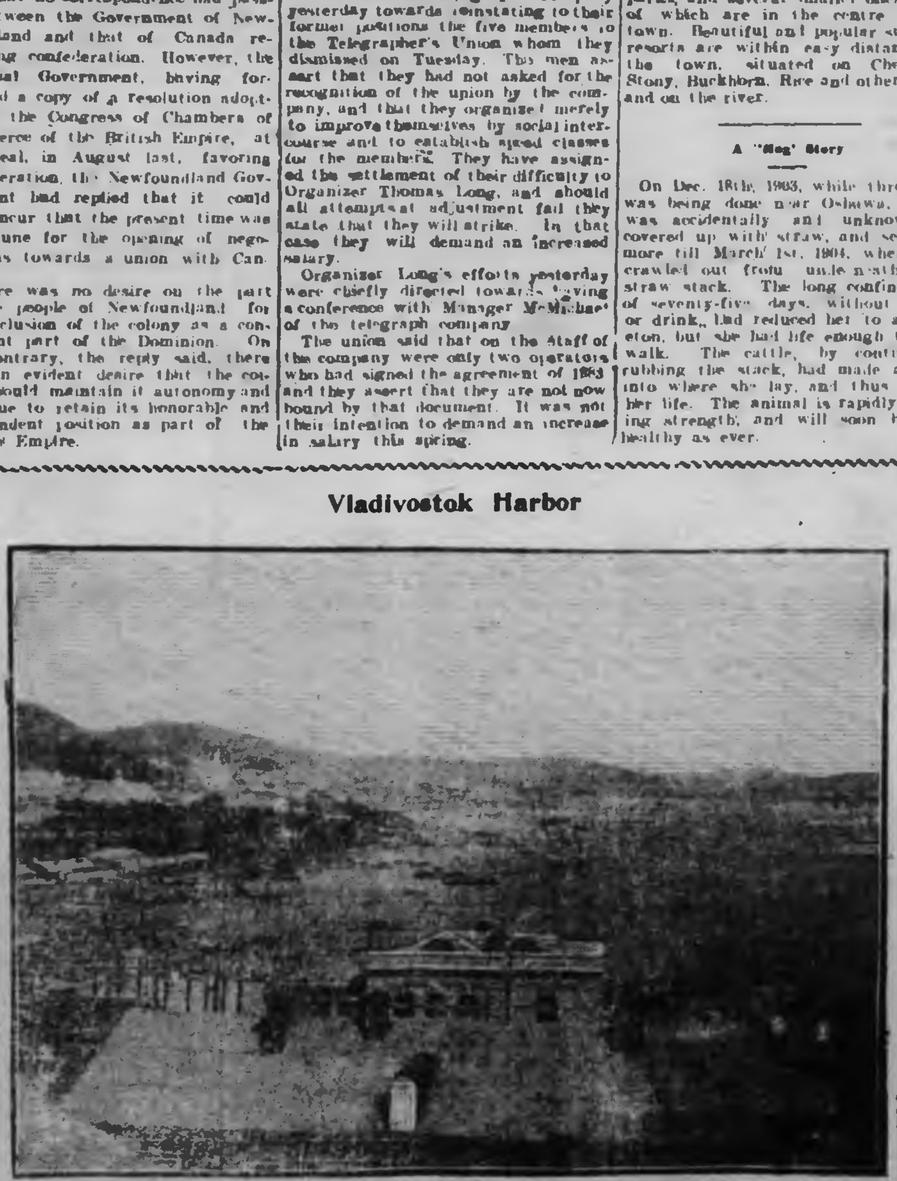
If Suspended Men are Not Reinstated Increase of Salary will be Asked

No action was taken by the Great North-Western Telegraph Company yesterday towards reinstating to their former positions the five members to the Telegrapher's Union whom they dismissed on Tuesday. The men assert that they had not asked for the recognition of the union by the company, and that they organized merely to improve themselves by social intercourse and to establish speed classes for the members. They have assigned the settlement of their difficulty to Organizer Thomas Long, and should all attempts at adjustment fail they state that they will strike. In that case they will demand an increased salary.

Organizer Long's efforts yesterday were chiefly directed towards having a conference with Manager McMichael of the telegraph company.

The union said that on the staff of the company were only two operators who had signed the agreement of 1883 and they assert that they are not now bound by that document. It was not their intention to demand an increase in salary this spring.

Vladivostok Harbor



Haven for the Russian War Vessels—One of the best on the Northern Asiatic Coast

Take It to Peterborough

C B. Routley, Peterborough, who purchased the Wilkinson stock, intends leaving for home today or tomorrow. He had not disposed of the whole of his stock, but owing to his business interests in Peterborough, is unable to remain here any longer, and will take back with him the goods he has left. He will also probably take back with him a trotting horse which he has purchased from L. Guess—Kingston Whig.

Y.M.C.A.

This morning at the Y.M.C.A., a boys' meeting will be held at 10 o'clock, the subject being "A Boy's Decision."

On Easter Sunday afternoon the service will be conducted by Mr. W. R. Lough, Principal of the Model School, of Clinton, Ontario. The Charlotte street male quartette will render selections. Mr. Lough is a brother of the popular Secretary of the local Y.W.C.A.

Salvation Army

The Easter services at the Salvation Army Barracks will be conducted by Brigadier and Mrs. Southall of Toronto, and will be held as follows:—Saturday at 7 a.m., sunrise kneedrill; at 11 the subject of the Brigadier's address will be "The Climax" and at 7 p.m. "The Roll Call." In the afternoon at 3 o'clock Mrs Southall, who is the Women's Social Secretary, will give an address on the Rescue Work. On Monday night at 8 o'clock the League of Mercy will be commissioned. All are invited to these services.

"Country Belongs to French".

In last evening's Star, a Sturgeon Falls correspondent writes;—"It is related that the Bishop of Peterborough, in the course of a sermon here, said that this country belonged to the French. They had settled it, and there should be no English here. This is cherished by the English with feelings that are not altogether friendly."

EARLY COON HUNTING

Two Coons Discovered in Hollow Log on Aylmer Street

Residents of Aylmer street south witnessed an exciting scene on Wednesday afternoon. A large pile of logs brought from Wallace's swamp, has been piled near the street by Mr. Jno. Carew, of Lindsay, and recently he has been loading several cars. On Wednesday while handling the logs, two coons suddenly scampered out of a hollow one, and then a lively chase ensued.

Dozens of dogs were soon engaged in the chase and "Mick" O'Brien's kennel was out full force. The coons succeeded in evading their pursuers, and finally regained their place of abode in the hollow log.

SAD DEATH AT CLUNAN HOUSE

Mr. George Gibson Choked to Death with Piece of Meat.

While eating his dinner yesterday at the Clunan House, Mr. George Gibson, of Seymour Township, was choked to death as the result of a piece of meat lodging in his throat. Deceased was 79 years of age and in the best of health apparently. He had been visiting his nephew, Mr. W. H. Huycke, of 507 Rubidge street, but had been invited by a few old friends to partake of the midday meal at the above hostelry.

Dr. Coughlin was immediately summoned, but on his arrival he could do nothing for the man, who died about fifteen minutes afterwards. Deceased was a married man and a large family is left to mourn his loss. The remains will be taken to his late home for interment.

DESERVING OF PRAISE

Manufacturer's Committee Issue Booklet Descriptive of Electric City

The Manufacturers' Committee has just issued a neat pamphlet, descriptive of Peterborough and its wonderful resources. Among the many advantages mentioned it has the following;—

The town owns an excellent system of waterworks and water rates are low.

There is a good System of sewers. Electric light is supplied very cheaply.

There is a Collegiate Institute and nine other public schools.

There are twelve churches, and all leading denominations are represented.

The Government has good public buildings for Post Office, Customs and Inland Revenue Office.

A well furnished Public Library supplies reading.

There is a large and admirably equipped Young Men's Christian Association building.

Two large and well equipped hospitals are provided for the sick.

Peterborough might be called a "City of Parks." It has two large parks, and several smaller ones, two of which are in the centre of the town. Beautiful and popular summer resorts are within easy distance of the town, situated on Chemong, Stony, Buckhorn, Rice and other lakes and on the river.

A "Hog" Story

On Dec. 18th, 1903, while threshing was being done near Oshawa, a pig was accidentally and unknowingly covered up with straw, and seen no more till March 1st, 1904, when she crawled out from underneath the straw stack. The long confinement of seventy-five days, without food or drink, had reduced her to a skeleton, but she had life enough to still walk. The cattle, by continually rubbing the stack, had made a hole into where she lay, and thus saved her life. The animal is rapidly gaining strength, and will soon be as healthy as ever.

RUSSIANS SAID TO BE EVACUATING COREA.

Japanese Have Occupied Haiju, a Seaport East of Anju--Coreans Ready for Rebellion

Paris, March 31—The Echo de Paris has a despatch from St. Petersburg which says that the Japanese numbered 2,000 and the Cossacks 900 in the Chong-ju engagement. The two forces were only 600 yards apart in the fight.

ANARCHY IN COREA.

Correspondents Resent Japanese Restrictions.

London, Thursday, March 31 — The Daily Mail correspondent at Seoul, in a despatch dated March 24, describes the internal situation in Corea as being grave. Outside the reach of Japanese bayonets, he says, anarchy practically prevails. The Japanese censorship now extends beyond military movements. It does not allow any mention of local disturbances, the correspondents deeply resent the Japanese restrictions, and many who were pro-Japanese in their sympathies, have completely changed their attitude.

London, March 31 — The Daily Telegraph says the Japanese authorities have refused correspondents the use of the field telegraph lines, and that all despatches must be sent to Tokio by mail. The paper further says that there is no sign that any foreigners will be permitted to go to the front, though the native newspaper men will be allowed to do so.

The Daily Telegraph, in an editorial on the unprecedented severity of the censorship, suggests that Japan has some new and important move to conceal, possible the re-embarkation of a portion of her troops already in Corea for some other point in the theatre of war, and is anxious to guard against the possibility of leakage through foreign correspondents, who might sympathize with Russia.

Russians Evacuating Corea!

A correspondent of the Daily Telegraph at Seoul reports that the Russians are evacuating the positions they occupy in Corea.

Special despatches from Shanghai repeat the rumor that the Mikado will shortly proceed to Corea with the headquarters staff.

Coreans Ready for Rebellion.

The Seoul correspondent of The London Daily Mail describes Corea outside the districts occupied by the Japanese, as being in a state of anarchy and in readiness for rebellion. The correspondent asserts that the censorship prevents any reference to disturbances.

Japs Occupy Haiju.

Seoul, March 30.—The Japanese advance occupied Haiju, a seaport south of Anju, March 27.

WM. ARMSTRONG'S MAIL IS STILL ARRIVING

Letters for the Prisoner Still Coming from Different Parts

Letters are still arriving for Wm. Armstrong, who was arrested at the Postoffice on Wednesday afternoon, on the charge of conducting a fraudulent business. The Chief of Police, the Mayor and the Postmaster have each received letters of enquiry from intending applicants, and yesterday The Times received a communication from Copper Cliff, Ont., in which the writer asked for particulars concerning the said Armstrong.

Nothing further has been learned as to the identity of the prisoner, although several letters found in his trunk tend to show that he has at one time made his home in the States. His photograph was taken on Wednesday afternoon, and copies will be forwarded to different points.

ATHLETIC WORLD

BY OUR SPORTING EDITOR

LACROSSE.

The annual convention of the Canadian Lacrosse Association will be held today at Toronto, opening at 10 o'clock sharp, and continuing till 12.30 when the Reception Committee of the City Council will entertain the delegates at luncheon. The speechmaking will be brief, and the delegates will have this afternoon for the continuance of their work.

The delegates at the annual convention of the Canadian Lacrosse Association will have a good choice this season for the council as there are a number of good men nominated. The majority of the nominees are all well known in the national game, and three of them, if elected, should make a strong council, these being, Harry Gillespie, of Orangeville; J. D. Bailey, of Toronto, and Fred. Clarke, of Peterborough—Toronto News.

BASEBALL.

The Port Hope Guide contains an item on baseball, in which it is stated that the Excelsiors are likely to represent Peterborough in the Midland League. This is hardly according to fact, as the Cordage Company's team is more likely to enter the league. In conversation with a prominent member of the latter team last evening the Times was informed that they would produce an A1 team this year, and that the financial support promised them was most encouraging.

SPRINTING

In a recent issue of The Times, in speaking of the Burns-Belland race to come off on April 9th, it was stated that the course would be from the Oriental to Downer's Corners and return. We were in error here, as the course will be 2-12 miles and return along the Lakefield road. The judges appointed are Messrs. M. J. Hutchinson, of the Examiner, J. T. Anderson, of the Times, and A. Duncan and R. N. Jolliffee will act as referee.

GOOD FRIDAY SERVICES

Special Services to be Held in the City Churches Today

The following is a list of the special services to be held in the different city churches today;—

ALL SAINTS' CHURCH.

Service will be held at 11 o'clock a.m., and will be conducted by the pastor, Rev. Wm. Major.

ST. LUKE'S CHURCH.

There will be two services at St. Luke's church today; the morning meeting commencing at 10.30 and the second will commence at 12 o'clock and last till 3 o'clock in the afternoon.

ST. JOHN'S CHURCH.

Services will be held at 11 o'clock a.m., and at 3 p.m. there will be a special service for children and young people. There will also be an evening service, commencing at 7.30 o'clock.

ST. PETER'S CATHEDRAL.

The Mass of the pre-sanctified will be held at 9 o'clock this morning, Station of the Cross at 3 p.m., and Veneration of the Cross at 7 p.m.

GEORGE STREET CHURCH.

The pastor, Rev J. P. Wilson, will conduct the morning service, commencing at 11 o'clock. Special music will be rendered by the choir under the direction of Mr. G. W. Mulligan. Handsome floral decorations will add to the appearance of the church.

EASTER SERVICES

At St. Andrews on Sunday — Special Music and Sermons

At St. Andrew's church on Sunday the Rev. J. G. Potter will officiate. The service of praise will be in keeping with Eastertide. The evening service will be one of special song, with an address on "The Story of Christ."

The following is the arrangement for the services;—

MORNING.

Anthem, "See now the Altar," solo Alf. E. Young; Solo, "Awake, ye Sons of Light and Glory," Sydney Glass.

EVENING.

"Night of Nights," ... ... Vandewater
A. E. Young
"He was Despised,"...... ... ... Handel
Miss Violet B. Smith.
"Christ is Risen" ... ... Hummerel
Miss Florence Miller
"Hosannah" ... ...Granier
Sydney Glass.
Anthem ..."Come unto Him"... Wagner

THE NEWFOUNDLAND QUESTION

The rumored settlement of the French Shore question has revived the interest in the possibility of bringing about at last the long-delayed admission of Newfoundland to the Canadian Dominion. It will certainly remove the only serious obstacle which Canadians have ever seen to such a union; but it is doubtful whether the Newfoundland will be any readier to give up a local control which they appear to value very highly.

It is hard to see just why the Newfoundlanders have so many doubts abouut the advisability of uniting with Canada. It would open a wider field to their public men; give them more money for the equipping of their country with public works; make them a present of a good market, duty free; and at the same time secure them cheaper produce of Canadian origin.

Still there is undoubtedly a strong feeling on the Island against entering Confederation, and the best friends of that policy admit that it will take time to educate the people to look upon it favorably. That being so, the proper attitude for Canada is to await this process of enlightenment. Any effort we might make to force the pace would be misunderstood. We have already made it clear enough that we are ready to be both just and generous to the people of Newfoundland in any arrangements which may be necessary for their admission to Confederation; and now our better policy will be to keep quiet until they are ready to meet us.

To My Old Customers

I wish to inform my old customers and the public in general that I will return to my old business of taking care of lawns, boulevards and gardens. Orders may be addressed to me at Peterborough Post Office, or at my residence, 499 Bethune street.

GEORGE LAWSON.

—The members of the Charlotte st. church choir will practice this evening at 7.30 o'clock.

—A young amateur detective is figuring out the size of the prisoner Armstrong's right foot. He claims to have seen the footprint in the middle of George street one day last week.

—A beautiful photograph of a graceful little girl, surrounded by Easter lilies, is being displayed in Mr. G. E. Whiten's show window. The execution is of the finest and the life-like nature of the picture has been much admired.

WEATHER NOTES

Friday—Continued unsettled.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBOROUGH, APRIL 1 1904

THE NEWFOUNDLAND QUESTION

The rumored settlement of the French Shore question has revived the interest in the possibility of bringing about at last the long-delayed admission of Newfoundland to the Canadian Dominion. It will certainly remove the only serious obstacle which Canadians have ever seen to such a union; but it is doubtful whether the Newfoundland will be any readier to give up a local control which they appear to value very highly.

It is hard to see just why the Newfoundlanders have so many doubts about the advisability of uniting with Canada. It would open a wider field to their public men; give them more money for the equipping of their country with public works; make them a present of a good market, duty free; and at the same time secure them cheaper produce of Canadian origin.

Still there is undoubtedly a strong feeling on the Island against entering Confederation, and the best friends of that policy admit that it will take time to educate the people to look upon it favorably. That being so, the proper attitude for Canada is to await this process of enlightenment. Any effort we might make to force the pace would be misunderstood. We have already made it clear enough that we are ready to be both just and generous to the people of Newfoundland in any arrangements which may be necessary for their admission to Confederation; and now our better policy will be to keep quiet until they are ready to meet us.

Outing for April

Most people believe that it will remain for Thomas A. Edison to give the world a flying machine that will really fly. What he has to say on this subject in April Outing will therefore be of special interest to every reader. In no uncertain terms Mr. Edison says what he thinks of the machines of Santos Dumont and the rest. He draws some significant conclusions as to just what principle will produce the perfect airship. A new photograph of Mr. Edison accompanies the article.

A name hardly less famous than Edison's, that Mr. John Burroughs, appears in Outing for the first time. In the April issue Mr. Burroughs begins a regular department, in which he talks in his intimate way of the things that live and grow and swim and fly about us. Mr. Burroughs's editorial connection with Outing is a notable one.

"Untraveled Russia" is certainly the most timely article in the number, being a vivid descriptive narrative of a trip through that part of the Czar's dominions visited only by the privileged few. Human-interest photographs printed on heavy plate paper help to make the article a living one.

Caspar Whitney, who is now in South America, completing his studies of tropical peoples, has another Sumatra story written in his usual vigorous style, "Uda Prang—Jungle" with photographs by the author. The sketch is one of a series which Mr. Whitney will soon publish in book form.

Fiction occupies its usual prominent place in the magazine. "The Silent Places," by Stewart Edward White; "The Outsider," a college story by Arthur Ruhl, and "Cap'n Nat's Story," by Clay Emery, are all full of the outdoors. As interesting as fiction is the story of "The Pony Express Riders," illustrated by striking full-page drawings of Buffalo Bill Cody and the rest of that brave band of carriers who plied between St. Joe and Sacramento before the coming of the iron horse.

Of special interest to various parts of the country and showing the broad field which Outing covers are "Maple Sugaring in the Northern Woods" by Hamilton Percival, "Snapper Fishermen of the Gulf," by Henry G. Rowland, "Highest on Mt. McKinley," by Robert Dunn, and "Catching Moose on Spring Crusts," written and illustrated by Leonidas Hubbard, Jr., the assistant editor of Outing, recently lost in Central Labrador.

Quite different in character but of equal interest is Blanche Bates' clever article on "Rough Riding on the Stage," with pictures of Miss Bates and her favorite ponies. "The Kitten in the House," by Zona Gale, will interest all who know and love those household pets.

Other articles of moment in the number are "The Rise and Fall of Poultry Booms," "How a Woman Learns to Ride," "Flaws of a Baseball Diamond," and "The Value of Last Year's Automobile." The usual departments by Edwyn Sandys and Joseph A. Graham complete the number. The new cover with its bright colors and the superb typography of the magazine make April Outing one of the most attractive publications of the month.

Your Children Are Run Down

They Are Liable to Get Fever or Pneumonia. Keep Your Little Ones Strong and Healthy with Ferrozone.

Parents can't afford to neglect the health of their children, for if disease fastens itself on the child of tender years it may be the beginning of a long train of serious sickness. Ferrozone is a remedy that mothers can rely on, and every child will be benefitted by using it. Mrs. Henrietta Laflame of Quebec, writes; "Last year my daughter, aged sixteen, was run down and looked very poorly. She was worrying about her exams, and she didn't feel strong enough to study very hard. I got some Ferrozone and it made a wonderful change in Marie. Ferrozone gave her strength and toned her up splendidly. I am very grateful to Ferrozone and know that children would be much stronger if treated with Ferrozone."

CHILDREN GROW STRONG ON FERROZONE

Mrs. James E. Devine of Frankford, says Ferrozone has no equal for strengthening children, and writes; "When my little daughter was weak and miserable I gave her one Ferrozone tablet at meals. She improved at once, and before taking Ferrozone a week gained in strength, and enjoyed a splendid appetite. I never used any tonic that gave such quick and permanent results as Ferrozone."

Every child can be made stronger by Ferrozone which acts on the blood and strengthens the entire system. Ferrozone is the sort of tonic that builds up strong healthy frames; it gives a child energy and spirit, and drives away weakness. Every mother should give her children Ferrozone, and give up all obsolete treatments like bitters and cod liver oil, which are hard on a child's stomach. Just one Ferrozone tablet at meals, easy and pleasant to take. Results are sure when you use Ferrozone. Refuse any substitute and insist on having Ferrozone which alone can build up and cure quickly. Price 50c per box or six boxes for $2.50, at all druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

An Easter Number

A truly Easter number is the April Canadian Magazine. The cover is a beautiful Easter design in colours, the special illustrations are suitable to the season, and the whole aspect of the issue is that of a notable occasion. To illustrate Mr Carman's "Church Art in Rome" there are some reproductions of famous paintings and pieces of sculpture which are creditable alike to the engraver and painter. The delicate colour effect obtained in these reproductions show considerable enterprise and a high degree of skill. The stories are more numerous than usual, and well selected. They are from the pens of Hubert McBean Johnston, W. A. Fraser, A. Seton Fox, Alice Jones and Caroline Marriage. That by Mr. Fraser, entitled "The Tea Dance at Fort Donald," introduces some of the characters from "Blood Lilies," and is undoubtedly in his best vein. Jean Blewett writes entertainingly of "The Ways of The Child," and her contribution is beautifully illustrated. There are two serious, yet most informing articles. One is "Wheat Growing in Canada," by William Saunders, Director Dominion Experimental Farms, in which he proves that the Northwest may easily produce 800,000,000 bushels of wheat per annum, or four times the annual requirements of Great Britain. The other is "Soil Utilization," by E. Stewart, who shows that Canada can best employ her waste lands by turning them into forests. The departments are interesting and replete with photos, cartoons, and pictures of current interest.

ADVERTISE IN THE TIMES.

THE ONTARIO ACCIDENT INSURANCE COMPANY.

Eighth Annual Report Submitted to the Shareholders at the Annual General Meeting held at the Company's Offices Toronto Street, Toronto, on Monday, the Twenty-second Day of February, 1904.

The Directors beg to submit to the Shareholders the Eighth Annual Report of the Company's affairs, together with the statement of the accounts for the year ending December 31st, 1903, and have pleasure in again drawing attention to the substantial increase in its transactions, and also to the very satisfactory results indicated by the abstracts.

The net income from Premiums, after deducting $9,320.95 for reinsurance, was $169,465.08.

The income received from investments amounted to $1,891.13.

During the year the Company paid under its policies 1,751 claims; the total, after deducting $2,698.21 received from reinsuring companies, amounted to $70,275.54.

The Revenue Account submitted herewith, after deducting all charges and expenses shows a balance of $30,950.28. This has been applied as follows $17,500.00 to Reserve, $10,000.00 to Contingency Account $2,621.70 in payment of Dividend No. 6, $828.58 unappropriated.

The Reserve Fund stands now at $45,544.16, and the Contingency Fund at $10,000.00.

The Company's paid up capital is at this date $43,006.05. The Securities deposited with the Receiver-General at Ottawa are $35,231.90.

The Premium Income shows an increase of $52,436.56 over that of 1902.

During the year the Directors had occasion to regret the loss by death of two of their fellow-members, Lieut.-Col. R. E. C. Jarvis and Mr. R. Shaw Wood, both of whom had been connected with the Company since its foundation. The vacancies thus created will be filled at to-day's meeting.

All of which is respectfully submitted.

LARRATT W. SMITH, President

Toronto, January 28th, 1904. CLARKSON AND CROSS, Auditors.

PROCEEDINGS OF THE EIGHTH ANNUBL GENERAL MEETING

The Eighth Annual General Meeting of the Shareholders was held at the Company's Offices, No. 3 Toronto Street, Toronto, on Monday, the 22nd of February 1904 at 2 o'clock, p.m.

The following shareholders were present—J. N. Shenstone, J. P. Steedman, (Hamilton), A. W. Thomas, A. L. Eastmure, G. H. Muntz, G. W. Monk, F. T. Lightbourn, J. F. Smith, F. J. Lightbourn, G. L. Smith, and 52 shareholders represented by proxy.

The chair was occupied by the Vice-President and Managing Director, Mr. A. L. Eastmure, and Mr. F. J. Lightbourn, the Secretary, acted as Secretary of the meeting.

Mr. Eastmure, on taking the chair, said—

"Gentlemen,—You will observe that our President, Dr. Larratt W. Smith, is not with us to-day, and Mr. Pearson and Mr. Mason are also absent. It is the first time in the history of the Company that Dr. Smith has been away on the occasion of an annual meeting. I am glad to be able to state that the indisposition from which these gentlemen have been suffering is disappearing and that we may hope soon to have all of them with us again."

The notice calling the meeting having been read by the Secretary, the Vice-President submitted the Report, together with the Financial Statements (the latter being read by the Secretary) and said—

"Gentlemen,—At our last Annual Meeting the President remarked, as a matter of mutual interest, that the results of the business for 1902 were perhaps the most satisfactory in the Company's history. That distinction may now fairly be claimed on behalf of the year just ended, as our growth in income and resources during 1903 exceeds greatly that of any previous year.

"As against $126,249.47 in 1902, the gross premium income for the year, including new policies and renewals, reached the sum of $175,796.03, and when it is remembered that the Company's operations extend now over a period of eight years and that its methods and practice have become well known, the result may be regarded as indicating that our plans are popular and that the Company enjoys the confidence of the insuring public.

"Last year reference was made to the steady growth of our annual income, and it may be of interest to repeat these figures. The increase has been as follows—

Premiums, 1896	$24,781 00	Premiums, 1900	$ 83,496 52
Premiums, 1897	31,440 56	Premiums, 1901	108,624 77
Premiums, 1898	46,125 58	Premiums, 1902	126,249 47
Premiums, 1899	71,867 36	Premiums, 1903	175,796 03

"The income from premiums on new and renewal risks since the Company commenced business now amounts, in the aggregate, to $676,161.50.

"The beneficiaries under the Company's policies, as at December 31st last, numbered in all 6,723; and the payments made to them amounted to $289,988.50, showing an average loss percentage on all transactions, covering the eight years during which the Company had been in operation, of 42.88 per cent.

"Claims were received during 1903 from 1,751 persons, for sums aggregating $72,973.75, all of which were adjusted and paid with the customary promptness.

"It will be seen from the statements laid before you that the Reserve has been increased from $28,000.00 to $45,500.00, and the Contingency Fund from $8,000.00 to $10,000.00.

"Including a balance of $8,734.15 carried forward from 1902, the surplus on the year's working equals 18 per cent. of the net income for 1903, and 70 1-4 per cent. of the paid-up capital; whilst our assets, which eight years ago amounted to $46,558.90, have now reached the considerable sum of $103,423.71, a result which I feel cannot be otherwise than satisfactory to the Shareholders.

"It will be seen that, continuing the policy, which has been observed from the beginning, of building up a strong Reserve, the greater part of our surplus has been carried to that fund and the Contingent Fund. In view, however of the satisfactory progress the Company is making, your Directors felt justified in again increasing the dividend, making the rate 6 per cent. for the past year.

"An earnest effort was again made during the later months of 1903 to complete the formation of the Accident Underwriters Association of Canada, and the preliminary articles were finally signed on behalf of all companies in November last. The organization has thus become an accomplished fact, and the next step should be the adoption of measures calculated to promote uniformity of practice between the companies, as affecting all questions of common interest, but, particularly, at the moment, in relation to liability lines. Having in view the uncertainty, not to say apprehension with which liability business is regarded by experienced underwriters everywhere, it is to be regretted that the movement, having for its object the placing of this important branch upon a more stable footing, has not made more rapid progress.

"In our last report mention was made of a new form of Personal Accident Policy (the Mercantile Combination), then in press, which it was anticipated would maintain the Company's reputation for enterprise and liberality. The expectation has been fully realized, as the plan was very favorably received, and continues in active demand.

"Having regard to the industrial development so apparent in the Province of British Columbia, special attention has been given to the Company's interests in that important territory; and in the hands of influential, energetic and efficient representatives our business there, already firmly established, promises satisfactory results.

"Did time and space permit, much might be said here in appreciation of the efforts put forth in every part of this broad Dominion by our General, District and Resident Agents, to whose loyalty, efficiency and zeal the Company owes much of its prosperity. I have pleasure, also, in testifying to the painstaking and satisfactory manner in which the duties of our head and branch office staffs have been performed, without which the same measure of success could not have been attained.

"As an earnest of the future, it is gratifying to be able to state that the premiums on policies issued during January of the present year show an advance of 20 per cent. over the corresponding month of 1903, whilst the claims payments for the same month were below the average.

"I now beg to move, seconded by Mr. J. N. Shenstone, That the Eighth Annual report, now submitted, be adopted, and that the same, together with the Financial Statements read therewith, be printed, and a copy thereof forwarded to each of the Shareholders.

"In the meantime, if any Shareholder would like to make any observation, or ask for any information, it will be in order to do so."

The meeting was then addressed by Mr G. W. Monk, Mr. A. W. Thomas, Mr. G. H. Muntz, Mr. J. F. Smith and Mr. F. J. Lightbourn, all speaking appreciatively of the excellent progress the Company was making, the latter mentioning specially the Company's sickness branch, which, though developing rapidly, was still in a somewhat experimental stage. Mr Lightbourn pointed out that with the present limited statistics it was difficult to ascertain whether sufficient premium was being charged for the hazard. There was a growing feeling that higher rates should be asked, and an advance might be anticipated in the near future, particularly in the case of policies providing benefits against disability occasioned by illness from whatever cause arising. During the year the question of uniform phraseology in personal accident policies had been further considered by the committee of the International Association of Accident Underwriters appointed for that purpose, and so active and practical had the work of that committee been that already a considerable number of fundamental clauses had been carefully recast and are recommended by the Association for general adoption.

It may be interesting to note that during 1903 the "Ontario Accident" issued 6,580 policies for insurances, aggregating $13,939,350.00, as against 5,490 for $12,856,965.00 in 1902, and that the premium income shows an increase of $52,436.56 over that of the year preceding.

The report was adopted unanimously, after which it was moved by Mr. G. H. Muntz, seconded by Mr. J. F. Smith, and carried,

That the thanks of the Shareholders are justly due to the Company's General and District Agents in the several Provinces for the zeal and efficiency displayed by them in their several departments during the year."

On motion, Messrs. Clarkson and Cross were reappointed auditors for the ensuing year.

Mr. A. W. Thomas and Mr. F. T. Lightbourn, having been appointed scrutineers, reported the following gentlemen elected as Directors—Larratt W. Smith, A. L. Eastmure, W. H. Pearson, J. Herbert Mason, J. N. Shenstone, F. J. Lightbourn, Thomas Fyshe (Montreal), J. F. Smith, K.C., and G. W. Monk.

After the usual vote of thanks to the President, Vice-President, Directors, Secretary and officials in the office the meeting adjourned.

At a meeting of the Directors, held immediately after the annual meeting, Dr. Larratt W. Smith was re-elected President, and Mr. A. L. Eastmure, Vice-President of the Company.

Executive Committee—Messrs. Larratt W. Smith, A. L. Eastmure and W. H. Pearson.

HUBBARD DIED IN BRAVE FIGHT

Companion Writes of End of Labrador Explorer

PATHETIC DAIRY RECORDS

Graphic Description of the Suffering he Endured During his Last Days

The story of the death by starvation of Leonidas Hubbard, jr., the explorer, in Central Labrador, on or about Oct. 18 last, is told in a letter received recently from A. Dillon Wallace, a lawyer of New York, who, with a Cree Indian guide, George Elson, accompanied Hubbard on the journey.

The letter is in part as follows—

"North-West River, Labrador, Dec. 3, 1903.—The story of our awful experience is too long to go into a letter. I will merely say that we plunged madly into the interior of an unknown country, into regions never before trod by white man, with almost no provisions. For our trip we should have had at least 550 pounds of flour—we had 120 pounds; we should have taken 120 pounds of bacon or pork—we had 25 pounds, and so on all down the line.

Lived on Caribou Meat

"On July 15 we left North-West River, and on August 1 were practically out of provisions. On Aug. 3 we killed four geese, on Aug 12 a big stag caribou; from that forward we lived on the caribou meat, which we had dried but which was soon gone, and at long intervals a goose or duck or grouse we succeeded in killing with our rifles or pistols, and fish we caught with our rods.

"Early in September the weather grew too cold for the fish to bite. Until then we did very well, but after that we were often without anything to eat, and our meals were simply tea. Our salt and sugar were gone early, and we ate everything boiled and drank the water our food was boiled in. Birds, like grouse, ducks, etc., were eaten wholly—heads, entrails, feet and everything but the feathers—and every part of the fish."

These are but a few of the details of the fight for life made by these three men, which finally resulted in Hubbard's death and the narrow escape of the other two members of the expedition.

◆

IF RUSSIA WINS

Chas. E. Smith Prophecies European Land Grab in Asia

Philadelphia, March 29.—"In the event that Russia is victorious in the war with the Japanese the probable result will be an agreement among the European nations for the partition of China. In this division each power would control its own territory, and, as we do not want and would not have any territory, we would not have an equal chance. Such a result certainly would be unwelcome."

So declared Charles Emory Smith, former ambassador to Russia, in an address before the monthly meeting of the American Academy of Political and Social Science to-night. The subject of discussion was "The Struggle in the Far East; Its Causes and the Issues Involved."

Mr. Smith said that no one will challenge the right of Japan to provide for her own protection, and that by every right of national life and safety she is entitled to take care that Korea shall not be in the hands of a hostile or unfriendly or menacing power.

Other speakers were William Dudley Foulke, United States civil service commissioner; Professor Lindley Miller Keasbey, of Bryn Mawr College, and Brigadier General James H. Wilson, U.S.A. President Edmund J. James, of Northwestern University, presided.

EVERYBODY READS THE TIMES.

The Elwood Tinworker's Gold Mining Company.
ORGANIZED JULY 1902

CAPITAL STOCK $150,000
PAR VALUE OF SHARES $1.00.

The mining claims of this company consist of two full claims namely

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offe a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of $200,000 with shares at $1 each.

The officers of the Company are C. F. Buman, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $200,000 capitalization, in shares of $1 each, $110,000 worth is issued, the first small allotment of this was sold at 60c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have 221 acres under aid with three distinct veins, or layers of coal which are 4½ feet thick each. The first one at a depth of 287 feet, it is this vein which we are now mining, the second one is at a depth of 330 feet and the third at 461 feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth 561 feet. The mine is fully equipped and in good repair and working order Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than 200 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than 65c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease, as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from $2.75 to $3.50 for Mine Run and $2.75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 20 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $300 each. we predict that this stock will be worth not less than $3 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President.

169 Washington St, Chicago, Ills.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING · LOS ANGELES, CALIFORNI

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gangoo, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller. developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 1-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 25th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th country, The officers are all men of standing and good, conservative business men, The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O, Prescott, Ariz, 1-20-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly.
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

THE DONATIONS TO OLD M'GILL

Vast Sum Which Has Been Given Since Inception

IT IS NOW OVER $5,500,000

This Includes Donations of Land, Endowments Special Sums for Chairs Buildings, Etc.

Montreal, March 30—Sir William McDonald's recent very handsome gift to the Students' Union is a further reminder of the extent to which McGill is indebted to Montreal citizens.

The list of benefactions to McGill University is a very long one. In addition to the large gifts of such men as the Hon. James McGill, Sir William McDonald, Peter Redpath, Esq., Lord Strathcona, the Molsons, etc., there have been a large number of substantial donations which have not excited quite as much comment in the public press, but which have, nevertheless, been of much service to the University and the cause for which it stands. The total donations in land, buildings, apparatus, together with the Hon. James McGill's original endowment and donations in land reaches the value of $2,300,172.72.

Miscellaneous endowments reach the sum of $2,074,505.78, while special chairs have privately been endowed to the value of $962,393.22.

A sum amounting to $60,790.80 has been contributed to a fund for establishing scholarships, granting medals, etc. The total amount in donations of lands, endowments, etc., reaches in sum total the very handsome figure of $5,597,861.62

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1.20 a ton. Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3.00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

—THE—

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

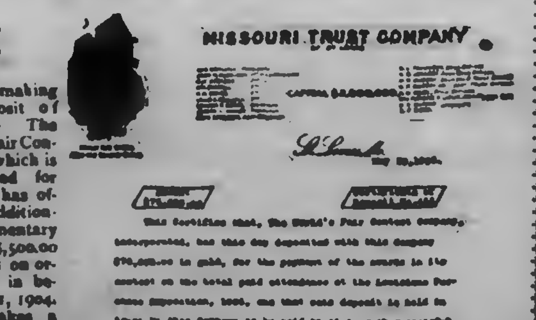
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904. An extra prize of $5,500.00 will be paid o orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1880 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,500.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 250 nearest correct estimates, $10 each	2,500.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE one Certificate and Coupon entitling you to chances in the prizes of $75,000. and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and quickly exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1880 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly in your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00 This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

JAPS WILL STUDY RELIGION

Come to See How Much It Enters Into Daily Life

Seattle, Wash. March 30.—A party of wealthy Japanese has arrived to visit the principal centers of the United States, inspect rolling-mills and factories of all kinds, look into the condition of the poor, examine the practical working of the laws and ascertain if possible whether religion enters to any appreciable extent into the actual daily life of the people.

One of the party, a graduate of Tokio University, said that, after most careful examination, absolutely unprejudiced and free from preconceptions, the Japanese had unanimously and unhesitatingly rejected the religion of the Europeans as something which they did not want and did not need.

CYCLONE REVEALS CRIME OF BIGAMY

Former Hamilton Woman Discovers Missing Husband

NAME APPEARED IN PAPER

House Was Domolished in Indiana and Publicity Ended in Five-year Sentence

Hammond, Ind., March 29—The Indiana harbor cyclone was a fateful Nemesis for James McInerny, of that city. It destroyed his house, and through the publication of his name in the Chicago papers, enabled Olivine Lebaie Anglais, of Chicago, his first wife, who had been searching for him and their daughter for 9 years, to ascertain his whereabouts.

Two years ago McInerny married 19-year-old Christine Johnson. With her friend, Francis McCormick, of Chicago, Olivine Anglais went to the Harbor and had McInerny arrested for bigamy. This afternoon a jury in the Hammond Superior Court sentenced the prisoner to five years in the State Penitentiary.

It was in 1889, at Hamilton, Ont., that McInerny, a contractor married Olivine Lebaie, who told him that she had been married before to Fred Anglais, who had deserted her and gone to the North-West Territory Later she was informed that Anglais was dead. Two years after, a daughter was born to the McInerny couple. A traveling man told him that he had met Anglais in Manitoba at Portage La Prairie alive and well. McInerny then fled with his daughter. His wife moved to Chicago, and could find no trace of him until his name was published last Thursday.

HOPES JAPAN WILL WIN

PROMINENT RUSSIAN OFFICIAL SO EXPRESSED HIMSELF

Engineer Sent Out by Russian Government Says it is Sad and Brought on War

Toronto, March 31.—A Russian who does not wish for Russian success in the war with Japan is Mr. Anatol D. Semenoff, civil engineer of Zenatov, Perm, Russia. He was sent America by the Russian Government, he says, to make a thorough investigation into the systems of sewage disposal. He called upon City Engineer Rust today, and will inspect the system here.

Mr. Semenoff expressed himself in the most pronounced terms as representing the voice of the people when he said that they were opposed to the war, and that it was the Government that was responsible for the trouble.

"What is your hope for the outcome of the war?" Mr. Semenoff was asked.

"It will be to the advantage of our people in Russia is defeated in this war. We have a bad Government, and the people want more liberty," replied Mr. Semenoff. "If Russia wins the people cannot hope for any more liberty than we have now, but if we lose we think it will be to our advantage."

"The Government say and the people pay," is the terse way in which Mr. Semenoff described the position of the people and the Government.

Mr. Semenoff was accompanied by his wife, who spoke English with greater fluency than her husband, and endorsed his views from the standpoint of the good of the Russian people. They have already visited Europe and the United States.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 330 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail. We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world."

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $50 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $36 25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. water power of 500 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER Secretary-Treasurer. Boulder, Colo.

KEEPS THE BOYS AT HOME.

Farmers' Association in Southern Illinois Has This Object for Its Principal Aim.

The continual exodus of boys from the farms of southern Illinois to the cities is being combated in this section of Egypt by a society bearing the name of Farmers' Relief association. The association is the outgrowth of an idea hatched in southern Illinois, and in the seven counties where the society is organised its effects are plainly seen, says the Chicago Inter Ocean. The rush of young men to St. Louis, Chicago and Cincinnati has been almost completely stayed. The farmers' boys are themselves members of the new organization, which has in a manner furnished attractions to rural life which largely offset the allurements of the city.

The Farmers' Relief association is modeled somewhat upon the lines of the trades union, and embodies some of the best and most reasonable features of former ill-born farmers' societies. The central idea of the association is to make country life attractive. The founder, James H. England, contended that if in each school district the families could be brought into closer social relations and the life given some little variety the problem would be solved.

The school district was made the unit in the plan. The school teacher was raised from mere pedagogue to social arbiter. He is called the chairman of the community committee, and he sees that there is always "some sort of doin's," as the people say The Wagner school district, a few miles south of Carbondale, is the best organised community. In the Wagner society every person in the district, transient or resident, is entitled to membership. To the social events of the district the rural pedagogue invites every man, woman and child. That means that there are no feuds, no quarrels, no wrangling, in the community, for all the people meet in a social way

The society has gone further than this, and has installed a school district telephone system. An old lady who has nothing to do but darn heavy homeknit socks or sew carpet rags is the "hello girl." Each family in the district pays five dollars annually for the use of a telephone, and they use it. The young men do their courting over the telephone when the weather is bad, and the only complaint of the telephone service to be made so far was that one rainy night Cupid had connected so many of the subscribers that a very sick man could not get a message through to the doctor in Carbondale. The man did not die, however.

As soon as the telephone system was in working order the school teacher organised a string band. This country musical organization furnishes the music at the dances and the church sociables. The band has a repertoire that includes everything from "The Arkansas Traveler' to "Comin' Through the Rye," and there is hardly a night in a month that it is not engaged.

The Home league, the twin sister to the Farmers' association, is the woman's club of the country It is conducted on the same lines as the clubs in the cities. It conducts a class in domestic science, and does its share of entertaining. The two organizations combined have hit the credit, or "on tick," system a knockout blow. If a member has anything to sell he must demand cash for it. If he buys he must pay cash.

All these things combined have helped to make country life attractive to the country people. When all the plans are fully carried out the organisers believe that the young men, or the proportion of them which remain in the country, will be satisfied to stay out of the cities.

Early Gold Stampede.

The voyage of the Argonauts, the date of which is uncertain, was professedly a rush for gold, to be collected in fleeces placed in the torrents flowing down the flanks of Mt. Caucasus. But older much was the westward movement, which Chaldean records of 3800 B C. chronicle, to the gold-bearing land of Melukhha, afterward known as Midian. Later on, but still at a very early period, there was a rush from Egypt to a spot inland from the present Suakim. Long afterward this was described by Diodorus Siculus, who left a map, still extant, showing the wells provided for the gold seekers between the Red sea and the mines About 1000 B C. there seems to have been another rush of miners in search of gold into South Africa. Its numbers can only be guessed at from the extensive remains that still exist.—Stray Stories.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from the railroad station and thirty-five miles from Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. The average assay of ore taken from the various shafts is $31 52 per ton. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservatively organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore. and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75 cents

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 200 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

CATARRH

RUINS HEALTH AND BEAUTY CAUSES THE WEAK TO DIE Y UNG INVARIABLY LEADS TO CONSUMPTION.

Thousands Annualy Cured by Catarrhozone

MR. ARCHIBALD BASS, of New Harbor, writes; "Catarrhozone proved itself a remarkable remedy in my case. I suffered terribly from catarrh in the throat and my nose was so stuffed up every morning I could hardly draw my breath. The mucous dropped back into my stomach, upset my digestion and kept me sick all the time. Catarrhozone relieved in a short time and cured perfectly."

MRS. W. F. BREACH, of Chapman, writes; "I have used a great many catarrh remedies but none of them ever helped like Catarrhozone. It cleared out my nose and throat and stopped a ringing noise in my ears. Catarrhozone is very pleasant and simple to use and many times better than any other catarrh remedy."

MR. LAWRENCE KENNEDY, of New West Annan, says; "For three years I tried doctors but my catarrh grew worse and worse. I got no relief till I used Catarrhozone. It was not very long in curing me so perfectly that the disease has never returned."

MR. JOSEPH De ROCHE, one of the most prominent and highly respected citizens of Loggieville, N.B., says; "I used Catarrhozone for a sore throat, cold in the head and head ache. I always felt relief immediately. It cured the discharge from my nose and restored my sense of smell lost through the effects of catarrh."

Catarrhozone is simple, convenient and pleasant. It is warranted to instantly relieve and permanently cure.

Complete outfit consists of a beautiful polished hard rubber inhaler and sufficient liquid for recharging to last two months. Costs $1.00 or sample size 25c. Sold by all druggists, or sent by mail to any address if price is forwarded to N. C. Polson & Co., Kingston, Ont., or Hartford Conn., U.S.A.

ACCIDENT INSURANCE GROWS

Phenomenal Record of the Ontario Accident Insurance Company

The eighth annual report of the Ontario Accident Insurance Company, published in this issue, will make interesting reading to everyone who is interested in accident insurance, and it will especially attract the attention of those whose business requires them to travel frequently. Apart from the satisfactory nature of the report itself—and it shows the best year's business in the history of the company—the information contained in it is particularly valuable as demonstrating the remarkable growth of accident insurance in this country. In its development it may be said the Ontario Accident Insurance Company claims to have received its full share, and the figures given in the annual report point to a really phenomenal growth in the business of a company which, in extending its operations, has left hardly a point in the Dominion of Canada untouched.

Some of the figures contained in the annual report are suggestive. The premium income increased by $52,436.56 over that of 1902, and last year stood by $178,786.03. The growth of the reserve fund, too, has reached a point, $45,500, which exceeds the paid-up capital of the company, a testimony to efficient and conservative management.

That accident insurance is becoming yearly more popular is seen in the number of policies issued by the Ontario Accident last year, 6,580, aggregating $13,939,850; while the necessity for such insurance may be gathered in the number of claims paid in the same period, 1,751, for sums aggregating $72,973.75.

While building up a strong reserve, the directors, in view of the satisfactory results of the year's business, felt justified in again increasing the dividend, making it 6 per cent. for the past year.

A particularly valuable and attractive plan of insurance, recently inaugurated by the Ontario Accident, is known as the Mercantile Combination Policy, one of the broadest and most comprehensive policies, it is claimed, that has ever been placed before the public. This policy is absolutely without restrictive conditions; it pays immediate cash for no less than 201 named injuries, pays surgical fees for general accidents, and includes sickness features where the policyholder desires. The varied extent of the business transacted includes accident sickness, accident and sickness combined, employers, elevator, teams, vessel, theatre, merchants', contractors', owners' and builders' contingent, general and public liability, workmen's collective. These plans, too, are adapted to meet the special legislation of the various Province.

A report such as the above reflects the greatest credit on Mr. A. L. Eastmure, the Managing Director, whose child the company really is. The gentleman who has for years represented its interests in this district is our esteemed townsman Mr. George K. Martin, who has always kept it well to the fore in insurance circles.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Fred. Collins is home from St. Andrew's College.

—Miss Janet Wilson is home from the Whitby Ladies' College.

—Mrs. D. Fraser, of Norwood, visited Peterborough friends yesterday.

—Mr. G. A. Cameron, of Peterborough, is a guest at the Simpson House.—Lindsay Post.

—Miss Mabel Tully, of Midland, who has been visiting friends here, left yesterday for Midland.

—Mrs. J. H. Chambers and Miss Mabel Chambers, of Manvers, are visiting friends in this city.

—Mrs. White, accompanied by her sister, Miss Hannah Byers, both of Bethany, are spending the Easter holidays in Peterborough.

—Mr. H. A. Pearson, secretary of the Y.M.C.A., Collingwood, passed through the city yesterday on his way to Lindsay.

—Mrs. (Rev.) Jas. G. Potter and children left yesterday to spend the Easter holidays with relatives in Kingston.

—Mr. Harvey Pearson, of Lakefield, was in the city yesterday, and was a pleasant caller at our sanctum.

—Mr. Gladstone Main, of the local branch of the Bank of Montreal, left yesterday for his home in Galt, where he will spend the Easter holidays.

—Messrs F. Clark and E. Best leave for Toronto today to attend the annual meeting of the C.L.A. to be held there today.

—Messrs. W. Adamson and L. Dobbin are commencing in business for themselves, in the plumbing and heating business. Both are experienced mechanics, and we wish them every success.

—Mr. Geo. L. Bull, formerly of Burk's Falls, Ont., has entered into a partnership with Mr. D. O'Connor, barrister, and henceforth the firm will be known as O'Connell and Bull.

—Mr. Gordon Lee, of this city, and formerly in the employ of the C.G.E. Company, has accepted a position in Toronto. The Times wishes Mr. Lee every success in his new home.

—Mr. Chas. Whiten, of the P. W. Ellis & Co., wholesale jewelry firm, Toronto, arrived in town last evening on a short visit to his parents, Mr. and Mrs. G. E. Whiten, Aylmer street.

—The Times had a pleasant call from Mr. George B. Hilliard, Lakefield, yesterday. Mr. Hilliard reports business booming at the Strickland Canoe Company's Works, of which he is the manager.

—Mr. G. H. Halpin, of St. Louis, Mo., is spending a few days with his parents, Mr. and Mrs. John Halpin, Hunter street. On leaving Peterborough Mr. Halpin will go to Philadelphia, where he will join the R. K. Mulford Company's travelling staff.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—Sunday will be the last day of Lent.

—There were no cases heard at yesterday morning's police court

—There will be no meeting of the Primary and Junior Union today.

—The Easter number of the Grit with a fine picture is now ready.

—March came in like a roaring old lion, but she went out like a cub.

—Householders are having a trying time with leaky roofs and flooded cellars.

—Today is Good Friday, and services will be held in George street church at 11 o'clock this morning.

—Several tramps have been seen around the suburbs. This is, perhaps, the surest sign of spring.

—Owing to today being a holiday there will be no issue of The Times to-morrow morning.

—The Y.M.C.A. building will be closed from 1 o'clock tomorrow afternoon, until Saturday morning.

—Today is All Fools Day. Those who were duped by swindler Armstrong should shake hands with themselves.

—Mr. P. B. McIlbargey shipped a carload of hogs, and Mr. J. Moore a load of hogs and cattle, to Peterborough and Toronto on Wednesday. The price paid for hogs was $4.50 per 100 lbs.—Lindsay Post.

—The Peter Hamilton Foundry Company has had a busy winter, and as a result about 400 mowers, 350 binders and 300 drills have been turned out.

—Over fifty Italians, under the superintendance of Frank Merino, left last night for Havelock, to unload several cars of new steel, which will be laid on Roadmaster Malloy's division.

—The Campbellford correspondent of the Port Hope Guide writes as follows;—"Mr. H. Swanson, who has spent the last thirty years working on the section of the Grand Trunk Railway, has secured a good position in Peterborough and intends taking up his abode there in about two weeks."

—The man who doesn't advertise in prosperous times because he doesn't need to, nor in hard times, because he can't afford it, is like the Arkansas man who didn't repair his leaking roof in fair weather, because he didn't need any roof. And, of course, he couldn't work in the rain.

JIST SUM THINGS

BY SI JONES

Spring is here with boath feat at last, altho it looks as if it hed past thru a hard winter to git here. But niver mind yer expearence we welcum ye rite heartily with boath hans, an' hope ye've cum ter stay erwhile. We've hed nuff winter ter stand us fer yeres, an the next man who complains of too warm wether ought ter be tried an sentenced an er monument erected over his remanes fer bein er genooine grumbler. Fer mi part mi ole age won't stand the severe winters an I'd sooner hear the grasshoppers than the slaybells eny day. They is moar in ercordence with natur, and roomaticks.

• • •

But spring hes its perculiarities too. Least wise the old woman hez her perculiarites erbout this time of the year, and I soppos othem wimin's husband's wives hez ther's too. It is er time of war and skirmishes in the househoied. Its er time when the kitchen cat's life aint worth a straw unless she hunts fer other quarters. Its er time when womin's temper is tride an man feels that he was made fer mourn. Its a time when the kumandments is more shattered then at eny other time doorin the yere. I respeckfullie refers to the housecleanin' time. Evry man knows es well es I do what this term meens an' if tha don't then tha aint married yet. If a man a komercial traveler erbout this time of the yere he's in luck, cans' he kin errange ter be way frum home, but sum of us aint so lucky. We've git ter witness the hole struggle.

• • •

No matter how good a man is doorin the rest of the tweele munths, he might be excused fer swarin wunce dooring housecleanin time. His meel hour aint regler, his meels is cooked on ther gas stove, an ther gas that escapes from the worried femails is nuff to assyfixate eny ordinary humin bein twice over. If ye complain of dust or sich yer led to feel that yer day of domestick reckenin is cum. If yer wise ye jist down yer scant vittles grab yer hat an hustle back ter yer place of bizness, without evin kissin yer wife goodbye. Never try ter kiss yer wife when she not in good humor. Its er dangerus transackshion, and liable ter lead ter familie truble.

"I am well now and enjoying better health than ever before in my whole life."

That is the statement of a woman who had never been well until she was made well by the use of Dr. Pierce's Favorite Prescription. There are a great many other women in like case. They have always been sufferers from disease. They have never known the joy of perfect health.

For all such women Dr. Pierce's Favorite Prescription holds out the prospect of perfect and permanent health, by the cure of the womanly diseases which weaken women. It establishes regularity, dries weakening drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"It gives me pleasure to let you know of the great benefit received from Dr. Pierce's medicines and the advice which you so kindly sent," writes Mrs. Bertie Parker, of Bonham, Fannin Co., Texas. "I took your 'Favorite Prescription,' 'Golden Medical Discovery' and 'Pleasant Pellets,' and followed your advice regarding the 'Lotion Tablets,' and am cured. I had been treated by different doctors and spent one hundred dollars for treatment and medicine, but received very little relief. I have only spent seventeen dollars and fifty cents for your medicine and it has cured me in three or four months of ulceration and falling of uterus. I suffered severe misery in my back, also irregular periods. Had bearing-down in lower portion of body and great pain all through my body. Pain in uterus was very severe. Had smothering spells, breath was very short all the time, had pain in stomach, pain in my thighs, pain in breast, also between my shoulders. Bowels constipated. I am well now and enjoying better health than ever before in my whole life. Am happy to tell you that I was cured by your good advice and good medicines, the 'Favorite Prescription,' 'Golden Medical Discovery,' 'Pleasant Pellets' and 'Lotion Tablets.' These medicines cured me and will cure others also."

The dealer who offers a substitute for "Favorite Prescription" does so to gain the little more profit paid on the sale of less meritorious medicines. His profit is your loss, therefore accept no substitute.

Dr. Pierce's Pleasant Pellets regulate the bowels.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Parry Sound Wharf," will be received at this office until Monday, April 25, 1904, inclusively, for the construction of a pile wharf at Parry Sound, District of Muskoka and Parry Sound, Ontario, according to a plan and specification to be seen at the office of H. A. Gray, Esq., Engineer in charge, Harbor Works, Ontario, Confederation Life Building, Toronto, on application to the Postmaster of Parry Sound, Ont., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the printed forms supplied, and signed with the actual signatures of tenderers.

An accepted check on a chartered bank, payable to the order of the Honorable the Minister of Public Works, for two thousand dollars ($2,000.00), must accompany each tender. The check will be forfeited if the party tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS,
Secretary.

Department of Public Works,
Ottawa, March 25, 1904.

For prospectus and full particulars address:

The Cooperative Investment and Exploration Company

311 Quincy Building Denver, Colo.,

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colorado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10.00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

BRITISH FORCES KILLED OVER 300 THIBETANS

Natives Massed Together in Mad Excitement Killed Each Other as the Sikhs Charged with Bayonets

Tuna, Thibet, April 2—The Thibetan general, the whole of his personal escort, and five high Lhassa officials were among the hundreds killed in the fighting of March 31, at Guru, Thibet. The small British losses are accounted for by the fact that the Thibetans were so huddled together that the majority were unable either to use their swords or to fire. The swordsmen in the front rank could not reach the Sikhs who had fixed bayonets, while the mob could not reach the enemy, but many of them probably killed each other in the mad excitement.

The scene recalled old-time fights in cockpits, the grim, determined faces of the Thibetans lighted with devilish savagery, expressing contempt for the Sikhs, whom they outnumbered six or seven to one.

When the Lhassa general fired the first shot, the Thibetans, with wild shouts, drew their swords, fired their matchlocks, and surged forward in all directions. About a dozen swordsmen made a desperate rush in the direction of Col. MacDonald.

EASTER SUNDAY SERVICES

IN THE DIFFERENT CHURCHES WERE OF A SPECIAL ORDER

GEORGE STREET CHURCH.

The Easter service began by a sunrise meeting of the Epworth League at 7.30 o'clock, and at 10 a.m. a fellowship meeting was held. At the 11 o'clock service Rev. J. P. Wilson, B.A., spoke on the subject "Death Interpreted by Easter," and in the evening the subject was "Resurrection—Now is Christ Risen From The Dead." The following beautiful music was rendered by the choir, under the leadership of Mr. G. W. Mulligan;

Morning.

Organ, "Celestial Voices" ......Flagler
Anthem, "Christ, our Passover" ....O. Darnton
Anthem, "Awake, Thou that Sleepest" (Baritone solo, G. W. Mulligan) ....Maker
Offertory, "The Saviour Arose Today"...... ....I. H. Meredith
Postlude, "Triumphal March," ... . S. Dalby

Evening.

Voluntary, selections from "The Messiah" ....Handel
Anthem, "Fair o'er the Hillside," (adapted from Rubenstein.)
Solo, "Lord of Light and Glory," ...... Mr. F. C. S. Turner.
Anthem, "O Death, Where is Thy Sting," (special staccato passage for pass in unison.)... ...E. Turner
Offertory solo... ... Mr. A. L. Davis
Postlude, "Hallelujah Chorus," Handel

MURRAY STREET BAPTIST.

Special Easter sermons were preached yesterday by the pastor, Rev. J. Bastow, M.A., and beautiful music added to the enjoyment of each service. The Sacrament of the Lord's Supper was administered at the close of the morning's service. The following is a programme of the special music rendered;

Morning.

Anthem, "Hail, Thou Happy Morn."
Solo, "The King of Ages,"...... .... Mrs. G. B. Miller.
Anthem, "I Know that My Redeemer Liveth."

Evening.

Anthem, "I Will Extol Thee."
Solo, "The Resurrection," .... Miss Hall.

ST. PAUL'S CHURCH.

The services both morning and evening were conducted by the pastor, Rev. E. F. Torrance, and the subject in each case was "The Resurrection." Special music was furnished by the choir.

ST. JOHN'S.

All the services of St. John's were well attended, especially those of Morning and Evening Prayers, when the sacred building was crowded to the doors. The choral portions of the 11 a.m. and 7 p.m. services were of a specially joyous and pleasing nature, and the choir is to be congratulated on the excellence of its efforts under the direction of Mr. Gliddon. The solo parts were taken by Miss Ruth Dawson and Mrs. Seward in a very creditable manner indeed. Miss Dawson is deserving of special mention for her rendition of "Christ Our Passover," her rich soprano voice being very suitable to the different solo parts of this beautiful anthem, and her enunciation pleasingly clear and distinct. Miss Stevens also displayed considerable skill in her work at the organ. Rev. E. L. King, M.A., lecturer at Trinity College, Toronto, preached two eloquent sermons, one in the morning and one in the evening. The floral decorations on the altar and in the chancel were rich and profuse. The morning's offertory for the Rectory Fund amounted to $231; that of the evening service will be announced at the Vestry meeting tonight.

ALL SAINTS' CHURCH

Services were held at 8 a.m., and at 11 o'clock, and at 3 o'clock in the afternoon a special children's service was held, at which a large number of scholars were in attendance. Special Easter music was much enjoyed by the large audiences present, and the rector conducted the services.

ST. ANDREW'S.

Rev. J. G. Potter officiated at both services yesterday, and the special Easter music was much appreciated. At the morning service the anthem, "See Now the Altar," was rendered by the choir, and Mr. A. E. Young sang the solo. Mr. Sydney Glass sang "Awake, ye Sons of Light and Glory." In the evening there was a "Service of Song" with an address on "The Story of Christ."

CHARLOTTE STREET.

Both services were conducted by the pastor, Rev. W. J. Jolliffe. In the morning an able discourse was delivered on the subject, "Risen with Christ," and in the evening the pastor spoke on "Heart Burning on the way to Emmaus."

MARR STREET.

There were special Easter services yesterday and handsome floral decorations. The pastor, Rev. J. G. Lewis, conducted both services, and his morning subject was "A New Life Power Through the Resurrection," which was preceded by a short talk to children on "Flowers." In the evening an able discourse was delivered on the subject "Evidences and Lessons of the Resurrection."

PARK STREET BAPTIST

Special sermons were preached yesterday by the pastor, Rev. A. H Brace, the morning subject being, "A Burning Question, and How to Meet it," and in the evening the reverend gentleman spoke on "The Spirit World in Commotion." At the close of the morning service the Ordinance of the Lord's Supper was observed.

ST. LUKE'S.

Both services yesterday were conducted by the pastor, Rev. Mr. Hojah, and large congregations were present. Profuse decorations added greatly to the appearance of the church, and the Easter music was well rendered. In the morning the pastor spoke on the subject, "Why seek ye the living among the dead?" and in the evening he spoke on "Thy Brother shall rise again."

SALVATION ARMY.

Yesterday's services at the Salvation Army were conducted by Brigadier and Mrs. Southall, of Toronto. Mrs. Southall, who is the Women's Social Secretary, delivered an address on the rescue work of the Army yesterday afternoon. This evening at eight o'clock the League of Mercy will be commissioned.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—Navigation will be late in opening this year.

—A hot summer is predicted by many scientific men throughout Canada and the United States.

—"Oi hiven't seen sich a hard winter this hundrid years," said a Peterborough Irishman the other day.

—An "At Home" and gymnasium closing will be held at the Y.M.C.A. this evening.

—The regular meeting of the Board of Education will be held at the Secretary's office this evening at 7.45 o'clock.

—A series of talks to boys will begin at the Y.M.C.A. this evening and continue each evening during the week.

—The Committee of the Whole Council and the Fire, Water and Light Committee will meet this evening.

—An important meeting of the Old Country Wanderers' Club will be held on Wednesday evening at the Crown hotel, commencing at 8 o'clock.

—Mr. T. J. Wallace, formerly of Keene Public School, was presented with a handsome mantel clock, on Friday last, previous to his departure from that place.

The Never Learn Club meets this evening in the Forester's Hall, Simcoe street, and will hold their last dance of the season. A Toronto orchestra will furnish music.

—An announcement appeared in a recent issue of the evening papers that Mr. Hally was about to leave for England. Mr. Hally wishes The Times to contradict this statement, as his intentions are to remain in this country for an indefinite period.

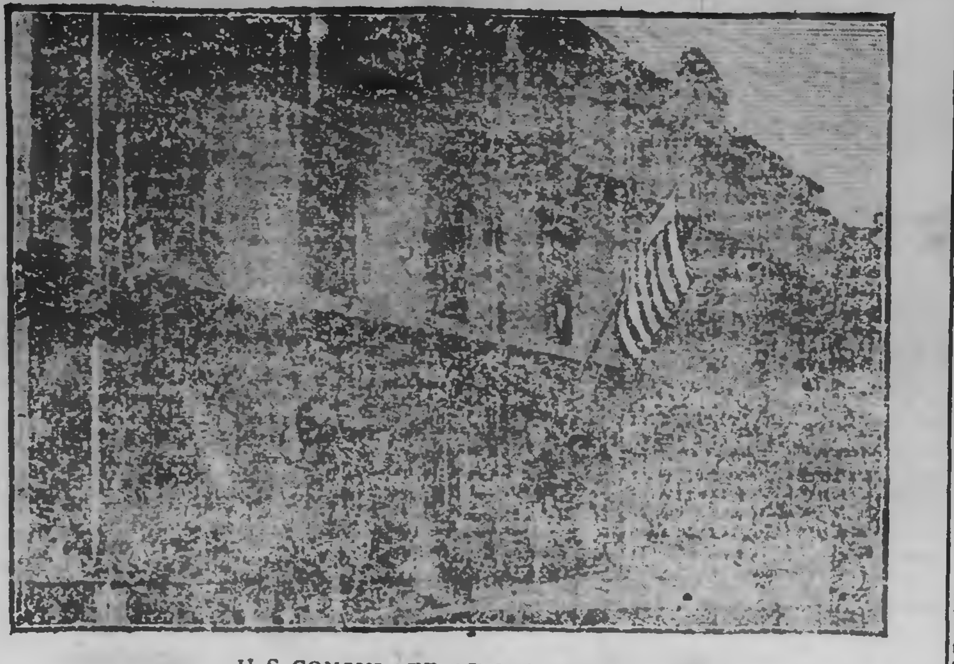
—The Omemee Council is advertising for a printer to open an office and issue a newspaper there, and that too in face of the fact that it has wilfully starved out several printers during the past twenty years.

—Yesterday afternoon as three Italians were driving along George street, in front of the City Hotel, one of them suddenly jumped out of the buggy and started down the street in pursuit of several small boys who had laughed at their action. Several citizens interfered and the Italian made himself scarce before anything serious occurred.

—One comfort to be had from the hard winter is that the fruit crops may be more helped than hindered by it. In other seasons there have been spells of mild weather in January and February which have advanced the buds, then occurred severe frosts in March and April which destroyed the buds. Thus far the conditions have been alright and the bearing wood of apple and pear trees is reported unimpaired.

At Lakefield Station

The total net earnings of the G. T.R. station, at Lakefield, for the year 1903, was $60,000. The increase over the earnings of 1902 was $13,000. Prospects are bright for the present year, as the different industries have heavy shipments to make. The snow blockade did not affect to any great extent the traffic at the above station.



U S. CONSULATE AT RIGA, RUSSIA

LEGAL STATUS OF AN INDIAN

Interesting Judgement Given by His Honor Judge Desnoyers

SELLING INDIANS LIQUOR

Judge Holds that Anyone Living on Reserve is Legally An Indian Whether Halfbreed or not

Montreal, April 2.—Judgment has been rendered by His Honor, Judge Desnoyers, in a case of considerable interest both legally and otherwise. For some time past the hotel keepers of Lachine have been carrying on a considerable trade with the Caughnawaga Indians employed in the various factories at Lachine. Complaints have reached the Government, and the Department of Indian Affairs prosecuted three inn-keepers under the Indian Act, which prohibits the sale of liquor to Indians, or to anyone reputed to be a member of an Indian band.

In these cases, which were bitterly fought, Mr. Arnold Wainwright, of Messrs. Davidson and Wainwright, represented the Government, and Mr. C. A. Wilson, the defendants.

The defence raised the question as to whether the inhabitants of Caughnawaga could now be described as Indians, and thereby raised the question as to what today was an "Indian" in Canada, under the terms of the Indian Act.

The defence further alleged that the inn-keepers were ignorant that the individuals to whom they sold the liquor were Indians inasmuch as they looked so much like white men, and that being innocent of any intent to break the law, they could not be held guilty.

A UNIQUE JUDGMENT.

The learned Judge, in an elaborate judgment held that any inhabitant of Caughnawaga, reputed to belong to the band, and living there as such, was an Indian within the terms of the Indian Act, no matter whether he was a half breed or not. This decision will deprive the Indians from practically adopting the status of white men, no matter what their degree of civilization may be, so long as they reside upon a reserve and obtain assistance from a paternal Government as a band of Indians.

The learned Judge further held that even though the Indian Act did not state that it was essential that there should be knowledge on the part of the offender that the Indian served with the liquor was such, the inn-keeper became an offender under the Act, even if he had no intent to infringe the law, and that consequently the defendants were guilty even though they believed that their customers were white men. As a matter of fact, as the Judge pointed out, the inn-keepers must have been aware that they were dealing with Indians living in Caughnawaga.

In view of the fact, however, that the Government had not instituted any prosecution under this act for twenty-five years, he suspended sentence against the defendants, on conviction, stating that if the offence was renewed the full penalty would be inflicted.

The decision will probably have the effect of stopping the traffic to Indians in Lachine, which has resulted in great distress and suffering among the wives and children in the Indian settlement across the river

GLAD OF ACTION TAKEN.

Referring to the judgment given by His Honor Judge Desnoyers, Mr. S. J. Carter, president of the provincial branch of the Dominion Alliance, said this morning that he was glad something was being done which would probably act, to a great extent, as a check upon the selling of liquor to the Indians from Caughnawaga.

"There have not been any serious grievances brought before the Dominion Alliance, at least officially. Of course we know that this evil exists, and that the Indians are supplied with spirits in spite of the law to the contrary. What is said about the traffic to Indians is perfectly true, and it is well known. The Indians go to Lachine and there the law is not recognized or enforced.

"We understand that the law is practically a dead letter, but by this judgment public attention will be aroused, and, no doubt, there will be good results. There has been a great deal of laxity in the matter of selling liquor to the Indians, and I am pleased to learn that some active steps are being taken.

"The fact must be borne in mind, however," continued Mr. Carter, "that Lachine alone is not guilty. The Indians come into Montreal and get liquor. The law is not enforced here although it is supposed to be, and, of course, is observed by some dealers. In defiance of it many of the liquor men sell to the Indians, and there is very seldom anything heard of the matter.

"I am quite certain that there has been much suffering among the families of the Indians in Caughnawaga on account of the drinking among them, which is carried on in direct defiance of a well-known law. If this important matter is brought forcibly to the notice of the public, it is likely that the law will be more strictly enforced, and there will be less trouble of this kind among the Indians."

WM. ARMSTRONG AN EX-CONVICT

Liberated from Kingston Penitentiary Last Sum—Served Term for Shooting a Bank Teller.

Ottawa, April 2.—Col. Sherwood, commanding officer of the Dominion Police, today identified by means of photographs the man, William Armstrong, now under arrest at Peterborough for obtaining money under false pretences. He turns out to be Stanley Steele, an ex-convict, who was liberated from Kingston Penitentiary last summer, after 16 years' imprisonment.

Steele was convicted of robbing a bank in Antigonish, N.S., in 1887, at which time he shot the teller, and received a 20 years' sentence, part of which was served in Dorchester Penitentiary, New Brunswick, and the latter part in Kingston. He gained four years on his term by good conduct.

Steele, through his fake advertisement in the papers offering employment to parties at St. Louis Exposition, raked in some hundreds of dollars.

ACCIDENT NEAR LAKEFIELD

Two Young Ladies on Way to Wedding Thrown From Rig—No one Injured

People who get married at this season of the year, especially in the country, are apt to find themselves confronted with serious difficulties in regard to transportation. We have heard of many cases in the past where the road to matrimony led through the slough of despond. The latest addition to the list comes in the shape of the sad experience of two young ladies who were on their way to attend the marriage of Miss Ettie Coons to Mr. Geoffrey Harvey, Smith, which happy event, by the way, took place on Wednesday, March 29th, at the residence of the bridegroom's father, Mr. Joseph Harvey. The road from Lakefield to Young's Point as everyone knows is not at the present time in an ideal condition for driving. In that portion of it which passes Mr. Eph. Wilson's farm it is, in fact, in a particularly execrable condition, so the young ladies found. On reaching the spot mentioned they were unable, owing to lack of experience, to navigate their course correctly, and the lamentable result was that the horse turned a complete somersault into the watery ditch, flinging the two ladies out also into the water. A cold bath is of course a highly pleasurable form of enjoyment, but it is a question whether the young ladies thought it either timely or blissful in the present case. We can only hope that they have suffered no ill effects from their involuntary immersion.—Lakefield News.

Holy Rollers

For some months past a sect known as the Holy Rollers have been carrying on meetings in Campbellford, which, they claim, are of a religious character, but from the manner in wihch they tumble about the floor prostrated and allow the audience, (mostly boys) to take an active part in their services by throwing snowballs at them, pulling down the stove pipes, and hurling brooms at them, all of which they glory in for the sake of being persecuted as was Jesus by the Jews. Their leader, F. F. Woodrug, who comes from the States, was arrested last week on the charge of performing two marriage ceremonies without being duly qualified to do so.

—The Easter Gospel Service held in the Y.W.C.A. rooms yesterday afternoon was well attended. The subject was "The Royal Commission," and Mrs. McColl sang several beautiful solos.

BURNED LIVING BABIES IN FIRE

A Murder Syndicate Said to Exist to Philadelphia

SOME STARTLING EVIDENCE

It is Believed That Probably Hundreds of Babies Have Been Murdered

Philadelphia, April 4. — "Living babies have been thrown into red-hot furnaces to destroy them," said Coroner Dugan yesterday.

"I have evidence to prove this," he continued, "and also evidence of the existence of the murder syndicate which does away with these children, and by destroying them dest evidence of murders."

Coroner Dugan made this declaration after the arrest of Mrs. Elizabeth Ashmead, of 256 South Twelfth street, and her son, of the same address. They belong to one of the most prominent families in the city. The arrest was made in connection with the deaths of two young women.

It is charged that Mary B. Sloan and Sarah Hughes died in Mrs. Ashmead's house. Mrs. Ashmead admits that the Hughes woman died there, but declares that the death was from natural causes. The bodies were exhumed.

Coroner Dugan announced that he would lay bare horrible details of the case at the inquest over the deaths of the two women. Examination shows deaths were caused by operations performed by a physician and the coroner declares that this doctor was in the employ of the syndicate of baby murderers that he has been trying to run down for months.

At the inquest evidence was given to show that the syndicate slew from sixteen to eighteen newly-born infants each week, thus netting at the rate of $50 for each murder, a weekly income of from $800 to $900.

Dr. David Mosier testified; "I saw live babies wrapped in an apron and carried to a furnace, into which they were thrown."

Dr. Joseph H. King testified; "Mrs. Ashmead said to me; 'We wrapped babies up in newspapers and laid them aside until they died, when we either threw them into a heater or out on the dump.'"

Mrs. Ashmead listened to these statements with a face white and drawn.

Mrs. Ashmead is accused of being responsible for at least the deaths of one-third of the 2,500 to 3,000 children born in Philadelphia each year whose births are never recorded.

The result of the hearing before the coroner was that Mrs. Ashmead her son Howland, and Dr. Matthew McVickar have been held as accessories to the deaths of Mary B. Sloan and Sarah Hughes.

Later Grace Ashmead, a beautiful girl, was taken to the Central station and held as a witness.

Mrs. Ashmead has been twice indicted before on charges of being implicated in deaths of young women, but neither indictment was pressed.

Canadian Liquor

It may be of some public interest to know that the liquor which Canadians consume is of pure quality. "The principal adulterant is water," and it is probably pure. There is not a microbe known to science that can stand immersion in whiskey seventy-five per cent. proof strength. Judging from the number who trod our streets with unsteady steps on Good Friday, the local "fire water," must be strong enough.

Military Orders

Headquarters, Peterborough,
April 2, 1904

Orders by Lieut.-Col. J. W. Miller, commanding the 57th Regt., "P.RR."

The regiment will parade at the armouries at 8 p.m., on Tuesday, April 5th, 1904, and on each subsequent Tuesday, at the same hour, untin further notice.

By order,
D. WALKER,
Captain and Adjutant

The military orders issued from Ottawa on Thursday last include the following;—

57th Regiment Peterborough Rangers—Lieut. O. H. Bradburn resigns his provision. To be provisional Second Lieutenants, W. R. G. Higgins, M. Comstock, Sergt. J. W. Kelly J. Gammel, to complete establishment.

RUSSIANS WILL TRY TO FLOAT SUNKEN VESSELS

Navy Department Announces That Japs Fleet was Not at Port Arthur on Wednesday

Port Arthur, April 2—All is quiet here and there is no change in the situation. The weather is warmer, and the sick and wounded are making good progress toward recovery.

The Japanese who were killed in the last attack upon this place, were buried this morning in the Chinese cemetery outside the town with military honors.

It is hoped it will be possible to raise the Japanese fireships which were sunk in attempting to block the harbor.

NO ATTACK MADE

Tokio, April 2—The Navy Department has no information concerning the reported Japanese attack on Port Arthur March 30-31, and the officials doubt that a general attack occurred. It was added that it was possible that a few Japanese cruisers are in the vicinity of Port Arthur, and that there may have been an exchange of shots with the Russians, but it is certain that the main Japanese fleet was not engaged at the time referred to.

Why are the Japanese so bent on blocking up Port Arthur harbor? They are not afraid of the Russian ships. Nothing would please them more than to have these come out and meet them at sea. The obvious explanation seems to be that they have another use for the fleet that is blockading Port Arthur. The common guess is that they want it to protect a great fleet of transports taking troops across the sea. We cannot see what threatens such a fleet, if it is true that the Russian cruisers are still in Vladivostok harbor. Perhaps the contemplated movement is so great that the Japanese want to make assurance doubly certain. This looks as if it were true that only a part of the available Japanese forces has been thrown into Korea. Late estimates indicate the presence of less than 10,000 men in the peninsula.

These have spread over all of it with great energy and occupied every strategic point. But they do not seem disposed to go farther. On the contrary, those in the advance seem to be selecting favorable defensive positions and fortifying them. There begin to be indications of a strong defensive line drawn across the whole peninsula, fifty to one hundred miles south of the Yalu. It may be that they are going no farther; that the only purpose of the army in Korea is to hold it firmly and defend it against the Russians, while the civil servants of the Mikado recognize the government and make it an appanage of Japan.

What will Japan do with the rest of her army of 200,000 or 300,000 men? A military writer in the London Times, who has had previous opportunities for close observation of Japanese strategy in war, believes that she will throw them on the Liao Tung peninsula as soon as the season permits. This is no time for landing troops in the river estuaries on which important strategic points are located. Not only the rivers but the bays are blocked with ice.

The theory of the Times writer is that Japan has in reserve an army larger than that thrown into Korea; and as soon as the ice goes out of the river and bays, she will send fleets and transports up the Liao Tung river before the Russians have time to mine it, take Niu Chwang by bombardment and assault, land troops in force and make this considerable city her base of supplies for operations in Southern Manchuria. This will isolate Port Arthur, cut the railway, threaten the Russian force on the Yalu in the rear and open the best possible route for operations farther into the interior. We shall see in a short time if there is anything in the idea.

Paris, March 31—The Echo de Paris has a despatch from St. Petersburg which says that the Japanese numbered 2,000 and the Cossacks 900 in the Chong-ju engagement. The two forces were only 600 yards apart in the fight.

ANARCHY IN COREA.

Correspondents Resent Japanese Restrictions.

London, Thursday, March 31 — The Daily Mail correspondent at Seoul, in a despatch dated March 24, describes the internal situation in Corea as being grave. Outside the reach of Japanese bayonets, he says, anarchy practically prevails. The Japanese censorship now extends beyond military movements. It does not allow any mention of local disturbances, the correspondents deeply resent the Japanese restrictions, and many who were pro-Japanese in their sympathies, have completely changed their attitude.

London, March 31 — The Daily Telegraph says the Japanese authorities have refused correspondents the use of the field telegraph lines, and that all despatches must be sent to Tokio by mail. The paper further says that there is no sign that any foreigners will be permitted to go to the front, though the native newspaper men will be allowed to do so

The Daily Telegraph, in an editorial on the unprecedented severity of the censorship, suggests that Japan has some new and important move to conceal, possible the re-embarkation of a portion of her troops already in Corea for some other point in the theatre of war, and is anxious to guard against the possibility of leakage through foreign correspondents, who might sympathize with Russia.

Russians Evacuating Corea?

A correspondent of the Daily Telegraph at Seoul reports that the Russians are evacuating the positions they occupy in Corea.

Special despatches from Shanghai repeat the rumor that the Mikado will shortly proceed to Corea with the headquarters staff.

Coreans Ready for Rebellion.

The Seoul correspondent of The London Daily Mail describes Corea outside the districts occupied by the Japanese, as being in a state of anarchy and in readiness for rebellion. The correspondent asserts that the censorship prevents any reference to disturbances.

Japs Occupy Haiju.

Seoul, March 30 —The Japanese advance occupied Haiju, a seaport south of Anju, March 27.

FROM THE LAND SIDE.

Capture of New-Chwang Expected in a Week.

London, Thursday, March 31—A despatch to the Chronicle from New-Chwang says it is the best opinion that the Japanese have indefinitely deferred attacking New-Chwang.

A despatch to the Daily Mail from Shan-Hai-Kwan says, however, that the Japanese expect to capture New Chwang from the land side in a week.

Apologised for Flag Incident.

London, Thursday, March 31— The Times prints a despatch from New-Chwang, saying that the Russian police have apologised for hauling down the American flag there, and have rehoisted it over the correspondents' quarters. The Russians are already enforcing martial law on the west bank of the Liao river.

The Tein-Tsin correspondent of the Standard says that the effect of martial law at New-Chwang has been exaggerated. The discomfort therefrom thus far has been small, although future developments may be unsatisfactory. The area included in the proclamation probably will be extended west of the Liao River.

DEATH OF MRS. HEALSIP

Passed Away at Family Residence on Good Friday Afternoon

Sad we are to have to announce the death of Minnie Graham, the beloved wife of Mr. Jas. H. Heaslip, at the family residence 348, Aylmer st., on Good Friday afternoon, at 3 o'clock. Deceased had been ill for some time, being troubled with stomach trouble. A husband and five children, four sons and one daughter, are left to mourn her loss.

The remains were interred in the Little Lake cemetery yesterday afternoon at 2.30 o'clock.

A NEW POST OFFICE

We Must Have It — Government Must Act

There are some things we can't wait for in this town, and one is a new post office. There is no more good in Mr. R. R. Hall's going to the polls without a promise in his pocket from the Government of immediate relief than there would be in a negro or a Chinaman's candidature. The crowd at our little building is so great on busy days that we can't do business. The staff is good enough, but one might as well expect Messrs. Richard Hall and Son to do business in a 10 x 12 building, or the volunteers to drill in Croft's stable, as for the people of this rapidly progressing young city to transact their large letter and money order business in a building that was only a compromise at the best. Wake up Council! Wake up Board of Trade! Get a move on ye politicians! This is the one great topic of general interest. We don't want and won't have improvements; we want a new building—no more half-shift compromises.

A Farewell Evening

The members of the Browning class with their friends, to the number of twenty-five, spent a farewell evening at the home of Mrs. Kirkconnell, Bedford street, last Friday, in honor of Miss Weir who, at Easter, removes to Peterborough. The ladies of the class have arranged a programme which abolished formality, and gave a delightful evening to all. After refreshments had been served, the gentlemen of the class presented Miss Weir with a set of the Camberwell Edition of Browning in twelve volumes.—Port Hope Times.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor." —London "Truth."

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have strictures that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

THE GRAND STRATEGY OF JAPAN

Why are the Japanese so bent on blocking up Port Arthur harbor? They are not afraid of the Russian ships. Nothing would please them more than to have these come out and meet them at sea. The obvious explanation seems to be that they have another use for the fleet that is blockading Port Arthur. The common guess is that they want it to protect a great fleet of transports taking troops across the sea. We cannot see what threatens such a fleet, if it is true that the Russian cruisers are still in Vladivostok harbor. Perhaps the contemplated movement is so great that the Japanese want to make assurance doubly certain. This looks as if it were true that only a part of the available Japanese forces has been thrown into Korea. Late estimates indicate the presence of less than 10,000 men in the peninsula.

These have spread over all of it with great energy and occupied every strategic point. But they do not seem disposed to go farther. On the contrary, those in the advance seem to be selecting favorable defensive positions and fortifying them. There begin to be indications of a strong defensive line drawn across the whole peninsula, fifty to one hundred miles south of the Yalu. It may be that they are going no farther; that the only purpose of the army in Korea is to hold it firmly and defend it against the Russians, while the civil servants of the Mikado recognize the government and make it an appanage of Japan.

What will Japan do with the rest of her army of 200,000 or 300,000 men? A military writer in the London Times, who has had previous opportunities for close observation of Japanese strategy in war, believes that she will throw them on the Liao Tung peninsula as soon as the season permits. This is no time for landing troops in the river estuaries on which important strategic points are located. Not only the rivers but the bays are blocked with ice.

The theory of the Times writer is that Japan has in reserve an army larger than that thrown into Korea; and as soon as the ice goes out of the river and bays, she will send fleets and transports up the Liao Tung river before the Russians have time to mine it, take Niu Chwang by bombardment and assault, land troops in force and make this considerable city her base of supplies for operations in Southern Manchuria. This will isolate Port Arthur, cut the railway, threaten the Russian force on the Yalu in the rear and open the best possible route for operations farther into the interior. We shall see in a short time if there is anything in the idea.

EDITORIAL COMMENT

There are some advantages of sentimental loyalty to a sovereign. Through this archaic public emotion the people of Australia have been able to shut the mouth of John Alexander Dowie and drive him from every public platform in the Commonwealth. The man Dowie ranted and raved with impunity against everybody and everything in the United States, from the heads of church and state down to newspaper reporters. He tried the same thing in Australia, and did very well until he expressed doubt whether King Edward would ever get into Heaven. Then the outraged populace rose in a riot, drove him off the platform after an hour's fight with the police, wrecked his hotel, hunted him through the streets till a mounted escort took him out of town and smashed suburban houses suspected of sheltering him. The result is that he has been forbidden the use of any public building, his lecture contracts have been cancelled and the American consul has advised him to get out of the country as quickly and quietly as he can.

Human Body Has Its Equinoxial Storms.

In Its March From the Cradle to the Grave, the Body Has Its Periods of Change Which are Associated with Alarming Disturbances.

There are two great periods in men's lives. About forty-five every man realizes that some new condition has arisen, and if this time is happily passed, about sixty the health barometer takes another dip and storms of great import cloud the horizon of life.

These storms must be met, and wise people will fortify the resisting power of the body by Ferrozone, which builds up bodily strength, renews the blood, strengthens the heart and vital organs. New tissues are formed by Ferrozone, which enables the body to resist disease and prevent the organic changes so likely to supervene at this critical time.

No matter what the age or sex of the individual, as a nerve builder, a brain strengthener, and general body invigorator, Ferrozone is the best medicine. It pushes back the feeling and appearance of old age, and puts the elasticity and vim of youth into systems that ordinary remedies fail to rebuild. This is not mere theory, but a claim that is reinforced by overwhelming evidence of the honest merit of Ferrozone.

Unlike oily emulsions, and alcholic bitters which are no longer prescribed by intelligent physicians, Ferrozone contains the latest and best strengthening elements in tablet form. Its quality therefore is uniform, its dose is small, just one tablet at meal time. You can't fail to be greatly benefited by Ferrozone, which is sold at druggists, price 50c. per box or six boxes for $2.50. Insist on having only Ferrozone. Refuse all substitutes. By mail from N. C. Polson, Kingston, Ont., and Hartford, Conn., U.S.A.

A PROGRESSIVE CLASS

Young Men's Baraca Bible Class Hold Semi-Annual Meeting

The Young Men's Baraca Bible Class of the Murray street Baptist Sunday school at their last semi-annual business meeting elected the following officers;

Hon. Pres. and Teacher—Geo. Lee.
Past Pres.—James Ellis.
Pres.—Walter Garbutt.
Vice-Pres.—Luther Cross.
Sec.—Robt. Laing.
Asst. Sec.—John Hardwick.
Treas.—Edward Jewitt.
Librarian—Walter Miller.

Committees and Convenors;—
Hustlers—James Ellis.
Membership—Raymond Bullick.
Social—Frank Webber.
Literary—Ernest Sedgwick.
Musical—Bruce Quinn.
Athletic—H. Sackville.

The reports of the various committees showed that the young men were awake to their opportunities.

The Secretary's report was especially encouraging, showing that great interest had been taken in the study of the lesson and that marked progress had been made in the matter of membership.

The young men deserve great credit for the enthusiastic manner in which they have carried out the principles of their class, and the various duties assigned to each.

The next regular semi-annual meeting will be held in October next.

BASEBALL.

The Port Hope Guide contains an item on baseball, in which it is stated that the Excelsiors are likely to represent Peterborough in the Midland League. This is hardly according to fact, as the Cordage Company's team is more likely to enter the league. In conversation with a prominent member of the latter team last evening the Times was informed that they would produce an A1 team this year, and that the financial support promised them was most encouraging.

PARTNERS IN A CONTINENT.

The United States and Canada as Joint Owners of the Upper New World.

Canadian progress has recently begun to keep step with that of the United States, the southern partner in the ownership of a continent. The Dominion has about one-fourteenth the population of this country. About 80,000 immigrants settled there during the fiscal year recently closed, or one-tenth as many as came to the United States.

The smaller number, says Youth's Companion, means more to our northern neighbor than the larger one does to the United States, for the immigrants to Canada are occupying practically new country and blazing the way—if one may use the figure of the forest in writing of a treeless region—for the thousands who are to come after them to make the prairies of the north blossom as the plantations of the south.

The new population is settling in the wheat-growing and cattle-raising regions, where land is cheap and plentiful enough to supply adjoining farms for the sons of the largest family in Europe or America. Between five and ten million acres of land have been sold by private companies within the past three years, and many thousand acres more have been disposed of by the government under the homestead laws.

The effect of the influx of population is shown in the crop reports. The farmers of Manitoba produced more than 50,000,000 bushels of wheat in 1901, whereas the yield of the province ten years before was only 23,000,000 bushels. The increase in the wheat production of the Dominion, from 61,000,000 bushels to 85,000,000 bushels, is due to the growth of this province.

American farmers need not fear the competition of Canadian wheat. There will be a market for all that can be raised. American producers of all kinds ought rather to feel an interest in the development of the resources of this continent, the Canadian half of it as well as the American.

THOMAS MERRITT, Manager, Toronto, Ont

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Parry Sound Wharf," will be received at this office until Monday, April 25, 1904, inclusively, for the construction of a pile wharf at Parry Sound, District of Muskoka and Parry Sound, Ontario, according to a plan and specification to be seen at the office of H. A. Gray, Esq., Engineer in charge, Harbor Works, Ontario, Confederation Life Building, Toronto, on application to the Postmaster of Parry Sound, Ont., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the printed forms supplied, and signed with the actual signatures of tenderers.

An accepted check on a chartered bank, payable to the order of the Honorable the Minister of Public Works, for two thousand dollars ($2,000.00), must accompany each tender. The check will be forfeited if the party tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

This Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS.
Secretary.
Department of Public Works,
Ottawa, March 25, 1904.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuoble. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

·DRS. KENNEDY & KERGAN·

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. **Cures Guaranteed or no Pay.** We treat and cure: **Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.**

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

K&K K&K K&K K&K K&K K&K

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possessed a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— . . . . . The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

RUSSIANS SAID TO BE EVACUATING COREA.

Japanese Have Occupied Haiju, a Seaport East of Anju--Coreans Ready for Rebellion

Paris, March 31—The Echo de Paris has a despatch from St. Petersburg which says that the Japanese numbered 2,000 and the Cossacks 900 in the Chong-ju engagement. The two forces were only 600 yards apart in the fight.

ANARCHY IN COREA.

Correspondents Resent Japanese Restrictions.

London, Thursday, March 31 — The Daily Mail correspondent at Seoul, in a despatch dated March 24, describes the internal situation in Corea as being grave. Outside the reach of Japanese bayonets, he says, anarchy practically prevails. The Japanese censorship now extends beyond military movements. It does not allow any mention of local disturbances, the correspondents deeply resent the Japanese restrictions, and many who were pro-Japanese in their sympathies, have completely changed their attitude.

London, March 31 — The Daily Telegraph says the Japanese authorities have refused correspondents the use of the field telegraph lines, and that all despatches must be sent to Tokio by mail. The paper further says that there is no sign that any foreigners will be permitted to go to the front, though the native newspaper men will be allowed to do so.

The Daily Telegraph, in an editorial on the unprecedented severity of the censorship, suggests that Japan has some new and important move to conceal, possible the re-embarkation of a portion of her troops already in Corea for some other point in the theatre of war, and is anxious to guard against the possibility of leakage through foreign correspondents, who might sympathise with Russia.

Russians Evacuating Corea?

A correspondent of the Daily Telegraph at Seoul reports that the Russians are evacuating the positions they occupy in Corea.

Special despatches from Shanghai repeat the rumor that the Mikado will shortly proceed to Corea with the headquarters staff.

Coreans Ready for Rebellion.

The Seoul correspondent of The London Daily Mail describes Corea outside the districts occupied by the Japanese, as being in a state of anarchy and in readiness for rebellion. The correspondent asserts that the censorship prevents any reference to disturbances.

Japs Occupy Haiju.

Seoul, March 30.—The Japanese advance occupied Haiju, a seaport south of Anju, March 27.

CURZON CONVEYS HINT TO RUSSIA

Foe Must Never Occupy Territory on Indian Frontier

GREAT BRITAIN'S ATTITUDE

Peace of Country Must Never be Threatened by Encroachments

Calcutta, March 30.—In the course of the budget discussion today the Viceroy, Lord Curzon of Kedleston declared that it was his express intention to return to India.

The Viceroy spoke for an hour and a half. Referring to their responsibilities in Asia, he said India resembled a fortress, beyond whose walls there existed on one side a glacis of varying breadth and dimensions, which they did not desire to occupy, but which they could not afford to see occupied by a foe. They were quite content that it should remain in the hands of allies and friends, but if unfriendly influences should creep up and lodge under its walls, they would be compelled to intervene because the danger of such unfriendly influences would grow up as a menace to their security. This, he said, was the secret of the whole position towards Arabia, Persia, Afghanistan and Siam.

Alluding to the contemptuous attitude of the Thibetan government in the face of the extreme patience of the Indian government, his Excellency said; "I have no desire to push on anywhere. The history of the last five years has been one of consolidation and restraint, but I would suffer any imputation rather than be an unfaithful sentinel and allow the future peace of the country to be compromised by encroachments from outside, which could only have one meaning."

COSSACKS AMBUSH JAPANESE FORCE

MAIN JAPANESE ARMY STEADILY MOVING

The Russian Warships out on a Cruise Experimenting

London, Thursday, March 31—A despatch to the Daily Mail from Seoul says that after their victory at Chong-Ju the Japanese advanced towards Koak-San, 12 miles from Chong-Ju, driving the Russians before them. The latter still occupy positions north of the Pakchon River. Apparently some force of the Japanese has reached that river. Some Japanese returning to the south state that 52 Japanese infantry, who were trying to advance north of the river were ambushed by Cossacks and destroyed. The correspondent says he doubts this report, and adds;—"Such reports as can be obtained here indicate that the main Japanese army is steadily following its advance guard northward from Ping-Yang, taking immense stores with it."

OUT ON A CRUISE

Russian Warships Twelve Miles Outside Port Arthur.

New-Chwang, March 31—It is reported that nine Russian warships are cruising twelve miles outside of Port Arthur directing the forts in experimental firing. The cruiser Askold is still further out at sea scouting.

Russian Battleship Rammed.

Paris March 30—A despatch to the Petit Parisien from St. Petersburg, says that a private telegram from Port Arthur, dated March 29, states that while the Russian battleship Petropavlovsk was manoeuvring in the inner harbor there, she rammed the battleship Sevastopol seriously damaging the latter. The naval staff at St. Petersburg deny any knowledge of such an accident.

Japs May do the Rechristening.

Moscow, March 30—The Gazette urges the rechristening of Port Arthur as Port Nicholas, the English name sounding badly to Russian ears.

FROM THE LAND SIDE.

Capture of New-Chwang Expected in a Week.

London, Thursday, March 31—A despatch to the Chronicle from New-Chwang says it is the best opinion that the Japanese have indefinitely deferred attacking New-Chwang.

A despatch to the Daily Mail from Shan-Hai-Kwan says, however, that the Japanese expect to capture New Chwang from the land side in a week.

Apologized for Flag Incident.

London, Thursday, March 31— The Times prints a despatch from New-Chwang, saying that the Russian police have apologized for hauling down the American flag there, and have rehoisted it over the correspondents' quarters. The Russians are already enforcing martial law on the west bank of the Liao river.

The Tein-Tsin correspondent of the Standard says that the effect of martial law at New-Chwang has been exaggerated. The discomfort therefrom thus far has been small, although future developments may be unsatisfactory. The area included in the proclamation probably will be extended west of the Liao River.

HAVE NO DESIRE TO JOIN CANADA

Statement of Newfoundland's Premier in House

A REPLY TO RESOLUTION

Views of Chambers of Commerce Congress Not in Accord with Colony

St. John's, Nfld, March 30.—In the Legislature tonight Premier Bond said that no correspondence had passed between the Government of Newfoundland and that of Canada respecting confederation. However, the Imperial Government, having forwarded a copy of a resolution adopted by the Congress of Chambers of Commerce of the British Empire, at Montreal, in August last, favoring confederation, the Newfoundland Government had replied that it could not concur that the present time was opportune for the opening of negotiations towards a union with Canada.

There was no desire on the part of the people of Newfoundland for the inclusion of the colony as a constituent part of the Dominion. On the contrary, the reply said, there was an evident desire that the colony should maintain it autonomy and continue to retain its honorable and independent position as part of the British Empire.

A 'Hog' Story

On Dec. 18th, 1903, while threshing was being done near Oshawa, a pig was accidentally and unknowingly covered up with straw, and seen no more till March 1st, 1904, when she crawled out from underneath the straw stack. The long confinement of seventy-five days, without food or drink, had reduced her to a skeleton, but she had life enough to still walk. The cattle, by continually rubbing the stack, had made a hole into where she lay, and thus saved her life. The animal is rapidly gaining strength, and will soon be as healthy as ever.

EVERYBODY READS THE TIMES.

The Elwood Tinworker's Gold Mining Company.

ORGANIZED JULY 1902

CAPITAL STOCK $150,000
PAR VALUE OF SHARES $1.00.

The mining claims of this company consist of two full claims namely

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.
ELWOOD, INDIANA

General Manager of Mines, J. A. DURRAGH, M. E., Camborne, B. C; Secretary, J. R. BOTTORFF; Local Fiscal Agent JOSEPH MILLS, Peterborough.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of $200,000 with shares at $1 each.

The officers of the Company are C. F. Bumann, President and Treasurer; George W. Kubler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $200,000 capitalization, in shares of $1 each, [illegible] worth is issued, the first small allotment of this was sold at 65c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have 281 acres underlaid with three distinct veins or layers of coal which are [illegible] feet thick each. The first one at a depth of 287 feet, it is this vein which we are now mining, the second one is at a depth of 320 feet and the third at 461 feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth 561 feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a break down we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 150 tons per day, but I have the promise of the superintendent to increase the output to not less than 250 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than [illegible] at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease, as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from $1.75 to $2.00 for Mine Run and $2.75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $140 per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 18 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 30 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same. Besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $500 each. We predict that this stock will be worth not less than $3 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President

GENERAL OFFICES:
[illegible] Washington St., Chicago, Ill.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

THE

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

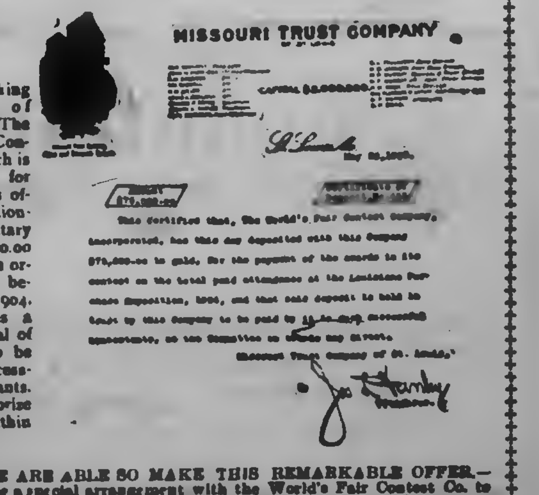
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1889 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	[illegible]
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,500.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $30 each	1,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE.—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES AND Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

SEEKING A CONFERENCE

If Suspended Men are Not Reinstated Increase of Salary will be Asked

No action was taken by the Great North-Western Telegraph Company yesterday towards reinstating to their former positions the five members to the Telegrapher's Union whom they dismissed on Tuesday. The men assert that they had not asked for the recognition of the union by the company, and that they organized merely to improve themselves by social intercourse and to establish speed classes for the members. They have assigned the settlement of their difficulty to Organizer Thomas Long, and should all attempts at adjustment fail they state that they will strike. In that case they will demand an increased salary.

Organizer Long's efforts yesterday were chiefly directed towards having a conference with Manager McMichael of the telegraph company.

The union said that on the staff of the company were only two operators who had signed the agreement of 1883 and they assert that they are not now bound by that document. It was not their intention to demand an increase in salary this spring.

Langtry & King Edward.

In commenting on that interesting and now historical episode in which she was said to have playfully sent a lump of ice tobogganing down the spinal column of the present Edward Rex, Lily Langtry said to Acton Davies the other day: "There is no reason in the world why I shouldn't tell the truth about that little matter, for the very good reason that it never occurred. When the King, then the Prince of Wales, heard the story, he asked me if I knew how on earth it could have been started. Of course I couldn't. However, my old friend, Mrs. Cornwallis-West, finally solved the mystery of how the story started, and her explanation, though a very weak one I admit, is the only peg on which any of us have been able to hang this story. An informal dinner was given one night at which Mr. and Mrs. Cornwallis-West and myself were guests. The Prince of Wales was not present. It was a very jolly little party; we all knew each other very well, and everyone was having a beautiful time, with the exception of Mr. Cornwallis-West, who was tired and wanted to go home. Several times he asked his wife to make a start, but she was enjoying herself and refused point blank. Finally he became quite angry and begged her to start. The ices were still on the table, and, taking a spoonful of hers, Mrs. Cornwallis-West laughingly slipped it under her husband's collar with the remark: 'There, my dear boy, that will cool you off for a few moments.' This story must have been repeated by some of the guests, and enlarged upon until it was landed upon his Royal Highness and myself. That, I assure you, is all I know about the matter. Even my enemies must admit that I have always been noted for gentle manners, and that I or any other woman would ever have dared take such a liberty with the prince is too ridiculous. His Royal Highness was charming and most good-natured about the whole matter. In fact, only this past summer, when the King was talking to me at Newmarket about my last American tour, he remarked, with a twinkle in his eyes: 'I suppose they are still telling that lump of ice story on us in America,' and I answered, 'Yes, and I'm afraid their time prancing about like [illegible].'"

Kill or Cure.

A short time ago a veterinary surgeon summoned a man to the Winkletown County Court for two guineas for attendance on a dog, reports an English paper.

He swore that he had been called in and found the dog suffering from distemper, and that he had paid so many visits and had supplied such and such medicines, for which he claimed two pounds two shillings as per agreement. Then came the defendant's turn.

"You say that I agreed to pay you two guineas?" questioned the defendant.

"Certainly you did!" replied the plaintiff.

"Do you remember what our arrangement was?"

"Perfectly."

"Didn't I say that I was afraid of you running up a long bill, but that if you would agree to take two quid, 'kill or cure,' you might have the case?"

"Quite right; and I said that if you would make it guineas I would take it on," answered the plaintiff, with a gleam of triumph.

"Well, now, on your oath, did you kill my dog?" demanded the defendant, with a sudden energy that woke up the judge and made the usher jump again.

"Certainly not," replied the other, with a bluster that was perhaps justifiable in the circumstances.

"And you didn't cure him, see he's dead; and as I promised to pay, and you agreed to accept, two guineas, 'kill or cure,' and you haven't done either, I wonder how you've got the nerve to ask for the money even, let alone bring me here."

At this point the learned judge intervened, and the case was remanded for further consideration.

Ancient British Wheat Fields

A wheat field a thousand years old is quite a common sight in this country. Of course, it has not grown a crop of corn every year in the ten centuries, but during that long sequence of ages, in the fixed and abiding order of this ancient country, that particular area of land has been cultivated, with the production of wheat as its main object, and it has remained as a part of the English granary from the days of Edward the Confessor until those of Victoria. Many of the wheat fields are far more ancient than this, but the records of Doomsday Book is a practical voucher for a period of 1,000 years. The custom of the Saxon cultivators, and the evidence of local names, are proof of a still greater antiquity of cultivation on some of the best corn land; and beyond the days of the Saxons lie the last two centuries of Roman occupation, when England was the great wheat-growing country of the West, and supplied the population of Rome with daily bread.—London Weekly Country Life.

Anecdotal.

At a circuit dinner in Ireland a barrister was relating some shooting stories, and wound up by stating that he had once shot thirty-one hares before breakfast. "I don't doubt it, sir," remarked Lord Norbury, "but you must have been firing at a wig."

A Maine country doctor tells this story on himself:—He responded one night to a note left at his door by a farmer asking him to go as soon as possible to see his little boy, who was ill with a very bad cold. The doctor gave one look at the child and asked severely: "Don't you know that your boy is coming down with the measles?" "Yes," replied the wife. "I knowed it." "Then what in the world did you mean by saying he had a bad cold?" asked the doctor. The woman hesitated a moment; then, looking at her husband, she said, hesitatingly: "Neither me or him knowed how to spell measles."

A Nottinghamshire clergyman, in baptizing a baby, paused in the midst of the service to inquire the name of the infant, to which the mother, with a profound courtesy, replied, "Shady, sir, if you please." "Shady!" replied the minister. "Then it's a boy, and you mean Shadrach, eh?" "No, please your reverence, it's a girl." "And pray," asked the inquisitive pastor, "how happened you to call the child by such a strange name?" "Why, sir," responded the woman, "if you must know, our name is Bower, and my husband said as how he should like her to be called Shady, because Shady Bower sounds so pretty!"

An amusing story is told of President Loubet's humble brother-in-law, whom an enterprising interviewer called upon directly after the French President's election. "How did you take the news?" asked the interviewer. "Oh, fairly well; without any rejoicings, of course. Now, here am I, for example, an ironmonger; in what way do you suppose it will benefit me that my brother-in-law is President of the republic? Why, this very morning I received three letters from people begging me to get them Government tobacco shops. That is the only advantage that the election will bestow upon me. People fancy that I have influence, and I shall therefore be worried."

Andrew Carnegie tells a story of a Yankee in Scotland that illustrates well the imperturbability of the Scottish temperament. The Yankee, a bicycler, came to the shore of a lonely lake, and saw in a boat a man examining the depths of the water with a water telescope. The man conducted this examination languidly. He would pause every little while to light his pipe and to converse on the weather or some such indifferent subject with a friend who sat upon the bank, now reading a newspaper and now tossing pebbles idly into the stream. The Yankee got off his bicycle to rest, and in an interval of silence he said to the men seated on the bank: "What is your friend looking for? Oysters?" "No. My brother-in-law," was the reply.

Charlemagne Tower, the United States Ambassador to Russia, was talking at Atlantic City about the Russian moujik. "This naive fellow," he said, "is something like a boy and something like an Irishman. He is, as a rule, very simple, very kind. A typical moujik entered one day a railroad station. He approached the agent and asked when a certain train would leave for a certain place. The agent told him distinctly, and, seeming satisfied, he departed. But a moment later he was back again, and again he asked the agent the same question. 'Why,' the agent exclaimed, 'I told you that only a minute ago!' 'You did, truly,' the moujik answered, 'but it isn't myself that wants to know this time. It's my mate outside!'"

Senator Edmund W. Pettus of Alabama is eighty-two years old. A man called at his law office in Selma one day and wanted to read him a thirty-page abstract of a will. Senator Pettus said: "I am too old to listen to all that. Tell me in a few words the abstract's contents." "I prefer to read it to you," the man insisted. "Ah," said Mr. Pettus, "you have the author's vanity. You are like Barthe, the comedian. Barthe called on a dying man one day with a new comedy. He unrolled it. He said: —'Let me read this to you. You will laugh.' 'But consider,' said the other, 'I am a dying man.' Barthe, ignoring that objection, smiled and cleared his throat to begin. 'Consider,' the victim resumed, 'I have only an hour to live.' 'But to read my comedy will occupy only a half hour,' said Barthe."

At the Portsmouth luncheon to the United States squadron, United States Consul Swalm of Southampton, who was stationed at Montevideo during the war with Spain, told the following story:—"They were expecting the 'Oregon' during the Spanish-American war, and they also expected that she would be short of coal. He could not buy so much as a pound of fuel, but one evening a Scotsman came to his door and said: 'You want coal?' The Consul replied that he never wanted a drink as badly as he wanted coal at that moment. The Scotsman had no power to sell, but he pointed out that he had eight hundred tons on board, and said he pitied the American captain who could not put his ship alongside, take out the bags of coal and then 'cut the painter.' It so happened that the 'Oregon' did not call, but such an act of friendship which defied law and order touched his heart."

David Belasco was born in San Francisco and educated at Lincoln College. He said recently: "I remember a chum of my boyhood who was a great traveller. He used to entertain me during recitations with tales of his adventures by land and sea. 'Never go by boat,' he said one day 'from New York to San Francisco. They crowd those boats dreadfully. There's no comfort aboard them at all. This will give you some idea, David,' he went on, 'of the way the boats are crowded. In course of my last trip a mild mannered man approached the captain, and, in my hearing, said: "Skipper, can't you rig me up a berth somewhere or other? I have no place to sleep." We had already been two days out, and, therefore, the skipper said in a surly way to the man, "Sleep where you did last night and the night before." "I can't do it, captain," the other answered. "You can't do it? Well, why can't you?" "Because I've been sleeping atop of a seasick man, and he's got well now, and won't stand it any longer."'"

Mrs. Pince-Nez—I can congratulate myself that all my daughters have married well. Mrs. Lorgnette—H'm! All my daughters have married well twice.

"Mr. Nuzzleton," she said, "if you try to hug and kiss me again I shall call papa." "Where is your father?" he asked. "He's in the Yellowstone Park, and will be beyond mail or telegraphic communication for three weeks."—Chicago "Record-Herald."

She (reproachfully)—Before we were married you used to say you couldn't live without me. He—A man never knows what he can do till he tries.—"Life."

A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON

Principal Office and Place of Business:
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co

110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer-others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the abov company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralised matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemised in the statement.

Shares 40c. Each, par value One Dollar

For full particulars apply to the Peterborough Brokerage Co., City Agents, Peterborough; W Gallon, Agent, Apsley; Roland Kidd, Toronto; G. Hilliard, Lakefield; D. L. McKINNEY, SECRETARY, SIOUX FALLS, S. D.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 20 feet wide, 8 feet of which runs from $16 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $50 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $[illegible] per ton.

FACILITIES—The Company owns 1,780 acres of placer and timber land. water power of 500 (minimum) horse power. No expensive shaft work necessary. Ore easily [illegible] on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to [illegible] two 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

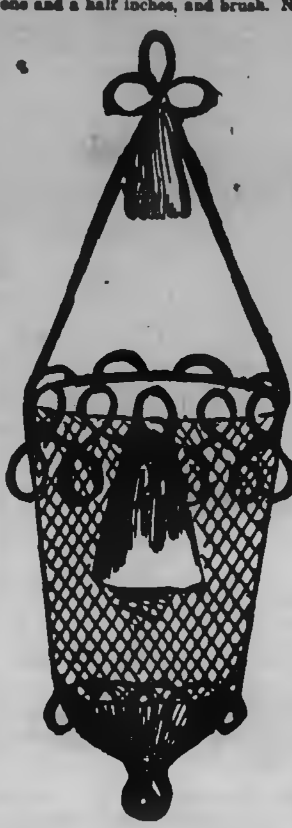
WHISK BROOM HOLDER.

One That Is Easily Made and Produces a Pretty Effect.

The illustration shows a whisk broom holder that is easy to make and one that produces quite a pretty effect as a wall ornament. It costs but a trifle and yet looks like an expensive article.

Get a cuff such as butchers wear, some manila rope, enough ribbon, width one and a half inches, and brush. Now start sewing rope on at center where tassel is and loop around in figure 8 style until you come to where you began, cut rope after fastening securely. Start at bottom of cuff, sew rope in circles to edge, letting the circles come below. Make hanger of rope with tassel and bow of ribbon. Put another tassel and bow where the ends of rope are fastened in front. Cherry ribbon is a very pretty contrast.



WHISK BROOM HOLDER.

Tassels are made by taking two pieces of rope one foot long, put four ends together, tie with strong string where they are doubled and then pull the strands apart.

Living In Rome.

Think of securing a cook for $7 a month! That is the price Mrs. Maud Howe Elliott says she pays in Rome. A seamstress works for 50 cents a day, and an up to date doctor receives $1 for a visit. Good hotels charge 12 francs (about $2.40) a day. Meat, chickens, eggs, fish, fruit and groceries are also cheap, but their cost is made up for by the exorbitant price of all imported groceries. Even the very rich cannot procure rapid transit, steam heat or express service, conveniences which the great majority of Americans enjoy.

Strength From Proper Breathing.

The Japanese, although men of very small stature, are among the strongest in the world. Any boy of fourteen or fifteen who will faithfully practice their system of producing strength will find himself at the end of a few months able to cope in feats of power with the average man of twenty-five, and all this without the dangerous practice of lifting very heavy weights.

It should always be remembered that rest must be taken after each exercise. While resting try deep breathing. Stand erect, though not in a strained position, and at each breath draw the abdomen in and throw the chest out. As the breath is exhaled let the chest fall inward again and the abdomen outward. From twenty minutes to half an hour is a long enough time to devote to jiu-jitsu, and this includes the time spent in breathing during rests, for deep, correct breathing is in itself one of the best exercises possible. In inhaling draw the breath through either the nostrils or the mouth, as preferred. In exhaling always let the breath escape through the mouth.—St. Nicholas.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from Kirkland, a station on the Sante Fe, Phoenix and Prescott Railroad and thirty-five miles from the Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore. and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before. smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 500 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Catarrh Cannot be Cured by Dosing

IT IS A LOCAL DISEASE AND IF CURED MUST BE LOCALLY TREATED.

Seven people out of ten suffer from catarrh. There is no lack of medicines, and if dosing would cure, very few cases of catarrh would be found.

You probably have it yourself. How much benefit have you obtained *so far from medicine-taking?* A little relief is all that you have derived. You have spent lots of money and yet the catarrh is growing worse all the time.

Has it ever occurred to you how desirable and how successful a treatment would be that you could breathe to where the disease existed. Perhaps you have thought about this form of cure but you have been unable to find a remedy that could be pleasantly and safely used.

Try Catarrhozone, it can be broken up by the air and carried in small drops to every part of the breathing organism. It touches the catarrh with healing, that is why it cures.

This healing, balsamic, vegetable substance is so volatile that the air greedily takes up from the inhaler, so antiseptic that it instantly destroys the microbes which produce disease of the breathing organs, and so soothing that it relieves congestion subdues inflammation, and stops mucous discharge.

Plainly Catarrhozone is an ideal remedy for diseases of the throat, lungs and nasal passages. If you have catarrh, bronchitis or asthma, all are equally curable by Catarrhozone. You have been told why this is so. These diseases are all modifications of an inflammatory condition of the lining membranes of the throat and nasal passages.

Now, bear in mind, you breathe Catarrhozone. Do you not think this is a rational treatment—a certain way of reaching the diseased surfaces which lie so far in the cavity of the body or in the head that they can be reached in no other way.

You cannot possibly fail to obtain quick cure from any of these maladies if you use Catarrhozone.

All dealers in medicine sell Catarrhozone. Trial, 25c., complete outfit, $1.00, which will last two months, and is guaranteed to cure permanently. Sent postpaid to any address by N. C. Polson & Co., Kingston, Ont, and Hartford, Conn., U.S.A.

TOWN AND COUNTY NEWS

ASHES HERE AND THERE BY TIMES' REPORTERS

People I Have Met

Everyone is looking forward to the lecture by Prof. Clarke at the Y.M.C.A. on Tuesday evening, April 5th. Rev. Oswald Rigby, M.A., LL.B., will take the chair. Mrs. K. Eardley-Wilmott and Miss Helen Davies will be the soloists.

The Summer Meet

The paragraph in The Times a few days ago evidently awakened the executive of the Peterborough Turf Club. President Cluman has called a meeting of the directors for tomorrow afternoon, presumably to take action in regard to a summer meet

Y. M. C. A.

Mr W. R. Lough, principal of the Clinton Model School, addressed the Y.M.C.A. meeting yesterday afternoon, and spoke on the subject. "The Duty of the Hour." Mr. Lough proved himself an excellent speaker, and all present thoroughly enjoyed his interesting address. The Charlotte street male quartette sang most acceptably

Saturday's Market

Saturday was a busy day on the market, and more farmers than usual were in the city. There was an abundance of butter and eggs, and the prices were more reasonable than was expected. Eggs brought 20 cents, while butter sold for 20 and 22 cents. Turkeys sold as high as $1.50 and geese brought 90 cents and $1.00. Chickens were worth 70 and 85 cents, and beef, mutton and pork were about the same as last week.

—The regular monthly meeting of the Town Council will be held tomorrow evening instead of this evening.

The attendance at the

Peterboro' Business College

a larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of these graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
[illegible] Principal

—Mr. H Mainard visited his Port Hope home on Good Friday.

Mr. M. J. Hutchinson spent Good Friday visiting Norwood friends.

—Miss M. Blois has returned from a visit to Port Hope friends.

—Mr. Joseph Symons, of this city, visited Port Hope friends last week.

—Miss Margaret Hamilton is home from Victoria College for the vacation.

—Mr. C. Clayton Stapleton, of Toronto, is renewing old acquaintances in town.

—Mr. J Webster, of Oakwood, visited Peterborough friends on Good Friday.

—Dr. W. J. Patterson and Mr. J. E. Roxboro, of Norwood, were in town on Friday.

—Miss Linda Hall is the guest of Miss Ruby Ross, in Toronto, for a few days.

—Mr. Chester Kemp, who is attending the Toronto College of Pharmacy, was home for Easter.

—Mr. and Mrs. F. T. Weir, of Toronto, are the guests of Mr. Frances Weir, Ashburnham.

—Mr. Roland Hayward, of the Bank of Commerce, Toronto Junction, was home for Easter.

—Messrs. Gerald and Vassel Hall, of the R. M. C., Kingston, are in town for the holidays.

—Miss Annie M. Brooks left Saturday afternoon on a visit to friends in Stirling, Ont.

—Miss Beale, of the Queen City, is visiting Mr. and Mrs. Harry Beale, of this city.

—Miss J. Morrow spent Good Friday with her sister, Mrs. A. J. Gough, of Toronto.

—Mr. H. McBain, of Toronto, spent Easter wiht his parents, Mr. and Mrs. J. J. McBain.

—Mr. W. G. Botsford, of Toronto, spent yesterday in town, the guest of Mr. O. B Rowley.

—Mr. E. H. Jolliffe, of Toronto University, is spending his vacation at his home here.

—Mr. and Mrs. Herbert Hall, of Toronto, are visiting relatives in town for a few days.

—Mr. Jas. Harde, of Toronto, visited Peterborough friends on Good Friday.

—Rev. J. A. Wilson, of St. Paul's church, spent good Friday at his home in Alliston.

—Miss M. Lough, the popular secretary of the local Y.W.C.A., spent the First in Toronto.

—Miss Rose Moore and Miss Annie Sanderson, of Lakefield, are visiting friends in Peterborough.

—Messrs. Fred Clarke and E. Best attended the O.L.A. Convention in Toronto on Good Friday.

—Mr. Percy Campbell, a Victoria College student, spent his vacation at his Peterborough home.

—Mrs. W. R. Huyck and Mrs. E. R. Huyck spent a couple of days in Peterborough last week — Tweed News.

—Mr. and Mrs. Wm. B. Tapson and Master Lou, of Bowmanville, are the guests of Mrs. Wm. Thompson, Stewart street.

—Mrs. E. Duncan, of Cobourg, is spending the Easter holidays with her parents, Mr. and Mrs. J. C. Brown, Smith street.

—Mr. Walter P. J. Alexander, of Toronto, spent Easter with his parents Mr. and Mrs. John Alexander, Aylmer street.

—Mr. T. F. Graham, B.A., of Knox College, Toronto, visited friends in town on Good Friday, and left Saturday morning for his home in Ottawa.

—Miss Ethel Barker, daughter of Rev. W. R. Barker, of Orillia, arrived in the city on Saturday evening, and is the guest of the Misses Whiten.

—Miss Fanny Brandon has returned to her home in Fenelon Falls, after a pleasant two weeks' visit with her cousin, Miss Mattie Robertson, of Water street.

—Mr. Geo. A. Moroney, Chief Clerk to the General Passenger Agent of the G.T.R., Montreal, spent Good Friday in town with his father.

—Miss Florence C. Hall, of town, leaves today for Belleville to sing at the anniversary services of the Victoria avenue Baptist church.

—Mr. Geo. Meredith, who has been for the past month in the employ of Mr. R. J. Frost, is visiting at his Orillia home.

—Misses Gertrude and Florence Brooks spent Saturday and Sunday in Peterborough, the guests of Dr. and Miss McFall.—Lakefield News.

—Mr. R. Roddick left Thursday for his home in Port Hope previous to his removal to Toronto, where he has secured a [illegible] staff of the city schools.

—Miss Violet B. Smith, of Toronto, has taken up her residence in Peterborough, and will be at home to her friends the first and second Wednesdays, at 4 Fleming place.

—Mr. and Mrs. E. L. Kingsley, of Toronto, are the guests of Mr. and Mrs. W. J. Hopwood, 302 Brock street, for a few days. Mrs. Kingsley will receive with Mrs. Hopwood this afternoon.

—Mr. Samuel McElroy, of Peterborough, was in town last Saturday, and called at the Times Office. It is thirty years since Mr. McElroy was in Port Hope, and he sees quite a change in town since his last visit.—Port Hope Times.

—Miss Fanny Brandon is visiting her uncle, Mr. Wm. Robertson, Peterborough, and her bright face and winning smile are much missed by the many friends among whom she is so popular, while Brandonhurst seems very lonely without the fair young daughter of the house.—Fenelon Falls correspondent of Bobcaygeon Independent.

Deep Ice

It is feared that the deep ice will have caused considerable destruction of fish, for shallow waters have been frozen solid to the bottom. It is said that large areas of Chemong lake have been frozen solid, but of course the fish would take to the deeper water.

FOOTBALL.

Deseronto association football players want to organize a league of four clubs, taking in Belleville, Deseronto, Picton and Napanee.

Write Notes to Themselves.

"Actors are great hands to write 'mash' notes to themselves," said a stage manager. "The leading young men, you see—the heroes that marry the beautiful girls—are supposed to attract to the theater myriads of young women. They draw big pay on this account; their friends talk seriously of the powerful, almost hypnotic, influences that they exert on romantic females. This power is the stock in trade of the actor who travels on his beauty instead of on his art, and he must always have tangible proof of it. So if the young women don't come up each mail with a bunch of authentic mash notes, he sees to it anyway that he gets mash notes all right. He times them so that they reach the theater during rehearsal. The manager every afternoon brings them to him—a half dozen pink and blue and cream envelopes, smelling of violet and orris. He takes them with a guffaw, reads them, passes them around. Every one pretends to be amused at their silly contents, but the minute the actor's back is turned the murmur passes back and forth: 'They're fakes. He wrote them himself. He spends two hours a day writing himself mash notes.' To tell the truth, this actor gets a number of authentic mash notes, but nobody believes it. It is thought that every note is a fake."—Washington Post.

"Barber, Barber, Shave a Pig."

In pig killing there is no more exciting moment than that of removing the bristles from the carcass. With such haste does the operation sometimes have to be accomplished that in a certain country family it was begun one day with a pair of fine brass candlesticks before the usual utensils could be found.

When Salmon P. Chase was at Kenyon college, which was then presided over by his uncle, Bishop Philander Chase, he encountered a similar difficulty and cut the knot with unhesitating decision. The bishop and most of the elders went away one morning, and young Salmon was ordered to kill and dress a pig while they were gone. He found no great trouble in catching and slaughtering a fat young "porker," and he had the tub of hot water all ready for scalding.

This process should have loosened the bristles, but either the water was too hot or the pig was kept soaking too long; at any rate, when the boy began scraping the bristles not one of them could be started. In pig killing phrase, they were "set." What could he do?

Then he bethought him of his cousin's razors, a fine new pair, just suited to the use of their owner, a spruce young clergyman. He pilfered them and shaved the pig from toe to snout.—Youth's Companion.

Puffy Eyes.

Puffy places under the eyes are usually due to some kidney disorder. Cold water should be taken freely, say a glassful half an hour before each meal and about two hours afterward. This treatment will not only cause the flabbiness to disappear, but will also render the complexion clear and the general health better.

Machines That Think.

The sewing of buttons on shoes and on garments is no longer done by hand in modern factories. There is a machine that sews 5,300 buttons on garments in nine hours, or more than eight expert sewers could possibly do in the same time. This machine requires no expert operator. A boy or a girl runs it.

And in one insurance office where it was formerly necessary for a force of clerks to copy names on reference cards to be filed in various places one clerk now writes the name on a single card with metallic ink, clamps it in a holder with a number of blank cards and flashes an X ray through the packet. Thus by a single motion one man writes, or, rather, prints, all the cards. —World's Work.

London's Roman Wall.

The destruction of Newgate brought to light another section of the ancient Roman wall which surrounded London and served as a fortification of the city. The whole extent of the wall has now been fairly well traced, and parts of it are still used as cellars and warehouses. The only portion of it that is still above ground is a bastion in the Church of St. Giles, Cripplegate. The ground of London is estimated to have risen at the rate of nearly a foot a century, and doubtless from time to time many rich finds of antiques will be unearthed, especially if a start is made to construct high buildings on the American plan.—Cleveland Plain Dealer.

Return to Calfskins Predicted.

Said a dealer in finished calfskins recently: "I am strongly of the opinion that the time is not far distant when we shall see a general return to the calfskin. At present and, in fact, during the past ten years shiny or lacquered leather has made a sensational inroad into calfskins, and while the leather is constantly being perfected and will undoubtedly be popular and standard for a long time to come the calfskin shoe will regain its old time favor. No leather that has been produced is the peer of a well made calfskin, and I am assured that it will again become the standard leather.—Shoe and Leather Dealer.

He Began Early.

The advantage of beginning a career at an early age is shown by the precocity of Edward Penfield, the designer and illustrator—that is, if Mr. Penfield is to be believed. It is told of him that he was once showing a piece of his early work to a friend, who, knowing that Mr. Penfield is yet under forty, asked in astonishment at what age he began to study art. With seeming reluctance Mr. Penfield gave the following explanation: "When a baby I was left in a basket at the door of the Art Students' league. They took me in and gave me a bottle of Chinese white and water. I cried for more, and so they set me to work."

Catalogues are Out

The city departmental stores are again on the war path with an unlimited supply of spring catalogues. Of course they have a right to distribute them to further their own cause, but our people should stop and think before sending their cash to a store one hundred miles away.

"WHIZ!! WALK A MILE"

Is a laconic definition of a toboggan ride. It's quick work going down the slide, but it's a long climb back to the starting point. It is very much that way with health; it is quickly lost and slowly regained. When the first symptoms of failing health appear, proper care may prevent the descent to utter weakness and debility. Usually the complication of disorders known as general debility has its origin in a diseased condition of the stomach and other organs of digestion and nutrition. These diseases are perfectly cured by the use of Dr. Pierce's Golden Medical Discovery. It cures through the stomach disorders which have their origin in a diseased condition of the stomach.

There is no alcohol in the "Discovery," neither opium, cocaine nor other narcotic.

"I was all run down; had no strength; had sharp darting pains all through me; head and back ache every day," writes Mrs. Frank Conwill, of Salamanca, N. Y. "I was also troubled with a distressed feeling in the stomach and pain in front of the hip bones. I had a severe cough and it nearly killed me to draw a long breath, I was so sore through my lungs.

"I wrote to Dr. Pierce, telling my symptoms as near as I could. He sent me a very kind letter, advising me to try his medicines, which I did, and before I had taken them a week I was decidedly better. I took two bottles of the 'Golden Medical Discovery' and two of the 'Favorite Prescription,' and am sure I never felt better in my life than when I quit taking them."

Dr. Pierce's Pleasant Pellets are a cure for biliousness.

Are You Looking FOR A **Good Investment?**

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

JAPAN IS UNITED AND IS SURE TO TRIUMPH

They are Not Over Confident in Regard to the Land Fighting

THE CAVALRY BRANCH THE WEAKEST SPOT

The Plan of Campaign is Now Developing Gradually—News from Far East

Chicago, April 5.—The Tokio correspondent of the Chicago Daily News writes as follows;

It is said that the Japanese plan of campaign involves starting from each side of Port Arthur and cutting the railroad at a point in the neighborhood of Mukden. Probably 150,000 men have already been landed on foreign soil. Exactly where has not yet come out. The second army is being mobilized and will be concentrated at Sendai. Seventy-five thousand men I know have already sailed from Nagasaki. For the rest of it we correspondents all disagree as to what the facts are, and as a matter of fact we are all as ignorant of the situation as the readers of our articles at home. We have been told if we make a dash for Corea on our own book we will not be allowed to accompany the Japanese troops during the war. Rather than spoil our chances for the whole war we have been sitting tight, hoping against hope that the Japanese Government intends to deal fairly with us and send us to the front when the necessity for extreme secrecy is past.

JAPS WEAK IN CAVALRY.

The Japanese seem to me to have now no especial reason for extreme secrecy. The army, excellent in infantry and artillery, is very weak in cavalry, which really is the eyes of an army. The Russian Cossack cavalry is likely to hover about the Japanese army, now forcing the advance guard to deploy and in this way delaying the advance of the whole army, now attacking the baggage train or picking up flanking parties. The Japanese will have the advantage of information furnished by the friendly inhabitants. Still the Russian sources of information are likely to be efficient.

The Government is now building a railway to run from Seoul to Wiju. This railroad will be of the greatest advantage in keeping the army in Manchuria supplied with provisions and ammunition. The protection of this railroad, once it is built, will be comparatively easy on account of the friendliness of the natives.

JAPS NOT OVERSANGUINE.

The period that we are now passing through has been one of preparation. The Japanese had hoped to block up the entrance to Port Arthur. They have failed thus far, but may be trying again some other method. Undoubtedly the navy cannot rest while so many Russian ships are still in fighting condition. While the Russian fleet at Port Arthur is badly crippled, still there are enough ships of the line left to inflict considerable damage in an emergency; besides, the four fast cruisers which are still supposed to be at Vladivostok might at any moment make a dash against Japanese transports, all of which cannot be convoyed by a Japanese squadron of sufficient size successfully to resist the attack of all four of the Russian cruisers. In other words, the Japanese line of communication by sea is by no means secure, and until it is one may expect from day to day the news of a new engagement at sea.

The Japanese are not overconfident. The victories at sea have not made them any the more sure of their army. They ask me on all sides; "How do you think our army will stand against the Russians? We Japanese feel very uncertain in this matter and we are awaiting the news of the first engagement with great anxiety." They dread an indefinite prolongation of the war, which would exhaust their resources and wear out the army. Many of them, I believe, hope for foreign intervention.

WILL FIGHT TO DEATH.

Nevertheless I believe the people are going to fight this war to the end, even if it means national ruin. I do not believe that the Japanese are going to make the mistake of trying to occupy the whole of Manchuria or march for Siberia, or any other foolish plan of that sort. I believe they will seize the coast line and just enough of the interior to make the Manchurian Railway useless to Russia. Then they will sit tight and wait for the Russians to attempt to drive them from the territory they have occupied.

To capture Port Arthur is the national hope, and is likely to be one of the principal strategical objects of the war. Port Arthur is surrounded by hills. These hills are all strongly fortified, and now undoubtedly are occupied by large forces of infantry. The approach to this circle of hills by land is over an open flat country. The storming of the place would be even more difficult than was the taking of Santiago in the Spanish-American war. I am afraid that the action of the American troops at Santiago may lead the Japanese to try to storm Port Arthur. Such an attempt, whether successful or not, would be accompanied by an enormous loss of life, for the ability of the Russian soldier to hold entrenched positions has been proved in too many wars to be a matter of doubt today.

NATION IS A UNIT.

A word about the solidarity of Japan. Modern political conditions have been found to fit in admirably with the ancient feudal institutions of Japan. A great man has his followers, who, in turn, have theirs, and so on down to the lowest class. This system of protection not only holds good in political life, as it does with us, but extends to every department of life in a fashion that makes the political organization of our leaders appear an insignificant affair. The Emperor, as head of the Church, the State and the social organism, unites all his network of clans, so to speak, and gives to the Japanese people a unity found nowhere else in the world. When something is to be done word goes out from the head of heads; it goes down the line from mouth to mouth and becomes with every man a personal matter in which he is individually interested. His future standing with his family and friends depends upon his carrying out his orders to the letter. Of course this system makes the life of the nation a private family matter, and consequently makes it next to impossible for a foreigner to get an inside view of Japanese life. It makes the Japanese very exclusive in regard to outsiders. I hear the same story on every side. A Japanese woman of the higher class would not think of marrying a foreigner.

A SELF-CONTAINED PEOPLE.

"You may know a Japanese abroad very well," said a diplomat of long residence in Tokio, "but when you come to Japan you will find a barrier. It is not because they are not democratic or friendly, but if they took you in at all they would have to adopt you into the family. I have many acquaintances. I know many Japanese who would do any kindness for me, but long as I have been in Japan I do not know a single Japanese intimately. There is not a Japanese who comes to my house for the simple pleasure of free personal relationship. (Indeed if a Japanese should come to my house too often, especially in this war time, it would throw suspicion on him among his fellows.

"It must not be thought that this reflects discredit on the Japanese. On the contrary, it enables them to advance steadily under the leading minds of their country. The ablest minds are at the head of all affairs, and when they decide to adopt some new measure after a thorough investigation they are able through the old feudal ties to accomplish the object quickly and effectively. Under no other system would it have been possible for Japan to absorb in less than fifty years the civilization of the West."

Editor's Advance Sheet

The Engineering Magazine for April opens with a very interesting review and summary of the commercial and industrial importance of Chile. It offers one of the most promising fields of attention, in view of the stimulus which will be given to the country by the opening of the Panama Canal. The figures given by Mr. Collins will be a revelation to most readers, and the illustrations accompanying his paper are of unusual interest, novelty and beauty. Three other illustrated articles which are characterized by the same uncommon combination of attractiveness and sound value are the account of the Crow's Nest Pass coalfields of British Columbia, by Mr. E. Jacobs, the description of the Alta Italia water-power and electric stations, by M. Enrico Bignami, and the review by M. Lucien Perisse of the mechanical features and new types displayed at the International Automobile Exposition at Paris. Employers and managers will find material of the utmost value in the exposition of the Allis-Chambers apprentice system, by Mr. P. W. Gates, the vice-president of the company, and in the study of wage-paying methods as they affect the workman, by Mr. Henry Hess, an employer of wide experience. Mr. Robb contributes a comparative study of the efficiency of internally and externally fired boilers. The number concludes with the customary comprehensive Review and Index of the Engineering Press.—The Engineering Magazine, New York.

Successful Dance

The Never Learn Club held a most successful dance and "at home" in the Foresters' Hall, Simcoe street last evening. A large number were present and the music furnished by Mariana's Orchestra, of Toronto. was excellently rendered. Light refreshments were served and all present thoroughly enjoyed themselves.

T.A.S. At Home

Last evening an "At Home" was held in the T.A.S. rooms, under the auspices of the T.A.S. Hockey Club, and a most enjoyable time was spent by the large number that were present. Progressive euchre was indulged in during the early part of the evening, and valuable prizes were given the winners. At the conclusion of this part of the programme dainty refreshments were served by the ladies who had charge of the evening's programme. Dancing was much enjoyed by all present and the music furnished by the T.A.S. orchestra was well rendered.

SPRINTING.

The gold medal for the Burns-Balland footrace is on exhibition in the window of Sanderson's jewelry store. The race will take place on April 9th, and will be over a course of two and a half miles along the Lakefield road.

RESIDENCE OF U. S. CONSUL GENERAL AT YOKOHOMA, JAPAN

OKPOTO TRIBE FOUGHT THEIR WAY INTO BRITISH LINE KILLING MANY

Punitive Expedition Meets with Opposition from Fierce Tribe in Nigerla, British West Africa

London, April 4—Meager details have arrived here of heavy fighting in Nigeria, (British West Africa) and of a reverse sustained by the punitive expedition sent against the Okpoto tribe. The Okpotos fought their way into the midst of the British square, and killed or wounded many of the British.

RUSSIAN PRESS ON THE THIBETAN AFFAIR NEW TRIPLE ALLIANCE

Britain, France, and Russia--More Moderate Tone of the Czar's Press, Russo-American Relations

St. Petersburg, April 4—The Russian newspapers continue to discuss the possible Anglo-Franco-Russian entente guardedly, but favorably, while at the same time sharply criticizing the British Thibetan expedition. For instance, the Novoe Vremya declares Great Britain's seizure of Thibet is bound to cause trouble for Russia, because of its effect upon those of her possessions which are under the influence of the Dalai Lama, but it follows this declaration with a significant editorial on the falsity of sentiment in politics, in which the point is made that Russian assistance to the United States at the most critical period in her history availed her nothing, and that the real interests of Russia and Great Britain now call for an understanding.

The Novosti favors an alliance, pointing out as a basis that Russia passage of the Bosphorus, for which Russia will guarantee Great Britain peace in India.

The Svet alone is bitter, declaring that Great Britain's diplomatic mission to Thibet is unmasked, having become one of blood-letting, showing that Great Britain is profiting by Russia's attention elsewhere.

Captain of volunteers Vorogzab, who has returned to Odessa from the Far East, in an interview, charges that the British at Singapore tried their best to betray him to the Japanese.

The Moscow Gazette publishes a historical review of Russo-American relations, concluding: "Henceforth the Americans will be styled as the ungrateful Yankees."

wants ports on the Pacific, an opening on the Persian Gulf, and the free

THIRTY YEAR DEBENTURE

TO BE ISSUED IN CASE THE BY-LAW CARRIES

Number of Communications Received at Last Night's Meeting of Board of Education.

A meeting of the Board of Education was held in the Secretary's office last evening and the following members were in attendance, Messrs. J. J. Hartley, Chairman, J. Stevenson, W. Pringle, V. Eastwood, J. Crane, W. Wrighton, J. J. McBain, L. M. Hayes, H. P. Kennedy, Dr. Burnham, W. H. Hall and R. B. Rogers.

The secretary's report was read and confirmed.

COMMUNICATIONS.

A communication was read from Messrs. Dennistoun, Peck, Kerr and Stevenson, which stated that upon consulting two of the trustees they pointed out that the High School Act of 1901 authorizes the issue of debentures for High School purposes, for a term of 30 years and they advised that the Board adhere to their demand for 30 year debentures, for the building of the new Collegiate Institute.

A communication from the Sturgeon Falls Board of Education soliciting the aid of the Peterborough Board in combatting the famous special act spoken of in the Toronto News editorial column, of the 18th inst. A copy of this editorial was inclosed but was accepted as read.—Received.

The following communication from the Town Clerk was read:—

"The Town Solicitor has advised the Committee of the Council that there is considerable doubt whether the Town has authority to issue debentures for a longer period than 20 years for Collegiate Institute purposes, and it has also received letters from a number of brokers and financial institutions advising against issuing instalment debentures as they will not sell as well as debentures issued for a straight period. "I am instructed to say that unless they hear from the Board of Education to the contrary, the bylaw will be submitted to the electors to issue debentures for 20 years and payable at the end of that period."

A telegram from Miss Annie Weir was read, in which she accepted the position on the High School staff.—Received.

Miss Mina Richardson sent in her resignation owing to ill-health.—Accepted.

Mr. Wallace wrote, accepting a position on the Public school staff.—Received.

On motion of Messrs. Hill and Dr. Burnham, Miss Evans, of Huntsville, was appointed at a salary of $350 to fill the vacancy occasioned by the resignation of Miss Richardson.

SCHOOL REPORTS.

The following report of the principal of the High School was presented;—

	On roll	Aver.
Form IV	12	12
Form III	37	35
Form II	49	48
Form IA	43	42
Form IB	45	42
Commercial	29	27
Total	213	201

The following is a report of the Public schools for the month of March;—

	On Roll	Aver.
Central School	417	374
South Central	411	376
Ashburnham	188	168
Barnardo Ave	175	155
Park street	170	159
George street	105	96
Kindergarten	79	57
	1545	1385

FINANCIAL REPORT.

The monthly financial report was as follows;—

Received.

Town Treasurer	$100 00
Fees, Collegiate Institute	100 00
Fees, Kindergarten	17 25
Fees, Public schools	4 00
	$1111 25

Monies Paid

J. E. Brown	$ 1 50
Jno. McIntosh	99 00
Stevenson Coal Co	22 14
Jno. Parrington	6 50
Stevenson Coal Co	8 19
Walter Wood	18 00
Geo. Gumprecht	2 00
D. Dunlop	19 00
A. Williams	96 25

The payment of the above accounts was confirmed on motion of Messrs. Hayes and Crane.

The Finance Committee recommended payment of a number of accounts.

The Supervision Committee recommended the appointment of a Drill Instructor and mentioned Sergt.-Major Brittain as a capable man for the position, at a salary of $25 per month.

The suggestion was adopted unanimously being seconded by Dr. Burnham.

It was moved by Mr. V. Eastwood, seconded by Mr. H. P. Kennedy, that the Council be requested, on the advice of our solicitor, in case the bylaw for the Collegiate Institute carries, to have the debentures issued for 30 years.—Carried.

Factory for Norwood

Messrs. Buck and McLean purpose commencing the operation of a veneer and stove factory in Norwood. A large number of hands will be employed, and as this material is much in demand, there is every likelihood of this new venture being most successful.

Y. M. C. A.

Everyone is looking forward to the lecture by Prof. Clarke at the Y.M.C.A. this evening, April 5th. Rev. Oswald Rigby, M.A., L.L.B., will take the chair. Mrs. K. Eardley-Wilmott and Miss Helen Davies will be the soloists.

BIRTHS

MOWRY—In Peterborough, at 381 Sherbrooke street, on Sunday, April 3rd, 1904, the wife of Mr. Orlando Mowry, of a daughter.

McFARLANE—In Peterborough, on Sunday, April 3rd, 1904, the wife of Mr. Chas. McFarlane, Gilmour st., of a son.

FERGUSON—On Monday, April 4th, 1904, the wife of Mr. H. Ferguson, of Stewart street, of a son.

GILL—In Ashburnham, on Sunday, April 3rd, 1904, the wife of Mr. Alfred R. Gill, Monroe Ave., of a daughter.

TIGHE—In Ashburnham, on Monday, April 4th, the wife of Mr. Hugh Tighe, Stewart street, of a son.

DIED

STRATTON—On Monday, April 4th, 1904, William Armstrong Stratton, K.C., Barrister, aged 43 years.

Funeral on Wednesday, 7th at 3 o'clock, p.m., from the family residence, 118 Gilmour street.

If all the stone-laden ships have been sunk at the entrance of Port Arthur that the Japanese are said to have sunk there they will give give rise to perplexing questions among the geologists of coming ages.

—Mr. Geo. Davidson, of Hespeler, is visiting his brother, Adam, of this place.

ADVERTISE IN THE TIMES

THE DEMISE OF MR. W. A. STRATTON, K.C.

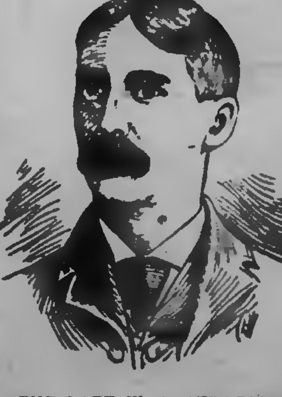
A PROMINENT PETERBOROUGH LAWYER AND RESPECTED CITIZEN PASSES AWAY

Yesterday Afternoon—Short Sketch of a Most Successful Career

Sad we are to have to chronicle the death of one of Peterborough's most brilliant and most respected citizens, the late W. A. Stratton, K.C., who passed away yesterday morning at 7 o'clock, after a prolonged illness. Deceased had been ailing for some time, and although his death was expected, it came as a shock to his relatives and many friends, in whose esteem he held a high place.

The late William Armstrong Stratton, was born 43 years ago in Ashburnham, and was a son of the late James Stratton. His early education was received at the public and High schools here and his course of study was completed at Toronto University, from which he obtained his B.A., degree in 1880. He chose law as his profession, and read in the office of Mr. D. W. Dumble, K.C., of Peterborough, and later was connected with the firm of Mowbat & Miller, Toronto. In 1886 he was called to the bar, and began practicing here, having an office at the corner of George and Simcoe streets.

Later on in the year 1888 deceased entered into a partnership with Mr. R. R. Hall, and the firm has been known as that of Stratton & Hall ever since. In 1899 the late Mr. Stratton was made a Queen's Counsel. He was a man especially learned in commercial law and had a wide literary culture. His remarkable untiring industry was admired by his many friends, and it was owing to his too strict application to business that his health became impaired. His position in the legal profession was one of the most prominent, and conscientious attention to the interests of his clients, won for him wide popularity.



THE LATE W. A. STRATTON.

His devotion to his legal duties was most marked, and he never sought distinction in other circles, although his interest in politics was active at times. Deceased was a member of Peterborough Lodge, A. F. and A.M., the Peterborough Lodge of Oddfellows, the Canadian Order of Foresters, and also of the Independent Order of Foresters. He was also a member of the Peterborough Law Association.

During his younger days, deceased was considered one of the best cricketers in Canada, and was more than once chosen to represent Canada in matches of international importance.

The late Mr. Stratton possessed a warm and kindly nature, and, although never effusive in his good deeds, many were his acts of kindness, and hundreds of friends will ever remember him as having befriended them.

A mother, Mrs. James Stratton, three brothers, Hon. J. R. Stratton, A. H. Stratton, and Dr. E. G. Stratton, now at the Riviera; and four sisters, Mrs. (Dr.) Hunter, Miss Stratton, Miss Mary Stratton, and Mrs. T. F. Matthews are left to mourn his loss.

The funeral will be held under Masonic auspices to-morrow afternoon at three o'clock.

WEDDING BELLS

Nuptials of Mr. Frederick Peat and Miss May Alina Margaret Bourchier

St. John's church was the scene of a pretty wedding ceremony last evening, when Mr. Frederick Peat was united in the holy bonds of matrimony to Miss Mary Alina Margaret Bourchier, of Peterborough. The bride was assisted by her sister, and little Miss Margaret Hammer, made a pretty flower girl. The groom was supported by Mr. Jameson, and the wedding march was beautifully played by Mr. Armstrong. A large number of friends and relatives were present, and the impressive service was conducted by the Rector, Rev. J. C. Davidson. The bride was beautifully attired and the floral decorations were most appropriate.

A PROGRESSIVE CONCERN

Elwood Tinworkers' Gold Mining Company's Excellent Report

Organized in July, 1902, and incorporated under the laws of British Columbia, the Elwood Tinworkers' Gold Mining Company has been most successful, and its prospects for the future are of the brightest. The company's property consists of two full claims, the Western Star and St. Kew, there being 52 1-2 acres in each claim. This group is located in the Fish River District, about five miles from Camborne, B.C.

It is probable that the Kootenay branch of the Canadian Pacific Railway will be completed this year, and then all inland points in this district will have direct rail transportation to the United States. There is an abundance of water and timber on the property, and several other valuable mining properties are adjacent.

The Directors of this company feel confident of success and are assured that this corporation offers one of the best securities, at the market price, ever offered, and much of their own money has been invested. For continuity, permanency and richness the ore vein now opened on the Silver Dollar group surpasses any heretofore opened up in this very rich belt, and being a fine tunnel proposition the ore can be mined for a minimum cost, and there is every accessory upon the property required for mining and milling.

Further information may be had on application to Mr. Jos. Mills, the local fiscal agent of this progressive corporation.

ST. JOHN'S VESTRY MEETING

About Thirty Members of Congregation Attended Last Evening

At last evening's vestry meeting at St. John's church there was a good attendance of members of the congregation, and the following Wardens were elected, Col. H. Z. Rogers, Rector's Warden, and Mr. H. C. Cluxton, People's Warden. The purchase of a rectory site was discussed at some length and Dr. Boucher mentioned that the Irwin property could be purchased for $6,500. The matter was finally left with a working committee consisting of Messrs. Dennistoun, Wilmott and Elliott together with the incoming and outgoing wardens. Dr. Boucher was appointed convenor of the committee.

The election of sidesmen was deferred until the adjourned meeting to be held on Monday, April 18th. The election of a representative on the Board of Nichols' Hospital was also left over. Mr. Pousette, who for the past twenty years has represented the church on this board, intimated that he would present his report at the next meeting.

Mr. Walkey was unanimously re-elected vestry clerk, and the rector spoke in glowing terms of his excellent work during the past year. The present auditors were re-elected and Mr. Pousette's name was added to the committee on the rectory site.

Dr. Boucher was given authority to obtain an option on the Irwin property, and Mr. Dennistoun spoke of the young men's Bible class fund, which has been raised for the purpose of placing a decorated window in the schoolroom. $106 lies in the bank for this purpose, and the Rector and Mr. Dennistoun were elected a committee to look after the matter. The late Charlotte Jane Nicholls was the originator of the above idea and Mr. Dennistoun suggested that it would be very appropriate and an evidence of the congregation's appreciation if her name were inscribed on the window. All present were of the same opinion, and it is quite likely the suggestion will be adopted.

The question of lessening the number of collections was discussed, and the rector was most emphatic in his assertion that there are at present too many collections. This matter will be thoroughly gone into at the next meeting. Mr. Pousette and the Rector, were appointed a committee to draw up a resolution of sympathy to be recorded on the minute books, in view of the sad death of the former organist of the church, the late Miss Lottie Cochrane.

The financial report will not be published until after the auditors have examined it. Messrs. Dennistoun, Dr. Boucher and Rush were appointed a committee to represent the congregation at the Senate.

ATHLETIC WORLD

BY OUR SPORTING EDITOR

BASKETBALL.

The executive and basketball team of the London Y.M.C.A. will arrive in Peterborough this morning and at 2 p.m. the basketball team will play the Beavers, of this city. A conference will then be held, and the Ladies' Auxiliary will provide refreshments. The visitors will leave this city for Ottawa tomorrow morning.

The following players will uphold the honors of the Beavers this afternoon;—Backs, G. Thornton and R. Thornton; centre, E. Weller; forwards, H. Cressman and F. Cressman. R. Winch will replace R. Thornton at half time.

HOCKEY.

The injunction case of "Reddy" McMillan against the O.H.A. was to have been heard at Belleville on Saturday, but McMillan was still unprepared and another adjournment for a week was ordered.

ARMY TRANSPORTATION.

Few outside the military profession realize what it means to assemble an army and provide it with the the means to move, to live and to fight. In our own land, so thoroughly covered with a network of splendidly constructed and splendidly equipped railways, an army of 10,000 men can be promptly assembled readily moved and easily supplied.

In the country which is soon to be the field of operations of large armies in the Orient, but one railway exists, which will be utilized by the power through whose territory it passes to bring troops and supplies to the field of active work. Then the cars must be abandoned, and the men must exert their strength and power of endurance in weary marching.

The great quantities of supplies must be taken up by wagons and carts, to be hauled along to meet the needs of the advancing men and animals. Consider the number of wagons it would require to carry the food for 100,000 men and the forage for the 200,000 animals that must accompany them. Every man will consume at least three pounds of food each day and every animal at least fifteen pounds of forage, a total of 600,000 pounds—three hundred wagon loads. This means a wagon train nearly two miles long. At the end of the first day's march these three hundred empty wagons may start back to the base, passing another train of three hundred wagons hauling the food and forage for the second day. When the first three hundred wagons reach the base the army has advanced two days, consequently another three hundred wagons must have left the base the same day that the first three hundred arrived there. In this way the chain of wagons increases day by day as the army moves further from the starting point.

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. I would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

MOVING AN ARMY

Few outside the military profession realise what it means to assemble an army and provide it with the the means to move, to live and to fight. In our own land, so thoroughly covered with a network of splendidly constructed and splendidly equipped railways, an army of 10,000 men can be promptly assembled readily moved and easily supplied.

In the country which is soon to be the field of operations of large armies in the Orient, but one railway exists, which will be utilized by the power through whose territory it passes to bring troops and supplies to the field of active work. Then the cars must be abandoned, and the men must exert their strength and power of endurance in weary marching.

The great quantities of supplies must be taken up by wagons and carts, to be hauled along to meet the needs of the advancing men and animals. Consider the number of wagons it would require to carry the food for 100,000 men and the forage for the 200,000 animals that must accompany them. Every man will consume at least three pounds of food each day and every animal at least fifteen pounds of forage, a total of 600,000 pounds—three hundred wagon loads. This means a wagon train nearly two miles long. At the end of the first day's march these three hundred empty wagons may start back to the base, passing another train of three hundred wagons hauling the food and forage for the second day. When the first three hundred wagons reach the base the army has advanced two days, consequently another three hundred wagons must have left the base the same day that the first three hundred arrived there. In this way the chain of wagons increases day by day as the army moves further from the starting point.

This refers only to food and forage that are consumed each day. There are also to be considered the cooking utensils, the tentage, the field hospital, the extra clothing, the bridge trains, the signal and map making outfits and the ammunition that must accompany the army. Again, the records of all the men must be kept, and accounts and returns of money expended, stores and property issued must be rendered. It is as if all the inhabitants of a great city would take up the march carrying with them what they require for their comfort and health. One hundred thousand has been assumed for the purpose of illustration only; in fact, each nation will probably have three times that number in the field before the war is over.

From all this it is possible to acquire a conception of the immense task that is now being worked out in the Orient by the belligerents while we wait impatiently for news of strife. All these men must be brought to the field, all these supplies must be gathered together, all these wagons and cars assembled, before the advance begins.

EDITORIAL COMMENT

If all the stone-laden ships have been sunk at the entrance of Port Arthur that the Japanese are said to have sunk there they will give give rise to perplexing questions among the geologists of coming ages.

Faded Women Need Richer Blood

It Stamps the Glow of Robust Health on Cheeks and Lips. How Blood is Made Rich and Red Enough to Beautify the Complexion.

A bright rosy complexion can easily be acquired. All that is necessary is to purify the blood and supply it with an increased number of red corpuscles. The simplest method of doing it is to introduce more iron into the system, which is always lacking where the complexion is pallid or sallow.

Iron in a concentrated form, specially adapted for internal use is contained in its most efficient state in Ferrozone, which is noted for marvellous blood building properties. No matter how weak or poor the blood may be, Ferrozone will enrich and nourish it. The immediate result is a better color, which will improve steadily under Ferrozone.

Every girl that takes pride in her complexion would find Ferrozone of greater value than causmetics or face powders. Its influence is lasting, whereas artificial beautifiers are but a temporary aid. Thousands that have used Ferrozone are glad to endorse it strongly because it certainly is the best remedy for pimples, blotches, skin eruptions and poor complexion than money can buy.

Miss Minnie E. Stirling, of Lancaster, writes, "I can recommend Ferrozone to everyone who needs something to clear up their complexion. Before using Ferrozone my skin was sallow, and had a very unhealthy color. After the first box of Ferrozone there was a great improvement and when I had used three boxes I felt much better and had a satisfactory color in my cheeks."

Mrs. O. T. Warwick, of Bradford, says: "My daughter was greatly benefitted by using Ferrozone. She used to have a sickly color and never looked as if she was strong. After using two boxes of Ferrozone she felt better and her color was wonderfully improved. This encouraged her to continue Ferrozone and in a few weeks she looked like a different person and had a clear rosy complexion. Ferrozone accomplished wonders for my daughter."

Ferrozone is just what most girls and women need. It builds up their system, improves their looks, and makes them feel what buoyant good health really means. Price 50c. per box or six boxes for $2.50 at all druggists. Beware of substitutes and get Ferrozone when you ask for it. Mailed to your address by N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

TEXTS CERDITED TO SAVIOR

GERMAN PROFESSOR HAS COLLECTED SAYINGS NOT FOUND IN GOSPELS

Inherent Evidence That That They Were Uttered by Christ to His Disciples

Berlin, April 4.—Professor Harnack, a widely known and liberal professor of theology in the University of Berlin, has made a collection of the sayings of Christ that are not contained in the new testament, but which he maintains must be genuine on the strength of internal evidence. Some of these sayings are;

THOUGHT TO BE GENUINE.

"It is more blessed to give than to receive," although it is not in the gospel it is noted by St. Paul as having been said by Christ.

"He is guilty who troubles the spirit of his brother." This is from fragments of the gospel to the Hebrews, quoted by St. Jerome;

"You should never be joyful save when you behold your brother in love."

"The seeker shall not rest until he finds, and when he finds he shall be astonished."

"I shall choose out the good. Those are the good whom my Father in Heaven has given me."

"In that which I find you therein shall ye be judged."

Speaking to one who was at work on the Sabbath;

"If thou knowest what thou doest thou are blessed; if thou knowest it not then are thou accursed and keepest not the law."

"Who is near me is near the Father; who is far from me is far from the Kingdom."

"Hast thou seen thy brother? Then hast thou seen God."

THE GOSPELS ARE INCOMPLETE.

Professor Harnack comes to the conclusion that these sentences are so varied and cover so large a field in ethics and religion that there is no reason to suppose that the four gospels contain anything like a complete account of Christ's sayings or teachings or any one brach of morals or religion. That much of what he said and did is forever lost to the world is quite certain. He believes that at the time the four evangelists lived there was an immense amount of material to choose from which is now lost, and this being so, the extraordinary similarity of all four accounts raises suspicions which it is exceedingly difficult to allay.

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

·SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

CURES GUARANTEED OR NO PAY. Consultation Free—Books Free—Question Blank Free for Home Treatment.

· Drs. Kennedy & Kergan, 148 Shelby Street, Detroit, Mich.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,800 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $35 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 9-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., 9-30-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

ROBERT HARRISON
Manager.

BRITISH FORCES KILLED OVER 300 THIBETANS

Natives Massed Together in Mad Excitement Killed Each Other as the Sikhs Charged with Bayonets

Tuna, Thibet, April 2—The Thibetan general, the whole of his personal escort, and five high Lhassa officials were among the hundreds killed in the fighting of March 31, at Guru, Thibet. The small British losses are accounted for by the fact that the Thibetans were so huddled together that the majority were unable either to use their swords or to fire. The swordsmen in the front rank could not reach the Sikhs who had fixed bayonets, while the mob could not reach the enemy, but many of them probably killed each other in the mad excitement

The scene recalled old-time fights in cockpits, the grim, determined faces of the Thibetans lighted with devilish savagery, expressing contempt for the Sikhs, whom they outnumbered six or seven to one.

When the Lhassa general fired the first shot, the Thibetans, with wild shouts, drew their swords, fired their matchlocks, and surged forward in all directions. About a dozen swordsmen made a desperate rush in the direction of Col. MacDonald.

LEGAL STATUS OF AN INDIAN

Interesting Judgement Given by His Honor Judge Desnoyers

SELLING INDIANS LIQUOR

Jubge Holds that Anyone Living on Reserve is Legally An Indian Whether Halfbreed or not

Montreal, April 2.—Judgment has been rendered by His Honor, Judge Desnoyers, in a case of considerable interest both legally and otherwise. For some time past the hotel keepers of Lachine have been carrying on a considerable trade with the Caughnawaga Indians employed in the various factories at Lachine. Complaints have reached the Government, and the Department of Indian Affairs prosecuted three inn-keepers under the Indian Act, which prohibits the sale of liquor to Indians, or to anyone reputed to be a member of an Indian band.

In these cases, which were bitterly fought, Mr. Arnold Wainwright, of Messrs. Davidson and Wainwright, represented the Government, and Mr. O. A. Wilson, the defendants.

The defence raised the question as to whether the inhabitants of Caughnawaga could now be described as Indians, and thereby raised the question as to what today was an "Indian" in Canada, under the terms of the Indian Act.

The defence further alleged that the inn-keepers were ignorant that the individuals to whom they sold the liquor were Indians inasmuch as they looked so much like white men, and that being innocent of any intent to break the law, they could not be held guilty.

A UNIQUE JUDGMENT.

The learned Judge, in an elaborate judgment held that any inhabitant of Caughnawaga, reputed to belong to the band, and living there as such, was an Indian within the terms of the Indian Act, no matter whether he was a half breed or not. This decision will deprive the Indians from practically adopting the status of white men, no matter what their degree of civilization may be, so long as they reside upon a reserve and obtain assistance from a paternal Government as a band of Indians.

The learned Judge further held that even though the Indian Act did not state that it was essential that there should be knowledge on the part of the offender that the Indian served with the liquor was such, the inn-keeper became an offender under the Act, even if he had no intent to infringe the law, and that consequently the defendants were guilty even though they believed that their customers were white men. As a matter of fact, as the Judge pointed out, the inn-keepers must have been aware that they were dealing with Indians living in Caughnawaga.

In view of the fact, however, that the Government had not instituted any prosecution under this act for twenty-five years, he suspended sentence against the defendants, on conviction, stating that if the offence was renewed the full penalty would be inflicted.

The decision will probably have the effect of stopping the traffic to Indians in Lachine, which has resulted in great distress and suffering among the wives and children in the Indian settlement across the river

GLAD OF ACTION TAKEN.

Referring to the judgment given by His Honor Judge Desnoyers, Mr. S. J. Carter, president of the provincial branch of the Dominion Alliance, said this morning that he was glad something was being done which would probably act, to a great extent, as a check upon the selling of liquor to the Indians from Caughnawaga.

"There have not been any serious grievances brought before the Dominion Alliance, at least officially. Of course we know that this evil exists, and that the Indians are supplied with spirits in spite of the law to the contrary. What is said about the traffic to Indians is perfectly true, and it is well known. The Indians go to Lachine and there the law is not recognized or enforced.

"We understand that the law is practically a dead letter, but by this judgment public attention will be aroused, and, no doubt, there will be good results. There has been a great deal of laxity in the matter of selling liquor to the Indians and I am pleased to learn that some active steps are being taken.

"The fact must be borne in mind, however," continued Mr. Carter, "that Lachine alone is not guilty. The Indians come into Montreal and get liquor. The law is not enforced here although it is supposed to be, and, of course, is observed by some dealers. In defiance of it many of the liquor men sell to the Indians, and there is very seldom anything heard of the matter.

"I am quite certain that there has been much suffering among the families of the Indians is Caughnawaga on account of the drinking among them, which is carried on in direct defiance of a well-known law. If this important matter is brought forcibly to the notice of the public, it is likely that the law will be more strictly enforced, and there will be less trouble of this kind among the Indians."

BURNED LIVING BABIES IN FIRE

A Murder Syndicate Said to Exist to Philadelphia

SOME STARTLING EVIDENCE

It is Believed That Probably Hundreds of Babies Have Been Murdered

Philadelphia, April 4. — "Living babies have been thrown into red-hot furnaces to destroy them," said Coroner Dugan yesterday.

"I have evidence to prove this," he continued, "and also evidence of the existence of the murder syndicate which does away with these children, and by destroying them destroys evidence of murders."

Coroner Dugan made this declaration after the arrest of Mrs. Elizabeth Ashmead, of 256 South Twelfth street, and her son, of the same address. They belong to one of the most prominent families in the city. The arrest was made in connection with the deaths of two young women.

It is charged that Mary B. Sloan and Sarah Hughes died in Mrs. Ashmead's house. Mrs. Ashmead admits that the Hughes woman died there, but declares that the death was from natural causes. The bodies were exhumed.

Coroner Dugan announced that he would lay bare horrible details of the case at the inquest over the deaths of the two women. Examination shows deaths were caused by operations performed by a physician and the coroner declares that this doctor was in the employ of the syndicate of baby murderers that he has been trying to run down for months.

At the inquest evidence was given to show that the syndicate slew from sixteen to eighteen newly-born infants each week, thus netting at the rate of $50 for each murder, a weekly income of from $800 to $900.

Dr. David Moser testified; "I saw live babies wrapped in an apron and carried to a furnace, into which they were thrown."

Dr. Joseph H. King testified; "Mrs. Ashmead said to me; 'We wrapped babies up in newspapers and laid them aside until they died, when we either thew them into a heater or out on the dump."

Mrs. Ashmead listered to these statements with a face white and drawn.

Mrs. Ashmead is accused of being responsible for at least the deaths of one-third of the 2,500 to 3,000 children born in Philadelphia each year whose births are never recorded.

The result of the hearing before the coroner was that Mrs. Ashmead her son Howland, and Dr. Matthew McVickar have been held as accessories to the deaths of Mary B. Sloan and Sarah Hughes.

Later Grace Ashmead, a beautiful girl, was taken to the Central station and held as a witness.

Mrs. Ashmead has been twice indicted before on charges of being implicated in deaths of young women, but neither indictment was pressed.

A PRETTY ROOM.

The Way Little Florence Fixed It Up to Look "Bu'ful."

Little Florence was in great glee. She said she had made the room look "bu'ful" for mother's friends that afternoon. She climbed into the great chair by the fireplace to admire her work. Over each picture she had placed a large green leaf, and there in front of the mirror, in the vase Uncle Jack brought from Venice last year, was a whole bunch of leaves. The room looked like a garden, and her own bright face was like a blossom above the green leaves in her hand.

But mother cannot find her little girl. Florence is not where she should be.

"Ah, at last I have found you, dear!" says mother. "What are you doing, Florence?"

"Just resting. I'm so tired from reaching up to the pictures! Isn't the room bu'ful? And, oh, mother, I'm so tired! Please, may I have my nap?"

The little head was bobbing over, and mother could not be cross with her darling, even though the leaves that brighten the room were from the best palm. The poor lady only sighed for her plant and tried to explain to Florence when she woke.

ADVERTISE IN THE TIMES

The Elwood Tinworker's Gold Mining Company.

ORGANIZED JULY 1902

CAPITAL TOCK $150,000
PAR VALUE OF SHARES $1.00.

The mining claims of this company consist of two full claims namely

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.
ELWOOD, INDIANA

General Manager of Mines, J. A. DURRAGH, M. E., Camborne, B. C; Secretary J. R. BOTTORFF; Local Fiscal Agent JOSEPH MILLS, Peterborough. . . . .

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of $[illegible] with shares at $1 each.

The officers of the Company are C. F. Buman, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $[illegible] capitalization, in shares of $1 each, $[illegible] worth is issued, the first small allotment of this was sold at [illegible] per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have [illegible] acres under aid with three distinct veins, or layers of coal which are [illegible] feet thick each. The first one at a depth of [illegible] feet, it is this vein which we are now mining. The second one lies at a depth of [illegible] feet and the third at [illegible] feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft a total depth [illegible] feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than [illegible] tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than [illegible] at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease, as our fixed expenses will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from $2 75 to $[illegible] for Mine Run and $1 75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $[illegible] per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over [illegible] per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $[illegible] each. we predict that this stock will be worth not less than $[illegible] per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President.

GENERAL OFFICES:
100 Washington St, Chicago, Ills.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1 20 a ton Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3 00 to $27.00 per ton. 95 per cent. can be saved by cyinideing process.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

THE

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

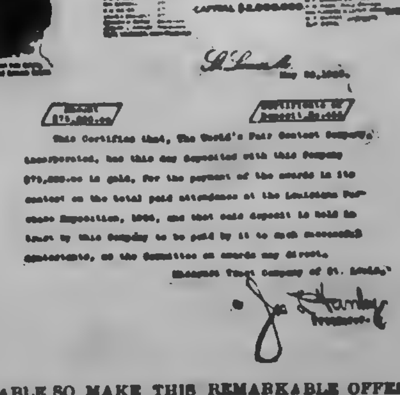
$75,000.00

This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The [illegible] persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1 00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$[illegible]
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	2,500.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00



MISSOURI TRUST COMPANY

This Certifies that, The World's Fair Contest Company,

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

RUSSIANS WILL TRY TO FLOAT SUNKEN VESSELS

Navy Department Announces That Japs Fleet was Not at Port Arthur on Wednesday

Port Arthur, April 2—All is quiet here and there is no change in the situation. The weather is warmer, and the sick and wounded are making good progress toward recovery.

The Japanese who were killed in the last attack upon this place, were buried this morning in the Chinese cemetery outside the town with military honors.

It is hoped it will be possible to raise the Japanese fireships which were sunk in attempting to block the harbor.

NO ATTACK MADE

Tokio, April 2—The Navy Department has no information concerning the reported Japanese attack on Port Arthur March 30-31, and the officials doubt that a general attack occurred. It was added that it was possible that a few Japanese cruisers are in the vicinity of Port Arthur, and that there may have been an exchange of shots with the Russians, but it is certain that the main Japanese fleet was not engaged at the time referred to.

Why are the Japanese so bent on blocking up Port Arthur harbor? They are not afraid of the Russian ships. Nothing would please them more than to have these come out and meet them at sea. The obvious explanation seems to be that they have another use for the fleet that is blockading Port Arthur. The common guess is that they want it to protect a great fleet of transports taking troops across the sea. We cannot see what threatens such a fleet, if it is true that the Russian cruisers are still in Vladivostok harbor. Perhaps the contemplated movement is so great that the Japanese want to make assurance doubly certain. This looks as if it were true that only a part of the available Japanese forces has been thrown into Korea. Late estimates indicate the presence of less than 10,000 men in the peninsula.

These have spread over all of it with great energy and occupied every strategic point. But they do not seem disposed to go farther. On the contrary, those in the advance seem to be selecting favorable defensive positions and fortifying them. There begin to be indications of a strong defensive line drawn across the whole peninsula, fifty to one hundred miles south of the Yalu. It may be that they are going no farther; that the only purpose of the army in Korea is to hold it firmly and defend it against the Russians, while the civil servants of the Mikado recognise the government and make it an appanage of Japan.

What will Japan do with the rest of her army of 200,000 or 300,000 men? A military writer in the London Times, who has had previous opportunities for close observation of Japanese strategy in war, believes that she will throw them on the Liao Tung peninsula as soon as the season permits. This is no time for landing troops in the river estuaries on which important strategic points are located. Not only the rivers but the bays are blocked with ice.

The theory of the Times writer is that Japan has in reserve an army larger than that thrown into Korea; and as soon as the ice goes out of the river and bays, she will send fleets and transports up the Liao Tung river before the Russians have time to mine it, take Niu Chwang by bombardment and assault, land troops in force and make this considerable city her base of supplies for operations in Southern Manchuria. This will isolate Port Arthur, cut the railway, threaten the Russian force on the Yalu in the rear and open the best possible route for operations farther into the interior. We shall see in a short time if there is anything in the idea.

Paris, March 31—The Echo de Paris has a despatch from St. Petersburg which says that the Japanese numbered 2,000 and the Cossacks 900 in the Chong-ju engagement. The two forces were only 600 yards apart in the fight.

ANARCHY IN COREA.

Correspondents Resent Japanese Restrictions.

London, Thursday, March 31 — The Daily Mail correspondent at Seoul, in a despatch dated March 24, describes the internal situation in Corea as being grave. Outside the reach of Japanese bayonets, he says, anarchy practically prevails.

The Japanese censorship now extends beyond military movements. It does not allow any mention of local disturbances, the correspondents deeply resent the Japanese restrictions, and many who were pro-Japanese in their sympathies, have completely changed their attitude.

London, March 31 — The Daily Telegraph says the Japanese authorities have refused correspondents the use of the field telegraph lines, and that all despatches must be sent to Tokio by mail. This paper further says that there is no sign that any foreigners will be permitted to go to the front, though the native newspaper men will be allowed to do so.

The Daily Telegraph, in an editorial on the unprecedented severity of the censorship, suggests that Japan has some new and important move to conceal, possible the re-embarkation of a portion of her troops already in Corea for some other point in the theatre of war, and is anxious to guard against the possibility of leakage through foreign correspondents, who might sympathise with Russia.

Russians Evacuating Corea?

A correspondent of the Daily Telegraph at Seoul reports that the Russians are evacuating the positions they occupy in Corea.

Special despatches from Shanghai repeat the rumor that the Mikado will shortly proceed to Corea with the headquarters staff.

Coreans Ready for Rebellion.

The Seoul correspondent of The London Daily Mail describes Corea outside the districts occupied by the Japanese, as being in a state of anarchy and in readiness for rebellion. The correspondent asserts that the censorship prevents any reference to disturbances.

Japs Occupy Haiju.

Seoul, March 30 — The Japanese advance occupied Haiju, a seaport south of Anju, March 27.

FROM THE LAND SIDE.

Capture of New-Chwang Expected in a Week.

London, Thursday, March 31—A despatch to the Chronicle from New-Chwang says it is the best opinion that the Japanese have indefinitely deferred attacking New-Chwang.

A despatch to the Daily Mail from Shan-Hai-Kwan says, however, that the Japanese expect to capture New Chwang from the land side in a week.

Apologised for Flag Incident.

London, Thursday, March 31— The Times prints a despatch from New-Chwang, saying that the Russian police have apologised for hauling down the American flag there, and have rehoisted it over the correspondents' quarters. The Russians are already enforcing martial law on the west bank of the Liao river.

The Tein-Tsin correspondent of the Standard says that the effect of martial law at New-Chwang has been exaggerated. The discomfort therefrom thus far has been small, although future developments may be unsatisfactory. The area included in the proclamation probably will be extended west of the Liao River.

WM. ARMSTRONG AN EX-CONVICT

Liberated from Kingston Penitentiary Last Sum—Served Term for Shooting a Bank Teller.

Ottawa, April 2.—Col. Sherwood, commanding officer of the Dominion Police, today identified by means of photographs the man, William Armstrong, now under arrest at Peterborough for obtaining money under false pretences. He turns out to be Stanley Steele, an ex-convict, who was liberated from Kingston Penitentiary last summer, after 16 years' imprisonment.

Steele was convicted of robbing a bank in Antigonish, N.S., in 1887, at which time he shot the teller, and received a 20 years' sentence, part of which was served in Dorchester Penitentiary, New Brunswick, and the latter part in Kingston. He gained four years on his term by good conduct.

Steele, through his fake advertisement in the papers offering employment to parties at St. Louis Exposition, raked in some hundreds of dollars.

Y. M. C. A.

Mr W. R. Lough, principal of the Clinton Model School, addressed the Y. M. C. A. meeting Sunday afternoon, and spoke on the subject. "The Duty of the Hour." Mr. Lough proved himself an excellent speaker, and all present thoroughly enjoyed his interesting address. The Charlotte street male quartette sang most acceptably.

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers :

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever nonassessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non-interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING · LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT
LA ZACUALPA RUBBER PLANTATION COMPANY
Incorporated Under the Laws of the State of California.

La Zaluaipa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cerothers, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15.000 was invested in the machinery above mentioned and all of the remainder has gone into the propertion. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $25,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day: one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than justify every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $80 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $38.35 per ton.

FACILITIES—The Company owns 1.780 acres of placer and timber land. water power of 800 (minimum) horse power. No expensive shaft work necessary. Ore easily reached on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to have 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

Advertising in the Times is sure to bring good results. Try it and be convinced

Oats a Safe Hen Food.

It is strange what fool theories men of good common sense will allow themselves to believe. Listen to this, which comes from one of our veterinary writers: "Oats in the hull will so injure and inflame the lining of the crop of the fowl as to cause death." As a theory, this is bad enough, but when we are told by some poultry editor that we must give up feeding oats because the practice is dangerous, then is becomes ridiculous. As a matter of fact, the hull of the oat is not of an inflammatory nature, and contains nothing that can possibly lead to an inflamed condition. Oats fed whole are not even irritating. as the hull is neither stiff nor sharp, and when moistened in the crop of the fowl becomes soft and pliable.

I have fed oats to hens and to growing chicks for years, and have never had one die from this cause. On the contrary, I believe oats to be not only a stimulating and energy-making food, but a very wholesome one as well. From my experience, which is by no means limited, I have come to believe that oats are one of the best egg-making foods we have; that they are productive of growth when fed to chicks, and that they go a great way toward keeping up the energy and health of the flock. The hull of the oat may not contain much nourishment, but it has some food value and is harmless.

Hens need some bulk to their food, and the oat hulls will keep the food from becoming too compact in the crop and digestive organs. There is no need to resort to the expense of feeding hulled or ground oats, as whole oats are better and cheaper.

My flock of laying hens has eaten an average of one-half bushel each during the year—I have sometimes fed more—and the results have been satisfactory. Not a case of crop disease of any kind. —E. C. Dow, Belfast, Me., in N. Y. Tribune.

Creditors and poor relations always call at the wrong time.

It is an easy matter for a man to resist everything but temptation.

If any homely woman lives long enough she will become a pretty old one.

A writer says the only gems that are a drug on the market are gems of thought.

Many a man carries his total assets on his shirt front in the guise of a diamond pin.

Speech is silver and silence is golden—and there is more silver in circulation than gold.

The public trusts many a man with an office that his butcher wouldn't trust with a pound of bacon.—Chicago News.

The river Jordan has its origin in one of the largest springs in the world.

Howitzers are steel breechloading weapons weighing 2,500 pounds and having a length of six feet ten inches.

The shipyards of Great Britain, all working together, could turn out a big steamship every day of the year.

Whatever the harm of sensational literature, it teaches the people to read.

Despite the defects of the American press, it holds up a mirror of the whole world's affairs. The mirror may not be the right kind, but its tendency is to lead the people to self-consciousness.

If you do not like vice and crime, change the light. If you look into a mirror and see a dirty face, do you wash the face or the mirror?

I do not want a press which shows up the virtues of humanity and not the faults; but let us have more truth, the whole truth and nothing but the truth.

GEMS OF THOUGHT

Deeds are greater than words. Deeds have such a life, mute but undeniable, and grow as living trees and fruit trees do; they people the vacuity of time, and make it green and worthy. Why should the oak prove logically that it ought to grow, and will grow? Plant it, try it; what gifts of diligent judicious assimilation and secretion it has, of progress and resistance, of force to grow, will then declare themselves.—Carlyle.

The longer we live and the more we think the higher value we learn to put on the friendship and tenderness of parents and of friends.—Dr. Johnson.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from Kirkland, a station on the Sante Fe, Phoenix and Prescott Railroad and thirty-five miles from the Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 500,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part of Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore. and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 2000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before. smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore. which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

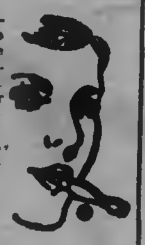
CATARRH

Don't Drug the Stomach — Breathe Nature's Remedy, Catarrhozone — Both Pleasant and Easy to Use. A Guarantee of Cure goes with it.



Catarrhozone always cures because it reaches the source of the disease quickly and thoroughly. Its healing vapor penetrates the minutest air cells of the nasal passages, throat and lungs. It attacks the cause of the disease direct, and doesn't work in a round about way through the stomach.

The antiseptics in Catarrhozone kill the germs that cause catarrh. It clears the nostrils, cures headache and foul breath. It prevents droppings in the throat, allays inflammation, heals sore spots and running at the nose.

So certain is Catarrhozone to remove and cure that doctors, ministers and public speakers keep it as their standby for coughs, colds, catarrh and throat trouble. Because it lasts so long it is cheap, and as it is sure to cure even the poorest can afford to buy it.

Mrs. J. A. Morris, of Perth, Ont., writes, "I cannot withhold my testimony for Catarrhozone. It cured my daughter of chronic catarrh and I therefore heartily recommend it to all sufferers. No house should be without Catarrhozone."

Why not use Catarrhozone? It cures colds in a few hours, and no case of catarrh can withstand it. Catarrhozone cures by the inhalation of medicated air which goes to all parts of the lungs, throat and breathing organs. A pleasant, certain, quick cure follows the use of Catarrhozone, which is guaranteed under all conditions to cure catarrh in any part of the system.

Two months' treatment, hard rubber inhaler and extra liquid costs only one dollar; sample size 25c. Sold by all druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A. Order Catarrhozone now.

TOWN AND COUNTY NEWS

ASHES HERE AND THERE BY TIMES' REPORTERS

Y.M.C.A.

The first of the series of talks to boys began at the Y.M.C.A. last evening. Mr. G. Williamson, the Secretary of the Association, had charge of the service and spoke on the subject "A Boy's Way." Mr. R. N. Jolliffe sang most acceptably.

Meeting of Painters

A meeting of the Painters of Peterborough will be held in the Palace Hotel Hall on the evening of Friday, April 8th, commencing at 8 o'clock, for the purpose of setting the wages for the summer.

J. H. HEASLOP, Sec'ty.

Charged with Theft

On September 5th last a pair of boots was stolen from the store of Mr. J. B. Douglas, George street, and yesterday a young man was up before His Worship charged with the theft. He claimed to be innocent, and was allowed out on $100 bail until his appearance on Monday morning next.

Plumbers to Meet Here

Mr. T. D. MacGregor has returned from Hamilton, where he attended the half-yearly meeting of the Provincial Master Plumbers' and Steam and Hot Water Fitters' Association. Through the active and energetic efforts of Mr. MacGregor he succeeded in having the next meeting held at Peterborough on Thanksgiving Day.

Maple Syrup Scarce

The maple syrup season will be of short duration judging from the opinions expressed by farmers who attended Saturday's market. After such a long steady winter the chances are that warm spring weather will soon come, and the absence of clear frosty nights and warm days indicates that really pure maple syrup will be a very scarce article.

The attendance at the

Peterboro' Business College

a larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

TEXTS CERDITED TO SAVIOR

GERMAN PROFESSOR HAS COLLECTED SAYINGS NOT FOUND IN GOSPELS

Inherent Evidence That That They Were Uttered by Christ to His Disciples

Berlin, April 4.—Professor Harnack, a widely known and liberal professor of theology in the University of Berlin, has made a collection of the sayings of Christ that are not contained in the new testament, but which he maintains must be genuine on the strength of internal evidence. Some of these sayings are;

THOUGHT TO BE GENUINE.

"It is more blessed to give than to receive," although it is not in the gospel it is noted by St. Paul as having been said by Christ.

"He is guilty who troubles the spirit of his brother." This is from fragments of the gospel to the Hebrews, quoted by St. Jerome;

"You should never be joyful save when you behold your brother in love."

"The seeker shall not rest until he finds, and when he finds he shall be astonished."

"I shall choose out the good. Those are the good whom my Father in Heaven has given me."

"In that which I find you therein shall ye be judged."

Speaking to one who was at work on the Sabbath;

"If thou knowest what thou doest thou are blessed; if thou knowest it not then are thou accursed and keepest not the law."

"Who is near me is near the Father; who is far from me is far from the Kingdom."

"Hast thou seen thy brother? Then hast thou seen God.

THE GOSPELS ARE INCOMPLETE.

Professor Harnack comes to the conclusion that these sentences are so varied and cover so large a field in ethics and religion that there is no reason to suppose that the four gospels contain anything like a complete account of Christ's sayings or teachings or any one brach of morals or religion. That much of what he said and did is forever lost to the world is quite certain. He believes that at the time the four evangelists lived there was an immense amount of material to choose from which is now lost, and this being so, the extraordinary similarity of all four accounts raises suspicions which it is exceedingly difficult to allay.

"Do you take this woman for better or for worse"—began the clergyman, but before he could proceed further he was interrupted:

"It's too early to tell yet," answered the groom; "you'll have to give me time, sir."—Boston Post.

Witherby—I made the mistake of my life this morning. I told my wife I didn't like her new gown.

Plankington—What, was she angry?

Witherby—Oh, no, it wasn't that; but she wants another.—New Yorker.

Mrs. Church—Do you enjoy going to the theatre?

Mrs. Gotham—No, I can't say that I do; the cars are so frightfully crowded, don't you know? But I always enjoy it after I get there. — Yonkers Statesman.

Camera Fiend—Shall I take you, Miss Passee?

Miss Passee—Oh, you original man! How sudden! — Houston Post.

Knippe—Yes, by making mutual concessions, my wife and I get along very smoothly. For instance, I gave up smoking cigars the other day.

Tucque—What did your wife give up?

Knippe—Oh, she gave up scolding me for indulging in the habit.—Syracuse Herald.

Lawyer—What was the thing that led to your financial downfall? You seemed to be doing a good business.

Bankrupt—I was, but one day I started out to see if I could borrow some money. I found it so easy that I kept on borrowing.—Somerville Journal.

There's a girl in our model apartment
Who practises singing all day;
The neighbors declare her a nuisance,
And wish they could drive her away.
I think that she sings like an angel,
And hope she will stay in the place—
No, pardon me, I'm not her sweetheart,
But simply—the girl in the case.
—New York Sun.

The War Office is waking up. We were scandalously short of "materiel" when the Boer war broke out, but that is now being rectified with all energy. A Parliamentary paper issued yesterday shows that during the past year the War Office entered into the following contract abroad, being presumably unable to obtain at home the article so urgently required :—

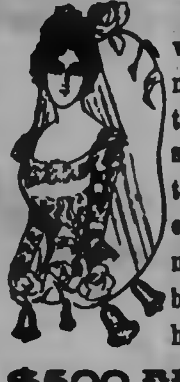
Powder puffs.. ....£23

If we are to believe Sir Archibald Hunter's version of the siege of Ladysmith, the order was, no doubt, on behalf of the 4.7 naval guns.—London Star.

—The funeral of the late Annie Eliza Latimer, who died yesterday morning, at her home in South Monaghan, will be held to Fraserville cemetery tomorrow.

—An evangelistic service was held in George street church last evening, and a large attendance was present. These services will be continued during this week.

To Make a Bride



Many a woman would make a beautiful bride but she is deterred from entering the married state because of ill-health.

$500 REWARD FOR WOMEN WHO CANNOT BE CURED.

The proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"If women would study the laws of health and use a little more common sense there would not be such a large number to-day suffering with the ills peculiar to our sex," writes Mrs. Sallie Martine (President Mutual Social Science Club), of 160 South Halstead Street, Chicago, Ill. "Then when medicine is needed if they would take the 'Favorite Prescription,' they would have a chance to get well. I used Dr. Pierce's Favorite Prescription three years ago and it cured me of female weakness of several years' standing, so I know what I am talking about when I praise it and always know what the result will be where it is used."

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

For prospectus and full particulars address :

The Cooperative Investment and Exploration Company

311 Quincy Building Denver, Colo.,

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colroado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

PRICE TWO CENTS

THE YALU RIVER NOW SEPARATES THE TWO MAIN FIGHTING FORCES

Russian Force Estimated to be About 30,000 --All Indications Point to a Decisive Battle.

Tokio, April 4—Regarding the Russian force at Antung, which is directly across the Yalu from Wiju, there is no definite information, but it is estimated to be about 30,000.

Antung is evidently the base of Russian operations in the Yalu district. They will dispute the passage of the river vigorously, meanwhile keeping in constant touch with the Japanese advance and offering a possible resistance to it. The chief base of the Russian army in Liao-Yang, which is 170 miles from Antung. According to the latest reports Liao-Yang is now comparatively quiet. It is held by 8,000 men, the main force having moved toward the Yalu.

All indications point to a decisive battle soon in the neighborhood of Antung, barring some powerful flank movement on the part of the Japanese forces.

EMPEROR MAY LOSE VOICE

GERMAN RULER'S THROAT TROUBLE GROWING WORSE

Empress' Health Precarious and This Contributes to Condition of Kaiser

Berlin, April 6.—Emperor William's throat trouble is serious, despite the persistency of reports that he is in excellent health. It is believed by those who met him in the Mediterranean that he is making the voyage to recuperate, in view of a further operation, which may even take place on board the Hohenzollern, on which he has now been joined by two of his sons.

A sinister rumor got abroad here lately and it has not been denied by the person concerned, although it must have reached him. It is that Professor Von Bergmann was consulted before Moritz Schmidt was called and that Bergmann gave it as his decided opinion that the only hope of effectually treating the Kaiser's ailment lay in complete removal of the organ affected. This meant the entire loss of his voice and lesser operation was decided upon.

Professor Bergmann's opinion is discounted by the suggestion that he always favors drastic remedies, but it is recalled that it was Bergmann alone who correctly diagnosed Emperor Frederick's ailment and refused for state purposes to alter his expressed conviction, while others did so.

In addition to his own state of healtah, the Kaiser has serious domestic worries. The Empress has been ill for some time and has been virtually secluded from her family for the last few years. She had grown extraordinarily thin and got into a low state of health, which it is feared has now developed the family taint which made her marriage to the then Crown Prince one of Bismarck's most condemnable and explicable acts.

NOT BELIEVED.

The reports and information given out here concerning the Kaiser's health are favorable. But they are not believed. The gloomy reports current in London are attributed by the officials here to English malice. It has been learned that these reports came in the first instance from high officials at Gibraltar who met the Kaiser at close quarters during his recent visit.

When he reached Gibraltar the Emperor never spoke above a whisper and husbanded his voice with the utmost care, remaining absolutely silent for long periods.

Such an amount of restraint in a man of his talkative disposition was bound to excite comment.

ENGLAND PLANS FOR WAR

Sends Ten Regiments to Canada to be Available for the East

Halifax, N.S., April 6.—Further information has been received here respecting the distribution of British regiments which the Home Office proposes to send to Canada so that they can be available in case of complications in the East. If existing plans are carried out two regiments, in addition to those now stationed here, are to stay in Halifax, one each at St. John, N. B.; Quebec City, Montreal, Toronto, Winnipeg, Manitoba, and Calgary, North-West Territory, and two at the Pacific terminus of the Canadian Pacific Railway or at Esquimault, B. C.

In case the services of an armed force are required in the East each regiment could be forwarded without interfering with another. Each body would arrive at the Pacific coast in such order as to facilitate the embarkation on steamers.

While stationed in Canada, it is understood that the services of these regiments will be utilized in training the Canadian military. The date of the arrival of the troops depends altogether upon developments in the East.

“Fighting Mac”

Mr. A. W. McPherson known in athletic circles as “Fighting Mac,” has become quite conspicuous in Toronto, owing to an occurrence in which he figured prominently, at Jarvis street Collegiate Institute, at which he is an occasional teacher. A refractory class of boys declined to obey him, and he proceeded to punish the chief offender. The rest of the class “pitched in” and “Mac” found himself the centre of attack, and surrounded by a noisy crowd of sturdy lads, all anxious to “lick the teacher.” “Mac's” rugby training was much in evidence for a few minutes, and he finally succeeded in winning a victory. Several of the boys received severe punishment, but the teacher was none the worse for his experience.

MR. FOY TALKS VICTORY

SAYS THAT THE CONSERVATIVE PARTY WILL SOON GOVERN THE PROVINCE!

Ross Government's Heroic Fight for Life—The Proposed Temperance Legislation

Montreal, April 6.—“The probabilities are that the session of the Ontario Legislature will close in a couple of weeks. I do not think it will be prolonged beyond that time.”

This was the statement made to the Star yesterday at the Windsor Hotel by Mr. J. J. Foy, the Conservative member for south Toronto, in the Ontario Legislature. Mr. Foy explained that his business in Montreal was purely of a private nature and non-political.

When asked as to the probability of an appeal to the province at an early date, Mr. Foy said; “I do not look for a general election. You may depend on the Ross Government holding on to the reins of office as long as they possibly can. With their slim majority they are having a herculean task to avoid defeat in divisions. They dare not throw up the sponge and take their chances at the polls.”

Referring to the temperance legislation, Mr. Foy said it was merely an amendment to the License Act, calling for stricter supervision of the granting of licenses. Questioned as to the prospects of the Conservative party when the general elections did come, Mr. Foy said there was very little doubt as to the sentiment throughout the province. The Liberals might defer as long as possible the inevitable, but could not avert the disaster that awaited them at the polls. “The Conservatives of Ontario are full of fight,” added Mr. Foy, “and await the collapse of the present Administration with confidence and certainty.”

FEAR BALKAN OUTBREAK

Austrian Army Corps Prepared to Leave on Short Notice

Trieste, Austria, April 6. — The Third Army Corps of the Austrian army is prepared to leave here at any moment for Ragusa on the Adriatic. Six Austrian-Lloyd steamers are ready to take the soldiers on board instantly. The army corps is provided with full transport and with ammunition.

The explanation given in military circles of these preparations is “if Russia meets with a great disaster in the Far East an outbreak will follow immediately.”

It is stated here that this really is a critical moment in the Balkans, where up to the time snow has prevented active operations.

The army corps will be landed at the most convenient port for transport to the Macedonian frontier. Besides the munitions of war, a large supply of provisions for the Third Army Corps is stored in the arsenal here. Every day the soldiers of the garrison are exercised in handling these packages and in carrying them to the steamboats.

ATHLETIC WORLD

BY OUR SPORTING EDITOR

FOOTBALL.

The Toronto Star says—

The Midland (Peterborough) League and Peninsular League will be asked to affiliate and appoint their own own Vice-Presidents for the Ontario Association Football League.

LACROSSE.

Mr. T. P. Lancaster, of Havelock, has called a meeting for April 23, at the Oriental Hotel, for the purpose of organizing a Trent Valley League. Several clubs have already agreed to enter teams and Mr. Lancaster is quite confident that his efforts will meet with success. The intention is to form three districts, each having four teams, thereby producing a League with twelve teams. The different teams who purpose entering are requested to send representatives to this meeting.

A GOOD PROPOSITION

The Costilla Gold Mining Company Offers a Safe Investment

Careful mining investments are productive of most satisfactory results, and the more intelligently and careful capital is invested, the better for the industry. All the great profits that have been obtained from mining investments have been made by those who purchased stock during the time of development of the mine, and this certainly is the time for those desirous of taking advantage of opportunities to secure shares. Many flotations of stock in mining companies are heralded to the public, with gross exaggerations, so that it is to the intending investors' personal interest to think well before he purchases shares in a concern, from which he may or may not secure dividends.

Of the most progressive, and most promising companies in America is that widely known as The Costilla Gold Mining Company, which possesses a rich mining property, sufficiently developed to insure the assertion that it will be a fine producer, and to warrant the expectation that it will be a dividend payer. This property consists of 240 acres in a compact body, situated in the West Blanca Mining District, Costilla County, Colorado. Great fissure veins outcrop and trend throughout these claims, and from the outcrops ores rich in gold have been taken. This mining district is among the most important in the State of Colorado for its mineral deposits, and the telluride-carrying gold as well as free milling quartz is in abundance.

In the centre of the company's group of claims is a cross-cut tunnel, which has been driven 117 feet from the portal to the vein, and a drift has been run along the vein for a distance of 178 feet. In this drift the ore is continuous and swells to good widths of three ounce and eight ounce gold ore, as the mountain is further penetrated. According to the engineer's surveys, the first ore shoot will be reached when the drift is driven 52 feet further. These gold-bearing veins are scattered profusely throughout the whole district, and rising almost sheer from the placer, the claims are almost vertical, the property revealing more than 100 veins, boldly defined, and presenting an ideal situation for exploitation along the veins and by crosscuting.

Not many companies in this district are working, owing to lack of funds for developing purposes, although in some the ore runs from $12,000 to $20,000 per ton, but, as there is an abundance of coal, iron and oil, as well as gold, it is expected that the time is fast approaching when it will be opened up on a large scale. The Costilla Company is free from debt except for $25,000 still owing on its property, and this is payable within five years, although it is the intention of the company to pay this off before that time.

A great deal of gold has been produced at a cost of $1.00 an ounce, and even less, so that it may readily be seen that there is an immense profit, as gold is worth $20.67. It is little wonder that more money is invested in mining than banking, with less risks and greater profits. It might also be added that there are fewer failures in actual working mines than in any other business or calling, when the mining is conducted in a straight forward, open legitimate manner, and the property is held by patents. These qualifications are possessed by the Costilla Company, which has every prospect of success.

Only 500,000 shares, which will be sold at 10 cents per share, are left, and an excellent opportunity is afforded to anyone desirous of investing in a concern, whose prospects are most brilliant. The character of the property and its development, pronounces the chances of success more than even. The work of development will be pushed ahead as long as the company's means will warrant them doing so, but the greatest care will be exercised to remain free from debt. Mr. Roland Kidd, General Fiscal Agent, Toronto and Peterborough, or Messrs. Thos. Patterson & Co., Fiscal Agents, Peterborough, will be pleased to furnish any further information concerning this progressive Company.

LIVELY TIME AT Y.M.C.A.

London Boys Welcomed Yesterday — Interesting Program

The Y.M.C.A. rooms was the scene of a happy gathering of boys and young men yesterday afternoon, the occasion being the welcoming of nine representatives of the London, Ont., Association by the local lads. An exciting game of basketball was played at 3 o'clock, which resulted in a victory for the visitors, the score being, 21 to 16. The line-up of the players was as follows;

London—Right forward, H. Willis, captain; left wing, H. Sheppard; centre, K. Brown; left guard, H. Duncan; right guard, M. Woods.—21

Beavers—Right forward, F. Crossman; left forward, R. Thornton; centre, E. Weller; Left guard, C. Thornton. right guard, R. Winch. —16

At the conclusion of the match, the visitors were shown through the building, and later, about 5 o'clock an interesting game of ring hockey was enjoyed by the boys. At 5.45 o'clock refreshments were served and this was followed by a conference at which papers were read by several Peterborough boys on the subjects, “Our duty to boys in foreign lands” and “Boys' Bible Study Classes.”

In the evening, commencing at 7.15 o'clock the regular boys' meeting was held, when Mr. Aplin, the able physical director, delivered an excellent address on “A Boy's Outfit,” and the London boys led in the service of song.

This morning a conference will be held at 9.15 o'clock on the social side of boys' work, and afterwards the visitors will be driven to the lift lock and the new dam. The visiting lads will then leave for Ottawa, where they will play this afternoon. Mr. H. O. Eamen, the genial young London Secretary, has charge of the boys. During their short visit to our city, the boys have been billeted with different members of the association.

EVERYBODY READS THE TIMES

BY-LAW WILL LIKELY PASS

General Opinion That Citizens Will Vote for New Collegiate Institute

At Monday evening's meeting of the Board of Education nearly every member spoke in favor of the proposed new Collegiate Institute. But this opinion was not unanimous, and one member expressed himself as of the opinion that the Board should not increase its indebtedness at present.

“We are behind to the amount of $60,000 now,” he remarked, “and we're not able to stand any more.” This seems hardly reasonable, as, if a new Collegiate Institute is really necessary, its building should not be delayed. The higher education of our boys and girls who must take our positions in the near future, is of vital importance, and delays in providing adequate buildings would be most dangerous. It is generally supposed that, when the bylaw is submitted, there will be no difficulty in its being passed.

A PETERBOROUGH BRIDE

Marriage of Miss Ada Hall and Mr. S. J. Little, of Cobourg

A very pretty wedding was celebrated at the Y.W.C.A. rooms on Monday evening, when Miss Ada Hall, of George street, was united to Mr. S. J. Little, of Cobourg. The rooms were tastefully decorated for the occasion, and about thirty of the bride's most intimate friends witnessed the ceremony, which was performed by Rev. J. G. Potter, of St. Andrew's Presbyterian church.

The bride looked most attractive in a beautiful travelling habit of navy blue, and Mendelssohn's wedding march was played. Miss Little, sister of the groom, assisted the bride, while Mr. George Hall, brother of the bride, acted as groomsman. At the conclusion of the ceremony dainty refreshments were served and after a pleasant hour, in which the bride's friends extended their congratulations and good wishes for the future, the happy couple left for Cobourg, where they will reside in the future.

WEDDED AT PORT PERRY

Nuptials of Miss Lila Blackstock Meharry and Mr. Jas. Hutcheson Scobell

A very pretty wedding took place at the Church of the Ascension, Port Perry, on March 31st, when Lila Blackstock Meharry, eldest daughter of J. Wesley Meharry, was married to Mr. Jas. Hutcheson Scobell, of Peterborough. The officiating clergyman was Rev. Geo. Scott, B.A. The church was beautifully decorated with palms, lilies and carnations and at the entrance to the chancel hung a large floral bell. At 2.30 o'clock, to the strains of Lohengrin's wedding march, played by Mr. D. A. Chapman, A.T.C.M., the bridal party proceeded to the chancel. The dainty bride was charmingly attired in white silk brocaded crepe de Paris over white taffeta, the whole gown being elaborately trimmed with silk duchess lace. The customary veil and orange blossoms were worn. The bridesmaid, Miss Ethel Scobell, Bowmanville, sister of the groom, was becomingly gowned in white silk crepe de chene over taffeta, with trimmings of accordian plaiting and touches of blue velvet. The maid of honor, Miss Edna Ferguson, Stratford, cousin of the bride, looked pretty in white French organdie, inserted with valenciennes lace. Both maids wore large white chiffon picture hats, with white plumes. Miss Kathleen Meharry, sister of the bride, wore a green eolienne with insertions of ecru lace and carried the wedding ring on a silver tray. The groom was supported by Mr. W. McAlpin, of Montreal. H. B. Clunes, Lindsay, and L. H. Allison, Port Perry, acted as ushers.

After the ceremony a reception was held at the home of the bride's parents, “Fairview Cottage,” which was tastefully decorated with carnations, tulips and smilax. The color scheme carried out was pink and white. The groom's gift to the bride was a gold chain and pendant, with his family crest embossed in pearls and rubies. To the bridesmaid a pearl and olivienne ring was given, and the maid of honor received a pearl crescent, and Miss Kathleen a ruby and pearl ring. The bride's going away gown was navy blue, with blouse of white liberty satin and violet toque.

Mr. and Mrs. Scobell will reside at the Oriental Hotel, Peterborough, for the present.

Induction at All Saints

On Thursday evening the induction of Rev. W. Major, as rector of All Saint's Church will take place, and the chargewill be delivered by Rev. Archdeacon Allen, of Millbrook. The service will be in charge of Rev. S. C. Noxon, of Tullamore, and the following clergymen of the district are expected to be present;—Rev. J. C. Davidson, of St. John's church; Rev. J. L. Holah, of St. Luke's; Rev. W. H. Sparks, Sunderland; Rev. C. H. Marsh, Lindsay; Rev. Mr. Forster, Omemee; Rev. W. L. Armitage, Picton and Rev. Geo. Warren, Lakefield.

At the close of the induction services a reception will be held and an offering, which will be used in the purchase of a better system of heating for the church, will also be taken up.

About the Post Office

In a recent issue of The Times mention was made of the inconvenience experienced by the public, owing to the small post office we have here. Toronto Junction, although not nearly as large as Peterborough, is having a handsome, spacious building erected. There is no reason why our present “dry goods box” on the corner should not be removed and a suitable building erected in its place. We are behind the Times in this respect, and it cannot be too strongly impressed on the powers that be, that this improvement be hastened.

“It's a shame and a disgrace for a young city like Peterborough not to have a better building than this” remarked a merchant at the post office yesterday, as he witnessed the crowd around the wicket, and several others present nodded assent.

INTERESTING LECTURE

Delivered by Prof. Clark Last Night in the Y.M.C.A.

The Y.M.C.A. Hall was crowded to the doors last evening when Prof. Clark delivered one of the best addresses ever listened to by a Peterborough audience. Rev. Oswald Rigby, M.A., L.L.B., occupied the chair, and Miss Davies sang most acceptably. The chairman, in a brief speech, outlined the object of the Professor's visit to Peterborough, and expressed his pleasure at being able to introduce such an able speaker. At the conclusion of the chairman's address Miss Helen Davies rendered “God is My Light,” and responded to a well-merited encore.

The speaker of the evening introduced his subject “People I Have Met” by a reference to his early childhood in Scotland, and outlined many interesting incidents in connection with the early church days in the Land of the Heather. He then vividly depicted the story of his life in England, and related many interesting incidents connected with the lives of all the great scholars of that time. He had been asked to give an account of some of the bad men he had met, but was pleased to be in a position to state that he had no recollection of anything but what was good, of the great men he had met.

His reminiscences were for the most part pleasant, and the good points in the various men mentioned were foremost in his memory. Johnnie Foster and W. Barnett, two Scotch Presbyterians, were mentioned as connected with educational pursuits. Norman MacLeod, a prominent Presbyterian clergyman, was also eulogized by the speaker, and many humorous stories of his life were related. A lengthy account of Dr. Scott and Mr. Liddell's life was given, and special mention was made of the famous Liddell and Scott dictionary. Some of it was sense and some of it was not. Maurel, Dean of St. Paul's Church, London, was also mentioned, and many humorous stories were told, among which was one which referred to the conferring of the degree of Doctor of Divinity. A wag composed the following couplet;—

“The degree of D.D. 'tis proposed to
convey
To an a Double S by a double S.A.”

Many other prominent men were mentioned by the speaker, who introduced many laughable stories. Although a man well up in years, Prof. Clarke is still an able orator, and his clearness of expression and striking personality are most makred. A vote of thanks was tendered the lecturer, on motion by Rev. J. C. Davidson, for the excellent, instructive lecture, and the large audience was unanimous in their expression of appreciation.

New Electric Power House

Contractor Wm. Kennedy, of Bobcaygeon, and well known in Peterborough, has commenced work on the foundations of the new electric power house to be erected for the corporation of Fenelon Falls. The new building will be 32x40 feet, two storeys high and the walls will be of concrete. A 600 h.p. generator will also be installed in the new building.

St. Luke's Vestry Meeting

At St. Luke's vestry meeting on Monday evening the following appointments were made;— Auditors, Messrs. F. J. Jamieson and G. G. Pratley; People's Warden, F. Adams; Rector's Warden, J. Z. Rogers; Assistant Wardens, Mr. Nesbitt and G. G. Pratley. Messrs. Sawyer, Wards and J. J. Turner were elected as delegates to the Synod.

All Saint's Church

The following appointments were made at All Saint's vestry meeting Monday evening; —Rector's Warden, Mr. James Mulholland; People's Warden, Mr. James Edgar; lay delegates, Messrs. R. E. Layfield, J. H. McClellan and D. H. Burritt. The People's Warden's report was presented by Mr. G. L. Maughan, and was most satisfactory. The reports of the various guilds were also read and adopted.

Curios for Museum

A number of curios, including a number of beaver cuttings and a very large fungus have been donated to the Historical Society, by Mr. C. E. Hubbs, of the Fifth Ward, who is enjoying a trip up North. These interesting donations will be placed in the Victoria Museum. Preparations are at present being made for the opening of the museum for the summer. Donations may be forwarded to the President, Lieut.-Col. Rogers, or to the Secretary, Mr. T. A. S. Hay.

Turf Club Meeting

A meeting of the directors of the Peterborough Turf Club was held in the club rooms yesterday afternoon, at which the following members were present;— Messrs. P. Clugan, President; R. H. Jackson, Treasurer; J. H. O'Shea, Secretary; H. Neil, A. Elliott, J. Clancy, S. Holland and A. Dunn.

It was decided that the summer meet would be held on August 9th, 10th and 11th, and the aggregate purses will amount to $2,300. A demonstration will also be held on May 24th, at which the club purposes offering valuable prizes for exhibitions of football, baseball, carters' races, hackmens' races etc.

Commanding Officers

The following is an official list of he commanders of each of the companies in the 57th Regiment, for the coming year :—

No. 1. — Capt. Cluxton; Lieuts. J. A. Wilson, W. A. Brundrette.

No. 2. — Capt. Clegg; Lieuts. Langford, Amys.

No. 3 — Capt. Mills; Lieuts. Comstock, Gemmill.

No. 4 —Capt. Hounsell; Lieuts. Smith, Higgins.

No. 5. — Capt. Bennett; Lieuts. J. G. M. Wilson, W. W. VanEvery.

No. 6. — Capt. Matthews; Lieuts. Watt, Clarke.

No. 7. — Capt. McWilliams; Lieuts. Kealy, Hicks.

No. 8. — Capt. MacPherson; Lieuts. Hamilton, Glover.

RUSSIAN ATTITUDE TOWARDS THE JEWS AN INFERIOR RACE.

Minister of the Interior Says They are Revolutionists and Murderers and Not to be Trusted with Citizen's Rights

Special to The Times.

Berlin, April 5 — Prominent Jews have received confidential reports of the result of an audience M. von Plehve, Russian Minister of the Interior, granted to a deputation of 60 Russian Jews who petitioned for the abolition of the disabilities attaching to their race. M. von Plehve said;

“It is not true that the Czar and I regard the Jews as an inferior race. On the contrary, we consider them exceptionally clever. If Jews were admitted to the universities without restrictions they would overshadow the Russians and dominate our intellectual life. It would not be fair to allow the minority thus to away the majority. I regret to say that I am convinced that the Jews are revolutionists, and also murderers. All the recent political assassinations, and all attempts at assassination have been inspired by Jews. I have indisputable proof of this.

“The Jews have declared war against the Russian government through the foreign press, which their race controls. The war entails heavy sacrifices. Take care that these sacrifices are not required from you. Russia will only improve the condition of the Jews very slowly and very cautiously. She will not give them the same rights of citizenship as she gives non-Jewish inhabitants. If she did, the massacres at Kishineff and Homel would be repeated on a much greater scale.”

A PLAN OF THE FIGHT BY JAPAN

Japan Has a Quarter of a Million Troops Moving

ANOTHER BIG ARMY CORPS

Being Mobolized and to be Followed by Still Another

Shanghai, April 6.—A despatch received here from Kobe, Japan, says the Japanese Government has 260,000 troops in motion, and fully 60,000 more under arms, in garrisons and at the depots. These numbers are exclusive of the third reserves, numbering 120,000, which have not been called to the colors. The exact number of troops which have left Japan for their various destinations are not known, but the entire first army had been landed and has established itself in North-western Korea, with its main base at Chinampho.

The Japanese general staff still carefully guards the plan of campaign, but it is generally believed that it will operate three armies each nominally numbering 100,000 men, the second army landing west of the Yalu River, and the third army east of New Chwang. The landings of the latter two armies will be easily accomplished, for the light cruiser squadrons can protect both movements.

It is thought that the landing of a heavy Japanese force west of the mouth of the Yalu will force the Russians to abandon the fortifications which they have been erecting north of the Yalu for the purpose of opposing the crossing of the first army of Japan from Corea.

TO OPERATE TOGETHER.

It is also anticipated that these great Japanese forces will operate in conjunction, the third army swinging eastward from New Chwang seizing or cutting the railroad, and then engaging in a turning movement against the main Russian position.

The Japanese are confident that the Russians will be unable to transport supplies sufficient to maintain in Manchuria a force larger than 360,000 men. The heavy detachments necessary to guard the railroad and supply bases will, it is claimed, reduce the Russian fighting force to about 200,000 men.

The Japanese are requisitioning thousands of horses, and it is probable that a considerable detachment of cavalry will accompany each army. Though the horses of the Japanese cavalry seem inferior to those of the Russians, the Japanese officers say they will satisfactorily accomplish the work planned for them.

ARTILLERY FOR FRONT.

Much Japanese artillery is departing for the front. The guns seem light, but it is believed that the Japanese have a number of heavy batteries equal in range to the best European field artillery. Japan also possesses a large number of excellent mountain batteries, which in rough country will have a distinct advantage over the Russians. It seems certain that Vice-Admiral Togo's failure to effectively dispose of the Russian fleet at Port Arthur has delayed the Japanese land operations. A general thaw is now proceeding in Korea and Manchuria, rendering the country roads impassable, and making it impossible to conduct general military operations until the spring.

WEATHER NOTES

Wednesday—Unsettled and showery

BRITISH-AMERICAN ARBITRATION

At a meeting in London the Anglo-American League has adopted resolutions declaring that it is desirable that the British Government should negotiate a treaty with the United States providing for the arbitration of all differences between the two powers that diplomacy may fail to settle, such differences to be referred to The Hague tribunal or some other agreed upon authority.

Professor James Bryce, who presided, said that all classes and political faiths in Great Britain were practically unanimous in favor of such a treaty.

If there is such unanimity of sentiment in Great Britain there would seem to be no good reason why there should not be equal unanimity in the United States, unless Americans in considerable numbers cherish designs against the integrity of the British Empire, and that is not likely.

In a recent article on this subject Professor Bryce remarked that it was for the United States rather than for England to make the first move and that is true.

Such a treaty would now be in force but for the action of the United States Senate, which in 1897 rejected the Olney-Pauncefote treaty after amending it so as to destroy its value. Since the defeat of that treaty was not the fault of the British Government, it is obviously for the United States rather than Great Britain to take the initiative if negotiations with a view to a general treaty of arbitration are to be resumed.

The situation is very different from what it was in 1897. Since then The Hague convention has been framed and signed by all the great powers and the arbitration tribunal for which it provided has been established. The United States Government has set the example of resorting to it. Others have followed the example. Two South American governments have agreed to submit all of their disputes of whatever nature to it or to some other tribunal mutually agreed upon. England and France have entered into a similar agreement with some reservations.

The Hague agreement, therefore, while it has not wholly met the expectations of its promoters and the friends of peace has undeniably yielded some results and opened the way to general arbitration treaties into which four countries have already entered.

It is to be expected that both parties will insist on declining to submit certain questions to arbitration, especially those affecting the independence and honor of the two countries—questions excepted by the Franco-English treaty.

SUNDAY SCHOOL STORY IN REAL LIFE

In telling the secret of his success in life Mr. Rockefeller, the great millionaire, appropriately chose his son's Sunday school class as the medium for his story differs only in nonessentials from the stories of the good boys in the Sunday school books.

Like all of the heroes of Sunday school literature, Mr. Rockefeller began life as a poor boy, earning his own way without even the assistance of the ubiquitous kind-faced old gentleman who distributes bright gold sovereigns, accompanied by an invitation to call at his place of business, when, as the story goes, he offers the caller a job of sweeping out the store, later takes him into partnership, opportunely dies, leaving the once poor youth sole proprietor and securely established as a great merchant.

It need scarcely be added to complete the story of his early career that Mr. Rockefeller had none of the extravagant habits and small vices which prevent so many young men from getting a start in life by saving. He did not use tobacco nor liquor; it does not appear upon the ledger that he spent any money for books, theater tickets, ice cream sodas, excursions or any of the frivolities of life. He paid his board and his washerwoman regularly, which, sad to relate, cannot be said of all the young men of meager salary who indulge their appetites and inclinations in having what they call “a good time.” When he felt that he could afford it he gave small sums to missionary societies, increasing his benefactions in proportion to his increasing wealth.

ADVERTISE IN THE TIMES 7

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, APRIL 6 1904

BRITISH-AMERICAN ARBITRATION

At a meeting in London the Anglo-American League has adopted resolutions declaring that it is desirable that the British Government should negotiate a treaty with the United States providing for the arbitration of all differences between the two powers that diplomacy may fail to settle, such differences to be referred to The Hague tribunal or some other agreed upon authority.

Professor James Bryce, who presided, said that all classes and political faiths in Great Britain were practically unanimous in favor of such a treaty.

If there is such unanimity of sentiment in Great Britain there would seem to be no good reason why there should not be equal unanimity in the United States, unless Americans in considerable numbers cherish designs against the integrity of the British Empire, and that is not likely.

In a recent article on this subject Professor Bryce remarked that it was for the United States rather than for England to make the first move and that is true.

Such a treaty would now be in force but for the action of the United States Senate, which in 1897 rejected the Olney-Pauncefote treaty after amending it so as to destroy its value. Since the defeat of that treaty was not the fault of the British Government, it is obviously for the United States rather than Great Britain to take the initiative if negotiations with a view to a general treaty of arbitration are to be resumed.

The situation is very different from what it was in 1897. Since then The Hague convention has been framed and signed by all the great powers and the arbitration tribunal for which it provided has been established. The United States Government has set the example of resorting to it. Others have followed the example. Two South American governments have agreed to submit all of their disputes of whatever nature to it or to some other tribunal mutually agreed upon. England and France have entered into a similar agreement with some reservations.

The Hague agreement, therefore, while it has not wholly met the expectations of its promoters and the friends of peace has undeniably yielded some results and opened the way to general arbitration treaties into which four countries have already entered.

It is to be expected that both parties will insist on declining to submit certain questions to arbitration, especially those affecting the independence and honor of the two countries—questions excepted by the Franco-English treaty. It is true that either party may refuse to submit any question to arbitration on the pretext that it affects national honor, but if that is a good reason for refusing to enter into a general treaty of arbitration it is a good reason for refusing to enter into any treaty whatever, for any treaty may be disregarded by either party on one pretext or another.

The value of all treaties depends on the honor and good faith of those who enter into them. Any arbitration treaty is of value because it pledges the faith of the parties and thus may fairly be expected to avert some wars, if not all.

It is to be hoped, therefore, that the government at Washington will take the initiative in reopening the negotiations with England.

Rheumatism Conquered!

DRIVEN FROM THE SYSTEM BY ELIMINATING POISONOUS URATES IN THE BLOOD

Stubborn Cases Quickly Relieved, Chronic Sufferers Absolutely Cured by an Internal Remedy

This disease originates in the blood in the poisons in the blood that cause the pain. Get rid of these poisons and you cure the pain. Doesn't that seem logical.

These poisons are composed largely of uric acid which dissolves and quickly passes out of the system if Ferrozone is employed, it being a complete and perfect solvent for all the poisons that give rise to rheumatic pain. No case is too chronic no person too old to be forever released from the agonies of rheumatism if Ferrozone is used; it cures after all other treatments proved useless. You may have been disappointed with other remedies. But don't let this defer you from using Ferrozone its not like the ordinary "cure"—it possesses peculiar qualities not found in any other remedy.

FERROZONE CURES RHEUMATISM

Mr. Edgar F. Richmond, an old and well known resident of Winchester says; "My endorsement of Ferrozone is cheerfully given for I know that I am speaking for a sure cure for rheumatism. Ferrozone cured me so the pain didn't come back again. I honestly believe that no medicine on the face of the globe can do as much for rheumatism as Ferrozone."

Mrs. D. J. Thurston, of Burton, P. O., writes; "As a long sufferer from rheumatism I can say that Ferrozone is the most satisfactory remedy that I used. Quite frequently I would get a bad attack and be laid up in bed. Ferrozone removed every trace of the disease and I have been well ever since."

Ferrozone is beyond all question the proper remedy to use in rheumatism. There is none better. Beware of substitutes and don't allow a druggist to palm off something he may say is just as good. Insist on having Ferrozone, use it as directed and you will be cured. Price 50c, per box or six boxes for $2.50, at all druggists or by mail, from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

SUNDAY SCHOOL STORY IN REAL LIFE

In telling the secret of his success in life Mr. Rockefeller, the great millionaire, appropriately chose his son's Sunday school class as the medium for his story differs only in nonessentials from the stories of the good boys in the Sunday school books.

Like all of the heroes of Sunday school literature, Mr. Rockefeller began life as a poor boy, earning his own way without even the assistance of the ubiquitous kind-faced old gentleman who distributes bright gold sovereigns, accompanied by an invitation to call at his place of business, when, as the story goes, he offers the caller a job of sweeping out the store, later takes him into partnership, opportunely dies, leaving the once poor youth sole proprietor and securely established as a great merchant.

The keynote of Mr. Rockefeller's success is as paradoxical as his personality. It is "save and give." He saved and he gave, but as it was easier to save than to give naturally he saved more than he gave, and in order that he might make no mistake and give more than he saved he recorded every financial transaction in a pocket ledger, which he exhibited to the Sunday school class with unpardonable pride.

It need scarcely be added to complete the story of his early career that Mr. Rockefeller had none of the extravagant habits and small vices which prevent so many young men from getting a start in life by saving. He did not use tobacco nor liquor; it does not appear upon the ledger that he spent any money for books, theater tickets, ice cream sodas, excursions or any of the frivolities of life. He paid his board and his washerwoman regularly, which, sad to relate, cannot be said of all the young men of meager salary who indulge their appetites and inclinations in having what they call "a good time." When he felt that he could afford it he gave small sums to missionary societies, increasing his benefactions in proportion to his increasing wealth.

So far Mr. Rockefeller's career was much like that of hundreds of successful men who began, like himself, a poor boy, thrifty, frugal and moral. It is admirable in every respect, however it may be lacking in novelty or exciting incidents. Unfortunately, the detailed story ends at the point where the hero was fairly launched on his career as a capitalist, but the inference is plainly conveyed that Mr. Rockefeller has simply continued along the lines upon which he started out—saving and giving and living a frugal life.

By this simple story of an upright life the richest man in the United States, if not in the world, refutes the suspicions and slanders that have been directed against him.

The moral of this Sunday school story in real life is obvious; Save what you get and don't be too particular how you get it. Give, for the Lord loveth a cheerful giver.

its value. Since the defeat of the

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalised at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

New York Chief of Police.

Mr. William Devery, whose term as Chief of Police of New York was marked by an administration the evil and shame of which have not yet been eradicated, is a Mayoralty candidate in the big city. A New York Tribune reporter thus records an interview with the "Big Chief," as Devery is familiarly known:

Let Tammany and fusion worry about the Mayoralty campaign!

"No worry in mine," says the Chief Bug. "Bill" Devery. "I've got things cinched; I can't lose."

And so certain is he of this that he will not even consider his future moves, in case he doesn't win.

"There's goin' to be a revolution—a revolution by the peepul, an' the peepul are goin' to get in control. The trusts don't realise that, and the newspapers don't seem to be on to the game. An' say, pard, Tammany Hall don't seem to think that the peepul are tired of havin' their votes stole from them, but they are. I tell you, there's things goin' to be doin' this campaign, and I'm goin' to win out on this Mayor-alty fight, as well as at the primaries. I was never in a losin' fight yet."

So said the Big Chief yesterday—said it, and really meant it. He had spent the afternoon in conferences with his henchmen, among them Assemblyman "Dick" Butler and "Sam" Parks and his bodyguard. As a relaxation, Devery surveyed the general political field.

"We're goin' to have a rip-sizzle of a day to-morrow," he began. "Our biggest meeting will be right here at headquarters, but we'll have another at Tenth avenue and Twenty-eighth street and one at Eighth avenue and Twenty-first street. If my encyclopaedia holds out, I expect to toddle around to each one. Tammany's spending a lot of money in this district—all it can borrow, I guess. Maybe Croker'll send over some. Will he ever come back? Sure thing! And when he does, you'll see Charlie Murphy (he's no more than a wooden Indian in front of a cigar store) stood on his head, while all the leaders go back to Croker. Now, I'm goin' to win out in the primaries, but I wouldn't take the job of distric' leader from Tammany Hall. I wouldn't be leader of the Wigwam, but when I'm elected there'll be a house-cleanin' over that way. Murphy'll go back to the gas retorts, and some of the others'll never be heard of again. They say all the Sheehan leaders went over to Goodwin. Well, I'll bet I get more than Goodwin. Sheehan and I was both cheated of our rights by Tammany. Sheehan's men are Democrats, and they're goin' to stand by me. Sheehan and I never had a voice in appointin' the election inspectors. I hear that some of them are goin' to load up the boxes. They might throw 'em in the East River. Let 'em try it! I'll have a lawyer at every pollin' place, and if they try to monkey I'll land 'em in the station house. I hear there'll be floaters from Paterson and the Bowery and the eighteenth district. Well, they'd better stay east of Seventh avenue, 'cause the wind changes often over here, and we're liable to have a equinoxial.

"Take my tip, boys. I'm goin' to win. Are you with us?"

The Most Valuable Knife.

The most valuable knife in the world is to be seen in the collection of a famous firm of cutlers in Sheffield. It is large enough to fit the pocket of none but a giant and contains seventy-five blades, which close up like those of an ordinary knife. Each of the larger blades is elaborately engraved and among the subjects of these strange pictures are views of Sheffield College, the City of York, Windsor Castle, Arundel Castle and a score of other famous scenes. The hafts are of mother of pearl, carved with great skill. On one side the artist has depicted a stag hunt and on the other a boar hunt. When asked as to the value of this knife, the firm replied: "Well, we calculated it up to £920, but that was before it was finished, and then we ceased to estimate what it had cost."

Editor's Advance Sheet

The Engineering Magazine for April opens with a very interesting review and summary of the commercial and industrial importance of Chile. It offers one of the most promising fields of attention, in view of the stimulus which will be given to the country by the opening of the Panama Canal. The figures given by Mr. Collins will be a revelation to most readers, and the illustrations accompanying his paper are of unusual interest, novelty and beauty. Three other illustrated articles which are characterized by the same uncommon combination of attractiveness and sound value are the account of the Crow's Nest Pass coalfields of British Columbia, by Mr. E. Jacobs, the description of the Alta Italia water-power and electric stations, by M. Enrico Bignami, and the review by M. Lucien Périsse of the mechanical features and new types displayed at the International Automobile Exposition at Paris. Employers and managers will find material of the utmost value in the exposition of the Allis-Chambers apprentice system, by Mr. P. W. Gates, the vice-president of the company, and in the study of wage-paying methods as they affect the workman, by Mr. Henry Hess, an employer of wide experience. Mr. Robb contributes a comparative study of the efficiency of internally and externally fired boilers. The number concludes with the customary comprehensive Review and Index of the Engineering Press.—The Engineering Magazine, New York.

A CLERGYMAN'S APPEAL.

The Rev. W. F. Brownlee, Ridgetown, Anglican minister, has written the following letter to the Muskoka Free Hospital for Consumptives:—

Dear Sir,—I fell in with a case to-day in my parish, a young woman very ill with consumption and I promised I would write you regarding her entrance into the hospital for consumptives in Muskoka. The case is one of great necessity and charity. The applicant is about 18 years of age. She is practically without a home, staying at present with a relative. She is bright and amiable, and would like to live. As I understand, you reject none on account of poverty. I commend the case to you as one most needy, and if you can send me instructions or papers for application to the hospital, I will see to raising necessary means for her transportation and have her sent at once, as I imagine she is not beyond receiving benefit.

(Note by Editor.—Sir Wm. R. Meredith, Kt., Vice-President of the National Sanitarium Association, or Mr. W. J. Gage, Chairman of the Executive Committee, Toronto, will gladly receive contributions for this and several other equally piteous cases calling for help.)

—Mr. W. Thompson, of Peterborough, inspector of the Sun Life, was in town of Good Friday arranging for the payment of a $2,000 endowment policy taken out twenty years by Mr. M. Dovey, and which matured at 12 noon.—Lindsay Post.

Opportunity is Something to be Grasped Now.

Here is Your Opportunity

The Great Divide Mining, Milling, Tunnel and Power Co

(Operating in Gilpin County, Colorado.)

Capital stock 1,500,000 shares. In Treasury 1,000,000 shares. Fully paid and non-assessable.

Owns seventy acres of patented ground in one of the richest sections of Gilpin County.

Five lode claims all of proved value.

Three miles of placer territory that is known to carry good values.

Three are great Fortunes in Placers.
Placer Mining gives large returns.
Placer Mining brings quickest profits.
Placer Mining insures large dividends.

A small block of charter member stock is now offered at FIFTEEN CENTS PER SHARE or the purpose of equipping the placers with a Hydraulic plant for their operation. CASH OR MONTHLY INSTALMENTS.

A clean, legitimate proposition.
Best of references will be furnished.

For prospectus and full particulars address:—

The Cooperative Investment and Exploration Company
311 Quincy Building Denver, Colo.,

Are You Looking FOR A Good Investment?

If so we can offer you the very best thing on the market in mining. A mine that has shipped $250,000 worth of ore. A mine that should pay 40 per cent. very soon and double that amount at no distant day, if you buy the stock at the price now offered.

If this is True, ARE YOU INTERESTED?

We Stand Ready to Prove the Following Statements:

We have two mines, the Michael Breen and Tempest, located five miles from Ouray, in the celebrated San Juan Mining District of Colrcado, where there are more mines worth over a million dollars than any section of the globe. Every one in Ouray knows of these mines and they know we are successful mining men

We have enough ore already mined in these two properties to keep our fifty ton mill running for two years if we should not break down another ton and besides this we have enough pay ore opened up in the drifts, levels and stopes to last a life time.

We have over 7000 feet of tunnels, drifts and upraises, all paid for, and a good wagon road to Ouray, five miles.

We have over 14,000 feet on the four veins that are now opened up, and from which shipments have been made, proving their value, not from the surface only but at a depth of from 600 to 1,200 feet. Two of these veins are 20 feet in width and carry from two to four feet of high grade ore worth $40 to $70.00 per ton, the balance being a mill ore which gives us a profit of about $10,00 per ton. There are 16 claims and a mill site, comprising 160 acres. With mill capacity we can easily produce 200 tons a day.

We have a 50 ton mill, recently equipped with the most improved labor-saving machinery, and all ready to run, but on account of low water this season, the first in 20 years, we will not be able to start up till about the 15th of April, hence the necessity of selling a small amount of stock to carry out the contracts now under way. This stock will be placed in this vicinity only.

We have only forty stockholders now and want only a few more. Our lowest grade or mill ore will give us a profit of $500.00 per day to say nothing of the vast amount of high grade which will go directly to the smelter. Don't you think this is a good enough investment at

30c. per share, par value $1.00

Fully paid and forever nonassessable. Capitalization 1,500,000 shares of which 500,000 is treasury stock. For reference and any other information address

ALEX J. CHAPTON, - - - - - - Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX J. CHAPTON

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gagnon, Black Jack, Star and Red Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 20, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 20th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-21-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

JAPAN IS UNITED AND IS SURE TO TRIUMPH

They are Not Over Confident in Regard to the Land Fighting

THE CAVALRY BRANCH THE WEAKEST SPOT

The Plan of Campaign is Now Developing Gradually—News from Far East

Chicago, April 5.—The Tokio correspondent of the Chicago Daily News writes as follows;

It is said that the Japanese plan of campaign involves starting from each side of Port Arthur and cutting the railroad at a point in the neighborhood of Mukden. Probably 150,000 men have already been landed on foreign soil. Exactly where has not yet come out. The second army is being mobilized and will be concentrated at Sendai. Seventy-five thousand men I know have already sailed from Nagasaki. For the rest of it we correspondents all disagree as to what the facts are, and as a matter of fact we are all as ignorant of the situation as the readers of our articles at home. We have been told if we make a dash for Corea on our own hook we will not be allowed to accompany the Japanese troops during the war. Rather than spoil our chances for the whole war we have been sitting tight, hoping against hope that the Japanese Government intends to deal fairly with us and send us to the front when the necessity for extreme secrecy is past.

JAPS WEAK IN CAVALRY.

The Japanese seem to me to have now no especial reason for extreme secrecy. The army, excellent in infantry and artillery, is very weak in cavalry, which really is the eyes of an army. The Russian Cossack cavalry is likely to hover about the Japanese army, now forcing the advance guard to deploy and in this way delaying the advance of the whole army, now attacking the baggage train or picking up flanking parties. The Japanese will have the advantage of information furnished by the friendly inhabitants. Still the Russian sources of information are likely to be efficient.

The Government is now building a railway to run from Seoul to Wiju. This railroad will be of the greatest advantage in keeping the army in Manchuria supplied with provisions and ammunition. The protection of this railroad, once it is built, will be comparatively easy on account of the friendliness of the natives.

JAPS NOT OVERSANGUINE.

The period that we are now passing through has been one of preparation. The Japanese had hoped to block up the entrance to Port Arthur. They have failed thus far, but may be trying again some other method. Undoubtedly the navy cannot rest while so many Russian ships are still in fighting condition. While the Russian fleet at Port Arthur is badly crippled, still there are enough ships of the line left to inflict considerable damage in an emergency; besides, the four fast cruisers which are still supposed to be at Vladivostok might at any moment make a dash against Japanese transports, all of which cannot be convoyed by a Japanese squadron of sufficient size successfully to resist the attack of all four of the Russian cruisers. In other words, the Japanese line of communication by sea is by no means secure, and until it is one may expect from day to day the news of a new engagement at sea.

The Japanese are not overconfident. The victories at sea have not made them any the more sure of their army. They ask me on all sides; "How do you think our army will stand against the Russians? We Japanese feel very uncertain in this matter and we are awaiting the news of the first engagement with great anxiety." They dread an indefinite prolongation of the war, which would exhaust their resources and wear out the army. Many of them, I believe, hope for foreign intervention.

WILL FIGHT TO DEATH.

Nevertheless I believe the people are going to fight this war to the end, even if it means national ruin. I do not believe that the Japanese are going to make the mistake of trying to occupy the whole of Manchuria or march for Siberia, or any other foolish plan of that sort. I believe they will seize the coast line and just enough of the interior to make the Manchurian Railway useless to Russia. Then they will sit tight and wait for the Russians to attempt to drive them from the territory they have occupied.

To capture Port Arthur is the national hope, and is likely to be one of the principal strategical objects of the war. Port Arthur is surrounded by hills. These hills are all strongly fortified, and now undoubtedly are occupied by large forces of infantry. The approach to this circle of hills by land is over an open flat country. The storming of the place would be even more difficult than was the taking of Santiago in the Spanish-American war. I am afraid that the notion of the American troops at Santiago may lead the Japanese to try to storm Port Arthur. Such an attempt, whether successful or not, would be accompanied by an enormous loss of life, for the ability of the Russian soldier to hold entrenched positions has been proved in too many wars to be a matter of doubt today.

NATION IS A UNIT.

A word about the solidarity of Japan. Modern political conditions have been found to fit in admirably with the ancient feudal institutions of Japan. A great man has his followers, who, in turn, have theirs, and so on down to the lowest class. This system of protection not only holds good in political life, as it does with us, but extends to every department of life in a fashion that makes the political organization of our leaders appear an insignificant affair. The Emperor, as head of the Church, the State and the social organism, unites all his network of clans, so to speak, and gives to the Japanese people a unity found nowhere else in the world. When something is to be done word goes out from the head of heads; it goes down the line from mouth to mouth and becomes with every man a personal matter in which he is individually interested. His future standing with his family and friends depends upon his carrying out his orders to the letter. Of course this system makes the life of the nation a private family matter, and consequently makes it next to impossible for a foreigner to get an inside view of Japanese life. It makes the Japanese very exclusive in regard to outsiders. I hear the same story on every side. A Japanese woman of the higher class would not think of marrying a foreigner.

A SELF-CONTAINED PEOPLE.

"You may know a Japanese abroad very well," said a diplomat of long residence in Tokio, "but when you come to Japan you will find a barrier. It is not because they are not democratic or friendly, but if they took you in at all they would have to adopt you into the family. I have many acquaintances. I know many Japanese who would do any kindness for me, but long as I have been in Japan I do not know a single Japanese intimately. There is not a Japanese who comes to my house for the simple pleasure of free personal relationship. Indeed if a Japanese should come to my house too often, especially in this war time, it would throw suspicion on him among his fellows.

"It must not be thought that this reflects discredit on the Japanese. On the contrary, it enables them to advance steadily under the leading minds of their country. The ablest minds are at the head of all affairs, and when they decide to adopt some new measure after a thorough investigation they are able through the old feudal ties to accomplish the object quickly and effectively. Under no other system would it have been possible for Japan to absorb in less than fifty years the civilization of the West."

PEOPLE OF PANAMA.

Official Pronouncement Fixes the Name by Which They Shall Be Known.

"Panama" and "Panamans," then, it is to be; to which we cordially add, so let it be, says the New York Tribune. Ever since the establishment of the independent isthmian republic there has been some uncertainty as to what its people were to be called, together with an ocean maxim.

Though carefully nursed, the chronometer meets with many adventures. It may go through fire, shipwreck and other perils of the sea, but rarely does the regular, distinct ticking ever stop forever. If a captain dies or his vessel is condemned it finds another owner or another berth and thus it shifts about from ship to ship, changing hands continually and traveling at odd times all the seven seas.

The manufacturing of marine chronometers in this country is confined to four firms, three of which are located in New York, and probably the whole output for a year amounts to 250 or even fewer. As with other articles, the price of chronometers varies according to quality and workmanship. The cheapest cost about $200 each, while the United States government, which naturally buys the best, pays sometimes as much as $375.

The movements of chronometers are usually imported "blank" from England—that is, only the plates and wheels are brought over. The manufacturer here provides the balance, springs, pivots, jewels and other parts needed to complete the whole, together with the brass-bound box in which the clock is placed. Being set in gimbals within the box, the chronometer will remain in a horizontal position when the vessel rolls or pitches, and by this means the poise of the balance is not disturbed.

It takes about three months to manufacture a chronometer and another three months to adjust it, though makers declare that the timepiece should not be sent to sea for two years after completion, as the delicate mechanism must be tested in various ways to obtain a perfect regulation. This adjustment, as the regulation is called, is something that requires the utmost skill and really is the most important feature of the maker's art. Sudden changes of temperature, humidity and electric currents will affect the speed, balance and hairspring, and therefore all the running parts must be so compensated and regulated that whatever contingency may arise there will still be the steadiness which allows no capricious variations. Old-fashioned chronometers were built to run eight days without winding, but these have been superseded by the 56-hour timepiece. Fifty years ago the chronometer was brought to its present state of perfection, and since that time, despite modern ingenuity, makers have found no reason to make any alteration in the principal parts of its mechanism.

A Natural Mistake.

Mr. Longbby—No, Tommy, why?

"Well, sis says you're an easy mark."

—Princeton Tiger.

Fewer Deaths.

The deaths from consumption in New York have decreased 40 per cent. since its health department began its crusade against the disease two years ago.

ADVERTISE IN THE TIMES.

The Elwood Tinworker's Gold Mining Company.

ORGANIZED JULY 1902

CAPITAL TOCK $150,000
PAR VALUE OF SHARES $1.00.

The mining claims of this company consist of two full claims namely

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.
ELWOOD, INDIANA

General Manager of Mines, J. A. DURFAGH, M. E., Camborne, B. C.; Secretary J. R. BOTTORFF; Local Fiscal Agent JOSEPH MILLS, Peterborough.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of $[illegible] with shares at $1 each.

The officers of the Company are C. F. Bumann, President and Treasurer; George W. Butler Secretary, and of C. [illegible], home officer in South Dakota as required by law. Of the $[illegible] capitalization, in shares of $1 each, $[illegible] worth is issued, the first small allotment of this was sold at [illegible] per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in [illegible], Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have [illegible] acres underlaid with three distinct veins or layers of coal which are [illegible] feet thick each. The first one at a depth of [illegible] feet, it is this vein which we are now mining, the second one lies at a depth of [illegible] feet and the third at [illegible] feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth [illegible] feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of [illegible] tons per day, but I have the promise of the superintendent to increase the output to not less than [illegible] tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than [illegible] at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease, as our fixed expenses will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from $2 [illegible] to $[illegible] for Mine Run and $2 [illegible] for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $[illegible] per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 14 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over [illegible] per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $[illegible] each. We predict that this stock will be worth not less than $[illegible] per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President.

GENERAL OFFICES:
[illegible] Washington St., Chicago, Ills.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1 20 a ton Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3 00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

—THE—

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1,(or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

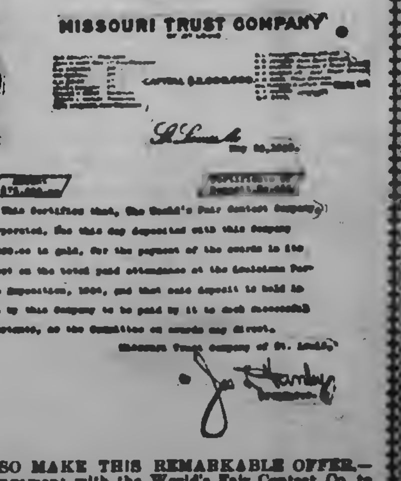
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30 h, 1904, and closes December 1, 1904 An extra prize of $5 500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1880 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1 00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,000.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000 00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $40 each	2,000.00
To the next 100 nearest correct estimates, $20 each	2,000.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $4 each	2,000.00
To the next 1,000 nearest correct estimates, $1 each	1,000 00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 The World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

This Certifies that, the World's Fair Contest Company, incorporated, has this day deposited with this Company $75,000.00 in gold, for the payment of the awards in the contest on the total paid attendance at the Louisiana Purchase Exposition, 1904, and that said deposit is held in trust by this Company to be paid by it to such successful contestants, as the Committee on awards may direct.

Missouri Trust Company of St. Louis.

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1 00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM.—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1880 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the aboev company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipement will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 300 cords of wood which will run us up until out July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

For full particulars apply to the Peterborough Brokerage Co., City Agents. Peterborough; W Gallon. Agent, Apsley; Roland Kidd, Toronto; G. Hilliard, Lakefield; D. L. McKINNEY, SECRETARY, SIOUX FALLS. S. D.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than satisfy every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $16 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $30 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $38 25 per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. water power of 800 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to erect 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER. Secretary-Treasurer. Boulder, Colo.

Advertising in the Times is sure to bring good results. Try it and be convinced

ANALYSIS OF THE AIR.

Number of New Gases Found in the Atmosphere—Different Compositions at Varying Heights.

The composition of the air was up to a few years ago a relatively simple affair. Two principal gases, nitrogen and oxygen, formed the greater part of the atmospheric mass; another gas, carbonic acid, only representing a few ten-thousandths of the total volume, and aqueous vapor, variable from one day to another, completed the fixed elements of the world's envelope. If to this combination we add a little ozone, condensed oxygen, in small and variable proportions, we have a complete statement of our knowledge, or, at least, that knowledge which sufficed for a student facing an examination, says a translation in Public Opinion from Nuova Antologia Rome.

To-day all is changed, for recently have been found a large number of new gases in the air. A few days ago Prof. Hann, of Vienna, gave a luminous exposition of the present view of science on this matter, and the conclusions of this famous meteorologist are very interesting. Prof. Hann stated that to the known gases, oxygen and nitrogen, or azote, we must add argon, neon, crypton, xenon and helium. Further, experiments have shown the presence of hydrogen, an element vitally necessary in the composition of water, but not considered up to the present in the make-up of the air. These gases have different physical properties, their density especially being very dissimilar, the lightest of all being hydrogen, compared to which helium is nearly twice as heavy, 1.97; neon, 9.9; azote, about 14; oxygen, about 16, argon, nearly 20; carbonic acid gas, 22; crypton, 41, and xenon, 64. With such differences in density it is evident that the gases are not present in equal proportions.

This view is radically different from the classified view, for we have heretofore believed—basing our conceptions on data obtained from balloon ascensions—that the composition of the air was the same, even at the greatest altitudes, which conception is easily understood when it is recalled that we only took into consideration oxygen and azote, the density of which elements is about the same. With the knowledge we have to-day of the properties of the different gases, of their weight and their liquefaction temperature, we may determine approximately what the proportions should be at different altitudes, the proportions being stated by Prof. Hann as follows:

"On plains but slightly elevated above the sea, the composition of the air is 78 per cent. of azote, 21 per cent. of oxygen, 0.9 per cent. argon, 3-10,000th of carbonic acid, hydrogen, 1-10,000th, while the other three elements vary from a hundred-thousandth to a millionth part. At six miles the azote is 81 per cent. and the oxygen 18 per cent., argon and carbonic acid gas have diminished one-half, but hydrogen is a little more abundant, 2½ litres to the ten thousand, the average temperature at this point being 18 degrees C. At 63 miles, with a probable temperature of 80 degrees C., the azote is only a memory, about 1,1,000th; there is no oxygen, 4-1,000ths of helium and 90 per cent. of hydrogen. The total pressure of all of these gases, which at the level of the sea support a column of mercury of 760 millimeters, at this height only raise 2-100ths of a millimeter of mercury."

Thus in the high regions of our atmosphere hydrogen, accompanied by a little helium, reigns supreme, while the heavy gases which constitute the atmosphere in which we live and breathe exist only on the surface of the earth.

Canal Systems of France.

Few who have not traveled in southern and central France know of her vast systems of canals and canalised rivers. Many persons spend months or years in Paris and know nothing of the great basins in that city from which canals radiate, binding all parts of France to the great heart of the capital. These canals run into rivers connecting those of the watersheds north, South and west. Through many of these small streams you will see little tow boats puffing, grunting and lifting up a heavy chain from the canalised river bed, winding it round a drum and thus towing long lines of barges with a most economical expenditure of power.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton There is an immense quantity of this sulphide ore.

This property is four and one-half miles from Kirkland, a station on the Sante Fe, Phoenix and Prescott Railroad and thirty-five miles from the Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company. For prospectus and further particulars address,

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years. already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Catarrh Leads to Consumption

he Experience of a Lady in Sydney Who was Cured of Consumption by Inhaling Catarrhozone — This Case Should Warn Others.

"The beginning of my trouble was cold. Just a simple cold," writes Mrs. A. V. Thorburn, of Sydney. "I neglected this cold and then I got catarrh. When it became troublesome I took some medicine but it didn't help me. I began to cough a great deal and then consulted a doctor. I was horrified to find I must have had tubercular irritation in my lungs for a year or more. A friend strongly urged me to use Catarrhozone. I conferred with my doctor and he said that lots of fresh air and the frequent use of Catarrhozone would be the proper treatment. I used to cough for at least half an hour in the morning but after using Catarrhozone a few days my cough was much easier. The irritation gradually left my throat and I commenced to get better. I kept up the Catarrhozone treatment and inhaled the medicated air five minutes every hour. I believe this was the means of staying my disease, for I got quite well again in a few months. I have since advised other sufferers from catarrh and lung trouble to use Catarrhozone, and in each case good results were obtained. I attribute my recovery entirely to Catarrhozone, which I can honestly recommend in the strongest way."

The foregoing experience should convince everybody of the evil of allowing colds to develop. To neglect catarrh is even worse. Carry a Catarrhozone inhaler in your pocket and use it occasionally. It prevents colds, permanently cures every type of catarrh, and is known to be the only remedy that actually kills the germs of consumption.

Catarrhozone is used by all intelligent physicians and is endorsed by thousands of doctors, because it can be relied upon to absolutely cure catarrh, bronchitis, throat and lung trouble. Catarrhozone is simplest, surest and best remedy. Two months treatment guaranteed to cure. Price $1.00, trial size 25c., at druggists or N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont. Refuse a substitute for Catarrhozone and insist on getting it when you ask for Catarrhozone.

TOWN AND COUNTY NEWS

ASHES HERE AND THERE BY TIMES' REPORTERS

Fire at Buckhorn

A report was circulated in the city on Monday to the effect that Mr. Thos. Eastwood's hotel at Burkhorn, had been destroyed by fire. The Times, as was stated in yesterday's issue, received a despatch from Burleigh contradicting this, but later news from Burkhorn confirms the first report. There was no loss of life reported, and no particulars were given. Mr. Eastwood has been in business for a number of years, and if his hotel has been destroyed, he will no doubt rebuild at once.

Death of Mr. Cavanah

We are sorry to learn of the death of Mr. Cavanah, of Lethbridge, N.W.T. Of late years he has acted as manager for the Hudson Bay Co. at that place. He was on a C.P.R. train last week, returning home from a visit to Winnipeg, when it met with an accident, in which a number of persons were injured. He escaped without a scratch, but on his arrival home underwent an operation for appendicitis. The operation proved fatal. Mr. Cavanah leaves a widow and six children, two of whom, William and Miss Mona, now reside in town, the latter living with her aunt, Mrs. W. J. Green, of Brock street.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. R. C. Strickland, Lakefield, was in town yesterday on business.

—Mr. and Mrs. Lewis Best, of Sarnia, are in town, the guests of Mr. John Best.

—Mr. George Meredith, of Frost's jewellry store, returned yesterday from a visit to his home in Orillia.

—Mrs. Robt. McAlpine, of Havelock, is the guest of Mrs. H. Newton, 51 Hunter street.

—Mr. W. R. Lough, who has been visiting in the city, left yesterday for his home in Clinton.

—Mr. Wesley Thurston, of the R. Neill boot and shoe store, Peterborough, is spending the holidays under the parental roof.—Lindsay Post.

—Mr. Joseph McClelland, a former resident of Peterborough, is in town, the guest of his brother, Mr. John McClelland.

—Messrs. Clayton Stapleton and W. McDonald, who have been visiting in town, left for their home in the Queen City yesterday morning.

—Mrs. W. B. Thomas, of Cobourg, who has been visiting her daughter, Mrs. A. J. Warne, left for her home yesterday.

—Mr. Wm. Robinson, proprietor of the Union Hotel, Gooderham, and formerly one of our well known citizens, was in town on business yesterday.

—Miss Mina Richardson, who has been connected with the Public School here for some time, leaves shortly for Toronto. Miss Richardson will be greatly missed by her many friends.

—The many Peterborough friends of Miss Agnes Mercier, of the Fifth Ward, will be pleased to learn of her success in obtaining a gold medal in her recent examinations for nurse at St. Mary's Hospital, Rochester.

—Mr. W. LaPierre, who has been in the employ of the Examiner for some time, left for Chicago last evening, on a visit to his brother, who is dangerously ill in that city.

—Another engagement just announced is that of Miss Ethel Walton, daughter of Mr. and Mrs. W. J. Walton, of Peterborough, to Mr. James Crawford Towers, of Toronto, formerly of Sarnia.—Toronto News.

—The marriage of Miss Clara Arnott, of North Monaghan, and Mr. Henry Jeffries, of the C.G.E. Co, Peterborough, will be solemnized at the bride's residence this evening. Rev. Mr. Armitage, of Picton, and formerly rector of All Saint's church in this city, will perform the ceremony.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—There was no police court yesterday morning.

—Fenelon Falls lock will have new upper gates this season.

—It is not expected that there will be skating next week.

—The G.T.R. reports a very heavy Easter travel this year.

—The streets are rapidly drying up and cyclists have appeared with their wheels.

—The Council meeting, which was to have been held last evening, was postponed until this evening.

—Man advertises to find a way to make money, and woman reads the advertisements to find a way to spend it.

—Work on the grand stand on Murray street will be resumed at an early date, and the structure will be covered with sheet iron.

—William Robert Dick, pioneer lumber merchant, is dead at Winnipeg, aged 83. He was reeve of Fenelon Falls, Victoria County, for a number of years, and went to Winnipeg in 1871.

—Lindsay people, when they glance upward at the bright night face of the fire hall timepiece, will feel a profound pity for their Peterborough brethren.—Post.

The proposed building to be erected by the Y.W.C.A. will be exempt from taxation, according to a clause recently inserted in the Peterborough Bill.

Heintzman & Co's piano tuner R. Shaw, is here from Toronto Pianos of all makes attended to by leaving an order at Ormond & Walsh's Drug Store Phone 146.

—This evening the special Boys' service at the Y.M.C.A. will be conducted by the Physical Director, and the subject will be "A Boy's Make-up." The soloist will be Herb. Mowatt and gramaphone selections will also be given.

—Owing to the flooded condition of a portion of the G.T.R. tracks two or three miles west of the city, great difficulty is being experienced by the company. On Monday evening the fire was put out in the engine of the express, as a result of the depth of the water, and the train had to stop before reaching the station.

—The special services at George street church last evening were conducted by the pastor, Rev. J. P. Wilson, who spoke on the first chapter of St. John's Gospel. He dwelt upon the obedience due to Christ, and remarked that people might be divided into two classes, those who accept Christ and those who reject Him. Miss Clara Bellegham sang in her usual acceptable manner.

—The funeral of the late W. A. Stratton, K.C., will take place from the deceased's mother's residence, Gilmour street, this afternoon at 3 o'clock and will proceed by way of Charlotte street, to the Little Lake cemetery. It will be conducted under the auspices of Peterborough Lodge A.F. and A.M. No. 155, of which deceased was a member.

—The commutation of sentence in the Steele case (Peterborough), has not been a wise proceeding. The man's original offence was attempted murder in a bank. He is no sooner at large than he resumes his record of crime by passing as an employer of labor for St. Louis exhibition.—Kingston Whig.

"The country roads are in a terrible state," remarked a farmer to The Times yesterday. "The snow is very deep and so soft that the horses break through easily. It's really dangerous to attempt to drive on them. One of my horses got down off the road a few miles out of the city this morning and I had a hard job to get him out at all."

A prominent Peterborough merchant also had an exciting experience the other day. He and a friend went for a drive in a covered buggy, and when they had reached the suburbs found the roads in a bad condition. They had to get out of the vehicle and walk behind, while the horse struggled through as best he could.

The Test of Respectability.

The New York "Evening Post" points out the fact that Carlyle's favorite definition of respectability, a "gigman," seems obsolete in the light of modern developments. In place of the old standard "he keeps a gig," we have substituted "he has a steam yacht." Most amusingly was this latter-day measure of wealth brought out in the letters from Paris of the promoter in search of an underwriter. Question arose as to the financial responsibility of one ready subscriber (apparently without ready cash), and the astute American applied himself to the task of rating the fellow. But how did he go to work? Did he go to the banks, the agencies, the Bourse? No, he simply observed the man's manner of life. When he discovered that the backward underwriter kept a yacht, his doubts were instantly relieved, and he cabled the joyful news to New York. Evidently, we say, in the lexicons of today we must look to see the entry: "Gigman; modern, yachtsman."

Beulah—Did you have a good time at the beach?

Belle—No! It was awfully stupid. Only a few men there?

Yes; I was engaged to the same man the whole summer.—Yonkers Statesman.

Mr. Kidder—Ah, how-der-do. Doctor! If you have a few minutes to spare, I wish you would come over to my house and chloroform my youngest boy.

Dr. Price—What is the matter with the lad?

Mr. Kidder—Oh, his mother wants to comb his hair.—Harper's Bazar.

"Yes," said the dentist, "to insure painless extraction you'll have to take gas, and that's fifty cents extra."

"Oh!" said the farmer. "I guess the old way'll be best; never mind no gas."

"You're a brave man."

"Oh! It ain't me that's got the tooth; It's my wife."—Philadelphia Ledger.

Carrie—I'm sure you misjudge Mr. Sweetser, papa. He is a man of great ambitions. You should hear him tell of the things he is going to do.

Carrie's Papa—And I suppose I'm one of 'em, but I reckon he'll find it harder to accomplish than he fancies it is.—Boston Transcript.

Double Yolked Eggs.

Many poultry dealers are proud that their hens produce double-yolked eggs, and I have known numerous cases in my experience of hens laying eggs with three yolks. The habit, however, is one to be discouraged in every possible way, says a writer in London Farmer and Stockbreeder, for it is not an indication of productiveness, but rather of disease. It is caused either by some sudden disturbance from the ordinary conditions of life, as a severe fright, or else it is due to weakness of the egg organs—the natural process of formation not being gone through properly and regularly. In almost every case this condition is brought about by overfeeding—a too rapid development of the yolks causing more than one to leave the ovary at a time to enter the oviduct. A hen which once gets into this habit will always be liable to illness, which usually takes the form of loss of power in the legs, even if an actual rupture does not occur internally. Such a hen should therefore be put at once on short rations with a view to checking for the time being the development of eggs. It is not the hen which lays a double-yolked egg occasionally that is a profitable hen. What the poultry farmer should aim at is a higher general standard in egg production—a better average size and more regular laying. Some hens only lay once every two or three days. These are the "unprofitables," and they are often the birds which are addicted to the "double yolk" evil.

Privileged.

The Honorable Colonel William J. Bryan appears to believe that the constitutional provision regarding free speech was inserted for his especial benefit.

Fired.

"I understand Blankley was ejected from Jones's house, where he went to pay a visit."

"Yes, he was an old flame of Mrs. Jones and Jones put him out."

EVERYBODY READS THE TIMES

Jolly Jack Tar.

"Jolly" is the word generally associated with the jack tar. He is the picture of health, and the health bubbles over in mirth and merriment. When people are ill, especially when sickness attacks the lungs the doctor often advises a sea voyage. But in the large majority of cases the sea voyage is impossible.

It is to the men and women of the workaday world to whom sea voyages or change of climate are impossible, that Dr. Pierce's Golden Medical Discovery comes as the greatest earthly boon. The effect of this medicine upon those whose lungs are "weak" is remarkable. Even where there is bronchitis, spitting of blood, emaciation, weakness, conditions which if unchecked or unskillfully treated lead to consumption, "Golden Medical Discovery" in ninety-eight cases out of a hundred works a perfect and permanent cure. It strengthens the stomach and other organs of digestion and nutrition, so that the body in all its parts is not merely fed but nourished. And it is by nourishment that Nature builds up the body to resist or throw off disease.

"I had a terrible cough something over a year ago and could find nothing to stop it or even to do me a particle of good," writes [illegible], Esq., of Cameron, Screven Co., Ga. "I chanced to see an advertisement of yours, and forthwith bought a bottle of your invaluable 'Golden Medical Discovery.' Before I had taken half a bottle I was entirely well."

Dr. Pierce's Pellets cure constipation.

ADVERTISE IN THE TIMES

A Gold Mining Co. Stock in a Gold Mine at 10 Cents per Share Par Value $1.00 per Share

THE COSTILLA GOLD MINING COMPANY
Has 10 Gold-bearing Veins Exposed
190 Acres in a Solid Block and All Patented
A Crosscut Driven 117 feet to the First Big Vein

A drift run on the vein 178 FEET IN ORE, the Gold value or contents running from 2 to 8 ounces, per ton, or from $40 to $160. This ore has not been stoped and will not be until the main shoot is reached.

The breast of the drift is, only 52 feet, according to engineer's survey, from the first BIG vertical ore shoot, which, at the surface, 550 feet above, shows values of 2 to 7 ounces gold, per ton.

Slabs and feeders of gold ore are coming in freely in the drift.

This is a business proposition. It is the KIND AND QUALITY which makes for great and permanent success. It is worth an investment of 10c. on the dollar, per share, now. It will be worth par with development.

BEET SUGAR COMPANY MAKES NEW PROPOSITION

Asks the Town to Guarantee It's Bonds for $100,000--Mr. Gordon, of Wallaceburg Will then Invest $100,000 in the Peterborough Factory.

The main question before the City Fathers last night was a proposition made by Mr. E. A. Gordon, President of the Wallaceburg Beet Sugar Company, with a view to securing the completion this year of the Peterborough Beet Sugar Company's big buildings, and the operation of the factory next winter. Mr. Gordon proposes that he and his associates put into the local concern $100,000, providing the Town guarantees the company's bonds for another $100,000, secured by a first mortgage on 33 acres of land and a taxable property valued at $370,000. It is also asked that the Factory's assessment be fixed at $10,000 for ten years, providing, of course, the property is transferred to within the Town's limits, and no opposition from property owners is forthcoming.

Mr. Gordon, in addressing the Council remarked that he was particularly struck with Peterborough's advantages for a Beet Sugar Factory, and other industries. His company purchased the beets grown in this vicinity last year, and an analysis showed that they produced 16.3 per cent of sugar, as against 15.3 per per cent. from those grown in Michigan. The Wallaceburg Company are pioneers in Michigan in the beet sugar business and are meeting with substantial success; but Peterborough farmers are a better class than those in Michigan, and their industry, wealth and agricultural skill will give the Peterborough factory advantages over his institution in Wallaceburg. Mr. Gordon then went on to point out that cane sugar is now used simply as a supplement to beet sugar, 75 to 85 percent. of the sugar used in Canada and the States coming from beets. The trouble with the Dresden and Wiarton factories had been bad surroundings, poor construction and bad management. Our Wallaceburg plant and buildings cost $682,000 in hard cash, but we have twice as much iron in the plant than is necessary. If I were putting in a plant today I would fall in line with the Germans and Hungarians, and do it cheaper than we Americans have been accustomed to doing, not using so much iron. He did not see why any factory, with good surroundings and economical management should not pay good dividends to its stock-holders—economy is the main factor. If this factory in Peterborough is but put on a sound basis, his American friends will take a block of its stock; they don't want to controll it, that's not their policy. The factory can be put up and a good plant installed at a cost of $250,000, and if the Town consents to guarantee the Company's bonds to the amount of $100,000 it will have first security on that plant, which he thought should certainly be ample. This was not asking much: the Wallaceburg factory got a bonus of $30,000 and ten years' fixed assessment.

To Ald. Best, Mr. Gordon replied that he and his associates are willing to invest $100,000 if the proposition can be put on a solid foundation, not, however, unless the Town guarantees the concern's bonds for $100,000, the security for which would be the plant and machinery.

Ald. Adams remarked that the bonds would not be marketable until ample security is forthcoming. The first thing to consider is one of territory.

Mr. H. W. Garvin replied that under the law a two-thirds vote of the Council can bring into the town any section of the Township. He did not, however, anticipate any opposition from property owners, as the erection of such a factory will increase the value of adjacent property. What we want the Council to do is to submit a bylaw on the lines suggested to the ratepayers at as early a date as possible. Michigan, during the last seven years built 22 beet sugar factories, and that state is nearly all level, the crops sustaining considerable damage during a wet season. Here in the Trent Valley we are exceptionally favored by nature, have no fear of floods, and the soil when properly tilled being specially adaptable to beet growing. He thought it a promising thing to get American men interested in this proposed factory, and the fact that Mr. Gordon has consented to be president of our Company, assures the success of the beet sugar industry in Peterborough. We can, he went on to say, get a first class plant from Holland for $156,000, it will cost $25,000 more to take down, transport and re-install that plant here; $40,000 will complete the building already started, and we shall thus secure an up to date factory for about $250,000. We couldn't get the Dresden plant for $500,000 and $50,000 in stock. We must have $250,000 in a month or the factory will not be built this year. $50,000 worth of stock can be disposed of in our community, once the institution is established on a firm basis. Had we been certain of completing the factory this year, the company could have now had five thousand acres under contract for beet cultivation. We are not asking the Town to guarantee more than thirty per cent. of the cost of the factory; there can be no possible risk, and many prominent citizens heartily approve of the proposition. Mr. Garvin here explained that it is proposed to put in a dryer next year, when farmers can send in beets for a distance of 100 miles, if necessary, and take the pulp back. The building will be sufficiently large to increase the plant by adding machinery capable of slicing 10,000 tons of beets a day, thus making it the largest factory of its kind on this continent.

To Ald. McWilliams, Mr. Garvin replied that there would only three factories now entitled to the government bounty, and Peterborough would be able to produce sufficient sugar to secure its third share of this bounty, $25,000.

Mr. Garvin here explained that, as a test, a farmer in Simcoe cultivated three acres of beets, to which his man devoted but one-twentieth of his time; the returns from these three acres entitled this farmer to keep his help eight months of the year, which he could not afford to do under previous conditions. The factory will employ all the farm help it could get for four months in the winter.

His Worship explained that the Town's borrowing capacity was now limited to $368,000; $50,000 is to come out of this for a new Collegiate Institute, and he could not see how the Town could very well exhaust its borrowing power for a private industry.

Mr. Garvin said the sale of the stock would be assured were the factory completed.

Ald. Morrison thought this question should have every consideration; beet sugar is a great industry, and if possible to get a factory for Peterborough, the Town should be prepared to take some risk. He thought the legal aspects of the case should be carefully gone into and he hoped no impediment would arise to prevent a mutually satisfactory agreement being arrived at between Mr. Gordon and the Town. He moved, seconded by Ald. Johnston, that the question be submitted to a Committee of the Whole Council, with Mr. Gordon present to answer any questions that may arise.—Carried, and the Committee will meet Friday afternoon.

Mr. Gordon remarked that there would be no objection to the Town being represented on the Board of Directors. He further added that he was only three-quarters of an hour in getting sufficient money subscribed to build the Wallaceburg factory.

Ald. Johnston moved, seconded by Ald. Morrison,—That His Worship, and Aldermen McWilliams, Best, Adams and Rush be a committee to take action in this matter.—Carried.

THE LIFT LOCK.

His Worship here pointed out that the Lift Lock is to be opened on the 12th of May, and he thought the Town should take some steps to welcome and entertain the Cabinet Ministers, and other notables, who will be here on that occasion.

The Town Council met in regular session last night, when there were present Mayor G. M. Roger, presiding and Aldermen Edgecumbe, Johnston, Morrison, Rush, E. F. Mason, Hicks, Scott, Frank Adams, Clinkscale, McWilliams and Best.

COMMUNICATIONS.

From J. Coyle Brown, asking authority to make sewer connection between his house and the George st. sewer.—Referred to the Board of Works.

From W. G. Morrow, secretary School Board, advising the Town that in case bylaw for the new Collegiate Institute Building carries, they would like to have the debentures issued for thirty years.—Referred to the Finance Committee.

From the Commissioners of the Town Trust, enclosing statement of their demand for 1904. The requirements for school purposes is $3,539.28; net for Town purposes is $14,859.47; for waterworks $15,274.91; total $33,673.66. —Referred to the Finance Committee.

From property owners, asking that a granolithic sidewalk be constructed on the north side of Dalhousie st., from Stewart to Bethune street, on the usual conditions.

From M. H. Halpin and C. Halpin, protesting against the construction of granolithic sidewalks on south side of Park and north side of Perry sts, and south of Perry and north of Lake streets, as they do not wish their property made liable for such expense.—Board of Works.

From twenty ratepayers, asking that an electric lamp be erected on Romaine street, west of G. T. R. track, and east of Park street. —Referred to the Fire, Water and Light Committee.

Geo. L. Blatch, C.A, and his assistant, Mr. J. A. Jackson, the chartered accountants of Ottawa, seconded by the Council this year to make a specially thorough audit of the Town's Finances, reported in 7 foolscap folios. They took pleasure in reporting that the general system of government of the Financial affairs of the Town is as good as that of any town in Ontario. They thought however, that if legislation can be effected to provide that the Court of Revision be composed of three qualified men outside of the members of the Council, the system would be strengthened and the result would be more satisfactory to the members of the Council as well as to the ratepayers. They also congratulated the Town on its officials, so far as they had an opportunity of judging, are well qualified for the positions they hold. The clerk and the Treasurer, are certainly valuable officials, and a word of praise for the collector of taxes also is got out of place, as the taxes are exceedingly well collected. The Water Commissioners were also complimented on the fact that the general principles on which their system of accounting is based are sound and the books carefully kept. —Referred to the Finance Committee.

From 91 ratepayers protesting against the proposed bylaw respecting street watering, whereby the owners whose property abuts against the streets to be watered are called upon to pay the whole cost of the same. The streets proposed to be watered, being the principal business streets of the Town are used by the public in general, who should be assessed in proper proportion. If the principal streets are not watered the public in general will protest, but it is unfair to compel any certain section of the ratepayers to pay for such expenditure.—Referred to the Board of Works.

From property owners, praying for the construction of a granolithic sidewalk on the north side of Sherbrooke street, from Stewart to Bethune street, under the usual conditions.—Referred to the Board of Works.

From Town teamsters asking for an increase per day for man and team from $3 to $3.50.—Referred to the Finance Committee.

From the Peterborough Gun Club asking for the privilege of continuing trap shooting at clay birds on the Riverside Park, as they have done for years past—Referred to the Legal Committee.

From Fred G. Wescott, saying that should a granolithic walk be constructed on Crescent street from Lake to Romaine street, he hopes it will be laid in its proper position, and not on the lines of the present one.—Referred to the Board of Works.

From Mrs. R. Stewart asking permission to connect her house on Wolfe street, with the sewer system on Aylmer street.—Referred to the Board of Works.

From George A. Rutherford, probably seeking a position on the police force, although he does not say so. He writes, "I hereby believe that the citizens of this Town are asking for more Police."—Received.

From Aubury White Assistant Commissioner of Crown Lands, saying that Alfred J. Cameron had been instructed by the Ontario Land Surveyor to make a survey of the Town's lands along the river front, west from Wolfe street to Hunter street. —Referred to the Board of Works.

From property owners, praying that a granolithic sidewalk be constructed on the west side of Stewart street between Dalhousie and Townsend streets, on the usual conditions. —Referred to the Board of Works.

From Dr. Bingham saying that since January last he has been doing the sanitary work of No. 5 Ward (Ashburnham) at a salary of $50 a year allowed him by the village before incorporation with the Town, and he hoped the Town would not give less than that amount.—Received.

From Geo. S. Matthews, objecting to the construction of a granolithic walk on Rubidge street, east side, between Charlotte and Brock streets, or rather to its being constructed alongside his property, at the corner of Rubidge and Hunter streets, as he is not in Peterborough and would ask that his name be added to any petition that may be presented to the Council against this work. —Referred to the Board of Works.

From Jas. and Fred. Metheral and Miss Dina Archambault, objecting to the construction of a granolithic walk on the north side of Cedar street, between Crown and Cambridge streets. Referred to the Board of Works.

From M. H. Spencely, seeking an appointment as Sanitary Inspector—Received.

ACCOUNTS.

A number of accounts were referred to the Finance Committee for certification thereto.

THEY WANT A SIDEWALK.

Messrs. Geo. Sloan and Geo. Tovey representing property owners on Chamberlain street, addressed the Council, asking for a sidewalk on the street in question, which had been petitioned for last year, and reported against by the Town Engineer on the ground that there is too much vacant property in this locality. Mr. Sloan claimed that the petition had been properly signed by the requisite number of property owners. Mr. Tovey explained that they want a sidewalk from Lafette avenue to Allison street, on the north side. His Worship promised that the Board of Works should thoroughly investigate this matter. To Ald. Johnston, Mr. Tovey explained that he and his fellow residents would be satisfied with a plank walk, rather than suffer the present inconvenience.

PLAN FOR A FIRE HALL.

Ald. Edgecumbe submitted the following report;

Gentlemen,—Your Committee of the Whole Council beg leave to report and recommend as follows;

1. That the Fire, Water, and Light Committee be authorized to send a deputation to other places to enquire as to the best plan for a Fire Hall, etc., and that the Treasurer be authorized to pay their expenses on the certificate of the chairman of the committee.

2. That the Town Solicitor and Chairman of Finance Committee be instructed to go up to Toronto to obtain information as to the best system of issuing debentures at the present time and that the Treasurer pay their expenses.

3. That no action be taken on Messrs. J. J. Turner & Son's application respecting their taxes for this year, and that it be suggested to Messrs. Turner to appeal to the Court of Revision after the next assessment if it should not be satisfactory.

All of which is respectfully submitted.

The report was adopted as read.

QUESTIONS OF LAW.

Ald. McWilliams submitted the following report;

Gentlemen,—Your Legal Committee beg leave to report as follows;

1. We recommend that no action be taken in regard to the claim of Ormond & Walsh for damages on account of their cellar having been flooded.

2. We recommend that no action be taken respecting a claim of the Colonial Ink Co. on account of their water service having been frozen.

3. Your committee is pleased to report that the opposition of the Legislature asked for by the town with respect to the erection of an Isolation Hospital was withdrawn.

4. We recommend that owing to representations made by purchasers of bread, no action be taken at present on the application of the Baker's Association to have the legal weight of loaves of bread changed to 2 pounds 1 1-2 pounds.

All of which is respectfully submitted.

The report was adopted as read.

FINANCE REPORT.

1. That the Chairman of this Committee and the Mayor be authorized to dispose of the debentures for $10,000 issued to pay for the Hilliard Farm, and the debentures for $5,000 to pay for the waterworks extensions made in 1903.

2. That the payment of $35 to William Frith, and $35 to A. McCarthy on account of their snow ploughing contracts for this season in Ward 6 be confirmed.

3. That the following accounts be paid.

Township Otonabee	$106.70
Frank Smith	1.00
J. & W. Metheral	8.75
Bell Telephone Co.	1.10
Peterborough Hardware	6.38
J. C. Turnbull Co.	14.35
Lindsay & Might	3.00
Clement Gordon	4.50
Salisbury Co.	4.90
E. H. D. Hall	216.63
Times Printing Co.	24.10
Peterborough Review	21.56
C.P.R. Co.'s Telegraph	64
R. H. Leary	6.75
J. E. A. Fitzgerald	75.75
W. J. McCallum	2.50
Wm. Hetherington	1.10
Russell Denne	7.65
Wm. Hamilton Mfg. Co.	7.00

PRICE OF BREAD.

In reference to that clause in the Legal Committee's report, recommending no action regarding the bakers request to make a smaller loaf without ticketing the same Ald. McWilliams explained that the main reason for refusing their request was that the committee are not prepared to grant the request involving an increase in the present price of bread.

NEW INSTITUTE.

A bylaw to provide for borrowing $50,000 for the purpose of providing a site and erecting thereon a new Collegiate Institute passed its first and second reading. The bylaw will be voted on on May 5th next. Ald. Best objected that the proposed site for the new building had not been specified by the Board of Education.

Ald Adams did not think this a question for the Council to interfere in.

His Worship said, as far as he understood, the Council were obliged to put this bylaw to the people at the Board of Education's request.

Mr. V Eastwood here explained that the Board had a site in view, but did not wish to give publicity to it until sure that the $50,000 asked for would be forthcoming.

The King's Approval.

The King has approved the issue of letters creating the Seychelles (hitherto a dependency of Mauritius) a separate colony. The formal ceremony of publication has been postponed until November 7, when Sir C. Bruce, Governor of Mauritius, arrives. Mr. E. B. Sweet-Escott, the present Administrator of the group, will be the first Governor of the new colony. The Seychelles are among the hundred or more islands scattered over the Indian Ocean, which have hitherto been dependencies of Mauritius. They are between the parallels of S. lat 4 deg. and 5 deg., 934 miles from Mauritius, 600 from Madagascar, and 970 from Zanzibar. Their total area is 50,120 acres and the population is nearly 20,000, the largest and most populous island being Mahe, which is about seventeen miles long and four to seven miles broad. Mahe was originally captured from the French in 1794, and on the capture of Mauritius in 1810 the whole group was formally taken possession of. The finances of the Seychelles were separated from those of the Mauritius in 1872 and in 1888 they were given a separate Administrator and Council, while in 1897 the Administrator was given the full powers of a Governor.

Mr. Balfour's Gallantry.

London Answers is responsible for the following:—Mr. Balfour has a gallant way of paying pretty compliments to ladies. Driving through Kingston one day, he passed a huge red motor car that stood before an imposing mansion of grey stone. A young girl in a white gown sat in the car, and as the Premier glided by she bowed to him, and smiled. But the Premier did not appear to see her.

The young girl looked embarrassed, vexed. She bit her lip. She thought a moment. Then she took hold of the wheel of her machine, pressed with her small foot the bulb that made the horn toot gruffly, and swiftly she shot after Mr. Balfour.

Soon the great car overtook the carriage, and halted. The young girl, an old friend of Mr Balfour's, extended her hand, and, as he took it, she said reproachfully:

"You passed me a while ago without looking at me."

With a gallant smile and inclination of the head, the Premier answered:

"If I had looked at you I couldn't have passed you."

Praise for the Germans.

A special correspondent of The Times, who is making a tour of German commercial and industrial centres, and is writing a series of letters thereon, says in one of them:—The Germans appear to have grasped the fact that work is better done in a good than in a bad light, and great care is taken to secure it. Ventilation is also well managed. But the most striking feature of German factories is their clean, orderly, and well-kept condition. These qualities seem to be universal, and they extend to the dirtiest and most untidy departments. Outside the rooms German factories are well provided with sanitary washing and dressing accommodation. Baths are common, particularly shower baths with hot and cold water; and in summer they are much used. German employers certainly do a great deal more for their people than ours, or rather I should say that the practice of providing comforts and conveniences for them is commoner in Germany.

A Shorter and Faster Route.

On the coast of North Pembrokeshire the Great Western Railway Company are quietly carrying out a scheme with the intention of creating a shorter and faster route to Ireland. The scheme includes the construction of a breakwater 2,000 feet long. The material is obtained from the Clogwen rock, which shelters Fishguard Bay from the west, and the removal of this rock is necessary for the carrying out of the superintendent engineer's plans. As the result of one monster blast alone over 100,000 tons of rock were displaced. To receive the charge of 14,200 pounds of Chilworth gunpowder a T-shaped tunnel was bored into the base of the rock by means of drills worked by compressed air. The report of the explosion was comparatively feeble, but the upheaval of such an immense quantity of rock provided a magnificent spectacle, which was witnessed by hundreds of people.

"To what do you attribute your longevity?" asked the reporter.

"My which?" queried the oldest inhabitant.

"Your longevity," repeated the reporter.

"Never had it. As far as I can remember I ain't never had no such complaint."—Puck.

New Bylaws Formed

A set of bylaws has been prepared by the Water Commissioners, for the general maintenance and management of the town's waterworks. At last Saturday's meeting these bylaws were passed and were declared to be in force from and after the first day of April. A small booklet, containing the new rules and regulations will be printed, and mailed to each consumer.

PRETTY APRIL WEDDING

Miss Katie Overend and Mr. L. J. Picard Wedded Yesterday

Yesterday morning a pretty wedding was celebrated at St. Peter's Cathedral, when Miss Katie Overend, daughter of Mr. W. J. Overend, Simcoe street, was united in matrimonial bonds to Mr. L. J. Picard. Only a few of the immediate relatives of the bride and groom were present, and the ceremony was performed by Rev. Father John O'Brien. The bride was beautifully attired in a handsome travelling gown of navy blue, and was assisted by her sister, Miss May. Mr. William Grady supported the groom, and at the conclusion of the ceremony a dainty wedding breakfast was partaken of.

The happy couple then left on an early train for Buffalo, N.Y., where they will spend their honeymoon.

FUNERAL OF LATE MR STRATTON

Large Number of Friends Follow the Remains to Their Last Resting Place

The funeral of the late W. A. Stratton, K.C., was held yesterday afternoon from the residence of deceased's mother, Mrs. Jas. Stratton, Gilmour street, and proceeded to the Little Lake Cemetery. Many beautiful floral tributes were presented, and the funeral cortege was one of the largest ever seen in the city. The funeral was conducted under Masonic auspices and the pall-bearers were;—Very Wor. R. M. Dennistoun; Wor. Bro. Peck, Wor. Bro. Crane, Bro. A. L. Davis; Bro. Adam Hall, and Bro. Wm. Ferguson.

Wor. Bro. Crane acted as Worshipful Master, and assisted by Wor. Bro. Peck conducted the services at the house. Rt. Wor Bro. Rush, Very Wor. Bro. Dennistoun, and Wor. Bro. Crane had charge of the services at the grave.

SHE SWORE TOO LOUDLY

Exciting Scene at Police Station Yesterday —$5 and Costs

"Signora" Olivastile was the center of attraction at yesterday morning's police court. She had acted disorderly in the vicinity of the Italian colony, and the police had escorted her to the station. Her Italian husband was about to leave for Montreal, and a farewell party had evidently been held. After hearing the evidence His Worship inflicted a fine of $5.00 and costs, amounting in all to $9.90. The prisoner had not sufficient funds on her person, so she was given accomodation down stairs until the necessary cash arrived. While in the cell she felt rather ill at ease. In one hand she held four dollars and in the other four "gold" rings, no doubt the gifts of affectionate friends. These she held, and the tears flowed freely. She was repentant—anxious to get out, and kept up a continuous wail. At last the required cash arrived and the prisoner was let out of her cell, and her predicament.

Rage For Jewelry

The women of 1903 will be remembered as the bejewelled daughters of a dawning century. Never was there such a craze for gems rich and rare. We are no longer satisfied with the beauty of a stone, we want its settings to be a marvel of art. Exquisite and artistic enamels lend the depth of their coloring to emeralds and diamonds and weird pendants and mermaids and bird-women, with plumaged wings, prove the imaginative genius of the man who gave his name as "Lalique" art.

The quantity of jewelry worn at one time savors somewhat of the barbaric, and makes us wonder what will be the next fad of sweet femininity. Crystal hearts with a tiny gold lock and key, are worn in Paris, and they are sure to meet with great success here. They are a prettier form of pendant than the plaque. The old paste "Saint Esprit" pendants worn by the peasant women of Normandy are in great request, particularly when colored stones are mixed with the paste.

Of Interest to Farmers

Farmers in this country are advised to examine the corn they are using for seed the coming season and test it to make sure it will grow. A well known farmer in this vicinity states that about forty-five years ago this country passed through just such a summer and winter as the past, and the next season a large amount of the corn refused to grow. He argues that on account of the wet season last year most of the corn did not mature properly and some put away in cribs is still quite soft. The severe weather, he argues, has killed the germs in much of the corn and its failure to sprout will be the first knowledge that some will have that the corn will not grow. He advises the farmers to test the seed by putting it in dirt and setting in under a warm stove for about four or five days or a week, when it should sprout. Anyone having 1902 corn should use it this year for seed. The above is well worthy of consideration.

Students Should Read Papers

It is just in such cases as the present war that the newspapers with their daily press despatches serve as an educator to the people. The other day the Times heard a teacher of wide experience assert that scholars who have access to newspapers at home outstrip in their studies those who do not see the papers. They become better readers and spellers, better grammarians, and write the best compositions, besides learning history and geography more quickly. They get a grasp of what is going on outside of their immediate neighborhood which otherwise they would only get by extensive travel and at great expense. Parents should take the newspapers and encourage their children to read them. All the latest local and foreign news is found in The Times.

$10—TO WASHINGTON AND RETURN—$10

Via Lehigh Valley Railroad, Friday, April 22nd. This is the last $10 Excursion this season. Tickets good 10 days. Stop over allowed at Baltimore and Philadelphia returning. Tickets good on Black Diamond Express. For further particulars call on or address ROBT. S. LEWIS, Passenger Agent, 33 Yonge street, Toronto.

FORTY-FIVE TONGHAKS HAVE BEEN PUT TO DEATH

Japs Have to Suppress the Korean Bandits Who are Causing Trouble

Seoul April 6.—It is reported that the Japanese have killed two Tonghaks (bandits) near Gensan. The Province of Chulla, in Southern Korea, where the Tonghaks precipitated the China-Japanese war, is being overrun by armed bands, and an official request has been made for troops to subdue them. A returning missionary reports that forty-five Tonghaks have been hanged at Kong Ju, capital of the Province of Chung Chung.

The British military attache has returned here from Pingyang.

MR. BERTRAM SPEAKS

Interesting Opinion Expressed by Chairman of Transportation Commission

"For instance, in the last meeting at Peterborough, the representatives from the different towns around all advocated the Trent Valley Canal, because they considered that their own towns would be benefitted by it. The real question in which the commission was interested was whether by the Trent Valley Canal grain could be brought through from the Georgian Bay to Montreal at a lower cost than by the present route. When I was a member of Parliament for Peterborough in the early 80's I was not in favor of the canal. At the present time, however, conditions have changed entirely, and the question is worthy of particular consideration, especially when it is considered that the Americans, in order to improve their canal facilities, have not hesitated to provide a hundred million dollars."

The above quotation from the Montreal Herald, is expressive of Mr. John Bertram, the Chairman of the Transportation Commission's opinion, on the proposed Trent Valley Canal. The wisdom of Mr. Bertram's remarks is quite apparent, and there is every likelihood of the proposed completion of the canal being carried out.

WAR OFFICE HAS FAITH IN JAPAN

Britain Believes That Russia will Lose in War

WILL HOLD COREA FIRM

And Russia will Not be Able to Drive Japanese Out

London, April 6.—One might count on one's fingers the observers throughout the whole world, who have any really complete grasp of Japanese ideas and plans for the present war," said a War Office authority to a press correspondent this morning. "We see," he continued, "strategists and tacticians everywhere proffering counsel to the Japanese. We see academic statesmen putting their wisdom at the disposal of Tokio. Meantime hardly a day passes, despite the ban on news, that some item of information does not slip through, showing how much deeper and abler the Japanese are than their counsellors.

"This is naturally the case because the Japanese are at the heart of the situation and because intellectually they are without superiors. They are facing today just what they have been preparing to face ever since the Cossack appeared in the Far East. He had studied the problem in detail for years. They have studied it with the firm conviction that they must understand it or perish nationally.

"In the drama now being enacted in the west Pacific, the most striking feature is the way the Japanese are fortifying themselves in Corea. Their precautionary steps are magnificent. Russia boasts that she will drive them forever off the mainland. The Japanese reply by the most thoroughly military occupation of Corea possible to effect. They know they must hold place on the mainland or shrivel into insignificance. They are, therefore, using every device known to military science or political propaganda to make that place secure. In the first place they threw a line of works across the peninsula from Wonsan to Ping Yang. Before this almost impregnable line they can fall back should disaster overtake them in Manchuria or North Corea. Then they sent armies forward and are now occupied in fortifying every important strategic point in the vicinity of the Yalu. When this task is finished, and it ought to be finished very shortly, we shall witness the next step in this impressive ungolding of the menaced nations' intelligence and material power.

"With the centre of his army deeply and broadly based on Corea, the Mikado can use the wings with safety and effectively against the Russians, especially since Admiral Togo's fleet commands the sea. Thus the Japanese can fight for years and utterly frustrate Russia's plans for the mastery of East Asia.

WEATHER NOTES

"I GUESS I GOT DE SPRING FEVER"
ME TOO

Thursday—Fair and Cloudy.

AT CADDIGAN'S LANDING

Several Peterborough Citizens were Victims of a Practical Joke

More than one Peterborough County resident was the victim of a practical joke on All Fool's Day, but the following is the most amusing that has come under our notice; On the morning of April 1st, telegrams were received by Messrs. T. Nailor, of Campbellford; Jno. Belcher, Peterborough County Engineer, and D. Conroy, Sr., the well-known contractor, to the effect that two of the masonry piers of the Marsh Creek bridge were badly out of plumb, and as this was serious news, all who were notified hurried to the scene. The messages also intimated that the bridge had been partially washed away. The bridge mentioned is across Gannon's Narrows, and in the vicinity of Caddigan's Landing. When the parties notified reached Lindsay, hacks were engaged to convey them to the scene of trouble, and on reaching there they were confronted with a large sign, which read, "April 1st, 1904." The bridge was not in any way damaged, and the visitors realized that they had been duped. Mild refreshments, including, buttermilk, were partaken of, and the happy party returned to Lindsay. As no carrier pigeons were with the visitors despatches have been considerably delayed.

Resolution of Sympathy

At a meeting of the Peterborough Law Association, held on Monday last, the following resolution was drawn up;

"That there be placed on the records of the Association an expression of the deep sorrow of the members of the Bar at the death of William Armstrong Stratton, K.C., who, for many years, successfully practised his profession in their midst.

"That, as a mark of their sentiments, the Association provide a wreath, to be placed on the coffin of their deceased brother, and attend the funeral in a body.

"That the Association extend to the mother, brothers and sisters of the deceased, an expression of their sincere sympathy and condolence in the great loss they have sustained."

ATHLETIC WORLD

BY OUR SPORTING EDITOR

A meeting of the Old Country Wanderers was held at the Crown Hotel last night, with Mr. T. A. Halley in the chair, and considerable important business was transacted. It was reported that a number of members had been practicing every night for the past two weeks. Arrangements were made to have practice on Tuesday and Thursday evening and Saturday afternoons at 3 o'clock. The ball will also be at the grounds every night for the use of members. Players aspiring to a place on the team are requested to attend practice on Tuesday evening at 6.15 or forward their names to the Secretary, Mr. Littledale, before Monday at 8 o'clock.

After the general meeting the committee met to discuss the advisability of holding a concert in aid of the funds, which, though satisfactory, are not yet complete, and as the present time seemed most fitting, it was decided to call an emergency meeting for Saturday evening at the Crown Hotel at 7.30. It is hoped that all members will be present as this is most important. A cordial invitation is extended to the British sportsmen as this is the first attempt to show the people of this city a British game. The Club are in the game for love of honest and clean sport, and look for support from the public of Peterborough. The citizens are requested to watch for the Old Country Wanderers' concert.

Mr. Thomas O'Neil, now president of the Midland League, states that he will not accept any office this year and in "Tip's" withdrawal, not only the league, but the local club loses a first class officer. Mr. O'Neil is thoroughly posted on all matters pertaining to the game, and has done much in this town to further its interests.—Port Hope Guide.

A Serious Accident

A report reached the city yesterday to the effect that Mr. J. A. Tate, of Cavan, had met with a serious accident, as a result of which he lost one of his feet. While loading furniture at the G.T.R. station, Millbrook, his foot got caught and a portion of it was torn off. An operation was performed and the remainder of the foot removed.

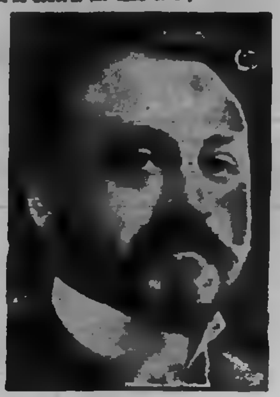
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, APRIL 7 1904

NOT SYMPATHY, BUT ANTIPATHY

At a church sociable the other day the harmony of the occasion was disturbed by a heated discussion which arose respecting the war in the far East.

Some of the brethren—and the sisters—championed the cause of the Japanese because they deemed the Russian Emperor a despot who outrages humanity by sending thousands of people to Siberia and who permitted the massacre of his Jewish subjects. The opposition upheld the Russian side of the controversy because the Japanese are not Christians, but "pagan barbarians," as one church member put it, while the Russians are Christians, even if their communion is a close one. The argument waxed warm until the pastor finally interposed and asked the disputants to give over their arguments.

The incident is worthy of notice only because it is typical of most arguments on the subject. People are in the habit of taking one side or the other, not because they admire either the Japanese or the Russians, but because they dislike one nation or the other. They are swayed by their antipathies rather than by their likings. It is not through love of Japan that the average man espouses the cause of that nation, but because he wants to see Russia "licked," while the Russophile is ordinarily no great lover of Russia, but holds the idea that the Japanese are getting too conceited and need a thrashing.

Perhaps this is human nature, but it is hardly creditable to the intelligence of mankind. The desire to see somebody get a trouncing is not the highest of motives, but it certainly is the motive which influences the sympathies of most people in international conflicts.

A RICH MINERAL DISTRICT

Monarch Consolidated Gold and Copper Mining and Smelting Co's Bright

One of the richest mineral estates in the United States is that of the Monarch Consolidated Gold and Copper Mining and Smelting Company, and is known as the Copper King property, which is located in and surrounds the drainage basin of that tumultuous tributary of the South Grand, the Roaring Fork, in the Harman Mining District, of Grand County, Colorado. Here at the head waters of this stream, and well up in the lofty mountains lying between Grand Lake and Mt. Andubon, is a vein of copper sulphide ore wonderful in size and excellent in quality; and as an evidence of its persistence and continuity it may be stated that six claims end to end are located upon it. From the vicinity of these six claims several branches of the Roaring Fork take their way, and soon uniting, flow as one stream in a south-westerly direction to confluence with the South Grand, at a point four miles distant from the mines. This intervening distance is covered by holdings of the company in the form of placer claims, mill sites and homestead entry, in area 1640 acres, controlling waterpower, timber and milling privileges of high order, all of which are to become conducive to the successful and economical development of the mines.

The New Denver, Northwestern and Pacific Railroad, building from Denver to Salt Lake City, is now working large forces of men along the portion of their route nearest the company's property, and will be in a position to operate trains by next summer. This will be in time to meet the requirements of the property, which will be in readiness to begin shipments of ore to Denver smelters, pending the installation of a treatment plant on the ground. In total to date the Copper King property comprises an area of 1720 acres of mineral land, covered to a very valuable extent with excellent timber. There is every likelihood that a thorough exploration and development of this property will reveal other valuable ore deposits. Already rich deposits of gold and copper have been discovered, and the fragments taken from other veins possess the same excellent values, and the geologic formation has been recognized by experts as being favorable to the deposition of large ore bodies.

The natural resources of this promising property are of the best. The water-power of the Roaring Fork is bound to contribute largely to the success of this enterprise, as it possesses a sufficient volume of water to create 500 horse power in one portion of its descent where it falls 600 feet in a distance of 1500 feet. This water-power is one of the most desirable, and probably the best in the entire region, and is a very valuable acquisition to the property, as operating expenses may be cut squarely in two by means of it, thereby throwing a heavier balance on the side of profit. There are five quarter sections of this acreage, upon which is growing some of the largest and finest pine and spruce timber to be found in Colorado, so that a considerable revenue will be derived from the conversion of this timber into lumber.

A copper sulphide vein, 30 feet in width, has been opened at different points, and possesses every indication of permanence. Near the upper end of the Copper King claim a shaft has been sunk to a depth of 25 feet, and bottom, ends and sides, were all found to be ore of 20 and 30 per cent. quality, and at several points on the surface samples running 50 and 60 per cent. have been broken off. A tunnel will be run from the lower end of this claim to a point beneath the shaft, and the latter will be continued until a connection is made. This will open a vast body of stoping ground for economical mining, the while perfect ventilation is secured. This will also facilitate deeper workings, the immediate delivery of ore at the mill, and there will, of course, be a probability of encountering other large ore bodies on the way. There will be no serious obstacles to overcome in the construction of a wire tramway for transportation of ore to the mill, as less than four miles would have to be covered, and this could be accomplished at a cost of about $20,000. When the mill or smelter has begun a steady run the initial expense for this tram will rapidly be repaired.

Considering the above description it may be readily seen that the prospects of this progressive corporation are most brilliant, and intending investors should carefully consider the many advantages possessed by the Monarch Company. For further particulars application should be made to the Peterborough Brokerage Co., the local fiscal agents of this prom- tone desirous of taking advantage of ising concern.

Rich, Red Blood. Basis of Health

Strong Blood Fortifies the Nerves Strengthens the Heart, Keeps You in the Swim. How to Nourish the Blood

To keep abreast in the unceasing race that confronts us, both energy and reserve strength are essential. Strength is power. Power is money—that's the way we resolve it today; yet even when evidence of failing strength and dwindling power becomes manifest, very few of us face the actual condition and deal with it as we would with something involving monetary value.

Thousands of people are falling behind in the race of life simply because they are failing in strength. Instead of using Ferrozone, which revitalizes all the functions of the body, forms rich, red blood, improves digestion, thereby renewing vitality and endurance, they simply drift along until the doctor or undertaker confronts them.

If Ferrozone was unpleasant to take, or if its action were not immediate and permanent, if physical improvement were not of the highest value to the individual, there might be some excuse for deferring the use of this remarkable tonic.

If your health is inconsequential, then Ferrozone may be dispensed with. But if health and vigor give you more power and comfort, can't you see the foolishness of denying yourself the many advantages of using such a grand medicine?

Do the fair thing by yourself, go right to your druggist and get Ferrozone. You will then know what perfect health, good spirits, and strong nerves really mean.

Ferrozone, like other good things, is grossly substituted, so insist on getting Ferrozone, which is prepared in tablet form and sold only 50c. boxes, six boxes for $2.50, at all dealers, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn, U.S.A.

EVERYBODY READS THE TIMES.

Scientific Possibility.

A magnificent experiment awaits only an appropriation from some capitalist's wealth. Sir Oliver Lodge mentions that 20 years ago he proved that fog could be dissipated electrically, and in a dense fog he cleared a space of 50 to 60 yards' radius by means of the discharges from a Wimshurst machine. Only lack of means prevented an attempt to give London a clear atmosphere. Recent advances make possible the desired kind of dynamo for a continuous current, and it is believed that an excessive amount of machinery would not be necessary, for the fogs occur in a still atmosphere, and are seldom of considerable height. Sir Oliver suggests also that rain might be electrically produced, as in India, where the dark monsoon clouds pass over without discharging.

Matter of Taste.

Kittie—Paul told me last evening I was the prettiest girl he ever saw.

Bessie—Oh, that's nothing; he said the same to me last year.

"I know, dear, but his taste may have improved since then, you know."

High Class Investment

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company. The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body, eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. R. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,080 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-28-02.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 28, 1902.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 28th, 1902.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-02

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1902.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

RUSSIAN ATTITUDE TOWARDS THE JEWS AN INFERIOR RACE.

Minister of the Interior Says They are Revolutionists and Murderers and Not to be Trusted with Citizen's Rights

Special to The Times.

Berlin, April 5 — Prominent Jews have received confidential reports of the result of an audience M. von Plehve, Russian Minister of the Interior, granted to a deputation of 60 Russian Jews who petitioned for the abolition of the disabilities attaching to their race. M. von Plehve said;

"It is not true that the Czar and I regard the Jews as an inferior race. On the contrary, we consider them exceptionally clever. If Jews were admitted to the universities without restrictions they would overshadow the Russians and dominate our intellectual life. It would not be fair to allow the minority thus to sway the majority. I regret to say that I am convinced that the Jews are revolutionists, and also murderers. All the recent political assassinations, and all attempts at assassination have been inspired by Jews. I have indisputable proof of this.

"The Jews have declared war against the Russian government through the foreign press, which their race controls. The war entails heavy sacrifices. Take care that these sacrifices are not required from you. Russia will only improve the condition of the Jews very slowly and very cautiously. She will not give them the same rights of citizenship as she gives non-Jewish inhabitants. If she did, the massacres at Kishineff and Homel would be repeated on a much greater scale."

ENGLAND PLANS FOR WAR

Sends Ten Regiments to Canada to be Available for the East

Halifax, N.S., April 6.—Further information has been received here respecting the distribution of British regiments which the Home Office proposes to send to Canada so that they cations in the East. If existing plans are carried out two regiments, in addition to those now stationed here, are to stay in Halifax, one each at St. John, N. B.; Quebec City, Montreal, Toronto, Winnipeg, Manitoba, and Calgary, North-West Territory, and two at the Pacific terminus of the Canadian Pacific Railway or at Esquimault, B. C.

In case the services of an armed force are required in the East each regiment could be forwarded without interfering with another. Each body would arrive at the Pacific coast in such order as to facilitate the embarkation on steamers.

While stationed in Canada, it is understood that the services of these regiments will be utilized in training the Canadian military. The date of the arrival of the troops depends altogether upon developments in the East.

FEAR BALKAN OUTBREAK

Austrian Army Corps Prepared to Leave on Short Notice

Trieste, Austria, April 6. — The Third Army Corps of the Austrian army is prepared to leave here at any moment for Ragusa on the Adriatic. Six Austrian-Lloyd steamers are ready to take the soldiers on board instantly. The army corps is provided with full transport and with ammunition.

The explanation given in military circles of these preparations is "if Russia meets with a great disaster in the Far East an outbreak will follow immediately."

It is stated here that this really is a critical moment in the Balkans, where up to the time snow has prevented active operations.

The army corps will be landed at the most convenient port for transport to the Macedonian frontier. Besides the munitions of war, a large supply of provisions for the Third Army Corps is stored in the arsenal here. Every day the soldiers of the garrison are exercised in handling these packages and in carrying them to the steamboats.

EMPEROR MAY LOSE VOICE

GERMAN RULER'S THROAT TROUBLE GROWING WORSE

Empress' Health Precarious and This Contributes to Condition of Kaiser

Berlin, April 6.—Emperor William's throat trouble is serious, despite the persistency of reports that he is in excellent health. It is believed by those who met him in the Mediterranean that he is making the voyage to recuperate, in view of a further operation, which may even take place on board the Hohenzollern, on which he has now been joined by two of his sons.

A sinister rumor got abroad here lately and it has not been denied by the person concerned, although it must have reached him. It is that Professor Von Bergmann was consulted before Moritz Schmidt was called and that Bergmann gave it as his decided opinion that the only hope of effectually treating the Kaiser's ailment lay in complete removal of the organ affected. This meant the entire loss of his voice and lesser operation was decided upon.

Professor Bergmann's opinion is discounted by the suggestion that he always favors drastic remedies, but it is recalled that it was Bergmann alone who correctly diagnosed Emperor Frederick's ailment and refused for state purposes to alter his expressed conviction, while others did so.

In addition to his own state of health, the Kaiser has serious domestic worries. The Empress has been ill for some time and has been virtually secluded from her family for the last few years. She had grown extraordinarily thin and got into a low state of health, which it is feared has now developed the family taint which made her marriage to the then Crown Prince one of Bismarck's most condemnable and explicable acts.

NOT BELIEVED.

The reports and information given out here concerning the Kaiser's health are favorable. But they are not believed. The gloomy reports current in London are attributed by the officials here to English malice. It has been learned that these reports came in the first instance from high officials at Gibraltar who met the Kaiser at close quarters during his recent visit.

When he reached Gibraltar the Emperor never spoke above a whisper and husbanded his voice with the utmost care, remaining absolutely silent for long periods.

Such an amount of restraint in a man of his talkative disposition was bound to excite comment.

MR. FOY TALKS VICTORY

SAYS THAT THE CONSERVATIVE PARTY WILL SOON GOVERN THE PROVINCE!

Ross Government's Heroic Fight for Life—The Proposed Temperance Legislation

Montreal, April 6.—"The probabilities are that the session of the Ontario Legislature will close in a couple of weeks. I do not think it will be prolonged beyond that time."

This was the statement made to the Star yesterday at the Windsor Hotel by Mr. J. J. Foy, the Conservative member for South Toronto, in the Ontario Legislature. Mr. Foy explained that his business in Montreal was purely of a private nature and non-political.

When asked as to the probability of an appeal to the province at an early date, Mr. Foy said; "I do not look for a general election. You may depend on the Ross Government holding on to the reins of office as long as they possibly can. With their slim majority they are having a herculean task to avoid defeat in divisions. They dare not throw up the sponge and take their chances at the polls."

Referring to the temperance legislation, Mr. Foy said it was merely an amendment to the License Act, calling for stricter supervision of the granting of licenses. Questioned as to the prospects of the Conservative party when the general elections did come, Mr. Foy said there was very little doubt as to the sentiment throughout the province. The Liberals might defer as long as possible the inevitable, but could not avert the disaster that awaited them at the polls. "The Conservatives of Ontario are full of fight," added Mr. Foy, "and await the collapse of the present Administration with confidence and certainty."

The Elwood Tinworker's Gold Mining Company.

ORGANIZED JULY 1902

CAPITAL TOOK $150,000
PAR VALUE OF SHARES $1.00.

The mining claims of this company consist of two full claims namely

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.
ELWOOD, INDIANA

General Manager of Mines, J. A. DURRAGH, M. E., Camborne, B. C; Secretary J. R. BOTTORFF; Local Fiscal Agent JOSEPH MILLS, Peterborough.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of [illegible] with shares at $1 each.

The officers of the Company are C. F. Bumann, President and Treasurer; George W. Butler Secretary, and of C. Burrows, home officer in South Dakota as required by law. Of the $250,000 capitalization, in shares of $1 each, [illegible] worth is issued, the first small allotment of this was sold at 50c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have [illegible] acres underlaid with three distinct veins, or layers of coal which are [illegible] feet thick each. The first one at a depth of [illegible] feet, it is this vein which we are now mining, the second one lies at a depth of [illegible] feet and the third at [illegible] feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth [illegible] feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than 200 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than [illegible] at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease. as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and townspeople and, therefore, we have no freight or cartage to pay. We receive from [illegible] to [illegible] for Mine Run and [illegible] for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about [illegible] per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 10 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about [illegible] each. We predict that this stock will be worth not less than $3 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain.

Yours very truly,

THE CONSUMERS' COAL COMPANY,
GENERAL OFFICES: [illegible] Washington St., Chicago, Ills.
C. F. Bumann, President.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1.20 a ton Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3.00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

—THE—

Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

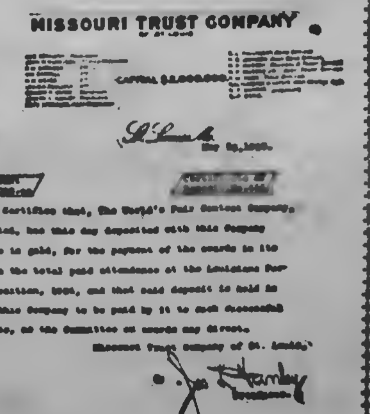
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1880 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$25,000.00
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $50 each	2,500.00
To the next 100 nearest correct estimates, $25 each	2,500.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 400 nearest correct estimates, $5 each	2,000.00
To the next 1,000 nearest correct estimates, $1 each	1,000.00
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 the World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your coupon will still entitle you to chances to win one or more of the other 1880 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

A PLAN OF THE FIGHT BY JAPAN

Japan Has a Quarter of a Million Troops Moving

ANOTHER BIG ARMY CORPS

Being Mobolized and to be Followed by Still Another

Shanghai, April 6.—A despatch received here from Kobe, Japan, says the Japanese Government has 260,000 troops in motion, and fully 60,000 more under arms, in garrisons and at the depots. These numbers are exclusive of the third reserves, numbering 120,000, which have not been called to the colors. The exact number of troops which have left Japan for their various destinations are not known, but the entire first army had been landed and has established itself in North-western Korea, with its main base at Chinampho.

The Japanese general staff still carefully guards the plan of campaign, but it is generally believed that it will operate three armies each nominally numbering 100,000 men, the second army landing west of the Yalu River, and the third army east of New Chwang. The landings of the latter two armies will be easily accomplished, for the light cruiser squadrons can protect both movements.

It is thought that the landing of a heavy Japanese force west of the mouth of the Yalu will force the Russians to abandon the fortifications which they have been erecting north of the Yalu for the purpose of opposing the crossing of the first army of Japan from Corea.

TO OPERATE TOGETHER.

It is also anticipated that these great Japanese forces will operate in conjunction, the third army swinging eastward from New Chwang seizing or cutting the railroad, and then engaging in a turning movemeht against the main Russian position.

The Japanese are confident that the Russians will be unable to transport supplies sufficient to maintain in Manchuria a force larger than 300,000 men. The heavy detachments necessary to guard the railroad and supply bases will, it is claimed, reduce the Russian fighting force to about 200,000 men.

The Japanese are requisitioning thousands of horses, and it is probable that a considerable detachment of cavalry will accompany each army. Though the horses of the Japanese cavalry seem inferior to those of the Russians, the Japanese officers say they will satisfactorily accomplish the work planned for them.

ARTILLERY FOR FRONT.

Much Japanese artillery is departing for the front. The guns seem light, but it is believed that the Japanese have a number of heavy batteries equal in range to the best European field artillery. Japan also possesses a large number of excellent mountain batteries, which in rough country will have a distinct advantage over the Russians. It seems certain that Vice-Admiral Togo's failure to effectively dispose of the Russian fleet at Port Arthur has delayed the Japanese land operations. A general thaw is now proceeding in Korea and Manchuria, rendering the country roads impassable, and making it impossible to conduct general military operations until the spring.

A GOOD PROPOSITION

The Costilla Gold Mining Company Offers a Safe Investment

Careful mining investments are productive of most satisfactory results, and the more intelligently and careful capital is invested, the better for the industry. All the great profits that have been obtained from mining investments have been made by those who purchased stock during the time of development of the mine, and this certainly is the time for those desirous of taking advantage of opportunities to secure shares. Many flotations of stock in mining companies are heralded to the public, with gross exaggerations, so that it is to the intending investors' personal interest to think well before he purchases shares in a concern, from which he may or may not secure dividends.

Of the most progressive, and most promising companies in America is that widely known as The Costilla Gold Mining Company, which possesses a rich mining property, sufficiently developed to insure the assertion that it will be a fine producer, and to warrant the expectation that it will be a dividend payer. This property consists of 240 acres in a compact body, situated in the West Blanca Mining District, Costilla County, Colorado. Great fissure veins outcrop and trend throughout these claims, and from the outcrops ores rich in gold have been taken. This mining district is among the most important in the State of Colorado for its mineral deposits, and the telluride-carrying gold as well as free milling quartz is in abundance.

In the centre of the company's group of claims is a cross-cut tunnel, which has been driven 117 feet from the portal to the vein, and a drift has been run along the vein for a distance of 178 feet. In this drift the ore is continuous and swells to good widths of three ounce and eight ounce gold ore, as the mountain is further penetrated. According to the engineer's surveys, the first ore shoot will be reached when the drift is driven 52 feet further. These gold-bearing veins are scattered profusely throughout the whole district, and rising almost sheer from the placer, the claims are almost vertical, the property revealing more than 100 veins, boldly defined, and presenting an ideal situation for exploitation along the veins and by crosscuting.

Not many companies in this district are working, owing to lack of funds for developing purposes, although in some the ore runs from $12,000 to $20,000 per ton, but, as there is an abundance of coal, iron and oil, as well as gold, it is expected that the time is fast approaching when it will be opened up on a large scale. The Costilla Company is free from debt except for $25,000 still owing on its property, and this is payable within five years, although it is the intention of the company to pay this off before that time.

A great deal of gold has been produced at a cost of $1.00 an ounce, and even less, so that it may readily be seen that there is an immense profit, as gold is worth $20.67. It is little wonder that more money is invested in mining than banking, with less risks and greater profits. It might also be added that there are fewer failures in actual working mines than in any other business or calling, when the mining is conducted in a straight forward, open legitimate manner, and the property is held by patents. These qualifications are possessed by the Costilla Company, which has every prospect of success.

Only 500,000 shares, which will be sold at 10 cents per share, are left, and an excellent opportunity is afforded to anyone desirous of investing in a concern, whose prospects are most brilliant. The character of the property and its development, pronounces the chances of success more than even. The work of development will be pushed ahead as long as the company's means will warrant them doing so, but the greatest care will be exercised to remain free from debt. Mr. Roland Kidd, General Fiscal Agent, Toronto and Peterborough, or Messrs. Thos. Patterson & Co., Fiscal Agents, Peterborough, will be pleased to furnish any further information concerning this progressive Company.

A CLERGYMAN'S APPEAL.

The Rev. W. F. Brownlee, Ridgetown, Anglican minister, has written the following letter to the Muskoka Free Hospital for Consumptives:—

Dear Sir,—I fell in with a case to-day in my parish, a young woman very ill with consumption and I promised I would write you regarding her entrance into the hospital for consumptives in Muskoka. The case is one of great necessity and charity. The applicant is about 18 years of age. She is practically without a home, staying at present with a relative. She is bright and amiable, and would like to live. As I understand, you reject none on account of poverty. I commend the case to you as one most needy, and if you can send me instructions or papers for application to the hospital, I will see to raising necessary means for her transportation and have her sent at once, as I imagine she is not beyond receiving benefit.

[Note by Editor.—Sir Wm. R. Meredith, Kt., Vice-President of the National Sanitarium Association, or Mr. W. J. Gage, Chairman of the Executive Committee, Toronto, will gladly receive contributions for this and several other equally piteous cases calling for help.]

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers :

J. R. CHAPTON, ... President
E. P. CHAPTON, ... Vice-President
A. J. SANBORN, ... Secretary
ALEX. J. CHAPTON, ... Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co. These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h.p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet o. shaft. At the 160 feet level we have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but the whole averaging fully $8 per ton. In view of the fact that the entire expense of mining and milling will not exceed $2.50 per ton, it can readily be seen that this is a remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail. We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to install a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis.

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day; one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until next July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to this end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than satisfy every claim made by the company, and unquestionably proves the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 6 feet of which runs from $10 to $100 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $80 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $[illegible] per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. Water power of 300 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to [illegible] 50 ton mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

LIGHTHOUSE HEROINES.

Wherever Women Have Been Put They Have Done Their Work in Satisfactory Manner.

The history of the lighthouse service shows that women are thoroughly reliable and efficient as lightkeepers. As a rule they are not appointed to the care of lights of the first importance, because the work would be too arduous; but wherever they have been put they have done their duty most satisfactorily. The Boston Herald tells of many notable feats of heroism performed by women lighthouse-keepers.

On Lake Michigan, at the north end of Milwaukee bay, stands a tall red tower, which is under the charge of Mrs. Georgia Stebbins. Its light is 122 feet above the water, and may be seen for 20 miles. Ten years ago there was a frightful storm, and three men, upset from sailboat, were in imminent danger of drowning. Mrs. Stebbins went to their assistance, and rescued them at the risk of her own life.

Twenty-five miles out in the ocean, in the pathway of the steamers from Boston to Halifax, is a barren and rugged island of small area, which in stormy weather is often swept by the waves. It is called Mattinicus Rock, and the lighthouse was formerly kept by a man named Sam Burgess.

On one occasion in winter he had gone away to the mainland to procure provisions, when the weather turned bad and prevented him from returning. Meanwhile, his wife, who was an invalid, and her four daughters lived for three weeks on one cup of corn meal and one egg apiece per day. The sea swept everything off the rock, driving the family to the light tower; yet the lights during all that dreadful period were as carefully tended as usual, and never failed.

The wife of a lighthouse-keeper often acts as his assistant and performs all his duties when he happens to be away. Thus it chanced that once, during a storm, Mrs. Fowler, whose husband had charge of North Dumpling light, on the Rhode Island coast, found herself in serious trouble. There was a thick fog and the machine for ringing the fog bell broke. It was an accident that might have cost many lives and more than one ship; but the woman was equal to the emergency. Scaling the outside of the tower, she fastened a rope to the bell, and rang it until the weather cleared.

ARTIFICIAL PUMICE.

New Product Being Introduced to Take the Place of the Natural Stone.

Natural pumice is so common to volcanic eruptions that after such outbursts the surface of the adjacent sea have been covered for miles with a mass of the floating stones. The material is a kind of glass (obsidian) which, while in a molten state, has been rendered porous by the expansion of gas or steam in its substance. This familiar stone, says the London Chamber of Commerce Journal, has always been useful in the arts; but it is not a reliable compound, for it will vary both in grain and hardness sometimes in the same piece. This has suggested the introduction of an artificial stone which is designed to answer the same purposes as natural pumice without its faults, and the new product is now being made for the markets of the world at Bietigheim, in the valley of the Ens. Its constituents are sandstone and clay, and there are no fewer than ten different grades of the stone manufactured. There is a hard and a soft kind designed for the leather, waxcloth, felt and wood industries; another kind for stucco workers and sculptors; a soft, fine-grained variety for polishing woods and [illegible] goods; another kind suitable for the treatment of lithographic stones; while other varieties of the new product are fitted for various duties.

A Natural Mistake.

The Terror—Do people often throw things at you, Mr. Doughby?

Mr. Doughby—No, Tommy, why?

"Well, sis says you're an easy mark."
—Princeton Tiger.

Fewer Deaths.

The deaths from consumption in New York have decreased 40 per cent. since its health department began its crusade against the disease two years ago.

EVERYBODY READS THE TIMES

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100.00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from Kirkland, a station on the Sante Fe, Phoenix and Prescott Railroad and thirty-five miles from the Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 500,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest, but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $[illegible]. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75cts Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of [illegible] feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

The Catarrhozone Dry Air Treatment

THE ONLY RATIONAL, SURE CURE FOR CATARRH AND DISEASES OF THE NOSE, THROAT AND LUNGS.

The only natural cure for catarrh is the dry air treatment which effects startling cures without resorting to drugs, dangerous snuff and cocaine mixtures.

Catarrhozone kills the catarrh germs, soothes and heals the sore mucous membrane, clears the air passages of the nose and throat, cures chronic catarrh that has resisted all other treatments.

The reason why Catarrhozone cures is because it really gets at the cause of the disease. No matter how remote or long standing your catarrh may be you can place perfect faith in Ferrozone. It is Nature's Cure composed of the most healing balsamic antiseptics known to medical science. Read the following;

MR. L. MURPHY, well known in West Medford, Mass., writes; "Catarrhozone cured my catarrh, after a score of doctors failed. I used to hawk and spit, my nose was continually stuffed up, and often I was sick at my stomach. Catarrhozone has removed every trace of catarrh from my system."

MISS EMMA PETERS, Highland Grove, N.S., writes; "I am more than pleased with the results from Catarrhozone. It cured me of the worst kind of nose and throat catarrh. Other friends using Catarrhozone are greatly pleased with it and agree that it is the only sure remedy for catarrh they ever used."

Nr. LAWRENCE KENNEDY, of West New Annam, says; "For three years I suffered from catarrh and throat trouble. I tried many remedies but they were of no avail. I got no relief till I tried Catarrhozone. Too much cannot be said of so valuable a medicine. I shall always recommend Catarrhozone to anyone troubled with catarrh; it is a positive cure."

MR. W. W. BEACH, of Chapman, Ont., who suffered for years from systematic catarrh says; "Catarrhozone is the best remedy I have ever used for catarrh and I have used a lot of them. Catarrhozone was exactly suited to my case."

No intelligent person can doubt the merit of Catarrhozone which receives more praise from Medical Journals, doctors and the public than any other remedy; it is certain to cure every type of catarrh, lung and throat trouble. Two months' treatment, $1.00; sample size 25c. At druggists or by mail from N. C. Polson & Co., Hartford, Conn., U.S., and Kingston, Ont. Refuse a substitute for Catarrhozone.

The subject of the Boy's Meeting at the Y.M.C.A. this evening will be "A Boy's Religion," and will be dealt with by the physical director, Mr. Aplin. These meetings have proved a source of great interest to the boys, and much good, sound advice has been given.

Last Guild Social

Tomorrow evening a social will be held in St. John's Sunday School room, under the joint auspices of the Girls' Guild and the Young Men's Guild. An excellent programme is being prepared, and Halpany's orchestra will play. This is the last social of the year, and a large attendance is expected.

A Popular Railway Man

The many friends of Mr. J. A. Ellis, formerly a resident of Peterborough, and brother-in-law of Mr. Wm. Butler, town, will be pleased to learn that he has been promoted from the position of agent of the Chicago Great Western Railway at Marshalltown, Iowa, to a similar position at Des Moines, Iowa. Mr. Ellis is a rising young man, and will some day in the near future reach the top of the ladder.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGL
Principal.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—Kiltie weather will soon be here.

—Never judge a man's knowledge by the things he says.

—Mr. James Baptie and Miss Baptie were in from Springville yesterday.

—New novelty goods, selling from 10 cents up at Times' Bookstore. Just the thing for a birthday present.

—The "Rival" fountain pen has no equal. Guarantee with every pen, price only $1.00. Times Bookstore.

—April so far is inclined to be cool, but otherwise her behaviour is above criticism.

—A meeting of the Peterborough Golf Club will be held at the office of Dennistoun, Peck, Kerr and Stevenson this evening at 8 o'clock.

—A despatch to The Times yesterday contradicted the report that Mr. Thos. Eastwood's hotel at Buckhorn had been destroyed by fire.

—George street is still in a muddy condition and the use of the scraper again would greatly add to its appearance.

—The new dredge on the Trent Canal has been broken into several times this winter, and the local police are on the lookout for the offenders.

—Dr. N. H. Beemer, the well-known specialist in mental diseases, and Superintendent of Mimico Asylum, registered at the Oriental yesterday afternoon.

—Rev. Mr. McDougall will lecture about the North-West in the George street Sunday School room tomorrow evening.

—A lady informed The Times that she saw some wild pansies in full bloom while driving in the suburbs yesterday.

—No Cure! No Pay! Dr. H. D. Baker is in town introducing Scott's Arabian Paste, and is staying at the Queen's Hotel.

—Mr. James Baptie, while on his way to town from Springville, saw a flock of about 200 loons in the river near Kincaid's farm.

—Wm. Armstrong, who was arrested on a charge of fraud last week, will appear at this morning's police court. Mr. D. O'Connell will appear for the defence.

—A large number attended the special service at the George street church last evening. The pastor Rev. J. P. Wilson, had charge of the meeting.

—Large quantities of supplies for the north country drives are being sent on by various lumbering firms who are anxious to get the goods delivered at the starting points before the roads give out.

—A young lad appeared at yesterday's police court on the charge of stealing a pair of boots from the Douglas shoe store, George street. He pleaded guilty and, after giving him some good, sound advice, Magistrate Dumble allowed him to go on suspended sentence.

—The annual meeting of the shareholders of the Peterborough Hockey Club, Limited, will be held in the Council Chamber next Wednesday evening, commencing at 8 o'clock. The reports of directors will be submitted, and new directors appointed.

—Comfort to the sick, from bathing, is described in "Care of Invalids," issued by the Medical Department of The Mutual Life Insurance Company, of New York. This book is sent on request to those who address the Home Office of the Company, Nassau, Cedar, William and Liberty streets, New York city.

Heintzman & Co's piano tuner R. Shaw, is here from Toronto Pianos of all makes attended to by leaving an order at Ormond & Walsh's Drug Store Phone 146.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. W. S. Campbell, of Hamilton, is visiting her parents here.

—Miss Ethel Walton has returned from a visit to Toronto friends.

—Mr. W. B. Irwin, of this city, visited Lindsay on Monday of this week.

—A door key was picked up on George street yesterday evening and is now in the possession of the Chief of Police.

Mr. Thos. Darcy, of Burleigh Falls, is visiting Mrs. W. Cowie, of Simcoe street.

—Rev. W. L. Armitage, of Picton, is renewing acquaintances in this city.

—Capt. and Mrs. D. Hutcheson, of Port Huron, are visiting at the residence of Mrs. Lumsden.

—Miss Irene Noble, of Peterborough, is a guest at "Marlborough," Jarvis street.—Mail and Empire.

—Rev. Father Keilty was in town yesterday attending the funeral of the late W. A. Stratton, K.C.

—Mr. D. A. Gordon, President and Manager of the Wallaceburg Sugar Company is in the city.

The inquest on the death of the late Jas. Craig, which was to have been resumed at Lakefield yesterday afternoon, was postponed for a week, owing to Prof. Ellis' report not being completed.

A CLERGYMAN'S APPEAL.

The Rev. W. F. Brownlee, Ridgetown, Anglican minister, has written the following letter to the Muskoka Free Hospital for Consumptives:—

Dear Sir,—I fall in with a case to-day in my parish, a young woman very ill with consumption and I promised I would write you regarding her entrance into the hospital for consumptives in Muskoka. The case is one of great necessity and charity. The applicant is about 18 years of age. She is practically without a home, staying at present with a relative. She is bright and amiable, and would like to live. As I understand, you reject none on account of poverty. I commend the case to you as one most needy, and if you can send me instructions or papers for application to the hospital, I will see to raising necessary means for her transportation and have her sent at once, as I imagine she is not beyond receiving benefit.

[Note by Editor.—Sir Wm. R. Meredith, Kt., Vice-President of the National Sanitarium Association, or Mr. W. J. Gage, Chairman of the Executive Committee, Toronto, will gladly receive contributions for this and several other equally piteous cases calling for help.]

$500 REWARD FOR WOMEN

WHO CANNOT BE CURED.

So uniformly successful has Dr. Pierce's Favorite Prescription proved in all forms of Female Weakness, Prolapsus, or Falling of Womb, and Leucorrhea, that, after over a third of a century's experience in curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels fully warranted in offering to pay $500 in cash for any case of these diseases which he cannot cure.

IT STANDS ALONE.—The "Favorite Prescription" stands alone, as the one and only remedy for these distressingly common forms of weakness, possessed of such positively specific curative properties as to warrant its makers in proposing, and binding themselves to forfeit, as we, the undersigned proprietors of that wonderful remedy hereby do, to pay the sum of $500 in legal money of the United States in any case of the above diseases in which after a fair and reasonable trial of our treatment, we fail to cure. No other medicine for the cure of woman's peculiar ailments is backed by such a remarkable guarantee; no other medicine for woman's ills is possessed of the unparalleled curative properties that would warrant its manufacturers in making such an offer; no other remedy has such a record of cures on which to base such a remarkable offer.

Therefore, *insist* on having Dr. Pierce's Favorite Prescription and turn your back on any unscrupulous dealer who would insult your intelligence by attempting to foist upon you some inferior substitute, under the plea that "it is just as good." Insist on having the article which has a record of a third of a century of cures and which is backed by those willing to forfeit $500 if they cannot cure you.

In cases attended by a leucorrheal drain a solution of Dr. Pierce's Lotion Tablets should be used conjointly with the use of the "Favorite Prescription." They are sold by all druggists, or sent post-paid to any address, on receipt of 25 cents in stamps. Send 50 cents in stamps for Dr. Pierce's Common Sense Medical Adviser. Address WORLD'S DISPENSARY, Buffalo, N. Y.

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pellets cure biliousness.

What are the advantages of the LONDON LIFE?

Briefly stated the principal points are:—

Undoubted Financial Standing.

Assets $107.70 for every $100.00 Liabilities.

Reserve Basis
one half per cent. greater than Government statute calls for.

Accumulating Profits
reported to the Government as a LIABILITY instead of an asset.

Assets
reported to the Government at ledger or cost value, and never more than market value.

Contingent Fund
provided for unforseen liabilities.

Special Reserve Fund
accumulating to eventually put all old business on a one per cent. higher reserve basis than Government statute calls for.

Interest Earnings
for 1903, 5⅔ per cent. This is larger than any other company of similar age.

Profits Paid to Policyholders
better than most companies and equal to the best.

Expenses Moderate
The Company has an enviable record for economical management, as is evidenced by comparing the cost with any other company transacting Ordinary and Industrial business.

Its Premium Rates
compare favorably with the leading Canadian Companies and are lower in most cases than those charged by foreign Companies doing business in Canada.

Endowments at Life Rates.
The London Life is the first Canadian Company to offer Endowment insurance at premiums charged for life policies. (Write for booklet entitled "Endowment at Life Rate.")

What Then with all the above advantages the LONDON LIFE is certainly the RIGHT COMPANY TO INSURE IN

For all information apply to

THE COSTILLA GOLD MINING COMPANY

Has 10 Gold-bearing Veins Exposed
190 Acres in a Solid Block and All Patented
A Crosscut Driven 117 feet to the First Big Vein

A drift run on the vein 178 FEET IN ORE, the Gold value or contents running from 2 to 8 ounces, per ton, or from $40 to $160. This ore has not been stoped and will not be until the main shoot is reached.

The breast of the drift is, only 52 feet, according to engineer's survey, from the first BIG vertical ore shoot, which, at the surface, 550 feet above, shows values of 2 to 7 ounces gold, per ton.

Slabs and feeders of gold ore are coming in freely in the drift.

This is a business proposition. It is the KIND AND QUALITY which makes for great and permanent success. It is worth an investment of 10c. on the dollar, per share, now. It will be worth par with development.

VOL XXXII, NO. 82 PETERBOROUGH ONTARIO, FRIDAY APRIL 8 1904 PRICE TWO CENTS

THE JAPANESE FLEET IS DIVIDED INTO SEVEN OR EIGHT SQUADRONS

Four of These are Watching Port Arthur—Russian Ships in Pechili Gulf Sighted the Enemy.

Port Arthur, April 7—The Russian battleship Peresviet reports that she sighted the enemy today in Kwantung waters. All is quiet here.

Kwantung, is a peninsula in the extreme south of Manchuria, and a short distance north-west of Port Arthur.

SEVEN SQUADRONS.

London, April 7.—The Daily Telegraph's Seoul correspondent says he learns from a Japanese sailor who participated in the attacks on Port Arthur that the Japanese fleet is divided into seven squadrons. Four of these are watching Port Arthur, the fifth patrols the Corean coast, and the sixth and seventh cruise between Vladivostock and North Japan. Two torpedo boats were much damaged in the engagements, but otherwise the fleet was little injured. The damages to the Japanese cruisers Iwate and Yoshino have been repaired, and the vessels have joined the fleet.

PATROLLING PECHILI.

The Daily Telegraph's Wei-Hai-Wei correspondent, under date of April 6, says Russian warships are patrolling the Gulf of Pechili.

The Standard's Tientsin correspondent says that Paul Lessar, Russian Minister to China, has protested to the Chinese Government against the presence of Japanese instructors with the Chinese army, which he regards as a violation of neutrality.

NOT SURPRISED.

St. Petersburg, April 7 — Gen. Kouropatkin's announcement that the Japanese have reached Wiju, Corea, on the right bank of the Yalu River, creates no surprise in well-informed circles, where it is thoroughly understood that the Russians have no intention of making a stand in force east of the river.

The second and fifth horse batteries of the Artillery of the Guards, the former armed with quick-firing guns leave for the front next week.

Grand Duke Alexis, the High Admiral, today reviewed 690 naval recruits, who will proceed at once to the Far East.

London, April 6.—One might count on one's fingers the observers throughout the whole world, who have any really complete grasp of Japanese ideas and plans for the present war," said a War Office authority to a press correspondent this morning. "We see," he continued, "strategists and tacticians everywhere proffering counsel to the Japanese. We see academic statesmen putting their wisdom at the disposal of Tokio. Meantime hardly a day passes, despite the ban on news, that some item of information does not slip through, showing how much deeper and abler the Japanese are than their counsellors.

"This is naturally the case because the Japanese are at the heart of the situation and because intellectually they are without superiors. They are facing today just what they have been preparing to face ever since the Cossack appeared in the Far East. He had studied the problem in detail for years. They have studied it with the firm conviction that they must understand it or perish nationally.

"In the drama now being enacted in the west Pacific, the most striking feature is the way the Japanese are fortifying themselves in Corea. Their precautionary steps are magnificent. Russia boasts that she will drive them forever off the mainland. The Japanese reply by the most thoroughly military occupation of Corea possible to effect. They know they must hold place on the mainland or shrivel into insignificance. They are, therefore, using every device known to military science or political propaganda to make that place secure. In the first place they threw a line of works across the peninsula from Wonsan to Ping Yang. Before this almost impregnable line they can fall back should disaster overtake them in Manchuria or North Corea. Then they sent armies forward and are now occupied in fortifying every important strategic point in the vicinity of the Yalu. When this task is finished, and it ought to be finished very shortly, we shall witness the next step in this impressive unfolding of the mediaeval nations' intelligence and material power.

"With the centre of his army deeply and broadly based on Corea, the Mikado can use the wings with safety and effectively against the Russians, especially since Admiral Togo's fleet commands the sea. Thus the Japanese can fight for years and utterly frustrate Russia's plans for the mastery of East Asia.

Probably this is sound criticism from a military point of view; but it must be supposed that the Japanese are looking farther than the immediate military situation. They have gained lasting political advantage by the complete occupation of Corea and the reorganization of its government in sympathy with their own purposes. They may well think this worth more to them than a brilliant success at the beginning of the war. They may have confidence enough in their resources to believe that they can beat the Russians in Manchuria, after the ice goes out of the harbors where they mean to land and hold Corea at the same time.

Anyway the latter was the chief prize of war for Japan. The emancipation of Manchuria, and the protection of China are secondary. The far-seeing elder statesmen probably thought it wise to make sure of Corea first and take their chance of gaining other objects later.

A high army officer in Washington, speaking anonymously because of the president's order not to discuss the war, thinks that the Japanese have made a mistake by consuming time and exhausting their resources in the occupation of Korea. He thinks that this should have been postponed to the end of the war, and all the force of Japan concentrated for a quick and overwhelming attack on the Russians in the Liao Tung peninsula before they could bring up their forces.

He says that there was no danger of a Russian invasion of Corea. The ground is immensely difficult on both sides of the border. All the obstacles the Japanese are now encountering in their march northward would have obstructed a Russian march southward. Even if the Russians had made the attempt, which the army officer thinks improbable, the Japanese could have fallen on their flank from the sea as soon as they had reached an easier country and destroyed them.

Meanwhile far less exertion than that required to fill Corea with troops would have sufficed to occupy the Liao Tung peninsula on either side, seize the railroad, shut the Russians up in Port Arthur for a siege and drive the rest of their forces back into the interior. This would have been a more brilliant opening of the land war and would have given the Japanese the prestige they are seeking. The army officer quoted cannot see why the course was not adopted.

Seoul April 6.—It is reported that the Japanese have killed two Tonghaks (bandits) near Gensan. The Province of Chulla, in Southern Korea, where the Tonghaks precipitated the Chino-Japanese war, is being overrun by armed bands, and an official request has been made for troops to subdue them. A returning missionary reports that forty-five Tonghaks have been hanged at Kong Ju, capital of the Province of Chung Chung.

The British military attache has returned here from Pingyang.

A COLD WINTER

One of the Severest on Record For Many Years

The late winter, which still lingers though the vernal equinox and the date for the beginning of spring are past, has been the severest on record for many years. In the frozen north and the supposed sunny south it has been alike disagreeable, the boreal blade and snow, ice and sleet of the higher latitudes having been offset by droughts in some portions of the semi-tropical winter resorts, and chilling rains, humid mists and clouded skies in others.

The northern cities have had average temperatures lower than any in their past history, and Boston has had sixty-six inches of snowfall. The mean temperature of New York has been five and one-third degrees lower than in any winter for over thirty years. In their frantic efforts to keep warm the Gothamites have come near burning up their city, there having been nearly two thousand fires, the most of them caused by overheating.

In the cities along the Atlantic coast 5 or 6 degrees below zero means colder weather than 20 or 30 below in Ontario, because our atmosphere is dry and electric, theirs is weighed down by the chill humidity.

Canada and the northern borders of the New England States have suffered much. In some localities the thermometer has fallen from 30 to 35 below zero, and remained there for days. In other places it has fallen to 40 and over. Railroads have been so blocked by the snow as to render transportation and traffic impossible. One train in upper New York was buried for sixteen days under snow drifts twelve feet deep. On Rice lake and most of the northern lakes the ice has been from four to five feet thick.

The greatest hardships and discomforts of this unusual winter have fallen to small villages and remote country districts where the public highways have been so blocked by drifts as to be impassable. Sometimes farers have been unable to get to their wood lots, and have had to burn fruit and shade trees for fuel. Towns on the railroad lines have suffered greatly for want of coal, which could not be supplied on account of the snow blockades.

The weather, which polite society had come to taboo as a staple topic of conversation, has this past winter regained its olden vogue, but none have spoken in its praise. It has been the subject of general anathemas. Few persons adopt the cheerful philosophy of the Ettrick Shepherd, who was wont to declare that whatever weather pleased God would be sure to please him.

A Popular Singer

The Belleville Intelligencer contains the following:—

"Miss Hall of Peterborough, made her first appearance before a Belleville audience, and in the three numbers given by her made a very favorable impression. She sang 'The Spirit of Spring,' 'The Nightingale Song,' and 'He was a Prince,' and as a recall 'This and That.' Miss Hall has a pure, sweet voice, of splendid compass, while her manner is pleasing and free from affectation. Many expressed the hope that she may be heard again in the near future. Miss Vera Riggs and Miss Elliott played the accompaniments."

VETERAN'S LAND GRANT

Veterans Grants May Be Applied For Till July 1

The Department of Crown Lands will receive applications for veterans' land grants up to July 1, next. The extension of time which had expired on Dec. 31, is being made to enable a number of Canadians who are still serving in South Africa to put in their applications. These men had not known that they were entitled to a grant until too late to put in their claims. The Commissioner of Crown Lands will introduce a bill to make the time limit July 1, next.

NORTH MONAGHAN WEDDING.

Miss Clara Arnott Wedded to Mr. H. Jeffrey of Peterborough

The residence of Mrs. Wm. Arnott, North Monaghan, was the scene of a pretty wedding on Wednesday evening, when her youngest daughter, Miss Clara was united to Mr. Harry Jeffrey, son of Mr. S. Jeffrey, of Peterborough. The bride was charmingly attired in a beautiful gown of cream crepe de chene and carried a pretty bunch of white carnations. The bridesmaid was Miss Anita Simmons, of Frankford, and the groom was supported by the bride's brother, Mr. Albert Arnott. The pretty little maid of honor, Miss Eva Lawless, carried a basket of flowers.

The house was most beautifully decorated for the occasion, and the dainty wedding repast was served on an artistically arranged table. The presents were costly and a large number was received. At the conclusion of the wedding breakfast a most enjoyable time was spent in playing games, singing, etc.

Mr. and Mrs. Jeffrey will reside in this city, at 43 Patterson street.

A TRIBUTE TO MISS WEIR

Newly Appointed Member of Collegiate Institute Staff Honored at Port Hope

The following from the report of the Port Hope High School Board's recent meeting refers to Miss Weir, who has taken a position on the Peterborough Collegiate Institute staff;

"In view of Miss Weir's appointment to the staff of the Peterborough Collegiate Institute, it was

Moved by Dr. Clemesha, seconded by Mr. Powers, That the Board place on record their appreciation of the valuable services rendered by Miss Weir during the past seven years as Modern Language teacher in the Port Hope High School, realizing, as they do, that the success of the school during this period was, to no inconsiderable extent, due to her excellent teaching power, to her firm yet kindly discipline, which left her, (apparently without effort) complete mistress of her class, and in sympathetic relations with them; and to the enthusiasm which she exhibited and inspired in the school work.

"The Board regrets that the promotion so fairly earned could not, for financial reasons, have been granted here, but they congratulate Miss Weir on the recognition of her merits as a teacher, involved in her appointment to the staff of the Peterborough Collegiate Institute, and express the hope that the future may afford even more of success than the past."

GLOWING TRIBUTE TO CITY OF PETERBOROUGH

"SCOTTISH CURLERS IN CANADA AND UNITED STATES" JUST BEEN ISSUED

Two Copies Received in the City Wednesday Evening—Reception Here "Cowed a'"

Two copies of "Curling in Canada and the United States," by Rev. John Kerr, arrived in town Wednesday evening, one of which is in the possession of Mr. M. C. Tooley, of the Queen's Hotel, and the other has been received by Mr. Arthur Blade. These copies were kindly sent by Mr. Mark Sanderson, of the Robert Sanderson Co., Glasgow, Scotland. The following is an interesting section which specially refers to Peterborough;

"Leaving Ottawa we came to Peterborough, a new town of 10,000 inhabitants, planned and laid out a hundred years ago by far-seeing men who recognized the importance of the situation. Among the amusing things at the smoker at Ottawa was the information that we were then leaving the last confines of civilization, and had better provide ourselves with tomahawks and scalping knives. But if a hundred years ago the site of Peterborough was primeval forest, and its denizens Red Indians and savages, the appearance of the place on our arrival was a witness to the fact that all that was now changed, and that here as elsewhere the fairy wand of Scotland had had much to do with the transformation. Notwithstanding the numerous ovations which had greeted the team on their eventful journey, the reception at Peterborough fairly "cowed a." As the C.P.R. train pulled into the station, the Scotsmen were met by the civic officials, an inner circle of local enthusiasts, and an outer circle comprising everybody else. Headed by the 57th Regiment Band, the curlers of the city had marched to the station, accompanied by their brother curlers from the surrounding districts, Orillia, Cobourg, Norwood, Keene, Port Hope, Uxbridge and Lakefield, who were engaged in a curling tournament at Peterborough, but had abandoned the rink for the nonce to extend their "Cead mille failthe" to the sons of Scotia, and a right royal welcome they gave us. No doubt a few of the 10,000 inhabitants of Peterborough stayed at home that morning, but it did not look like it, for it seemed as if the whole population had turned out to meet the Scotsmen. Everywhere the feeling seemed to be that the visitors were welcome, and that the citizens of Peterborough were determined to let them know it. A procession was formed, headed by the band, followed by a large array of curlers with brooms up. Then came the conveyances, in which the Scottish curlers, civic officials and prominent citizens were seated, these being followed by several hundreds more of the knights of the broom and the public in general. It was like a Lord Mayor's procession, the streets being lined on both sides with spectators who every now and then burst into cheers, even the dogs barking their welcome and bounding about as if in the greatest delight. It was certainly a reception that for its heartiness surpassed anything on the tour, and can never be forgotten by the members of the team. At Snowden's, which was the location of the team during their stay at Peterborough, luncheon was served under the presidency of Colonel E. B. Edwards, K.C., to whom the credit of the complete arrangements for the visit of the team to the Ontario province was due. The dining hall was beautifully decorated with Scottish flags, bunting, mottoes, etc., this being the work of Messrs. J. J. Turner & Sons, who were evidently adepts at artistic decoration. The various rinks on which the curlers played when at Peterborough were also beautifully decorated, and into the ice, which was here pebbled, fantastic figures in color were worked, especially around the tee. In his remarks at the luncheon, Colonel Edwards said that recent history had made Canada a more prominent part of the Empire than ever it was before, and he was sure the visitors would return with a greater idea of the importance of this country, of the blessings, the jollity, and the benefits of its winter climate, than they could have obtained in any other way. The Captain in reply delivered a message of greeting from the auld Mither Club, the Royal Caledonian, and said the visit of the team was made with the impression that they could give points to the Canadians in curling. As an evidence of the advanced civilization of Peterborough the menu at the luncheon in Snowden's had for preface, and was a greeting for the Scotsmen, a stirring song by John Usher.

After the luncheon an adjournment was made to the rink where several matches were played. In the evening the usual supper and smoking concert was held in the Oddfellows' Hall, where His Worship Mayor Roger, presided, and in the name of the city extended a hearty welcome to the visiting curlers, hoping they would enjoy themselves and carry away pleasant memories of Peterborough and Canada.

On Wednesday morning, January 21, the curlers embarked in open sleighs, drawn by black caparisoned horses, and, accompanied by the Mayor, aldermen and prominent citizens, were driven about the town, the perfect weather, with hard frost and unclouded sunshine, giving them a favorable idea of the Canadian climate. They visited various "Lions" such as the Electric Works, the Cereal Works, and hydraulic Lift Lock. In the afternoon they engaged no fewer than five of the best clubs in Ontario, two of which were represented by a special rink, and three by two rinks. The result was deemed a great feather in the Scots' cap, for they were victorious over four of these clubs, with a majority of 25 shots. The only club which escaped in this big battle, and that by the skin of its teeth, was Norwood, with one up. The defeated clubs were Campbellford, Keene, Uxbridge and Lakefield.

The book contains excellent illustrations of the Hydraulic Lift Lock the interior and exterior of the Charlotte street rink and of the pond in Jackson Park. Pictures of Messrs. Dr. Boucher, W. Ferguson, T. F. Matthews, S. D. Hall, D. Davidson, D. W. Dumble, J. Jeffries, G. Matthews and G. E. Whiten, are also inserted in the description of Peterborough.

KEENE.

—Miss M. Harrison, a student at Annesly Hall, Toronto, spent the Easter vacation with her parents.

—Mr. Ed. Might, of Peterborough, spent Good Friday in the village.

—Marshall Wear, of Gooderham, visited friends for a few days this week.

—Miss Gertie Roach spent Easter with friends in Campbellford.

—Mrs. M. Barnett was the guest of her mother, Mrs. Roach, for a few days this week.

—Mr. R. English visited friends in Port Hope on Sunday.

—Miss Gertie Clancy was the guest of her friend, Miss McCann, during the holidays.

—Miss Agnes Campbell, of Orillia, is visiting friends here at present. Miss Campbell is a sister of the late Alex. Campbell, and spent most of her early life here.

—Mrs. Dobbin, of Monaghan, is visiting her parents, Mr. and Mrs. Elmhirst at present.

—The annual skaters' dance on Monday evening was one of the most enjoyable events of the season. McFarlane and Miller furnished the music, and Mr. D. Kenneally was floor manager.

—We are sorry to report the serious illness of Miss Wilson. The young lady has been ill some time with consumption, and no hopes are entertained for her recovery.

—The roads in this vicinity are drying up rapidly, and will soon be fine for wheeling.

—Mrs. M. Galvin, of Toronto, is visiting her father, Mr. C. Bell, this week.

—Mr. D. Eason, C.E., of Peterborough, was in the village on Monday.

—Miss M. Campbell was the guest of Peterborough friends on Easter Sunday.

—On Thursday afternoon, March 31st, before the school closed for the the Easter holidays, the pupils presented Mr. Wallace, who is leaving for Peterborough, with an address and handsome mantel clock. Mr. Wallace, who was taken by surprise, heartily thanked the pupils for the address, and said the beautiful clock would always remind him of Keene, and the pleasant time spent in Keene Public school.

—Comfort to the sick, from bathing, is described in "Care of Invalids," issued by the Medical Department of The Mutual Life Insurance Company, of New York. This book is sent on request to those who address the Home Office of the Company, Nassau, Cedar, William and Liberty streets, New York city.

ADVERTISE IN THE TIMES

NATION TEA AND BAZAAR

Successful Entertainment at Charlotte St. Church Last Night

Charlotte street school room was crowded to the doors last evening, when the long talked of Nation Tea and Bazaar was held. The interior was beautifully decorated with flowers, flags and bunting, and fancy booths had been arranged at different points around the room. The waiters were appropriately dressed to represent different countries, such as Japan, England, Ireland, Scotland and China.

The booths were well stocked with good things and pleasant smiles of the fair ones behind the counters were evidences of a good business being done. The following interesting programme was rendered;—

Piano Solo	Miss Gumpricht
Solo	Mrs. C. B. McAllister
Selection	Church Quartette
Solo	Miss L. Moore
Solo	Mr. R. N. Jolliffe
Solo	Miss C. Kendry
Solo	Mr. Breininger
Duet	Miss Belleghem and R. N. Jolliffe

Rev. Mr. Jolliffe was a most efficient chairman.

Just before the commencement of the programme, great excitement prevailed for a few minutes, owing to the decorations around one of the chandeliers in the centre of the room being set on fire by coming in contact with a lighted candle. The audience was soon quieted, however, and no serious damage was done. Several articles on a table beneath the blaze were destroyed or spoiled.

INDUCTION SERVICES

At All Saint's Church Last Night — Interesting Ceremony

A most interesting event took place at All Saint's Church last evening, when Rev. William Major was formally inducted as Rector. The charge was delivered by Ven. Archdeacon Allen and Rev. S. C. Noxon, of Tullamore, Ont., preached.

The usual form of service which is used at the introduction of ministers to their cures, was carried out, and Rev. Mr. James, of Hastings, read the first lesson from Ezekiel, 33; 1 to 9. The second lesson was read by Rev. W. L. Armitage, of Picton, and was selected from St. Luke's Gospel, Chap. 10; 1 to 16. A special offertory, to be applied to the purchase of a new heating apparatus for the church was taken up, and a liberal response was met with.

The sermon was preached by Rev. S. Clowes Noxon, of Tullamore, Ont., who chose his text from Jeremiah 23; 4, and delivered an able address, dwelling on the relationship that should exist between the Shepherd and his flock, between the pastor and his people. This text lends itself readily to the present occasion, the speaker remarked, as they were concerned tonight with a shepherd and his sheep. A shepherd was being set up over his flock.

God often compares his care over Israel to that of a shepherd over his flock, and these words contained in the text cannot fail but be apprehended because of their clearness. Some claim that God speaks of civil rules here, and others that he speaks of spiritual authorities. God sets up shepherds over his sheep. He calls a man to preach and He calls a pastor to perform his duties. God's calling was not considered, simply the fact of the calling. Hearing God's voice and understanding it is the principal note in a preacher's success, and it is just as true that God calls a man to preach in a certain place, as it is that he calls him to the ministry. There is great need of prayer for the chief shepherd of our diocese. The Lord Bishop is the means by which the seal is set on a called pastor. The pastor must feed his flock, he must look after their spiritual sustenance, and he must administer spiritual food. Before he can do this he must taste of the food himself. The Bible is his storehouse, his means of obtaining his food. A man may be very learned, a B.A., but if he is not born with the spirit he will obtain nothing but the husks; if, however, he is a B.A., and has been born in the spirit he will get the kernel. The man who is called to preach must be a man of the spirit, and must ever exercise a watchfulness over his flock. He should gather his scattered flock together and should know his flock personally. The pastor is not the most important individual in the church. The people must also be considered. The sheep must be willing to be fed, and willing to be watched over. Israel was an instance of a flock's unwillingness to be fed, and they endured much trouble. The pastor today would be a failure if people would not accept his teachings as truth. Some of the morsels of food are distasteful to the people. They want to know about the church, not so much about the Head of the church. To speak of Jesus in an endearing way would choke some professing Christians, and yet they do not hesitate to say "My dear dog Jack," in speaking of a domestic animal. Prayer is another kind of food, earnest, continued, prevailing prayer. The pastor who urges this is not liked, but all these things are necessary if the pastor nourishes his flock properly. Then again the flock must be dependable. The pastor must lead and must depend upon his flock. This characteristic is apparently lacking in many Christians. A good shepherd can do great things under God's direction, if he has dependable sheep.

At the conclusion of the service a reception was held in the basement of the church, when an address was presented by the congregation to the newly inducted rector, and a beautiful bouquet of carnations was handed to Mrs. Major. Refreshments were served by the ladies of the church.

Central Ontario Medical Association Meets

A meeting of the Central Ontario Medical Association was held in the Y.M.C.A. parlors last evening, and the following physicians were present; Drs. Greer, Boucher, Caldwell, Morgan, Eastwood, McNulty, Carmichael. Several interesting papers were read, and some experiments were performed. The discussions were purely of a technical nature.

EVERYBODY READS THE TIMES

JAPS STEAMERS NAVIGATE THE YALU, ARMY LANDING NEAR RIVER

Vessels and Supplies on Korean Side Despite Russian Forts, Forty Transports Seen With Second Army Abroad

Tokio, April 7 2p.m.—A despatch from Seoul, Korea, says that the Japanese supply steamers are safely entering the estuary of the Yalu River, and are landing their cargoes at various points on the Corean shore. It is presumed here that the movement of these supply steamers is covered by Japanese gunboats. If this is true, the Russian forts erected upon the Chinese side of the Yalu River are evidently not effective.

According to reliable Corean reports, the American mines at Unsan, and the English mines at Gwendolen, are safely guarded by detachments of Japanese troops.

SAW FORTY TRANSPORTS.

An American missionary, who has just returned to Seoul from Northern Corea, reports having seen a fleet of forty transports, some of which were very large, off Haiju, 50 miles north of Chemulpo. It is supposed that the transports are carrying a part of the Japanese army, the first three divisions of which are said to be destined to land at Yonghampho.

CHOSEN FRIENDS CONCERT'

In S. O. E. Hall Last Night—An Excellent Program Rendered

The concert held by the Canadian Order of Chosen Friends in the S. O.E. Hall last evening was very successful, as far as the entertainment was concerned, but owing to counter-attractions, the attendance was not large. Mr. Robert McGill occupied the chair, and the first number on the programme was a recitation by Miss Smith, which was well received. Mr. Carnegie, the popular entertainer, next introduced some miscellaneous views, which were of a high order. After Miss Smith had given another recitation, Mr. R. E. Harding briefly outlined the objects of the Society.

The main part of the entertainment, was then introduced, being a pictorial reproduction of the book "In His Steps." The stereoptican views were excellent and were fully explained by Mr. Carnegie. At the conclusion of the entertainment Mr. John Miller sang "The Holy City," which was illustrated by views, after which the entertainment closed with the singing of the National Anthem.

ATHLETIC WORLD

BY OUR SPORTING EDITOR

The following interesting item on Canada's national game is taken from the American College Lacrosse Journal;

"When the United States and Canada are united, lacrosse may well claim to be the national game of the union, for long before the earliest white pioneers and voyageurs in North America, the game baggataway, which afterwards became lacrosse, was played by the Indian tribes in widely scattered parts of the northern continent of America. The origin of the game is lost in the past, but when we consider that at the time of the earliest authentic reports the game was played by tribes as far south as Alabama, and as far north as Canada, and as far west as Dakota and the Rocky Mountains, we realize it must have been in existence a long time to have spread over so vast an area.

"Among the Indian tribes the game was a preparation for the war path as well as a sport, and matches often lasted from sunrise to sunset, and sometimes two or three days. The goals were any marked trees or rocks which happened to be at the ends of the field. Sometimes the single pole and sometimes the two pole goal was used, and the field was from half a mile to three miles long. The goal posts varied in size, but some were as at present, six feet long and six feet apart. At times 800 or 1,000 players took part in the game at once, and the object of each of the contending parties was to strike or pass the goal of its opponent, and at the same time defend its own goal. A match was won by the side scoring an agreed number of goals first. Some of the tribes used two sticks, and some one. These sticks or crosses were about three feet long, bent at the end into an oblong or round loop, which was strung loosely with rawhide. The ball was about the size of a tennis ball, and was made of deerskin or rawhide, stuffed with hair and sewed with sinews. Some of the tribes required the goal post to be struck with the ball, others that the ball be thrown or carried between the goal posts below a line stretched across their tops. It may seem that a game such as this, played by one tribe against another, might be a rude sport, differing greatly from the gentle pastime of today.

Modern lacrosse as played by white men, while tamer than the Indian game, is still lively enough to satisfy the most ambitious athlete. The length of the field has been reduced to 125 yards, and the number of players to twelve, while the sticks or crosses have been lengthened so that when stood upright they will barely go under the arm of the player when the arm is extended from the body parallel with the ground. The part in which the ball is caught is usually about thirty inches in length and ten inches in width, and is strung loosely with rawhide or clockcord. With the elimination of old methods of play the white man has introduced team play and science into the game."

BASKETBALL.

The Beavers and Junior Arrows will play in the Y.M.C.A. gymnasium on Monday evening at 8.30 o'clock. The Arrows' line-up will be as follows;—W. Miller, and J. Ross, forwards; H. Staunton, centre; N. Darling and D. Loomis, backs; T. E. Arnott, spare man.

GOLF.

A meeting of the Peterborough Golf Club was held last evening in the offices of Dennistoun, Peck, Kerr and Stevenson, for the purpose of arranging for the summer sport. The meeting was well attended and it was decided to sink a well on the property. Other improvements were decided on and the links will be opened shortly. Mr. Neil, the President, presided.

WEATHER NOTES

"A ARK! ME KINGDOM FOR A ARK!"

Friday,—Showery.

TO THE AFFLICTED

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, sleeplessness, confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

A SAD CASE.

The following letter, addressed to the Secretary of the National Sanitarium Association, Toronto, from the Rectory, Norwood, Ont., and signed by Rev. J. McKee McLennan, a well-known Anglican minister of the province, needs no comment of ours. It reads: "I desire to secure the admission into the Free Hospital for Consumptives at Gravenhurst of a young woman, a member of my parish. The case is a very sad one, and if help can at once be given, a promising life can be saved. Three years ago the mother died of consumption. Since that time it has been my painful duty to bury two of the sons with the same disease. Now Annie, aged about seventeen, and a boy of fourteen, are all that remain of the family. The poor girl has been in Muskoka, boarding at a private house, waiting to be admitted. She returned home last week, and within twenty-four hours of her return her father dropped dead in his buggy while driving into Norwood. The case is surely one that must appeal to the sympathies of everyone, and yet, I fear, only one of the many that are constantly coming under your notice."

[Note.—Readers—and may their number be many—who desire to assist in this worthy work may send their gifts to Sir Wm. R. Meredith, Kt., Vice-President, National Sanitarium Association, Toronto, or Mr. W. J. Gage, Chairman of the Executive Committee, Toronto.]

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, APRIL 8 1904

HAS JAPAN MADE A MISTAKE?

A high army officer in Washington, speaking anonymously because of the president's order not to discuss the war, thinks that the Japanese have made a mistake by consuming time and exhausting their resources in the occupation of Korea. He thinks that this should have been postponed to the end of the war, and all the force of Japan concentrated for a quick and overwhelming attack on the Russians in the Liao Tung peninsula before they could bring up their forces.

He says that there was no danger of a Russian invasion of Corea. The ground is immensely difficult on both sides of the border. All the obstacles the Japanese are now encountering in their march northward would have obstructed a Russian march southward. Even if the Russians had made the attempt, which the army officer thinks improbable, the Japanese could have fallen on their flank from the sea as soon as they had reached an easier country and destroyed them.

Meanwhile far less exertion than that required to fill Corea with troops would have sufficed to occupy the Liao Tung peninsula on either side, seize the railroad, shut the Russians up in Port Arthur for a siege and drive the rest of their forces back into the interior. This would have been a more brilliant opening of the land war and would have given the Japanese the prestige they are seeking. The army officer quoted cannot see why the course was not adopted.

Probably this is sound criticism from a military point of view; but it must be supposed that the Japanese are looking farther than the immediate military situation. They have gained lasting political advantage by the complete occupation of Corea and the reorganization of its government in sympathy with their own purposes. They may well think this worth more to them than a brilliant success at the beginning of the war. They may have confidence enough in their resources to believe that they can beat the Russians in Manchuria, after the ice goes out at the harbors where they mean to land and hold Corea at the same time.

Anyway the latter was the chief prize of war for Japan. The annexation of Manchuria, and the protection of China are secondary. The far-seeing elder statesmen probably thought it wise to make sure of Corea first and take their chance of gaining other objects later.

A TERRIBLE WINTER

The late winter, which still lingers though the vernal equinox and the date for the beginning of spring are past, has been the severest on record for many years. In the frozen north and the supposed sunny south it has been alike disagreeable, the boreal blade and snow, ice and sleet of the higher latitudes having been offset by droughts in some portions of the semi-tropical winter resorts, and chilling rains, humid mists and clouded skies in others.

The northern cities have had average temperatures lower than any in their past history, and Boston has had sixty-six inches of snowfall. The mean temperature of New York has been five and one-third degrees lower than in any winter for over thirty years. In their frantic efforts to keep warm the Gothamites have come near burning up their city, there having been nearly two thousand fires, the most of them caused by overheating.

In the cities along the Atlantic coast 5 or 8 degrees below zero means colder weather than 20 or 30 below in Ontario, because our atmosphere is dry and electric, theirs is weighed down by the chill humidity.

Canada and the northern borders of the New England States have suffered much. In some localities the thermometer has fallen from 30 to 35 below zero, and remained there for days. In other places it has fallen to 40 and over. Railroads have been so blocked by the snow as to render transportation and traffic impossible. One train in upper New York was buried for sixteen days under snow drifts twelve feet deep. On Rice lake and most of the northern lakes the ice has been from four to five feet thick.

The greatest hardships and discomforts of this unusual winter have fallen to small villages and remote country districts where the public highways have been so blocked by drifts as to be impassable. Sometimes farers have been unable to get to their wood lots, and have had to burn fruit and shade trees for fuel. Towns on the railroad lines have suffered greatly for want of coal, which could not be supplied on account of the snow blockades.

The weather, which polite society had come to taboo as a staple topic of conversation, has this past winter regained its olden vogue, but none have spoken in its praise. It has been the subject of general anathemas. Few persons adopt the cheerful philosophy of the Ettrick Shepherd, who was wont to declare that whatever weather pleased God would be sure to please him.

Nature Sounds A Warning Call

To Everyone in poor health, Now is the Time to get Strong, Build Up and Increase Your Weight, Use Ferrozone, the Great Food Tonic.

Most of us make the mistake of neglecting the first message that comes from our tired body demanding more strength and less nervous strain.

When any organ of the body becomes loose, when the brain wearies and the nerves rebel against work, it's time to take Ferrozone and build up. The purpose of Ferrozone is to stimulate appetite, improve digestion, convert food into nourishment and supply the kind of blood and building material that fortifies the nervous system and strengthens the whole body.

Ferrozone is not an unnatural stimulant, but a food medicine combining the most strengthening elements known to science. Unlike sickly cod liver oil mixtures and bitters, Ferrozone is prepared in tablet form, convenient to take and always of uniform strength. Its health-giving properties are at once felt, and it is sure to help you quickly. Striking proof of its merits is found in the letter of Mr. N. W. Burke, a well-known lawyer in Meriden, who says: "When I first took Ferrozone I was in a nervous, run-down condition. Almost sick enough to give up work. I lacked strength and felt as if I could not get down to work. Ferrozone at once gave me a good appetite and drove away the nervous apprehensive feelings that formerly made my life miserable. As I continued the use of Ferrozone I grew stronger and am glad to say it has brought me back to perfect health. I know that Ferrozone is an excellent tonic for business men, and people inclined to a sedentary life. I can recommend it to such."

Ferrozone is endorsed by prominent people in every walk of life, because it never fails to bring the good health that sick folks are looking for.

You must be sure to get Ferrozone and flatly refuse any substitute. Price 50c per box, or six boxes for $2.50, all druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

OREGON GOLD FIELDS

Splendid Opportunity for the Canadian Investor Offered

A golden empire of 120 miles square, this new camp produced $[illegible]000,000 of the precious metal in 1903. The richness of the ore in many of the mines run from $10,000 to $200,000 a ton. More than one great mine in this wonderland has been paid for by pulverizing the rock in an old-fashioned mortar, and washing out the gold in a pan. Human genius cannot magnify or gild such facts. Hundreds, if not thousands, of mines are yet to be opened in it; hundreds of great fortunes are yet to be made in this golden empire. Among the noted claims in this veritable treasury box are those owned by the St. Louis Gold Mining Co., located in Deer Creek district, five miles east of the North Pole and Golconda Mines. They own eight full claims, free and clear, with a 500 foot tunnel in ore the whole distance of a free milling and cyaniding character, with a vein of 28 feet and two parallel veins on the property, opened by a 100 foot tunnel. This Company has the largest tonnage of ore blocked out of any in the camp. The management desires to secure ore before a mill. This sort of mining is only followed up by competent, experienced mining men.

Railroad, sawmill and sumpter within six miles of the property. Plenty of timber and an ideal tunnel of 1500 feet can be gained. The ores are strictly cyaniding and tests made by the best professionals show a saving of 95 per cent. of the values at the nominal cost of $1.20 per ton, including mining.

All over this gold strewn county or wonderland new discoveries of riches follow each other like cards from a practiced dealers hand, but all this takes time and money to open up. This article, my dear reader, should teach you to invest into a developed mine, a property of merit and the stock at prospect prices.

Brittle Rubber; Elastic Lead.

While liquid air has not proven itself the wonderful power which it was claimed to be at the start, it has found other fields in which its usefulness cannot be questioned, and, instead of driving machinery, it has come to be used in the treatment of certain diseases. It is still the subject of a great deal of experiment in the laboratory, and has recently been used in conjunction with that new wonder, radium, serving to prove new theories in regard to the latter. The lay mind will, however, probably be more interested in the action of liquid air on two substances much more common than radium, namely, lead and rubber. When the latter is immersed in liquid air it loses its elasticity and becomes brittle, and if dropped to the floor breaks like glass. Drop a ball of lead into the liquid air and it acquires all the elasticity which the rubber has lost, and will bound on the floor like the rubber in its normal state.—Science.

Not So Much of a Crime.

High Class Investment
THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gengon, Black Jack, Star and Red Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockefeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and e route, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 30, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

FORTY-FIVE TONGHAKS HAVE BEEN PUT TO DEATH

Japs Have to Suppress the Korean Bandits Who are Causing Trouble

Seoul April 6.—It is reported that the Japanese have killed two Tonghaks (bandits) near Gensan. The Province of Chulla, in Southern Korea, where the Tonghaks precipitated the Chino-Japanese war, is being overrun by armed bands, and an official request has been made for troops to subdue them. A returning missionary reports that forty-five Tonghaks have been hanged at Kong Ju, capital of the Province of Chung Chung.

The British military attache has returned here from Pingyang.

A RICH MINERAL DISTRICT

Monarch Consolidated Gold and Copper Mining and Smelting Co's Bright

One of the richest mineral estates in the United States is that of the Monarch Consolidated Gold and Copper Mining and Smelting Company, and is known as the Copper King property, which is located in and surrounds the drainage basin of that tumultuous tributary of the South Grand, the Roaring Fork, in the Harman Mining District, of Grand County, Colorado. Here at the head waters of this stream, and well up in the lofty mountains lying between Grand Lake and Mt. Audubon, is a vein of copper sulphide ore wonderful in size and excellent in quality; and as an evidence of its persistence and continuity it may be stated that six claims end to end are located upon it From the vicinity of these six claims several branches of the Roaring Fork take their way, and soon uniting, erly direction to confluence with the South Grand, at a point four miles distant from the mines. This intervening distance is covered by holdings of the company in the form of placer claims, mill sites and homestead entry, in area 1640 acres, controlling waterpower, timber and milling privileges of high order, all of which are to become conducive to the successful and economical development of the mines.

The New Denver, Northwestern and Pacific Railroad, building from Denver to Salt Lake City, is now working large forces of men along the portion of their route nearest the company's property, and will be in a position to operate trains by next summer. This will be in time to meet the requirements of the property, which will be in readiness to begin shipments of ore to Denver smelters, pending the installation of a treatment plant on the ground. In total to date the Copper King property comprises an area of 1720 acres of mineral land, covered to a very valuable extent with excellent timber. There is every likelihood that a thorough exploration and development of this property will reveal other valuable ore deposits. Already rich deposits of gold and copper have been discovered, and the fragments taken from other veins possess the same excellent values, and the geologic formation has been recognized by experts as being favorable to the deposition of large ore bodies.

The natural resources of this promising property are of the best. The water-power of the Roaring Fork is bound to contribute largely to the success of this enterprise, as it possesses a sufficient volume of water to create 500 horse power in one portion of its descent where it falls 600 feet in a distance of 1500 feet. This water-power is one of the most desirable, and probably the best in the entire region, and is a very valuable acquisition to the property, as operating expenses may be cut squarely in two by means of it, thereby throwing a heavier balance on the side of profit. There are five quarter sections of this acreage, upon which is growing some of the largest and finest pine and spruce timber to be found in Colorado, so that a considerable revenue will be derived from the conversion of this timber into lumber.

A copper sulphide vein, 30 feet in width, has been opened at different points, and possesses every indication of permanence. Near the upper end of the Copper King claim a shaft has been sunk to a depth of 25 feet, and bottom, ends and sides, were all found to be ore of 20 and 30 per cent. quality, and at several points on the surface samples running 50 and 60 per cent. have been broken off. A tunnel will be run from the lower end of this claim to a point beneath the shaft, and the latter will be continued until a connection is made. This will open a vast body of stoping ground for economical mining, the while perfect ventilation is secured. This will also facilitate deeper workings, the immediate delivery of ore at the mill, and there will, of course, be a probability of encountering other large ore bodies on the way. There will be no serious obstacles to overcome in the construction of a wire tramway for transportation of ore to the mill, as less than four miles would have to be covered, and this could be accomplished at a cost of about $20,000. When the mill or smelter has begun a steady run the initial expense for this tram will rapidly be repaired.

Considering the above description it may be readily seen that the prospects of this progressive corporation are most brilliant, and intending investors should carefully consider the many advantages possessed by the Monarch Company. For further particulars application should be made to the Peterborough Brokerage Co., the local fiscal agents of this promising concern, those desirous of taking advantage of this promising concern.

WAR OFFICE HAS FAITH IN JAPAN

Britain Believes That Russia will Lose in War

WILL HOLD COREA FIRM

And Russia will Not be Able to Drive Japanese Out

London, April 6.—One might count on one's fingers the observers throughout the whole world, who have any really complete grasp of Japanese ideas and plans for the present war," said a War Office authority to a press correspondent this morning. "We see," he continued, "strategists and tacticians everywhere proffering counsel to the Japanese. We see academic statesmen putting their wisdom at the disposal of Tokio. Meantime hardly a day passes, despite the ban on news, that some item of information does not slip through, showing how much deeper and abler the Japanese are than their counsellors.

"This is naturally the case because the Japanese are at the heart of the situation and because intellectually they are without superiors. They are facing today just what they have been preparing to face ever since the Cossack appeared in the Far East. He had studied the problem in detail for years. They have studied it with the firm conviction that they must understand it or perish nationally.

"In the drama now being enacted in the west Pacific, the most striking feature is the way the Japanese are fortifying themselves in Corea. Their precautionary steps are magnificent. Russia boasts that she will drive them forever off the mainland. The Japanese reply by the most thoroughly military occupation of Corea possible to effect. They know they must hold place on the mainland or shrivel into insignificance. They are, therefore, using every device known to military science or political propaganda to make that place secure. In the first place they threw a line of works across the peninsula from Wonsan to Ping Yang. Before this almost impregnable line they can fall back should disaster overtake them in Manchuria or North Corea. Then they sent armies forward and are now occupied in fortifying every important strategic point in the vicinity of the Yalu. When this task is finished, and it ought to be finished very shortly, we shall witness the next step in this impressive unfolding of the menaced nations' intelligence and material power.

"With the centre of his army deeply and broadly based on Corea, the Mikado can use the wings with safety and effectively against the Russians, especially since Admiral Togo's fleet commands the sea. Thus the Japanese can fight for years and utterly frustrate Russia's plans for the mastery of East Asia.

—Comfort to the sick, from bathing, is described in "Care of Invalids," issued by the Medical Department of The Mutual Life Insurance Company, of New York. This book is sent on request to those who address the Home Office of the Company, Nassau, Cedar, William and Liberty streets, New York city.

The Elwood Tinworker's Gold Mining Company.
ORGANIZED JULY 1902

CAPITAL TOCK $150,000
PAR VALUE OF SHARES $1.00

The mining claims of this company consist of two full claims namely

THE WESTERN STAR AND ST. KITT

situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Elwood Tinworkers' Gold Mining Co.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of $200,000 with shares at $1 each.

The officers of the Company are C. F. Bumann, President and Treasurer; George W. Butler Secretary, and C. Burrows, home officer in South Dakota as required by law. Of the $200,000 capitalization, in shares of $1 each, $110,000 worth is issued, the first on all allotment of this was sold at 50c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a paying basis and the output is increasing from day to day. We have 281 acres underlaid with three distinct veins, or layers of coal which are 4½ feet thick each. The first one at a depth of 280 feet, it is this vein which we are now mining, the second one is at a depth of 380 feet and the third at 460 feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft's total depth 561 feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than 250 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than 60c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the shaft to the surrounding farmers and towns people and, therefore, we have no freight or cartage to pay. We receive from $2.25 to $2.50 for Mine Run and $2.75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, of net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 10 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $600 each. we predict that this stock will be worth not less than $2 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
GENERAL OFFICES:
169 Washington St, Chicago, Ills.
C. F. Bumann, President.

Special Information to Investors

THE ST. LOUIS GOLD MINING COMPANY

owns extensive gold properties in one of the

RICHEST ORE DISTRICTS OF EASTERN OREGON

It's a great property, a safe investment and a gigantic speculation. All experts and practical mining men who are familiar with this property agree that it has a brilliant future.

Cyinide and free gold ore mine and mill for $1 20 a ton. Development 500 foot tunnel in on the whole distance. Vein 40 feet wide, 1,500 feet of depth can be obtained by this tunnel. 300,000 tons blocked out now. Values from $3.00 to $27.00 per ton. 95 per cent. can be saved by cyiniding process.

—THE—
Greatest Offer Ever Made to Readers

We will give you the Morning Times for four months for $1, (or the Weekly Times one year for same amount) and give you a certificate absolutely free, which will entitle you to chances in cash prizes amounting to

$75,000.00

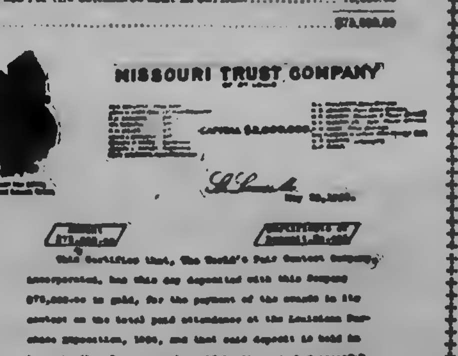
This amount is now deposited with one of the strongest banks in the United States, held by them for no other purpose than to be paid in prizes to those who can estimate nearest to the total paid attendance at the great World's Fair, which opens in St. Louis April 30th, 1904, and closes December 1, 1904 An extra prize of $5,500.00 will be paid on orders received

BEFORE MAY 1, 1904

So that it is important that you send in your subscription and remittance at once. Can you estimate how many people will pay admission into the Fair grounds from its opening to closing date? The 1789 persons who can estimate nearest the correct number will receive the above amount in cash prizes. You have just as much chance as anyone. Are you going to let this golden opportunity to gain a fortune slip by you? You may be one of the successful ones. Why not try? You may estimate as often as you wish, regardless of subscription. For each estimate you are given a separate engraved and numbered coupon and certificate. These are sent to you in blank form. You will fill in your own estimates, retain the certificates, and return the coupons to us before October 15, 1904, the closing date of the contest. Certificates and coupons, without subscriptions, will be sent for 25 cents each, or 5 for $1.00. The prizes are the largest ever offered in any contest and are divided as follows:

To the nearest correct estimate	$[illegible]
To the second nearest correct estimate	10,000.00
To the third nearest correct estimate	5,000.00
To the fourth nearest correct estimate	2,500.00
To the fifth nearest correct estimate	1,000.00
To the sixth nearest correct estimate	1,000.00
To the next 10 nearest correct estimates, $200 each	2,000.00
To the next 20 nearest correct estimates, $100 each	2,000.00
To the next 50 nearest correct estimates, $40 each	2,000.00
To the next 100 nearest correct estimates, $20 each	2,000.00
To the next 200 nearest correct estimates, $10 each	2,000.00
To the next 500 nearest correct estimates, $5 each	[illegible]
To the next 1,400 nearest correct estimates, $4 each	[illegible]
Supplementary prizes for the estimates sent in earliest	15,000.00
Total	$75,000.00

Since making this deposit of $75,000.00 the World's Fair Contest Co., which is incorporated for $200,000, has offered an additional supplementary prize of $5,500.00 to be paid on orders sent in before May 1, 1904. This makes a grand total of $80,500.00 to be given to successful contestants. This extra prize is a fortune within itself.



MISSOURI TRUST COMPANY

HOW WE ARE ABLE SO MAKE THIS REMARKABLE OFFER.—We have made a special arrangement with the World's Fair Contest Co. to give, FREE OF ALL CHARGE, one Certificate and Coupon entitling you to chances in the prizes of $75,000, and the handsome extra prize of $5,500 to every reader of this advertisement who sends us $1.00 for his or her subscription before May 1st, 1904. It doesn't matter whether you have ever been a subscriber or not, the opportunity is open to every one.

The Contest Co. will sell only a limited number of Certificates and Coupons thereby strengthening the chances of each contestant. Large orders are coming in rapidly and it is only a question of time until the limit will be reached, and supply exhausted. You should therefore send in your order at once.

WE DO NOT ASK YOU TO ESTIMATE NOW.—You receive the blank Certificates with duplicate coupons attached, and we allow you the privilege of filling in your own estimates on the Certificates and Coupons whenever you are ready, and of returning the coupons to us at any time before October 15th, 1904. You will then know the daily attendance up to that day, and are enabled to more intelligently base your estimates for the entire fair.

WE DATE YOUR CERTIFICATES ON THE DAY YOU BUY THEM—Your Coupons will be considered in the awarding of prizes according to the dates they bear. You understand, therefore, that those who do not order before May 1st, 1904, will have absolutely no chance whatever in the handsome extra prize of $5,500. This prize alone is a fortune in itself, and even if you should happen to miss it your Coupon will still entitle you to chances to win one or more of the other 1889 prizes shown above.

No home can have too much good reading. When you can supply this at a nominal cost, and at the same time enjoy the opportunity to gain a fortune which may mean your independence for life, it is certainly to your interest and your family's, to take advantage of the opportunity as quickly as possible. This is a remarkable offer and may last only a short time. Don't lay this aside intending to write to-morrow. Do it TO-DAY. Address

Times Printing Co., Peterborough, Ont.

IMPORTANT NOTICE—Bear in mind THAT YOU HOLD YOUR OWN CERTIFICATES and Coupons and that you do not have to make your estimates until the very last day of the Contest if you so desire. Remember also that April 30th is the last day that you can buy certificates and coupons to get chances in this extra prize of $5,500.00. This contest is an open contest and may be competed in absolutely without restriction further than by complying with terms of the contest by making the estimate and purchasing or otherwise securing a certificate, entitling you to make the estimate. Absolutely no restrictions are placed upon any one in the world who wishes to compete in this contest, regardless of whether they are a subscriber or intending subscriber, as it is intended as a great National Contest.

LIGHTHOUSE HEROINES.

Wherever Women Have Been Put They Have Done Their Work in Satisfactory Manner.

The history of the lighthouse service shows that women are thoroughly reliable and efficient as lightkeepers. As a rule they are not appointed to the care of lights of the first importance, because the work would be too arduous; but wherever they have been put they have done their duty most satisfactorily. The Boston Herald tells of many notable feats of heroism performed by women lighthouse-keepers.

On Lake Michigan, at the north end of Milwaukee bay, stands a tall red tower, which is under the charge of Mrs. Georgia Stebbins. Its light is 122 feet above the water, and may be seen for 20 miles. Ten years ago there was a frightful storm, and three men, upset from sailboat, were in imminent danger of drowning. Mrs. Stebbins went to their assistance, and rescued them at the risk of her own life.

Twenty-five miles out in the ocean, in the pathway of the steamers from Boston to Halifax, is a barren and rugged island of small area, which in stormy weather is often swept by the waves. It is called Matinicus Rock, and the [illegible] by a [illegible].

On one occasion in winter he had gone away to the mainland to procure provisions, when the weather turned bad and prevented him from returning. Meanwhile, his wife, who was an invalid, and her four daughters lived for three weeks on one cup of corn meal and one egg apiece per day. The sea swept everything off the rock, driving the family to the light tower; yet the lights during all that dreadful period were as carefully tended as usual, and never failed.

The wife of a lighthouse-keeper often acts as his assistant and perfoms all his duties when he happens to be away. Thus it chanced that once, during a storm, Mrs. Fowler, whose husband had charge of North Dumpling light, on the Rhode Island coast, found herself in serious trouble. There was a thick fog and the machine for ringing the fog bell broke. It was an accident that might have cost many lives and more than one ship; but the woman was equal to the emergency. Scaling the outside of the tower, she fastened a rope to the bell, and rang it until the weather cleared.

ARTIFICIAL PUMICE.

New Product Being Introduced to Take the Place of the Natural Stone.

Natural pumice is so common to volcanic eruptions that after such outbursts the surface of the adjacent sea have been covered for miles with a mass of the floating stones. The material is a kind of glass (obsidian) which, while in a molten state, has been rendered porous by the expansion of gas or steam in its substance. This familiar stone, says the London Chamber of Commerce Journal, has always been useful in the arts; but it is not a reliable compound, for it will vary both in grain and hardness sometimes in the same piece. This has suggested the introduction of an artificial stone which is designed to answer the same purposes as natural pumice without its faults, and the new product is now being made for the markets of the world at Bietigheim, in the valley of the Enz. Its constituents are sandstone and clay, and there are no fewer than ten different grades of the stone manufactured. There is a hard and a soft kind designed for the leather, waxcloth, felt and wood industries; another kind for stucco workers and sculptors; a soft, fine-grained variety for polishing woods and for tin goods; another kind suitable for the treatment of lithographic stones; while other varieties of the new product are fitted for various duties.

A Natural Mistake.

The Terror—Do people often throw things at you, Mr. Doughby?

Mr. Doughby—No, Tommy, why?

"Well, sis says you're an easy mark."—Princeton Tiger.

Fewer Deaths.

The deaths from consumption in New York have decreased 40 per cent. since its health department began its crusade against the disease two years ago.

Matter of Taste.

Kittie—Paul told me last evening I was the prettiest girl he ever saw.

Bessie—Oh, that's nothing; he said the same to me last year.

"I know, dear; but his taste may have improved since then, you know."—Boston Transcript.

—A large number attended the special service at the George street church last evening. The pastor Rev. J. P. Wilson, had charge of the meeting.

MUCH VACANT LAND YET.

Dangers of an Overcrowded Population Are Still Remote.

The material development of the country is quietly progressing at a remarkable rate in one direction which is not given much popular attention. More than 22,824,290 acres of the public lands were turned over to private individuals last year. This means that an area almost equal to that of the state of Indiana has within that time been added to the productive regions of the United States. Most of these newly opened lands were homesteaded by farmers, as will be seen from the following figures: There were 54,365 patents of all classes issued within the year. Of this number 47,654 are classed as agricultural, 4,904 as Indian allotments, 1,104 as mineral patents, 200 as coal patents, 276 as private land claims, 187 as railroad patents and 40 as swamp land patents. The total sum which the government got by way of fees and commissions for issuing these patents was $11,024,744. Under a recent law the most of the receipts from the sale of public lands will henceforth be set aside for reclaiming arid lands by irrigation.

In the public domain there are still unappropriated 380,979,307 acres of surveyed lands and 591,976,169 acres of unsurveyed lands, or a total of more than 970,955,000 acres. A great many tracts in this immense area of course will always remain uncultivated and unsettled, but it has been estimated that when the contemplated system of irrigation shall be put into working order so much good land will be opened that a population as large as the whole nation's present population could find room there to thrive prosperously and contentedly.

Rapid strides are now being made in the developing of the public domain. The excitement and uproar of former pioneer days are absent in this work, but the process is marked and very effective. The passenger traffic on western railroads is evidence of this fact. Agreeable reflections arise in contemplating that the United States still owns so much arable public land. The dangers of an overcrowded population by immigration or natural increase are still remote. The census for many years to come will not show an excess of people above what the west will need in settling up its vacant lands.—Kansas City Journal.

Return to Calfskins Predicted.

Said a dealer in finished calfskins recently: "I am strongly of the opinion that the time is not far distant when we shall see a general return to the calfskin. At present and, in fact, during the past ten years shiny or lacquered leather has made a sensational inroad into calfskins, and while the leather is constantly being perfected and will undoubtedly be popular and standard for a long time to come the calfskin shoe will regain its old time favor. No leather that has been produced is the peer of a well made calfskin, and I am assured that it will again become the standard leather.—Shoe and Leather Dealer.

He Began Early.

The advantage of beginning a career at an early age is shown by the precocity of Edward Penfield, the designer and illustrator—that is, if Mr. Penfield is to be believed. It is told of him that he was once showing a piece of his early work to a friend, who, knowing that Mr. Penfield is yet under forty, asked in astonishment at what age he began to study art. With seeming reluctance Mr. Penfield gave the following explanation: "When a baby I was left in a basket at the door of the Art Students' league. They took me in and gave me a bottle of Chinese white and water. I cried for more, and so they set me to work."

Opportunity is Something to be Grasped Now.

Here is Your Opportunity
The Great Divide Mining, Milling, Tunnel and Power Co
(Operating in Gilpin County, Colorado)

Capital stock 1.500,000 shares. In Treasury 1,000,000 shares. Fully paid and non-assessable.

Owns seventy acres of patented ground in one of the richest sections of Gilpin County.

Five lode claims all of proved value.

Three miles of placer territory that is known to carry good values.

Three are great Fortunes in Placers.
Placer Mining gives large returns.
Placer Mining brings quickest profits.
Placer Mining insures large dividends.

A small block of charter member stock is now offered at FIFTEEN CENTS PER SHARE for the purpose of equipping the placers with a Hydraulic plant for their operation. CASH OR MONTHLY INSTALMENTS.

A clean, legitimate proposition.

A. J. SANBORN, ALEX. J. CHAPTON

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT
LA ZACUALPA RUBBER PLANTATION COMPANY
Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely cer-others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. *The entire property is free from encumbrances.*

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo. bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires Our machinery is well housed. the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode.

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet This is a double compartment shaft, built in the most substantial manner and *intended for a permanent working shaft* It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 foot level is. have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet Here we have 25 feet of ore lying in lenses of various values, but we whole averaging fully $8 per ton. In view of the fact that the entire expense of the mining and milling will not exceed $2.50 per ton, it can readily be seen that this of remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross-cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail. We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only to maintain itself, but will carry the work through to a satisfactory dividend paying basis.

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day; one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 300 cords of wood which will run us up until July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

For full particulars apply to the Peterborough Brokerage Co., City Agents. Peterborough; W Gallon, Agent, Apsley; Roland Kidd, Toronto; G. Hilliard, Lakefield; D. L. McKINNEY, SECRETARY, SIOUX FALLS. S. D.

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to that end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than satisfy every claim made by the company, and unquestionably prove the destiny of the property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $100 per ton, and the Company owns 9,600 feet on this vein.

Ore running from $10 to $60 per ton is continually being shipped from the gold property, and [illegible] samples taken from widely different portions of the vein system averaged $28.[illegible] per ton.

FACILITIES—The Company owns 1,720 acres of placer and timber land. water power of 500 (minimum) horse power. No expensive shaft work necessary. Ore easily treated on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to [illegible] mills, one on each property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

Advertising in the Times is sure to bring good results. Try it and be convinced

PEOPLE OF PANAMA.

Official Pronouncement Fixes the Name by Which They Shall Be Known.

"Panama" and "Panamans," then, it is to be; to which we cordially add, so let it be, says the New York Tribune. Ever since the establishment of the independent isthmian republic there has been some uncertainty as to what its people were to be called, together with an ocean maxim.

Though carefully nursed, the chronometer meets with many adventures. It may go through fire, shipwreck and other perils of the sea, but rarely does the regular, distinct ticking ever stop forever. If a captain dies or his vessel is condemned it finds another owner or another berth and this it shifts about from ship to ship, changing hands continually and traveling at odd times all the seven seas.

The manufacturing of marine chronometers in this country is confined to four firms, three of which are located in New York, and probably the whole output for a year amounts to 250 or even fewer. As with other articles, the price of chronometers varies according to quality and workmanship. The cheapest cost about $200 each, while the United States government, which naturally buys the best, pays sometimes as much as $375.

The movements of chronometers are usually imported "blank" from England—that is, only the plates and wheels are brought over. The manufacturer here provides the balance, springs, pivots, jewels and other parts needed to complete the whole, together with the brass-bound box in which the clock is placed. Being set in gimbals within the box, the chronometer will remain in a horizontal position when the vessel rolls or pitches, and by this means the poise of the balance is not disturbed.

It takes about three months to manufacture a chronometer and another three months to adjust it, though makers declare that the timepiece should not be sent to sea for two years after completion, as the delicate mechanism must be tested in various ways to obtain a perfect regulation. This adjustment, as the regulation is called, is something that requires the utmost skill and really is the most important feature of the maker's art. Sudden changes of temperature, humidity and electric currents will affect the speed, balance and hairspring, and therefore all the running parts must be so compensated and regulated that whatever contingency may arise there will still be the steadiness which allows no capricious variations. Old-fashioned chronometers were built to run eight days without winding, but these have been superseded by the 54-hour timepiece. Fifty years ago the chronometer was brought to its present state of perfection, and since that time, despite modern ingenuity, makers have found no reason to make any alteration in the principal parts of its mechanism.

MOTHER OF FOUR CHILDREN.

The trustees, secretary, and other officers of the Free Hospital for Consumptives at Muskoka are daily in receipt of many piteous letters.

A few days since Mr. W. J. Gage, of Toronto, Chairman of the Executive Committee of the National Sanitarium Association, received a letter from a resident of Quebec, pleading for the admission of a victim of the dread white plague, living about a hundred miles south-east of Montreal, and asking if it were not possible to admit her into the Free Hospital. The writer says: "The applicant is a Mrs. Wm. Paterson, the mother of four children and the wife of a farmer in a place called Goshen, in the township of Windsor. The doctor says that her left lung only is troubled. She is able to go about, but her appetite is very bad. I believe if she could be admitted into the Free Hospital for Consumptives she might be cured. She could not pay much, if anything. Kindly let me know if you could receive her."

We are told by Mr. Gage that applications for admission to the Free Hospital reach the secretary from all points in the Dominion, and patients have been received from Prince Edward Island on the east to Alberta on the west. Two hundred and twenty-five patients have been admitted in eighteen months, and not a single patient has been refused because of his or her poverty.

We can hardly think of any charity that appeals more pathetically for the support of the Canadian people.

Subscriptions may be sent to Sir Wm. R. Meredith, Kt., Vice-President of the National Sanitarium Association, or to Mr. W. J. Gage.

EVERYBODY READS THE TIMES.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100 00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from Kirkland, a station on the Sante Fe, Phoenix and Prescott Railroad and thirty-five miles from the Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1 200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest. but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $[illegible].
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 160 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before. Smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,100 feet, thereby permitting shipments during the entire year.

A production of at least 150 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good [illegible] Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

Fine Weather Gives Relief from Catarrh

But Never Cures it Because the Germs are Still Alive, Though Inactive. First Kill the Germs Then You'll be Really Cured.

Catarrh germs are carried into the throat and lungs by the air we breathe. In the same way the remedy must be applied. To be effectual the cure must be breathed, for otherwise it can't get where the germs really are.

Mix your germ-killing medicine with air, breathe it right into all the little air cells where the catarrh really is, then you'll get cured quickly. This is exactly the way Catarrhozone acts. You inhale its medicated vapor to the very source of the disease. It destroys the cause of the inflammation, kills all the microbes that develop when the lining membranes become diseased. Besides this Catarrhozone is a wonderful healer. Every sore spot is rebuilt with new healthy tissue. All the poisonous secretions that have been putrifying the system are driven out. No trace of catarrh remains after Catarrhozone has been used.

Why don't you use Catarrhozone? Its the simplest thing in the world to use, and so sure to cure permanently that you really can't afford to be without it.

MISS E. M. PETERS is known by every resident in the pretty town of Highland Grove. She was cured by Catarrhozone of systematic catarrh and says; "For three years before I commenced using Catarrhozone I was continually bothered by a congested condition of my nose and throat. I was sneezing and coughing all the time and really never felt well. I perserverd with Catarrhozone and was rewarded by being entirely cured. My recovery prompted others in this locality to use Catarrhozone, and many of them have had remarkable cures from using it."

MISS LOUISE MURPHY a well known society belle residing at 22 Monument St., Medford, writes; "Kindly forward me three outfits of Catarrhozone which I have found most valuable for catarrhal affections of the nose and throat. Catarrhozone cured me of weak lungs and really saved me from consumption. I am recommending Catarrhozone above all other treatments, knowing what great curative powers it possesses. I know others who have also benefited by Catarrhozone."

Catarrhozone is perfectly harmless and may be used with perfect safety by the most delicate infant. Instead of deadening the stomach with drugs, it sends the healing vapor along with the air you breathe into every air cell and passage of the nose, throat, lungs and bronchial tubes. Catarrhozone can't fail, it's sure to cure. If not satisfied you can have your money back for the asking. Two months' treatment, hard rubber inhaler and extra bottle of inhalent costs $1.00, sample size 25c. By mail to any address if price is forwarded to N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont., Can.

TOWN AND COUNTY NEWS

ASHES HERE AND THERE BY TIMES' REPORTERS

Obituary

The remains of the late Mrs. Bowie who died yesterday morning, arrived in the city last evening, and will be interred this afternoon. Deceased was the wife of Mr. E. E. Bowie, 696 Water street.

Remanded For Eight Days

Wm. Armstrong, who was recently arrested at the post office on a charge of fraud, appeared at yesterday morning's police court, and was remanded for another eight days. The authorities expect to have all the evidence ready to proceed with the case next Friday.

A Chance for Investors

The Times had the pleasure of a visit yesterday from Mr. Frank P. Wilcox, Secretary-Treasurer of the Slocan-Republic Mining and Development Company, of British Columbia, one of the best mining propositions that has come on the market for a long time. Mr. Wilcox is arranging to place a block of the Company's gilt edge stock on the market here through a local fiscal agent, announcement of which will appear later.

The attendance at the
Peterboro' Business College
is larger this year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.
Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGL
[illegible] Principal.

Graduated at Kingston

Amongst the graduating nurses at the Kingston General Hospital on Wednesday last was Miss Etta Montgomery, and Miss Carrie Edmison, of town, and Miss Lizabell Howell, Millbrook. The Times extends its congratulations.

Y.M.C.A.

The subject at last night's Boys' meeting was "A Boy's Religion," and was dealt with by the Physical Director, Mr. Aldin. A good attendance of boys was present and all manifested the greatest interest in this all important subject. This evening the subject will be "A Boy's Inheritance."

The Latest Fad

One of the latest fads is men's socks for women. If the women continue the invasion of the wardrobe of the men there will be mighty few articles of wearing apparel that man can call his own. His hat, shirt, vest, collar, tie, socks, and often his pantaloons are gone. He has chewing tobacco and suspenders, not much on a layout for a cold day.

Sabbath School Teachers Union

A meeting of the Primary and Junior Sabbath School Teachers' Union will be held this evening in the Y.M.C.A. at 8 o'clock. The lesson for the following Sabbath will be taught by Mrs. G. H. Williamson, and Mr. D. W. Dumble respectively. All teachers and others interested are requested to attend these meetings which have proved a great source of help during the past quarter to many who have attended, and as excellent teachers for the coming quarter have been secured, greater blessing is looked for on the work of the Union during the June quarter.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Richard McBride, of Hamilton Township, visited the city yesterday.

—Miss Annie Dundas, of this city, is visiting her aunt, Miss Dundas, Port Hope.

—Miss Mary McAuley and Miss Mae Sullivan, of Peterborough, are visiting Miss McHugh, of Lindsay.

—Messrs. G. G. Pope, M. H. Pearce and E. A. Isaac, of this city, visited Lindsay on Wednesday of this week.

—Mrs. L. J. Squair, and her sister, Mrs. Ashton, of Bowmanville, who have been visiting in the city, left for Bethany yesterday. A message was received stating that their mother was dangerously ill at that place.

By The Times Reporters on Their Daily Rounds

—Fancy shelf paper in five different shades at Times Bookstore.

—Mr. S. Gaskins, of the Fifth Ward, had the misfortune to lose a valuable cow the other day.

—To move or not to move is the question perplexing many Peterborough citizens at present.

—The Ladies' Aid of St. Andrew's church will hold its regular monthly meeting this afternoon at 3.30 o'clock.

—The police station office is much improved in appearance since the new floor was placed in yesterday.

—The Primary and Junior Sabbath School Union will hold a meeting in the Y.M.C.A. this evening, commencing at 8 o'clock.

—The Strangers' Fellowship Club will hold a tea at the Y.M.C.A. tomorrow evening, when the officers will be installed

—The crossings on George street were cleaned off yesterday, and a decided improvement to the appearance of our streets has been made.

—The Finance Committee of the Town Council met last evening at 8 o'clock, and at 8.30 the Committee of the Whole held a session.

A full rehearsal of the George street choir was held last evening, and this will be the last before the Muriel Foster concert.

—See the new goods just in at Times Bookstore. Handsome pieces of bric-a-brac just the thing for renewing decorations in house cleaning time. Articles from ten cents up.

—Samples of the milk sold by Lindsay dealers have been tested, and found to be below the Government standard. Much of the milk resembles the skimmed article.

—The Oddfellows of Peterborough will hold a concert in the Opera House on Monday evening. The different artists engaged have excellent recommendations as entertainers of the first class.

Heintzman & Co's piano tuner R. Shaw, is here from Toronto Pianos of all makes attended to by leaving an order at Ormond & Walsh's Drug Store Phone 146.

—Restaurant keepers are liable for damages done to the gowns of their woman patrons through the carelessness or awkwardness of waiters, according to an opinion handed down in the State of New York by the appellate term of the Supreme Court.

—The swindler, Armstrong, would require a large visiting card, as he was introduced at the Police Court yesterday, as "William Armstrong, alias F. H. Bradley, alias Stanley Steele, alias J. G. Steele, alias W. E. Armstrong".

DEATHS.

BOWIE—At London, Ont., on Wednesday, April 6, 1904, Carolina, beloved wife of Mr. E. E. Bowie of Peterborough.

The funeral will take place on Friday afternoon at 2.30 from the family residence, 696 Water street. No flowers.

New Typewriter for Sale

Hammond machine, brand new in perfect order. Will be sold at a bargain. Apply to P. O. Drawer H., or at Times Bookstore. 1wkd

The Happy Home.

Happiness must be founded on health. Where there is ill-health there will surely be unhappiness. The happiness of many a home has received its downfall at the table, spread with rich and dainty foods. The first symptoms of disease of the stomach are ignored as being disagreeable but not dangerous. Presently dyspepsia or some other form of disease fastens on the stomach.

At any stage Dr. Pierce's Golden Medical Discovery will cure diseases of the stomach and other organs of digestion and nutrition. But the cure is quicker if the "Discovery" is used in the earlier stages of disease. If you have any symptoms of diseased stomach use "Golden Medical Discovery" and be cured.

"I feel that I would be doing an injustice to you if I did not send you a statement of my case," writes Mrs. David W. Guice, of Hamburg, Franklin Co., Miss. "I had liver complaint and indigestion. Everything that I ate disagreed with me. I suffered all the time with swimming in my head; heart beat too fast; my feet and hands were cold all the time. Did not sleep well at all. Was able to get about but very little. I commenced to use Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets' in May, 1897, and by December I could begin to get about very well. Have been doing my work ever since. Feel better than I have for several years."

Dr. Pierce's Common Sense Medical Adviser, paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

AN APPEAL TO THE FASHIONABLE SET IN CANADA.

"Lally Bernard," the Well-known Toronto Journalist, Writes from England of the Battle Against Consumption in Muskoka.

Lally Bernard, of the editorial staff of the Toronto *Globe*, writing to that paper from London, England, where she is now a resident, shows most clearly that the battle against the great white plague is one that should interest all classes of the community. It will be remembered that this writer entered *incog.* as a patient in the Muskoka Free Hospital for Consumptives, and afterwards in the *Globe* told of real life in that institution. In her present article she says:

"To-day I have found a letter at the club which nearly missed me, having been addressed 'Lally Bernard.' May I express to my unknown correspondent my warmest thanks for the kindly appreciation for the little I have been able to do in the battle being waged against tuberculosis in Canada. The need of sympathy and interest is a tremendous one, and I am always puzzled when I find really well educated and intelligent people in Canada so criminally ignorant of the extent of the danger, and the means which are being taken to combat it.

"It may be of some interest to those who feel as I do in regard to the responsibility which rests upon each and all to aid in this fight against a most insidious foe, when I tell them, that here in London, where I have been for only a few days, I have already come across the dread enemy four times. First of all, in the back garden of our humble quarters in Kensington I espied, when morning dawned, a tent with two beds in it. I enquired of our landlord why the tent was there, and was told a long story about the coronation and quarters for some boys coming up from the country, and that he, the landlord, had subsequently found it more agreeable to sleep in the tent than in the basement bedroom he had formerly occupied. A little later, in conversation with the lady who secured the lodgings, I learned that the landlord's son was obliged to sleep in a tent! Comment was needless.

"In looking for quarters I found a charming home of a young doctor and his wife, where extraordinarily moderate terms were asked for really exceptionally good accommodation. The doctor in question had been 'ordered south,' and his wife had to keep the house going by accepting 'paying guests.'

"Yet again, in the third place, I found that the lady who was at the head of the establishment had not only lost her husband from the dread disease, but had managed one of the most fashionable sanitariums in England, and her knowledge of the treatment and the extent of the problem in England showed me how tremendous was the need for care and watchfulness in our own country.

"May I ask my correspondent to use all possible influence to make the question of combating tuberculosis one of interest in the 'fashionable set' to which she evidently belongs. I know full well, from the little experience I have had, how tremendously a little genuine interest and help might lighten the burden now resting on the shoulders of the authorities of the Free Hospital for Consumptives at Gravenhurst. It is, of course, far away from wealthy centres, and out of sight is to be out of mind.

"I can quite understand that until people have seen forty or fifty patients together in different stages of consumption they do not realise what an immense amount of aid might be given by those who are fortunate enough to be free from the disease and by those who have little else to do than to invent or learn some new form of recreation.

"Mrs. Torrington has kindly promised me to try and get musical societies and people interested in music to provide a pianola for the Hospital, and I feel sure it will be of immense benefit to the patients. Surely my correspondent who evinces such sympathy with the cause, could make that sympathy take a practical form and organize a hospital library where books worth reading might be supplied, with some system similar to that of the Aberdeen Association, which has done such excellent work."

[Note.—Readers—and may their number be many—who desire to assist in the work of the Muskoka Free Hospital for Consumptives may send their gifts to Sir Wm. R. Meredith, Kt., Vice-President, National Sanitarium Association, Toronto, or Mr. W. J. Gage, Chairman of the Executive Committee.]

THE COSTILLA GOLD MINING COMPANY
Has 10 Gold-bearing Veins Exposed
190 Acres in a Solid Block and All Patented
A Crosscut Driven 117 feet to the First Big Vein

A drift run on the vein 178 FEET IN ORE, the Gold value or contents running from 2 to 8 ounces, per ton, or from $40 to $160. This ore has not been stoped and will not be until the main shoot is reached.

The breast of the drift is, only 52 feet, according to engineer's survey, from the first BIG vertical ore shoot, which, at the surface, 550 feet above, shows values of 2 to 7 ounces gold, per ton.

Slabs and feeders of gold ore are coming in freely in the drift.

This is a business proposition. It is the KIND AND QUALITY which makes for great and permanent success. It is worth an investment of 10c. on the dollar, per share, now. It will be worth par with development.

THE GREAT BATTLE NOT EXPECTED FOR ABOUT A FORTNIGHT OR MORE

Latest Report Say That It Will Be Two Weeks Before the Battle--Advance of the Japs

The Operations of Russia Arousing Serious Thought in Great Britain

London, April 9.—Advices from Chefoo and other places in the Far East indicate a battle on the Yalu in about a fortnight, and a probable attack on New Chwang, with a daily chance of a naval engagement in the vicinity of Port Arthur, where the Russians are making occasional cruises. The censorship probably will be less strict after the coming battle on the Yalu has been decided.

The London Daily Telegraph's Seoul correspondent says he learns from a Japanese sailor who participated in the attacks on Port Arthur that the Japanese fleet is divided into seven squadrons. Four of these are watching Port Arthur, the fifth patrols the Corean coast, and the sixth and seventh cruise between Vladivostok and North Japan. Two torpedo boats were much damaged in the engagements, but otherwise the fleet was little injured. The damages to the Japanese cruiser Iwate and Yoshima have been repaired, and the vessels have joined the fleet.

The Daily Telegraph's Wei-Hai-Wei correspondent, under date of April 6, says Russian warships are patrolling the Gulf Pechili.

KUROPATKIN'S MOVES.

General Kuropatkin, commander-in-chief of the Russian military forces in the Far East, arrived at New Chwang yesterday and reviewed about four thousand troops on the parade grounds outside of the fort. One battery of horse artillery, several batteries of field artillery, parts of four regiments of Siberian rifles and detachments of Cossacks and regular cavalry participated in the review.

Russian secret service agents reported that the Japanese intended to attack New Chwang yesterday.

ALONG THE YALU RIVER.

It is not believed that the Russian troops between Antung and Chiu Tien Cheieng (about ten miles north of Antung) comprise the main Russian force and consequently the engagement which is looked for at or near these places probably will not be decisive, but only a forerunner of larger operations.

The Russians are constructing entrenchments at several points on the Yalu and Tumen Rivers. These entrenchments, however, are not yet completed, and if the Japanese succeed in forcing their way past one line of defence it would give them a distinct advantage and make it more difficult for the Russians to concentrate to oppose them.

The ice on the Yalu is melting rapidly, and the muddy roads make promptness in military operations most difficult.

London, April 9.—Russia's military proceedings are arousing serious thought in Great Britain. King Edward, his Ministers and educated circles generally, feel that the Muscovites are preparing a military advance that may finally prove perilous to the interests of many states, particularly the British Empire. The slavs are conceived to face an ordeal which will show what position they are destined to occupy in the world. It is admitted that they began the struggle handicapped in almost every respect, except that of a lavish supply of men. It is taken for granted that Russia's civil administration is corrupt and its army disorganized, while the transport problem it has to solve is regarded as the most difficult that ever faced a nation in war. Not only is the Trans-Siberian Railway a single line, lying across interminable wastes and menaced at many points by bandits, but it is also broken in two by Lake Baikal, where troops and supplies must cross miles of ice on sleighs. When the ice breaks up, a few men and some goods can be carried across in boats, but most of the traffic must perforce go round the lake part of the way by rail and the remainder on foot or by waggon. This section of the railway will not be completed before August, and possibly not till much later. Furthermore the Russian army like the Russian navy, is not homogeneous. The officers are often strangers to each other. The ordinary basis of discipline and operation has been shattered, and time must elapse before the army can become thoroughly cohesive and capable of quick action. Finally it is doubtful whether more than half the Russian artillery is of the modern quick-firing type.

ANTI-RUSSIAN FEELINGS IN CHINA

Berlin, April 9.—Well grounded reports from the Far East reach certain members of the Berlin diplomatic corps to the effect that China is on the verge of throwing in her lot with Japan. They affirm that the coalition will be deferred only until the first decisive defeat of Russia on that. Anti-Russian feeling is described as having reached an uncontrollable pitch in Pekin where the authorities are gradually permitting themselves to be convinced that now is the time to cast off the Russian yoke. Japan is not enthusiastic with regard to China's support, realizing that it will entail embarrassing international complications. At the German Foreign Office no credence is given the report of the likelihood of a yellow alliance against Russia.

TOWN WILL GUARANTEE SUGAR CO'S BONDS

To the Amount of $100,000, Providing the Ratepayers Pass the By-law, which will be Submitted May 5th

The Council met in Committee of the Whole yesterday afternoon to further consider the Beet Sugar proposition, and it was finally decided to submit a by-law to the people on the 5th of May next.

Ald Morrison, in introducing the debate called attention to the fact that two-thirds of the borrowing power of the town was already used up, which leaves only $161,000 of a balance to work on. If bonds of $100,000 are given the Peterborough Sugar Company, then a borrowing power of only $61,000 will be left. These bonds would be considered a debt on the town until they were paid. The debentures for a Collegiate Institute would require $50,000 more, and the Government has asked us to furnish a site for a drill hall which would entail the still further reducing of this $61,000. If the sugar people could see their way clear to cut their requirements from the town down to $50,000, Ald. Morrison thought the council would be justified in taking action and the by-law when submitted to the people would likely carry.

Mr. Garvin, of the Sugar Company, remarked that a corporation had the power to lend up to 10 per cent. of the total assessment for industrial purposes, but Ald. McWilliams pointed out that a special act had been passed referring to the Town of Peterborough. This act was self-imposed and read 10 per cent. of the taxation, but this could be easily changed by another act being inserted. It is not desirable that this limitation should exist but it is not an insurmountable difficulty to obtain a change of legislation in the matter.

Mr. Garvin then spoke again. Peterborough is not going to stand still, and there is no more progressive place in Canada to-day. Even if the limit of the borrowing power is reached this year, the population during the next 10 years will greatly increase, and as a consequence the borrowing power of the town as well. As long as the borrowing power was not exceeded, Mr. Garvin thought the town should not turn down such an important industry. He was confident, that under the able leadership of Mr. Gordon, the sugar industry would succeed. "If the council does not submit this by-law they will be placing themselves in a dangerous position," continued Mr. Garvin. "If the industry pays the town will not be out a dollar, and if it should fail the stockholders would be the heaviest losers."

The Mayor then stated that the feeling of the council was not against the scheme, but they wanted a by-law that would carry. He did not think the proposed one would meet with the approval of the people.

Mr Hunter, a Peterborough county farmer, said that he was sure the company would prove a benefit to the community. He had grown beets and had made as high as $80 and $90 per acre, and he felt confident that 6000 or 8000 acres of beets would be grown yearly in case the company commenced operations."

It was then moved by Ald. McWilliams, and seconded by Ald. Adams, that the Sugar Beet Company be asked to modify their request to read a "ten year guarantee of $100,000 with $50,000 payable at end of three years, and the balance to be paid in equal instalments in the next seven years.—Carried.

Ald. Morrison suggested that the town's $100,000 be placed in trust at one of the banks, to be paid over to the company when factory was in operation, but Mr. Garvin asked that the money be paid on the arrival of the machinery.

On motion by Ald. Adams and Ald. McWilliams, it was decided that the first instalment of $50,000 would be paid when the buildings are sufficiently completed for the reception of the machinery, and when the latter is here.

A motion was also carried, stating that a member of the council would have a position on the company's board of directors until such a time as the bonds were paid.

It was moved by Ald. McWilliams, seconded by Ald. Rush, that a by-law be submitted to the people on May 5th, and that the solicitor be asked to draft same.—Carried.

BAY OF QUINTE CONFERENCE

Programme of Meeting to be Held in June — List of Special Services

The following is programme that will be carried out in connection with the annual Methodist Conference, of the Bay of Quinte division, to be held in Peterborough in June next.

The twenty-first session of the Bay of Quinte Conference will be held in George Street Church, Peterborough, in June, 1904.

The annual conference will open on Thursday, June 2nd at 9 a.m.

Wednesday, June 1st at 9.30 a.m.

The Ministerial Session will open on

The Stationing Committee will meet in Charlotte street church on Monday, May 30th at 7.30 p. m.

The Statistical Committee will meet on Tuesday at 2.30 p.m.

The Financial Secretaries will meet the Treasurers of the Connexional Funds on Tuesday, at 2.30 p.m.

CONFERENCE ANNIVERSARIES.

Wednesday, June 1st, 8.00 p.m.—Addresses by Rev. S. T. Bartlett, J. P. Berry, B.A. and W. W. Chown, Esq., on Sunday School and Epworth League Work and Systematic and Proportionate Giving.

Thursday June 2nd, 8.00 p. m., Missionary meeting, addresses by Revs. J. J. Rae and James Henderson, D.D.

Friday, June 3rd, 8 p. m.—Reception of probationers into full connection. Resolution to be moved by Rev. C. Parker and seconded by Rev. G. Brown.

Saturday, June 4th, 8.00 p. m., in Y. M. C. A. Hall, Theological Union Lecture by Rev. N. Burwash, D. D., LL.D., F. R. S. C.; subject, "The Historical Monuments of Egypt." The lecture will be illustrated by maps and sketches and recently procured antiquities. The business meeting of the Union will be held at the close of the lecture.

Monday June 6th, 8.00 p. m.—Educational meeting; addresses by Rev. F. H. Wallace, D. D.; F. E. O'Flynn, Esq., and Rev John Potts, D.D.

Tuesday June 7th at 8.00 p.m.—Temperance meeting; addresses by Rev. M. E. Sexsmith, B.A., A. E. Mallory, M.D. and Rev. G. R. Clare.

SUNDAY SERVICES, MAY 29th.

George street, 9.30 a. m., Love Feast, conducted by Rev. A. H. Reynar, M.A., LL.D.

11.00 a. m., Ordination sermon by Rev. S. D. Chown, D. D.

3.00 p. m., Sunday School; addresses by Rev Jno Garbutt, J. W. Flavelle, Esq., and Rev. I. S. Wright, B.D.

7.00 p. m., Rev. S. J. Shorey.

The morning service will be followed by the ordination of candidates for the ministry, conducted by the president of the Conference. The Sacrament of the Lord's Supper will be administered at the close of the evening's service, conducted by Rev. T. J. Edmison, B.A., B.D.

Charlotte street.—11.00 a. m., Rev. W. G. Henderson; 3.00 p.m., Sunday school; addresses by Rev. C. E. Cragg, S.T.L.; T. Wickett, Esq., and Rev. H. T. Lewis, B.A. 7.00 p.m., Rev. L. Phelps.

Mark street.—11.00 a.m., Rev. W. B. Tucker, B.D., 3.00 p. m., Sunday school, addresses by Rev. A. J. Terrill, B. D.; R. W. Clark, Esq., and Rey. A. J. H. Strike, B. A.; 7.00 p. m., Rev. R. Sandiforth, B. A.

Y. M. C. A., Sunday, 4.15 p.m., Rev. W. G. Clarke, B. A.

St. Paul's (Presbyterian)—11.00 a.m.—Rev. E. B. Lanceley, 7.00 p. m., Rev. N. McDiarmid.

St. Paul's Mission—11.00 a. m., Rev. W. G. Clarke, B. A.; 7.00 p. m., Rev. J. R. Real.

Murray street (Baptist)—11.00 a. m., Rev. R. Duke; 7.00 p.m., Rev. R. Taylor

Park street (Baptist)—11.00 a. m., Rev. G. H. Copeland; 7.00 p.m., Rev. R. Burns, Ph.D.

Bethel—3.00 p. m., Rev. C. L. Thompson

Lakefield—7.00 p.m., Rev. F. Johnston, Millbrook—Rev. W. A. Bunner.

Cavanville—7.00 p.m., Rev. C. D. Cobb.

Fraserville—7 p.m., Rev. H. W. Foley, B.A., B.D.

Bridgenorth—7.00 p. m., Rev. J. S. McMullin.

T. H. Edmison, B.D.,
Pres. of Conference.
D. Balfour,
Sec. of Conference.
J. G. Lewis, B.A.,
Sec. Billeting Com.

Muskrat Hunting Up North

The lateness of the present spring will prove disastrous to muskrat hunters and the skins of the little animals may come quite high when overcoats time comes around again. The open season for muskrat hunting is from Jan. 1st to April 30th inclusive, but the only time they can be properly hunted is generally in the month of April after the ice moves out of the bays, but at present it looks as if the season will be over before the ice has entirely gone out. It was reported around Peterborough yesterday that several trappers in the country were destroying their houses and shooting the animals, but these trappers had better beware, as the law is very strict on that score and entails a heavy fine.

Profanity on the Streets

The use of profane language and disorderly conduct on our streets will, we trust, soon be a thing of the past. It will for a certainty, if the strong arm of the law can prevent it. Police Magistrate Dumble the other day imposed a fine of $5 and costs, $9.90 in all, on a woman who acted disorderly on the public street, and he is bound that law and order shall be maintained on our streets. It is a disgrace to a city to find young men loafing and swearing on the public sidewalks where ladies are compelled to walk, and the thing will not be [illegible] must be exercised by those in authority. It is quite a common occurrence to notice groups of young men, whose language is of the vilest and this must be listened to by ladies passing. Of course the police are not aware of this, as the offenders soon decamp on the appearance of the man in uniform.

CLOSE TIME FOR FROGS

Demand Made Last Year's Haul Very Valuable

The report of the Department of Fisheries indicate a small diminution of the catch as compared with 1902, but the demand and exceptionally high prices made last year's catch more valuable. Angling is reported to have been good everywhere. There has been a falling off in the number of convictions, and Provincial Inspector Bastedo remarks that since the organization of the Department there has been a remarkable change in public opinion. The Department has been urged to establish a close season for frogs, concurrent with the close season for bass and maskinonge, for the protection of both.

REV. J. G. POTTER AT OTTAWA

Peterborough Clergyman Spoke at Lord's Day Alliance Meeting

Rev. J. G. Potter, of St. Andrew's church, attended the mass meetings held at Ottawa on Wednesday evening last, under the auspices of the Lord's Day Alliance of Canada, which is holding its triennial convention there. The following is taken from the Journal of Thursday.

"Rev. J. G. Potter, Peterborough, spoke along similar lines, contending that the legislation asked for was reasonable and justifiable. The present legislation was not fair to the worker, who if charged with working on the Sabbath, would, except in cases of necessity, be fined, while the corporation goes free. He wanted to see the legislation that would make it possible to get at the corporation. It was an absolute necessity that such a law be passed to guard the interests of the working man and preserve the day of rest. If the workers of today were asked to work on the Sabbath and refused, it was as a general rule practically an order to get out. The Alliance was indeavoring to have legislation passed that would help remedy this evil, and they should be heartily supported by all classes of citizens."

SANE BUT ARE LOCKED UP

LUNACY IS QUITE OFTEN VOLUNTARY

Perfectly Rational Persons are Inmates of Asylums Says a Doctor

"Few people," said a medical officer of a large private asylum, "have any idea that hundreds of the people confined in mad-houses are every bit as sane as theselves, and yet it is a fact that cannot be disputed.

"I do not refer to inmates who are sanity itself on all points but one—the victims of monomania. No; quite apart from these unfortunates there are hundreds who live and die in lunatic asylums and yet are no more mad than their keepers. I myself have known several cases where men and women have voluntarily immured themselves in asylums simply out of fear that they might go mad. They are neurotics, people who are always getting strange fancies into their heads—chiefly the result of laziness—and are haunted by the fear that some day they will lose their reason. I know one such man who has voluntarily made a "lunatic" of himself for over thirty years, without showing the least sign of insanity.

RETREAT FOR DRUNKARDS.

"Then there are others—and these cases are numerous—whom drink has driven out of their senses at one time or another, and who have committed deeds of violence. A few weeks' retreat and treatment has put them all right again; but, although they are as sane as possible in confinement, it is not safe to give them their freedom for fear of relapse under temptation outside.

"In numbers of cases patients who have been cured and discharged return to us of their own free will. And there are others who might go back into the world, but have become so attached to their environment that they elect to spend the rest of their days in it.

"There can be no doubt that many of the sane inmates of asylums are much safer here than outside, and it is this knowledge which sends many of them to us and keeps them with us. Among my own people here is a very clever doctor who a few years ago had a practice bringing him in a large income. He was, however, the victim of a strong periodic impulse to introduce poison in his patients' medicine, and the fear that some day he would yield to it and thus become a murderer grew so strong that he sold his practice and became an inmate here.

TO BE NEAR RELATIVES.

"The most remarkable cases, though, are those who become inmates of asylums rather than part from those they love. We have two sisters here, one hopelessly insane, the other as right as any woman living. They have always been devoted to each other, and when it was found necessary, twenty old years ago, to confine the former her sister, who was on the eve of marriage, broke off her engagement and decided to spend the rest of her life with her relative.

"There are also scores of people in the criminal asylums who are of perfectly sound mind—in fact, many of them have never been anything else. They have, however, contrived to stimulate madness and thus escape the hangman or a long term of penal servitude."

ATHLETIC WORLD

BY OUR SPORTING EDITOR

SPRINTING.

The foot race which was to have taken place this afternoon has been postponed until the 16th.

A meeting of the Auburn Woollen Mills employees will be held in the Y.M.C.A. parlors on Tuesday evening next at 8 o'clock, for the purpose of organizing a baseball team for the ensuing season. All interested are requested to attend.

RUSSIA SEEKS AID FROM CHINA; EXPECTS HER TO FURNISH SUPPLIES

And Ammunition for Troops -- Proclamation by Alexieff--Must Show Good Feeling

Demands Protection of Railroads and Wires.

WILL PUNISH OFFICIALS IF INJURY IS DONE.

The Bearded Bandits Greatest Evil of Manchuria

St Petersburg, April 8.—Gen. Kouropatkin, who arrived at New Chwang Wednesday, and inspected 4,000 troops there, greeting them in the name of the Emperor, also inspected and defensive works of the town, and held a conference with the commanders. It is reported here that he found the troops in good health and spirits.

London, April 8.—A despatch to the Daily Mail from Geneva says that the Czar on Wednesday received two officers who are going to the front to represent Switzerland. His Majesty seemed very nervous and melancholy. He discussed the repulse of the Cossacks at Chong-Ju, and said; "Do not be too severe in your criticisms. Remember everything becomes difficult so far from a base."

Russian Troops Anxious to Destroy the 'Red Beards.'

RUSSIA ANXIOUS TO WIN OVER MANCHURIA

And Completely Wipe Out the Treacher-Bandits

Washington, April 7.—The State Department has received a copy of a proclamation issued by Admiral Alexieff, Russian Viceroy in the Far East, in which he informs the Chinese in the territory under his command that it is their duty to join with the Russians in "restricting and attacking" the Japanese. As China, however, has declared neutrality he urges that the Manchurian officials must not hinder, but ought to assist the Russian army in obtaining supplies. The proclamation says:—

"At present Russia and Chinese interests are intertwined, like a cart and its prop, mutually dependent, and it is our duty, if the enemy should invade the borders, to join together in restricting and attacking him. But, according to a despatch from the Chinese Government, it desires to keep its hands in its sleeves and maintain an attitude of neutrality.

"On this account I must urge upon all the officials of Manchuria that they must not hinder, but oughts to the utmost of their ability, to assist the Russian army to purchase locally whatever supplies of grain or forage they may need upon the march, in camp, or when doing garrison duty.

London, Friday, April 8, 4 a.m.—Despatches from Shanghai and Chefoo say it is rumored in those places that the Japanese have made another attack on Port Arthur, but the reports are apparently only based on statements made by Chinese fishermen. Nevertheless, Admiral Togo's ships are reliably reported to be again hovering off the coast of the Liao-Tung peninsula, either seeking an engagement with any Russian ships that are at sea, or preparing to renew their attention to Port Arthur. A despatch to the Express from Wei-Hai-Wei reports mysterious movements by vessels of both fleets in the straits between Wei-Hai-Wei and Port Arthur.

It is stated from St Petersburg that Admiral Beitzenstein, lately commanding the Vladivostock squadron, is now at Port Arthur, where it is reported he will take over the command of the torpedo boat flotilla.

There is little to be reported regarding the land movements, beyond conjectures based upon the fact that transports are unloading at the mouth of the Yalu River. There are no indications that fighting has occurred, indeed it cannot be learned that there are any Russians in touch with the Japanese on the Yalu.

Telegrams from Tokio report that the fighting lines of the Japanese columns moving north from Ping-Yang have reached the left bank of the Yalu. News of operations all round were never scarcer.

Again at Port Arthur.

St. Petersburg, April 7.—The Admiralty has received information that a Japanese squadron has been cruising off Port Arthur since yesterday.

Japs Advance to the Yalu.

Tokio, April 7.—Information has been received that Japanese transports with force have entered the estuary of the Yalu, and that troops are landing at various points on the Corean shore. Presumably gunboats are covering the movement. If this be true, the Russian forts erected on the other side of the river must be ineffective.

The Seoul correspondent of the Kokumin telegrapha, on what he says is reliable authority, that the Japanese lines have advanced to the Yalu, thus proving that there is no considerable Russian force on the left bank of the river.

Many Transports Sighted.

Seoul, April 7.—It is said at the Japanese Legation that three Japanese merchants were murdered during the recent disorders at Chung-Chong. An American missionary, returning from the north reports that forty transports, some of the largest size, were seen off Haiju which is fifty miles north of Chemulpo. It is believed that they were carrying the first and third divisions of the army corps, and that they were on their way to land at Yongampho.

Is the Estuary Mined?

Shanghai, April 7.—It has been learned here that the Russians have planted submarine mines off the coast of Takushan (about 50 miles west of the mouth of the Yalu River) as well as in the estuary of the Yalu.

Washington, April 7.—According to the Nichi Nichi Shimbun, a Tokio newspaper, copies of which have been received at the Japanese Legation, an interesting and impressive scene preceded the departure from the Japanese battleship Asama of the five men of that vessel who were selected from among an overwhelming number of volunteers to take part in the attempt to close the entrance of Port Arthur by sinking merchant vessels. A translation of the Nichi Nichi Shimbun's account follows.—

"After the second attack on Port Arthur, on the morning of February 14, Admiral Togo perfected the plan of closing the entrance of the harbor, and called for volunteers to man the five merchant vessels which were to be employed in the attempt. An overwhelming number of officers and seamen offered their services, and from among them the necessary number was selected, seventy-seven officers and men in all.

"On the night of Feb. 19, when the volunteers were about to embark on the vessels to which they had been assigned enthusiastic ovations were given to them by their comrades on board the vessels of the fleet, from which they had been selected. Among others a solemn scene was witnessed on the battleship Asama. In the presence of all the crew, who were collected on the upper deck, Capt. Yamashiro brought out a large silver bowl presented to him by the Crown Prince. He filled it with water, drank with each of the five volunteers who had been selected from the Asama.

The Bearded Bandits.

"The bearded bandits (Red Beards) are the greatest evil of Manchuria. The Russian troops day and night are anxious to destroy them, so as to protect the law-abiding people. You must not fear to report them. Each ought in every way to give assistance, pointing out the forests where they assemble, the places at which they rendezvous, that we may earnestly hope to clear out their haunts and dens and exterminate their bands.

"Should anyone harbor these gangs or bandits or knowing their trail, conspire with them not to reveal it, his guilt shall be regarded as identical with that of the bandits.

"It is my earnest desire that you, the people of Manchuria, and the Russian troops associate together with mutual good feeling. Should any of the Chinese officials or people look upon the Russian troops with enmity, the Russian Government will surely take measures to exterminate such persons; on no account will any leniency be shown them. Should such a time come, the Russian Government will adopt such measures as may be necessary to protect its interests."

Admiral Alexieff directed that his notice be posted on all thoroughfares.

Must Show Good Feeling.

Should Russian troops arrive in your neighborhood, you should meet them with mutual sincerity and good feeling. The law-abiding people are responsible for the Chinese Eastern Railway, telegraph and telephone wires in their districts and must exert themselves to give protection.

"As to the local officers concerned, together with the gentry and village elders they must all with united purpose take such measures as will secure them (railway, etc.) against injury. This will be greatly appreciated. Should anyone plan to injure them, not only will the person who plots such crime be severely punished, but you also, the officials and people of the vicinity, who sit by and see the injury planned, will be held responsible.

Paris, April 8.—The Russian naval plan for retrieving the reverses at Port Arthur and Chemulpo has been communicated to one of the Embassies through official channels having access to the highest naval authorities at St. Petersburg. The plan is explained as follows;

Russia recognizes that Japan now has preponderating naval strength in the Far East, and will attempt to reverse it by two distinct moves. First, urgent efforts will be made to have a naval concentration at Port Arthur, the Baltic, Red Sea and Vladivostock fleets joining Vice-Admiral Makaroff's command if possible, and thus giving the combined fleets preponderance over Vice-Admiral Togo.

Second, it is foreseen that it will be difficult and probably impossible to effect this concentration as Admiral Togo may intercept the Baltic fleet before its arrival at Port Arthur. In that event the Baltic fleet, which is comparatively small, will attempt the perilous task of engaging the large Japanese fleet in the hope of disabling some of the Japanese ships, and thus reducing the Japanese effective.

BIG POWER DAM IS UNDERMINED

Orillia's Light and Power System at a Standstill

QUICKSAND CAUSED MISHAP

Town Council Orders Immediate Repairs to the Structure

Orillia, April 7.—The big concrete dam of Orillia's electric plant at Ragged Rapids, on the Severn River, gave way yesterday morning, and as a consequence the town was last night without light or power. A despatch to the Times contains the information that the break occurred at the base of the dam near its centre, allowing the water to escape to such an extent that it fell below the level of the flumes, completely closing the plant. The dam is about 150 feet wide with a head of 57 feet, but at one point there is a deep pool in the river extending the dam's depth to about 80 feet, and it is at this point that the break occurred. When this portion of the dam was being constructed it was undermined two or three times by quicksand, and it is probable that the present mishap was due to the same cause. The upper part of the apron of the dam is as yet uninjured, but the flow of water through the break widened it and weakened the whole structure. The full extent of the damage has not yet been ascertained, but it is expected that it will take two or three months to repair it, if not all summer.

TREACHEROUS FIRE ON THE BRITISH

Invited Them to Parley and Then Fired Volley

BRITISH ARE ADVANCING

Col. Younghusband is Reported Near Tyangsti

London, April 9.—A despatch to The Times from Kalatzo, Tibet, dated yesterday, reports that 300 Tibetans at the village of Samonda, in treacherously firing a volley at a party of British officers whom they invited to parley with them, aimed badly. No one was injured, but the action is supposed to indicate the tactics which the Tibetans intend to employ at Guru. The correspondents adds that reinforcements are arriving at Gyangtse to oppose the British advance. Col. Younghusband was last reported 25 miles from Gyangtse and expected to reach there this week. The British is still marching on.

FOOTBALL.

The Quinte League have written to the secretary of the Midland League stating that they are willing to join hands with them. A representative will be sent to the meeting to be held here a week from today. In case an affiliation is perfected the teams to join will be Picton, Belleville, Deseronto.

A NARROW ESCAPE

Stage Drivers Horses Broke Through Ice on Cameron Lake

Herbert Foster, a young man who drives the mail stage between Fenelon Falls and Coboconk, and a couple of passengers who happened to be making the trip with him, had an exciting experience on Cameron Lake last Monday evening. On the return journey from the university village the horses broke through the ice, but the passengers managed to jump and escape a wetting. The struggles of the horses enlarged the hole, and the animals would have perished had not the pluck of the driver prompted him to jump on their backs, unloose the harness and pass a rope around each horse in such a manner that it could be helped out sideways onto solid ice.

BASKETBALL.

Bowmanville baseball team has organized and willing to enter a six club league composed of Bowmanville, Oshawa, Port Hope, Cobourg, Lindsay and Peterborough, if such is formed.

At a meeting of the Bowmanville Football Club on Thursday it was decided to send a delegation to Peterborough to attend the meeting of the Midland League next week.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, [illegible] Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

JAPAN'S INFLUENCE UPON CHINA

Is it really time, as is so frequently and confidently asserted, that the "yellow peril" is a mere bugaboo without substance or excuse for existence? The matter is at least worthy of consideration from more than one side. It presents an opportunity for interesting and perhaps pertinent speculation.

Those who dismiss as unworthy of serious attention the suggestion that the Mongolian may one day essay to overwhelm the Caucasian are prone to clinch the whole matter with the assertion that the time has gone by when western civilization could be endangered by an onrush of barbarians, and that assertion is measurably true. It is true, that is to say, that a horde of barbarians, armed with spears, bows and arrows, scythe blades and other primitive weapons would make little headway against the soldiers of western civilization armed with long-range rifles, rapid-fire cannons, and the other accessories of modern, scientific warfare.

But arm the barbarians with the same weapons carried by their civilized opponents, officer them with men trained in the best military schools, equip them with a commissariat adequate to their requirements and then give them a numerical superiority of two against one—will anyone pretend to say that under such circumstances western civilization would not stand a very strong chance of succumbing in the end?

Yet if we are to encounter the "yellow peril" it will unquestionably be under conditions like those described. The Mongolian will not advance to the struggle beating gongs and burning joss sticks for the discomfiture of his opponents. He has evolved out of that stage of military tactics. He has learned some things and he is rapidly learning others.

When the shock of radical conflict shall come—if it ever does come—the yellow man is likely to be as well found in all the material requisites for war as is the white man. His inferiority will be an intelligence and in general morals—an inferiority which will certainly be compensated in a large measure by his numerical superiority.

It would be a mistake, moreover, to attribute to the Mongolian any marked degree of inferiority even in the matter of intelligence. Those who speak of the "yellow peril" are in the habit of assuming that the Chinese alone constitute that peril. What of the Japanese? And if we concede that the Japanese must be reckoned upon as contributing to the Mongolian strength wherein will Caucasian civilization have any pronounced advantage in the matter of intellect, courage or military genius?

Is there anything in the history of the Pekin expedition expedition or of the existing hostilities in the Orient to justify the assumption that the Japanese at least are not equal, man for man, to any white men, who may encounter them in battle?

Let us suppose—and the supposition is by no means a violent one—that the Japanese having emerged victorious from the struggle with Russia, should frame a pan-Mongolian league, including not only the people who are strictly classed as *Mongols*, but the whole population of Asia belonging to the Turanian race—the vast body of yellow-skinned men who inhabit the major portion of that continent.

Suppose that the Japanese should devote themselves to the task of unifying and disciplining these people in the same fashion which has wrought a transformation in Japan within forty years. Suppose that the next forty years should prove that the possibilities of advancement among the allied Mongolians are even approximately equal to those displayed by the Japanese. Would not the year 1950 present a situation which would warrant the Caucasian race in entertaining the gravest apprehensions? Would not there be a "yellow peril" which no one would feel disposed to scout as a mere bugaboo?

It is true that the contingency is still remote and it is safe to say that events will not move so fast as to threaten the world's peace during the present generation. The Japanese are astute enough to make haste slowly if they should embark upon an enterprise so vast as that which has been outlined. The welding into a homogeneous whole of the many adverse elements which would compose a pan-Mongolian league would be a task which would consume much time. It would be a gigantic work of civilization and education such as the world never has before seen.

But the work is capable of accomplishment. The task is not impossible. When we see what has been done in Japan since that nation accepted western ideas of civilization we can hardly deny the possibilities contained in a similar acceptance of them by the hundreds of millions of Asiatics who are akin in origin and sympathies.

The Japanese are not only intelligent and progressive but they are ambitious. The idea of a coalition under Japanese leadership of all Asiatic Mongolians can hardly have failed to suggest itself to the people who are now trying conclusions with the Russian Empire. With that idea even embryotic in the Japanese national mind it is ill advised to scoff at the possibilities of the "yellow peril." Our children or our grandchildren may have to face it.

Learn The Art of Resting

Rest is a True Food for the Body and Strength for the Spirit. Almost a Lost Art Now,

The absence of rest accounts for much of the ill-health, irritability and despondency that we find everywhere about us. We can't eat our pudding and have it, nor can we go on wasting our energies without soon reaching the limit of our reserve power.

Better not let it go on this far. Much wiser to take Ferrozone when that tired enervated feeling is first noticed. Nervous collapse is avoided in this way. If you feel the need of rest, but can't get it because of overwrought nerves, nothing in the world will do you so much good as Ferrozone, which is noted for promptly restoring perfect health in just such cases as yours.

Perhaps you wonder how Ferrozone does this. The first result of Ferrozone is a better appetite. Everything you eat is digested and properly assimilated. The natural outcome of this is the formation of pure blood, the fundamental basis of health. When the body is given a new supply of blood the circulation is quickened. This gives the weak nerves something to feed upon. They quickly lose their sensitiveness, and your old irritable companions become a help instead of a drawback. Pretty soon you begin to feel the vim and buoyancy that Ferrozone always brings. Your strength increases, you can work longer, toil harder, sleep better than ever before.

If half the pale, nervous people could only realize how beneficial Ferrozone is, there would be a lot more happiness in the world. No remedy applies so directly to the peculiar ills from which women suffer. It is a specific for anaemia and brings a ruddy glow of health to pale cheeks in a remarkably short time. In all diseases arising from impairment of blood or nerve tone, in cases where a tonic is needed to stimulate appetite and digestion, nothing is more helpful than Ferrozone. It replaces tiredness and lack of energy by a reserve of force, and maintains such a healthy condition of the system that sickness is impossible.

Every person, man, woman, or child who wants more strength, more flesh, stronger nerves, purer blood, should use Ferrozone. Price 50c. a box, or six boxes for $2.50, at druggists or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

THE STURGEON FALLS CASE

The Province of Ontario seems to have adopted for its motto that beautiful saying of our friend Mr. Tarte, "Business is Business." The reason underlying both the motto and the general conduct of our people is a lack of idealism. We have become so practical that the successful man has become, to us, the man who wins. This may suit us, but it will not suit other people, and it won't suit us for very long. It will last till the bottom falls out of it, and it would appear to have fallen out at last in this case.

THE MARINER'S GUIDE

The Most Valued Possession of the Sea Captain.

The Making of Chronometers a Refined Art That is Followed by But Few—Expensive Instruments.

New York, as the leading seaport of the country, is the center of an important industry on which depends in a large measure the safety of thousands of ocean travelers, says the Philadelphia Ledger. This is the manufacturing, and particularly the rating, of marine chronometers. Nearly every shipmaster, upon entering New York after an ocean voyage, obtains from the customhouse a permit to land his chronometer, so that it may be rated according to standard time. This rating may be likened to the daily comparison which the man with the fine watch makes with his jeweler's timepiece.

In the case of a chronometer the adjuster keeps a careful record of its variation, and this record goes with the clock when it is returned to the ship. The importance to a captain of knowing whether his chronometer is running fast or slow cannot be overestimated, for, although it may vary only five seconds a month, each second makes a difference of four miles in a ship's course, and a mistake of such a short distance, if not corrected, might result in a wreck and the loss of many lives. Knowing the exact variation of his chronometer, the captain is, therefore, able to make the necessary allowance for it when he ascertains the latitude and longitude of the vessel after taking his sight, or, in other words, after determining the angular position of the sun through the use of the sextant.

Many of the large ocean liners carry three chronometers, the ordinary vessel one and the deep-water ships sometimes two or three, but the life of an ocean timepiece, if well taken care of, is 100 years and more, and accordingly the maker has to meet no great demand. As a matter of fact, a chronometer really goes out of service only when it sinks with a vessel. A shipmaster, when about to abandon his command at sea, invariably thinks of four things that should be saved—his logbook, sextant, compass and chronometer. With these and a fair supply of provisions he feels a certain sense of security when he risks his life in an open boat. A derelict with a chronometer on board is indeed a rarity. And when one reads of a captain who has been unable to save his chronometer the story is indubitable proof that the summons to leave the vessel was so urgent as not to admit a moment's delay. Leave the ship's cat if you will, but save the chronometer. might well be taken as much discussion and much variety practice. "Panamese" was used by some. "Panamista" by others, and again [illegible] man.an" was employed Offi[illegible] ject [illegible] solu[illegible] thing [illegible]curred whenever there is occasion for making a new word, but not always does authoritative judgment finally fix so surely upon the right form as it has done in the present case.

For there can be no doubt that "Panaman" and Panamans" are the best of all the words proposed. It is a common reproach of the English language that rules of analogy do not uniformly prevail in it, in spelling, in pronunciation or in etymology. No, though they do prevail more widely than some critics seem to think. But, however, that may be, if analogy is desirable and lack of it deplorable, surely we should observe it in our formation of new words. Now, analogy unmistakably indicates "Panaman" and "Panamans" as the proper forms for adoption in this case. The well-nigh universal practice in America in forming proper adjectives and names of peoples from the names of their countries is to do so by adding to the latter either "n" and "ns" or "an" and "ans" or in a few cases, for sake of euphony, "ian" and "ians." The formation of American and Americans from America sets the example. So we have Mexicans, Cubans, Dominicans, Haytians, Jamaicans, Guatemalans, Nicaraguans, Costa Ricans, Colombians, Venezuelans, Brazilians, and so on down to Patagonians. The apparent exceptions—Canadians, Salvadoreans and Peruvians—are really nothing but slight euphonic modifications of the same rule by analogy with practically universal American usage; therefore, we must say "Panaman" and "Panamans."

THE OREGON MINING AND SMELTING COMPANY

Offer to Canadian investors a limited amount of stock of the above company The property owned by the Company consists at the present time of about 500 acres, which are located in the Tarryall District and Park County, Colorado. This whole district has been known for years on account of its rich placer ground, and is now prominently before the public owing to the number of very good properties which have been opened up recently producing, principally, gold, and lately some that are producing Platinum. On the Oregon property there are a number of well known veins of low grade ore that will yield a profit by being treated on the ground of the company. The company have recently opened up a fine vein in the Hawkeye group and this vein shows not only good values but an immense amount of ore which alone would make the property very valuable. Assays from ore taken from various parts of this property range from a few dollars to $373 per ton in gold. We have very little silver, lead or copper in the district. The company have a shaft 240 feet deep, with a good shaft house thoroughly well equipped with all modern machinery to develop same. They are now driving a tunnel which is in about 700 feet and which will cut the Hawkeye vein about 300 feet deeper than where it is opened at present. There is enough ore exposed on the property of this company to keep them busy for a number of years and the reason for selling stock at the present time is to secure funds to build a mill. The company will probably join with the Almaden Company in building this mill. There is water enough to furnish water power and over 100 acres of fine spruce and pine timber. The affairs of the company have always been managed in a business-like economical manner and there are no officers' salaries. The monies received from the sale of stock go direct into the property.

I can heartily recommend this stock as safe, as well as an unusually good investment, because of the immense amount of ore which the company have already opened up. It is not a mere prospect, but the property has been developed by expense of a considerable amount of money and time.

The company is splendidly officered by men of integrity and high standing. The company has not pushed the sale of stock the last year owing to a delay in getting title to the ground from the Government, but now that has been satisfactorily adjusted and work will be pushed to a finish.

The number of exceedingly rich strikes which have been made during the last few weeks in the various camps in the State of Colorado is the best evidence of the prosperity of the mining business. Almost every camp in the state has opened up rich bodies of ore, and Park County is well in the lead in that line.

There are only $25,000 of stock for sale, at $1.00 per share. The company is capitalized at $200,000, and the advantage to the investor of selling the stock at par, is that every share is fully paid up and non-assessable.

For further particulars apply to ROLAND KIDD, Fiscal Agent, Toronto and Peterborough, or to

Drs. Kennedy & Kergan, 148 Shelby Street, Detroit, Mich.

TO CANADIAN INVESTORS

I desire to call the attention of investors to the

Smuggler Gold Mining Co.'s Proposition

of which I am the authorized agent

Investments in mining stocks where they can be purchased cheaply whose property contains merit and whose directors are men of unquestionable honor and integrity, and especially when sufficient work has been done to guarantee a producing mine and the leads have been demonstrated to be permanent, offer the greatest opportunity for large returns from modern investments.

The shrewdest capitalists of England and America are giving more attention to mining properties and putting more money into them than at any time in the past history of the world.

The Smuggler Group consists of five full sized claims, to-wit:—The Smuggler, Gangon, Black Jack, Star and Bed Rock, located in the Greenhorn District of Eastern Oregon. Surrounding mines are Potosi, Pride of Pendleton, Bonanza and Rockafeller, developing work to the extent of 1,000 feet of tunnelling, drifts and crosscuts have been made, exposing hundreds of tons of high grade ore, averaging from $25 to $45 per ton, based on smelter returns, and for the purpose of equipping the mines a limited number of shares of Treasury Stock will be sold at 25 cents per share, the par value of which is $1.00.

For further information apply to ROLAND KIDD, Peterborough and Toronto, or to

ELI ROWLES, Fiscal Agent,
408-409 The Hayden, Columbus, Ohio.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-31-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.
The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, *Fiscal Agent*, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

where investors are invited to call and inspect samples of ore taken from the mines of the Company There never was a better investment offered the people of Peterborough.

ROBERT HARRISON
Manager.

MUCH VACANT LAND YET.

Dangers of an Overcrowded Population Are Still Remote.

The material development of the country is quietly progressing at a remarkable rate in one direction which is not given much popular attention. More than 22,824,299 acres of the public lands were turned over to private individuals last year. This means that an area almost equal to that of the state of Indiana has within that time been added to the productive regions of the United States. Most of these newly opened lands were homesteaded by farmers, as will be seen from the following figures: There were 54,365 patents of all classes issued within the year. Of this number 47,654 are classed as agricultural, 4,904 as Indian allotments, 1,104 as mineral patents, 200 as coal patents, 276 as private land claims, 187 as railroad patents and 40 as swamp land patents. The total sum which the government got by way of fees and commissions for issuing these patents was $11,024,744. Under a recent law the most of the receipts from the sale of public lands will henceforth be set aside for reclaiming arid lands by irrigation.

In the public domain there are still unappropriated 380,979,307 acres of surveyed lands and 591,976,169 acres of unsurveyed lands, or a total of more than 970,955,000 acres. A great many tracts in this immense area of course will always remain uncultivated and unsettled, but it has been estimated that when the contemplated system of irrigation shall be put into working order so much good land will be opened that a population as large as the whole nation's present population could find room there to thrive prosperously and contentedly.

Rapid strides are now being made in the developing of the public domain. The excitement and uproar of former pioneer days are absent in this work, but the process is marked and very effective. The passenger traffic on western railroads is evidence of this fact. Agreeable reflections arise in contemplating that the United States still owns so much arable public land. The dangers of an overcrowded population by immigration or natural increase are still remote. The census for many years to come will not show an excess of people above what the west will need in settling up its vacant lands.—Kansas City Journal.

Oats a Safe Hen Food.

It is strange what fool theories men of good common sense will allow themselves to believe. Listen to this, which comes from one of our veterinary writers: "Oats in the hull will so injure and inflame the lining of the crop of the fowl as to cause death." As a theory, this is bad enough, but when we are told by some poultry editor that we must give up feeding oats because the practice is dangerous, then is becomes ridiculous. As a matter of fact, the hull of the oat is not of an inflammatory nature, and contains nothing that can possibly lead to an inflamed condition. Oats fed whole are not even irritating, as the hull is neither stiff nor sharp, and when moistened in the crop of the fowl becomes soft and pliable.

I have fed oats to hens and to growing chicks for years, and have never had one die from this cause. On the contrary, I believe oats to be not only a stimulating and energy-making food, but a very wholesome one as well. From my experience, which is by no means limited, I have come to believe that oats are one of the best egg-making foods we have; that they are productive of growth when fed to chicks, and that they go a great way toward keeping up the energy and health of the flock. The hull of the oat may not contain much nourishment, but it has some food value and is harmless.

Hens need some bulk to their food, and the oat hulls will keep the food from becoming too compact in the crop and digestive organs. There is no need to resort to the expense of feeding hulled or ground oats, as whole oats are better and cheaper.

My flock of laying hens has eaten an average of one-half bushel each during the year—I have sometimes fed more—and the results have been satisfactory. Not a case of crop disease of any kind. —F. C. Dow, Belfast, Me., in N. Y. Tribune.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 500 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at [illegible]

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

ONE OF THE BEST INVESTMENTS EVER OFFERED TO THE PUBLIC OF CANADA.

The Peterborough Brokerage Company will direct and through their agents offer a limited amount of stock of

Consumers' Coal Company
Limited.

Incorporated under the laws of South Dakota, with a capital stock of $250,000 with shares at $1 each.

The officers of the Company are C. F. Bumann, President and Treasurer; George W. Butler Secretary, and C. Burrows, home officer in South Dakota as required by law. Of the $250,000 capitalization, in shares of $1 each, $210,000 worth is issued, the first small allotment of this was sold at 50c per share the second small allotment at 75c per share and the balance has all been sold at par, $1.

The Consumers' Coal Company controls and owns, clear of incumbrance, a coal mine in Chenoa, Illinois which is a first-class coal mine on the Toledo, Peoria & Warsaw and the Chicago & Alton R. R. The former line crosses five different railroads running parallel to Chicago. The Mine is on a *paying basis and the output is increasing from day to day*. We have 321 acres under laid with three distinct veins, or layers of coal which are 4½ feet thick each. The first one at a depth of 267 feet, it is this vein which we are now mining, the second one has a depth of 380 feet and the third at 461 feet. Our main shaft runs down through all three of these veins and a hundred feet below the third, which serves as a sump, makes our shaft a total depth 561 feet. The mine is fully equipped and in good repair and working order. Our machinery engines and everything else is in duplicate so in case of a breakdown we can switch and operate without any loss of time. We have our own blacksmith shop and car shop in which we build our own cars. Our output is now hanging in the neighborhood of 100 tons per day, but I have the promise of the superintendent to increase the output to not less than 250 tons per day within two or three weeks, knowing his arrangements, I know this to be possible.

Although it should not cost more than 60c at the highest to mine coal in Illinois, yet it costs us a trifle over a dollar owing to the extensive improvements we have made in and at the mine, but as we increase the output the cost per ton of mining will decrease as our fixed expense will be no more in mining several hundred tons per day than they are at the present time in mining one hundred tons. Up to the present time we have sold most of our output at the mouth of the *shaft to the surrounding farmers* and towns people and, therefore, we have no freight or cartage to pay. We receive from $2 75 to $3 50 for Mine Run and $3 75 for Lump. In that way we have made quite a handsome profit and we estimate that our average, or net earnings at the Mine, up to the present time is about $100 per day and we hope to soon increase this as we increase the output.

We have three yards in Chicago in which we are handling 16 different kinds of coal and we have a very substantial business and have made considerable profit each month out of which we have paid over 20 per cent in dividends last year and accumulated a surplus fund equal to the amount paid in dividends.

The reason we are selling stock at the present time is that our business has grown so extensively that it takes more money to handle the same, besides this, we are buying teams with which to handle our coal in Chicago, which will cost us about $600 each. we predict that this stock will be worth not less than $3 per share before another year is over as by that time our Mine will be producing not less than four or five hundred tons per day. We will appreciate your subscription to any amount you see fit to invest and if possible to interest some of your friends, kindly do so. I remain,

Yours very truly,

THE CONSUMERS' COAL COMPANY,
C. F. Bumann, President.

A Wedding Au Naturel

There was a wedding yesterday in Graceless Church.

Lord Baldknob of Kiltshire, England, married Miss Sallie Panhandle of East Pittsburg.

The bridal party, including the attorneys for both sides, formed in the alcove promptly at 11.30.

At 11.45 the real estate in the bride's name was transferred to his lordship.

At 11.50 a million dollars in legal tender changed hands.

At high noon all the railroad first mortgage bonds known to be in the bride's possession were handed over.

A vote of thanks was then passed to his lordship for leaving the bride's father enough to live on comfortably until the next rise in Wall street, which is predicted for next spring.

At 12.15 two bishops, four clergymen two real estate lawyers and a barrister representing the plaintiff, pronounced the benediction.

The groom will pass the next three weeks with his bride at his estates in England, after the roof has been repaired.

After this, it is understood, they will separate and enter society.--"Life."

ANNOUNCEMENT

Are you aware of the fact that the Government received over $302,000,000 worth of gold, produced in the year 1902?

Are you aware of the fact that the greater number of millionaires have received their wealth through mining, rather than from any other investment?

Are you aware of the fact that $75,000 in gold, known to be produced in addition to the Three Hundred and Two Millions, is all outstanding?

Are you still doubting (?) the millionaires who have made their fortunes through mining, and who are to-day the largest investors in the gold producing enterprises, which is the foundation of the commerce of the world?

Are you doubting our gold standard which this government has adopted, because the gold mining of this country is its greatest production?

Are you aware of the fact that the small investor as well as the large, is deriving his just income from the amount of gold produced yearly? Are you one of them? If not, we want you to read our offer, which is sure to give the investor an income for life.

No Assessments, No Stock Manipulations, No Syndicate Methods

If you have faith in Mexican Gold Mining, do not overlook the opportunity offered herein, which is bound to give large returns to every investor.

An Income For Life.

How some people secure those two very desirable provisions an income for life and a comfortable old age, by shrewd investments. More money has been made from gold mining than from any other produce that mother earth produces. An investment at the present time and the present price of stock to make you a fortune.

Estimated Income.

Stock of this corporation should earn 100 per cent. yearly. Stocks should pay at least 50 per cent. yearly.

Come and Let Us Remove Your Doubts.

Let us tell you the number of companies only in operation for the last two years which have paid as high as $440 in dividends on every share, a total to the stockholder holding one hundred shares of $44,000 in seventeen months. Stop and figure what the dividends amount to to the one holding a thousand shares. The above was paid by the "Dos Estrellas" Gold Mining Company, located in the same camp where we are now in operation.

Be Fair With Yourself,

And investigate the offer made by this corporation. If you make an investment and you find that you have made a mistake within thirty days, your money will be returned to you with 6 per cent. interest. We know positively when you become a stockholder in this corporation, after having investigated the property operations, you will not only retain your holdings, but you will secure more stock. The stock of this corporation is absolutely guaranteed by the reserve of 2700 acres of property in addition to the claim known as the La Alexandria, for which thousands of dollars have been refused as this corporation holds the property in reserve, as an absolute guarantee to the investor. The following are the claims held in reserve:—

1 La Paloma 2 La Mexicana 3 El Vivian
4 El Davidor 5 Porfirio Diaz 6 La Bonanza

located in the famous mining camp known as Tlalpujahua, Mexico. All of the above properties are held by this corporation until this company becomes a dividend payer. With properties like the ones mentioned failure is out of the question. This is the camp where 70 companies have began operations within the last ten months and seventeen of them are to-day dividend paying companies, paying thousands of dollars in monthly dividends to their large and small stockholders. Our operations will soon result in dividends which are bound to come, as the assays of our property run as high as $320 to the ton, a sample of which will be forwarded to any prospective stock buyer.

Stock Soon to Advance to 50 Cents a Share.

Until then subscriptions will be accepted at the following prices, received in routine order; first come, first served, as this company reserves the right to withdraw the price from the market without notice.

Our Partial Payment Plan.

100 shares at 25 cents per share.................. $ 25 00
$5.00 down and $2 00 per month until paid.
200 shares at 25 cents per share.................. 50 00
$10 00 down and $5 00 per month until paid.
500 shares at 25 cents per share.................. 125 00
$15.00 down and $10.00 per month until paid.
1000 shares at 22 cents per share.................. 220 00
$25 00 down and $15 00 per month until paid.
2000 shares at 20 cents per share.................. 400 00
$25.00 down and $25.00 per month until paid.
5000 shares at 19 cents per share.................. 950 00
$75.00 down and $50 00 per month until paid.

A Dollar Invested is Sure to Make You 10 Times the Amount in a Year's Time.

In this Company, at the present prices, this is no prospect, as we are actually in progress and adjoining the most famous mines in operation, whose stock has advanced to thousands of dollars per share within the last few years

Mexico is Becoming the Gold Producing Country of the World

Rich strikes are being made almost everywhere in our Camp. Men rich and poor buy stock which you will so much appreciate within a few months. The management of this corporation is entirely in the hands of the Directors, whose reputation can only be an open book to you. We also issue a monthly statement of every transaction so that every stockholder knows the management of the corporation equally as well as any one in the active management. Do not let this opportunity get away from you. You are actually getting a $1.00 worth in real value at the prices above quoted.

Act Quickly and Get the Benefit of the Present Allotment Which is Practically the Ground Floor For an Investment in This Company

We are only offering 250,000 shares on the market. This is all this corporation will sell. We are only incorporated for 500,000 shares and that alone will speak for itself, and shows that we are not a corporation merely for the sale of stock but well managed and with the most conservative amount of stock to be placed.

Remember an investment in this Company is absolutely guaranteed by the reserve of properties representing in full over $1,000,000, located in the most famous mining camp in the Republic, called Tlalpujahua, Mexico, where this Company controls their property. WE SOLICIT YOUR INVESTIGATION. Prospects, copies of assays and price lists will be forwarded upon request. Reference from the most reliable Banks of Mexico.

A limited amount of stock has been laid aside to be offered to the public at the present price, of which you can avail yourself, if investigated at once. This company further agrees to find a purchaser for stock held by any stockholder at $1.00 per share within a year's time.

La Alexandria Gold Mining & Smelting Co.
79 Wisconsin Street, Milwaukee, Wisconsin

PROSPECTUS
OF THE
U.S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
Capitalization 200,000 Shares
Par Value, $1.00

Officers:
J. R. CHAPTON, - - - - - - - President
E. P. CHAPTON, - - - - - - Vice-President
A. J. SANBORN, - - - - - - - Secretary
ALEX. J. CHAPTON, - - - - - - Treasurer

Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME, A. J. SANBORN, ALEX. J. CHAPTON
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

U. S. Gold Mining & Milling Co
110-111 HENNE BUILDING - LOS ANGELES, CALIFORNIA

HIGH CLASS INVESTMENT
LA ZACUALPA RUBBER PLANTATION COMPANY
Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain for others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

The Elwood Tinworker's Gold Mining Company.
ORGANIZED JULY 1902
CAPITAL TOCK $150,000
PAR VALUE OF SHARES $1.00

The mining claims of this company consist of two full claims namely
THE WESTERN STAR AND ST. KITT
situated five miles from Lardeau, B. C., each claim comprising 52½ acres—105 acres These mines are situated in a very rich mining district—acknowledged to be richer than any other property of similar area in the world, and certainly offers big inducements to the investor.

The Directors of the company feel confident of the success of the mines and are assured that this corporation offers one of the best securities, at the market price, ever offered, having placed a large amount of their own money in the property.

The company is carefully and capably managed by men of experience who have accomplished much in the working of these properties.

If you have money to invest place it with the

Stocks—The MARKETS OF THE WORLD—Grain

A Profitable Investment

MIDWAY CONSOLIDATED GOLD MINING COMPANY

There are millions of dollars in Canada seeking investment, and we therefore have much pleasure in announcing that we have made arrangements with the above company to sell a block of their stock in Canada. The company is officered by men of high integrity and business ability.

What the Company Owns

The Company owns 24 claims of 20 acres each, all in the name of the Midway Consolidated Gold Mining Co. These claims are situated about 7 miles northwest from Sumpter, Baker county, Oregon. The entire property is free from encumbrances.

The Plant

We now have installed and in operation a hoisting plant that will do the work 1800 feet deep. We have a 125 h p. Scotch Marine boiler that furnishes us ample power. A saw mill with a capacity of about 20,000 feet of lumber per day. A dynamo, bunk and boarding houses with roads cut wherever necessary. We have enough ground cleared of timber to protect the plant against forest fires. Our machinery is well housed, the buildings being erected from lumber and timber cut from our own ground by our own mill. The buildings and machinery are insured for $10,000 against fire. Our entire plant is modern and strictly up to date. So far as we are equipped, we have the best plant and buildings on the Mother Lode.

Work Done

We have done about 1800 feet of exploratory and assessment work on the claims about equally divided between shafts and tunnels; this is outside of our main shaft. Our main shaft is down about 180 feet. This is a double compartment shaft, built in the most substantial manner and intended for a permanent working shaft. It requires 1500 feet of timbering for every 10 feet of shaft. At the 160 feet level is have cut a station 10x12 feet and from this point we have run a cross-cut to the vein, 63 feet. Here we have 25 feet of ore lying in lenses of various values, but we whole averaging fully $8 per ton. In view of the fact that the entire expense of the mining and milling will not exceed $2.50 per ton, it can readily be seen that this of remarkable and excellent showing.

We feel that it would be well right here to set all stockholders straight regarding the vein. On the 60-foot level it was reported that the vein was 79 feet wide. We find now, after crosscutting on the lower level, that 79 feet was not the correct width of the vein. At one time the vein stood out of the ground and in this position tipped down the mountain, making a large body of mineralized matter. It was in going through this entire mass that we cross cut 79 feet. The vein proper, on the first level, we now find was less than 20 feet wide. In going down this 100 feet the vein has widened materially, the values have greatly improved and the walls so stand now that the vein is widening as it goes down. We now have two well defined walls. A vein 25 feet wide is in itself something remarkable, but when at a depth of only 160 feet we find it entirely filled with ore of a good commercial value, the showing is unusual and most gratifying. Our stockholders will find upon investigating, that most of the great dividend payers have veins only a few feet wide and values rarely exceeding $5 per ton.

We are now sinking again. Hereafter the levels will be 100 feet apart. As soon as the next level is reached we will again cross-cut to the vein where we purpose doing a considerable amount of work.

Arrangements have been made to have the work at the Midway in the future, directed by a competent mining engineer, under the supervision of Mr. Hendryx.

It might be interesting to the stockholders to state that the cost of sinking this shaft, including labor, timber and necessary expenses, is about $40 per lineal foot. In many mines such work far exceeds this figure.

With our saw mill we have cut 238,230 feet of lumber and timber which will be sufficient supply until we are ready to build a mill. We have sufficient wood on hand to run us until July.

Our Timber

We have timber growing on our ground to furnish us lumber, timber and fuel for many years.

Our Titles

In the past year we have had all of our claims resurveyed and relocated, in this way fixing our boundaries exactly so that no disputes can arise. Our ground is contiguous. Plats have been made and we are ready to apply for patent from the United States whenever we feel prepared to invest the money.

Money Expended

Up to date about 275,000 shares of the treasury stock have been sold. Out of collections on these sales approximately $45,000 has been received and invested in the Midway proposition. Of this sum about $15,000 was invested in the machinery above mentioned and all of the remainder has gone into the properties. None of this has gone into any salaries to officers as we pay no salary to any officer of the company. The report is too long and too cumbersome to be here recited in detail.

We would necessarily be obliged to recapitulate and the recapitulation would show the amounts as here given. The books and accounts are correctly kept and a voucher is taken and filed for every item of expense. An inspection of the work done and improvements made would satisfy anyone that we have a hundred cents of full value to show for every dollar expended.

Estimated Requirements

After consultation with the manager it is estimated that $30,000 to $35,000 additional will put the property on a producing and self-sustaining basis. We desire to instal a 10-stamp mill as early as possible. Our manager assures us that such a plant, with the necessary equipment will place the proposition in a position not only maintain itself, but will carry the work through to a satisfactory dividend paying basis.

Equipment

Under this head we have installed one first class sinking plant of eighteen hundred foot capacity; one saw mill, with a capacity of twenty thousand feet per day; one electric lighting plant with 120 16-candle power lights capacity.

We have erected all the necessary bunk and boarding houses and are in a position to continue with the present equipment until after the property is on a paying basis.

We cut 238,231 feet of lumber and 390 cords of wood which will run us up until July, and lumber and timbers enough for the mine until we are ready to build a stamp mill or other incidentals in the way of tools for equipment, etc., and are accounted for as itemized in the statement.

Shares 40c. Each, par value One Dollar

The Monarch Consolidated Gold & Copper Mining and Smelting Company

of BOULDER, COLORADO

Solicits the co-operation of reputable men in providing means for the thorough and rapid development of two large gold and copper mining estates, which are second to none in intrinsic value, and to that end extends every opportunity for determination as to whether statements made by the company are true or false.

The proposition when developed will pay no less than 50 per cent. per annum on the investment, and it behooves anyone who wishes to better his financial condition, to give immediate attention to this.

Full particulars in every detail will be given to all to whom such a proposition may appeal, but please do not ask for them unless you really are interested, because you waste your own time and ours also.

Capital $1,000,000, 500,000 Shares in Treasury

Property includes two great mining estates—one gold, the other copper—both containing wide, deep, proven veins of high and low grade ore.

Development work has been systematically carried on, with results that more than satisfy every claim made by the company, and unquestionably proves the destiny of a property to equal that of the greatest successful mining companies of the world.

Above Statement Can be Easily Verified

The following two facts alone will give anyone familiar with mining a rough idea of the great value of the property.

The Copper King Group contains one vein 30 feet wide, 8 feet of which runs from $10 to $180 per ton, and the Company owns 9,000 feet on this vein.

Ore running from $18 to $80 per ton is continually being shipped from the gold property, and 24 samples taken from widely different portions of the vein system averaged $28.35 per ton.

FACILITIES—The Company owns 1,729 acres of placer and timber land. water power of 80 (minimum) horse power. No expensive shaft work necessary. Ore easily reached on Company's property, thus saving freight and smelter charges.

DIVIDENDS—To begin earning and paying large dividends it is only necessary to [illegible] property. To obtain funds for this purpose a limited amount of stock is offered at

75 Cents Per Share, Par Value $1.00

INVESTORS are afforded every opportunity for the strictest investigation regarding the property and the reputation of the officers and directors. Highest banking references.

Send for prospectus, read it through and then ask for any additional information you want which will be cheerfully given. Address the Peterborough Brokerage Company, or T. S. WALTEMEYER, Secretary-Treasurer, Boulder, Colo.

Advertising in the Times is sure to bring good results. Try it and be convinced

PEOPLE OF PANAMA.

Official Pronouncement Fixes the Name by Which They Shall Be Known.

"Panama" and "Panamans," then, it is to be; to which we cordially add, so let it be, says the New York Tribune. Ever since the establishment of the independent isthmian republic there has been some uncertainty as to what its people were to be called, together with

an ocean maxim.

Though carefully nursed, the chronometer meets with many adventures. It may go through fire, shipwreck and other perils of the sea, but rarely does the regular, distinct ticking ever stop forever. If a captain dies or his vessel is condemned it finds another owner or another berth and this it shifts about from ship to ship, changing hands continually and traveling at odd times all the seven seas.

The manufacturing of marine chronometers in this country is confined to four firms, three of which are located in New York, and probably the whole output for a year amounts to 250 or even fewer. As with other articles, the price of chronometers varies according to quality and workmanship. The cheapest cost about $200 each, while the United States government, which naturally buys the best, pays sometimes as much as $375.

The movements of chronometers are usually imported "blank" from England—that is, only the plates and wheels are brought over. The manufacturer here provides the balance, springs, pivots, jewels and other parts needed to complete the whole, together with the brass-bound box in which the clock is placed. Being set in gimbals within the box, the chronometer will remain in a horizontal position when the vessel rolls or pitches, and by this means the poise of the balance is not disturbed.

It takes about three months to manufacture a chronometer and another three months to adjust it, though makers declare that the timepiece should not be sent to sea for two years after completion, as the delicate mechanism must be tested in various ways to obtain a perfect regulation. This adjustment, as the regulation is called, is something that requires the utmost skill and really is the most important feature of the maker's art. Sudden changes of temperature, humidity and electric currents will affect the speed, balance and hairspring, and therefore all the running parts must be so compensated and regulated that whatever contingency may arise there will still be the steadiness which allows no capricious variations. Old-fashioned chronometers were built to run eight days without winding, but these have been superseded by the 56-hour timepiece. Fifty years ago the chronometer was brought to its present state of perfection, and since that time, despite modern ingenuity, makers have found no reason to make any alteration in the principal parts of its mechanism.

ONE GOOD INVESTMENT IS BETTER THAN A LONG LIFE OF LABOR.

THE PYRAMID GOLD & COPPER MINING CO'Y

Incorporated under the laws of Arizona, and operating extensively in the Copper Basin District, Yavapai County, Arizona, owns twelve (12) claims 600 x 1500 feet each; nearly 200 acres. This makes one of the largest gold and copper mining properties in the Southwest. The property is all paid for, title perfect, and the company has no debts.

A large amount of development work has been done entirely at the expense of the officers and directors of the company, which proves that the Pyramid property contains an almost inexhaustible quantity of very rich ore. The last eight assays made from ore taken from the various shafts average $31.52 per ton. One shaft is in Sulphide of Copper the entire width which experts believe will assay from $75.00 to $100.00 per ton. There is an immense quantity of this sulphide ore.

This property is four and one-half miles from Kirkland, a station on the Sante Fe, Phoenix and Prescott Railroad and thirty-five miles from the Val Verde Smelter. A stamp and concentrating mill, with a capacity of 100 tons of ore per day, is now being erected on this property. The management expects to have this mill completed and running by May 15th, 1904. As mining properties are operated 360 days in a year, you can readily see that the earnings of one 100 ton mill will enable the company to pay good substantial dividends.

It is the intention of the Company to continue increasing their present plant until they have a capacity of 600 tons or more per day, and then build their own smelter.

The Capital Stock of the Pyramid Gold & Copper Mining Company is $1,200,000. Par value of shares $1.00 each. 600,000 shares in the treasury, the proceeds from the sale of Treasury Stock will be used in building various stamp and concentrating mills on the property, equip the mines, etc. No salaries will be paid to officers of the company until the property is on a dividend paying basis. Every dollar received from the sale of stock is expended in a judicious manner for equipment and further development of the property.

Only a limited number of shares will be sold at 50 cents. When sufficient funds have been obtained to pay for the mill, now in the course of construction, and the equipment of the mines, the stock will be advanced to $1.00 per share.

The Pyramid property is about 25 miles from Senator W. A. Clark's rich United Verde Mines that pay about $18,000,000 profit annually. We don't claim to have a better property than the United Verde, for to be as good is good enough, and according to the excellent showing made on this property we cannot help but believe that the Pyramid property will prove, as development progresses, to be one of the best in Arizona.

The stock of the Pyramid Gold & Copper Mining Company is recommended as an investment.

FIRST—Because copper has proved itself to be the best of all investments. Bacon Street, Boston, and a large part Fifth Avenue, New York, are lined with palaces built with copper dividends.

SECOND—Because Yavapa County, Arizona—the home of the United Verde—is the richest copper producing county in the world. Already over $130,000,000 have been paid in dividends from mines in this county.

THIRD—Because the Pyramid Company has one of the largest and richest properties in Yavapai County, Arizona.

FOURTH—Because many thousand dollars in cold cash has been spent on the development and equipment of the property so that it is close to the producing, self-sustaining and dividend-paying stage.

FIFTH—Because the company is moderately capitalized, conservately organized and well managed.

SIXTH—Because the stock of the Pyramid Gold & Copper Mining Company is a safe investment. Its property is one of the choicest in Arizona.

SEVENTH—Because the stock at the present price is the cheapest and best investment in the market to-day.

Are you ambitious, and do you want to reach the height of your ambition? If you do you must accumulate money, for money means freedom, comfort and ease.

An investment in the stock of a mining company whose property is developed to such an extent to prove that it contains an almost inexhaustible quantity of rich ore, and the officers and directors of the company are men of good character and standing, who thoroughly understand the mining business, is the safest and most profitable investment in the market to-day. It is much safer, and by far more profitable than Banking. If you desire to make an absolutely safe investment and one that will bring you large returns this is your opportunity. A word to the wise should be sufficient.

It is not a question of how little you can invest, but how much. Take all you can get of it. If you want to get Pyramid Stock at 50 cents per share, send in your order and remittance at once. Make remittances payable to the company.

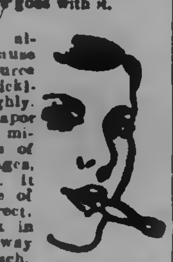
CATARRH

Don't Drug the Stomach — Breathe Nature's Remedy, Catarrhozone — Both Pleasant and Easy to Use. A Guarantee of Cure goes with it.



Catarrhozone always cures because it reaches the source of the disease quickly and thoroughly. Its healing vapor penetrates the minutest air cells of the nasal passages, throat and lungs. It attacks the cause of the disease direct, and doesn't work in a round about way through the stomach.

The antiseptics in Catarrhozone kill the germs that cause catarrh. It clears the nostrils, cures headache and foul breath. It prevents droppings in the throat, allays inflammation, heals sore spots and running at the nose.

So certain is Catarrhozone to remove and cure that doctors, ministers and public speakers keep it as their standby for coughs, colds, catarrh and throat trouble. Because it lasts so long it is cheap, and as it is sure to cure even the poorest can afford to buy it.

Mrs. J. A. Morris, of Perth, Ont., writes, "I cannot withhold my testimony for Catarrhozone. It cured my daughter of chronic catarrh and I therefore heartily recommend it to all sufferers. No house should be without Catarrhozone."

Why not use Catarrhozone? It cures colds in a few hours, and no case of catarrh can withstand it. Catarrhozone cures by the inhalation of medicated air which goes to all parts of the lungs, throat and breathing organs. A pleasant, certain, quick cure follows the use of Catarrhozone, which is guaranteed under all conditions to cure catarrh in any part of the system.

Two months' treatment, hard rubber inhaler and extra liquid costs only one dollar; sample size 25c. Sold by all druggists or by mail from N. C. Polson & Co., Kingston, Ont., or Hartford, Conn., U.S.A. Order Catarrhozone now.

Ministerial Associations

The regular monthly meeting of the Ministerial Association will be held in the Y.M.C.A. parlor on Monday morning at 10 o'clock. In addition to the regular routine of business a paper will be read by Rev. A. H. Brace, of Park street Baptist church.

Received Bad Scalp Wound

Mr. Zimeri Blodgett sustained a severe scalp wound by a fall from his waggon the other day. He was hauling gravel to the new building of the Matthew's Company on George street, when the wheel struck a stone and he was thrown off the load. He was removed to Nicholls Hospital, but a late report states that he is doing as well as could be expected.

Life in the Far West

Rev. Dr. John McDougall, the noted missionary to the North-West Indians, delivered an able lecture at the George street church last evening, when a large audience listened with the greatest interest to his excellent description of life in the far west. Dr. McDougall told the interesting story of his life and relates some of the strange experiences through which he has passed. The doctor is very fond of western life, and takes the greatest pleasure in describing it.

—There was no police court again yesterday morning.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre in Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course.

WM. PRINGLE
Principal.

Y.M.C.A

A large gathering of boys attended the last of the series of lectures at the Y.M.C.A. last evening. The subject was "A Boy's Inheritance," and was conducted by Mr. Aptin, the physical instructor. This series of meetings has been well attended, and great interest has been manifested by the boys, who have been much benefited by the good advice contained in the able speeches.

St. Paul's Church

At St. Paul's church Rev. J. A. Wilson will conduct the morning service to-morrow and Rev. Dr. Torrance in the evening. Services in St. Paul's Mission will be resumed to-morrow, Rev. Dr. Torrance preaching at the morning service and Rev. J. A. Wilson in the evening. Sabbath school and Bible Class will meet in the afternoon at 3 o'clock. The regular weekly prayer meeting will be held on Wednesday evening next at 8 o'clock.

New Library Books

The following new books have been added to the Public Library —

Electricity and Matter	Thomson
Evolution of the Soul	Hudson

The American Prisoner	Philpotts
The Stolen Emperor	Fraser
The Younger Mrs. Courtney	Brooker

Chas. S. Botsford, Proprietor, Bankrupt Stock Store, 408 George St. Peterboro

Will retire from business on 1st of May, and the business will change hands. $1,700.00 worth of goods must be sold in that time, and the prices will induce people to buy.

Mr. Botsford thanks the good citizens of Peterborough and the jolly farmers of surrounding country for their liberal patronage during the last 18 months and now invites you all to his farewell sale of dry goods.

This is your chance.

COUNTY COURT JUDGMENTS

At the County Court yesterday His Honor Judge Weller gave judgment in the following two cases;

Canadian Dairy Supply Co. vs. Moore.—Judgment for plaintiff with costs. F. D. Kerr for defendant, and D. T. Medd for plaintiffs.

McCamus vs. Freeborn.—Judgment for defendant with costs. Edmison for plaintiff and Dennistoun, Peck, Kerr and Stevenson for defendants.

High Class Program

Lovers of high class vocal, musical and histrionic talent should not fail to attend the concert in the Opera House, Monday evening, under the auspices of the Otonabee Lodge Oddfellows. Mr. H. Ruthven Macdonald and Miss Marietta LaDell enjoy continental fame in song and elocution, respectively, while Master Harold Rich, the wonderful boy concert soloist, is a phenomena in the musical world. This combination of entertainers is drawing crowded houses wherever billed.

Streets were Flooded

Owing to the heavy downfall of rain last evening many cellars were flooded, and in some cases considerable damage was done. About eight o'clock the water began to run into the basement of St. John's Sunday school room, and soon about two inches covered the floor. George street was a mass of water about nine o'clock, and the water had risen over the pavements in many places, and was pouring through the gratings into the nearby cellars. The crossings were covered with water three or four inches deep, and a perfect river ran down each side of the street.

BREEZY LOCAL BREVITIES.

By The Times Reporters on Their Daily Rounds

—Cheer up, we're getting nearer lawn mower time every day.

—The small boy is much in evidence these days with his baseball and bat

—A new assistant secretary of the T.A.S. rooms has been appointed in the person of Mr. P. Kane.

Heintzman & Co's piano tuner R. Shaw, is here from Toronto Pianos of all makes attended to by leaving an order at Ormond & Walsh's Drug Store Phone 146.

—Vessel men do not think that navigation will open at Kingston before the 15th inst.

The Sunday services in connection with the Bay of Quinte Methodist Conference will be conducted on June 5 instead of May 29, as has been announced.

—The Gospel Meeting of the Y.W.C.A. on Sunday afternoon will be conducted by the general secretary. The meeting commences at 4.15 o'clock.

—Frederick F. Woodruff, leader of the band of "Holy Rollers," which had located near Campbellford, was allowed to go on suspended sentence on his appearance before Judge Benson, of Cobourg, the other day.

—Navigation on Rice Lake, although it will be later in opening than usual, is showing signs of activity. All boat owners are getting their craft in readiness for the season, which is believed will be the best in the history of that district.

—A word of advice might well be given at this early season regarding broken boards in sidewalks. If every citizen would make a definite report to the city engineer's office, by telephone, postal card or personal visit, as to defective planks, etc., it would be far better than making complaints to the newspapers and expecting the latter to raise a storm.

—Mr. H. Sullivan, who formerly attended school here is among the successful graduates in medicine at Queen's University, Kingston.

ST. JOHN'S GUILD

Joint Social of Girls' and Young Men's Guild a Great Success

A joint social under the auspices of the Girls' Guild and the Young Men's Guild, of St. John's church, was held in the school-room last evening. This was the last social of the season, and was a decided success in every way. A large number of happy young people were present, and the following interesting program was rendered;

Orchestra selection	
Solo	Mr. Sawyers
Orchestra selection	
Violin duet	Misses Wallace and Burnett
Orchestra selection	
Solo	Miss Dawson
Piano solo	Miss Gumpricht

Mr. Arnott also favored the audience with a number of gramophone selections, and games of different kinds added to the enjoyment of the evening. At the conclusion of this interesting program dainty refreshmens were served by the young ladies.

Perhaps the most interesting event of the evening was the presentation by the Young Men's Guild to Mr. Chris. Graham of a handsome Morris chair and address. Mr. Graham made an appropriate reply.

Obituary

There passed away at his residence 16 Parnell street, an old and respected resident of Peterborough in the person of Mr. Jas Thompson. The deceased was in his 67 year and leaves a grownup family. His wife predeceased him by 15 years. The funeral will take place on Monday morning from the family residence and proceed to the English church burying grounds, 4th line Cavan, where interment will take place.

The P. P. Home

The Committee of Management of the P. P. Home gratefully acknowledge the following donations for the month of March:—Mrs. Dr. Burnham, Toronto papers; Mrs. W. Savigny, reading matter; Y. W. C. A., bread and butter; Mrs. A. L. Davis flowers and reading matter; A friend, clothing. Mrs. James Mann, dried apples; Mrs. Wilson reading matter; Miss A. Cameron, reading matter; Mr. G. Mann, bag of apples.

LACROSSE.

The Trent Valley League team is trying to run things as cheap as possible, and no telling if they wait for the seniors to hand over their sticks and suits, but what they will be asking for excursion rates via the Trent Valley Canal. But there now everything comes to those who wait. —Port Hope Guide.

$500 REWARD! FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they can not cure. All they ask is a fair and reasonable trial of their means of cure.

Their financial responsibility is well known to every newspaper publisher and druggist in the United States, with most of whom they have done business for over a third of a century. From this fact it will readily be seen how utterly foolish it would be for them to make the above unprecedented and remarkable offer if they were not basing their offer on curative means having an unparalleled record. No other medicine than Dr. Pierce's Favorite Prescription could possibly "win out," as the saying goes, on such a proposition. But they know whereof they speak. They have the most remarkable record of cures made by this world-famed remedy ever placed to the credit of any preparation especially designed for the cure of woman's peculiar ailments. This wonderful remedy, therefore, stands absolutely alone as the only one possessed of such remarkable curative properties as would warrant its makers in publishing such a marvelous offer as is above made in the utmost good faith.

"I want to tell you of the great improvement in my health since taking your 'Favorite Prescription,'" says Mrs. [illegible] "When I began its use I was a physical wreck [illegible] health again. Could not sit up all day. I noticed a great improvement before the first bottle was used. [illegible] six bottles of 'Favorite Prescription,' I felt like a new person. Can ride horseback and take all kinds of exercise and not feel tired."

If you are led to the purchase of "Favorite Prescription" because of its remarkable cures, do not accept a substitute which has none of these cures to its credit.

If you are looking for a perfect laxative try Dr. Pierce's Pleasant Pellets.

World's Dispensary Medical Association, Proprietors, 663 Main Street, Buffalo, N.Y.

VERY TRYING TO WOMEN

Are the Peculiar Ills Brought on by Catarrh of the Pelvic Organs.

(Pe-ru-na is a Tonic Especially Adapted to Their Peculiar Diseases.)

Miss Alice Dressler
Miss Jessiemone Westland
Miss Mamie Groth
Mrs. Ida L. Gregory
Mrs. Louise Westbrook
Miss Florence Murphy

Catarrh is a very frequent cause of that class of diseases popularly known as female weakness. Catarrh of the pelvic organs produces such a variety of disagreeable and irritating symptoms that many people—in fact, the majority of people—have no idea that they are caused by catarrh.

A great proportion of women have some catarrhal weakness which has been called by the various doctors she has consulted by as many different names. These women have been treated and have taken medicines, with no relief, simply because the remedies are not adapted to catarrh. It is through a mistaken notion as to the real nature of the diseases that these medicines have been recommended to them.

If all the women who are suffering with any form of female weakness would write to Dr. Hartman, Columbus, Ohio, and give him a complete description of their symptoms and the peculiarities of their troubles, he will immediately reply, with complete directions for treatment, free of charge.

"Health and Beauty," a book written especially for women, sent free by Dr. Hartman, Columbus, Ohio.

Miss Alice Dressler, of No. 1813 North Bryant Ave., Minneapolis, Minn., writes as follows concerning Peruna:

"I was suffering from catarrh of the throat and head. One of my college friends, who was visiting me, asked me to try Peruna and I did so and found it all and more than I had expected. It not only cured me of the catarrh, but restored me to perfect health."—Alice Dressler.

Miss Mamie Groth, Platteville, Wis., writes:

"I have for several years suffered with frequent backache and would for several days have splitting headaches. Several of my friends advised me to take Peruna and I asked my physician what he thought of it. He recommended it and so I took it and am entirely without pain of any kind now." —Mamie Groth.

In a recent letter from No. 2 Grant Ave., Denver, Col., Mrs. Ida L. Gregory writes:

"Some six years ago my husband suffered with nervous prostration, and advising with a friendly druggist he brought home a bottle of Peruna. His health was restored from its use, his appetite was increased and restful sleep came to him."—Ida L. Gregory.

Miss Florence Murphy, No. 2703 Second Ave., Seattle, Wash., writes:

"I suffered for over a year with female trouble, and although I tried several physicians none of them seemed to be able to help me permanently.

"It only took a little over three bottles of Peruna to make me well and strong. I never have backache, headache or bearing down pains any more."—Florence Murphy.

Mrs. Louise Westbrook, No. 9 East Columbia St., Detroit, Mich., Secretary of the West Side Lotus Club, writes:

"For several years I suffered with leucorrhoea and painful menstruation, which was followed by general debility, until I was but a wreck of myself. Thanks to Peruna I am a well woman to-day."—Louise Westbrook.

Miss Jessiemone Westland, No. 767 Beaubien Ave., Detroit, Mich., District Deputy of Detroit Independent Order of Good Templars, writes as follows:

"Peruna has been a blessing to me and gladly do I indorse it. For two years I suffered with catarrh of the stomach. I lost flesh and grew thin and emaciated, nervous and exhausted, so that I could neither work or enjoy life. I began taking Peruna and can now eat and enjoy everything I eat. I have been well over a year now."—Miss Jessiemone Westland.

OUR GRADUATES

are in great demand, at salaries of $50 per month and upwards. March 28th and 29th. We received fifteen calls, from Winnipeg 3, Montreal 1, Toronto 11.

Our course of Training and Instruction assures success to those who wish to secure immediate employment as Shorthand Writers, Bookkeepers and Telegraph Operators.
